A. Supporting Comment. Maersk asserts that third-flag carriers provide approximately 77 percent of the sailings in the United States/Philippines trade. Maersk states that restrictions on third-flag participation will severely diminish the available quantity of service necessary to satisfy the trade. Maersk asserts that without the competitive incentive provided by third-flag carriers, there will be deterioration in the quality of service. Maersk notes that third-flag carriers provide both all-water and intermodal service and that shippers will be deprived not only of a choice of carrier but also of service options. Maersk estimates that its revenues from this trade will continue to decline in 1984 and that such losses will result in a retrenchment in Maersk's overall service. Maersk does not present evidence of cutbacks in its own service or of other third-flag carriers.

BBSL states that Philippine laws are antithetical to regular third-flag liner service. BBSL states that the potential impact on service may be particularly severe on the U.S. Atlantic Coast where third-flag carriers have provided the vast majority of sailings. BBSL does not present evidence of actual service cutbacks.

CMA cites the withdrawal of Yang Ming Line from the Philippine trade in the second half of 1983 as an example of actual adverse impact on service. CMA believes that Yang Ming Line withdrew because it concluded that it could no longer effectively compete in the trade as a third-flag carrier. CMA states that Yang Ming Line had provided 36 sailings a year to the Philippines. CMA also believes that East Asiatic Company, and perhaps other lines, have refused to accept bookings to the Philippines due to the difficulty in obtaining waivers CMA also states that many of its members regard Philippine carrier service as inferior because of their infrequent sailings. CMA believes that U.S. shippers will be disadvantaged by inferior service should the cargo reservation system be fully implemented.[3]

B. Opposing Comment. The Philippine carriers state that they offer about 5 percent of the liner sailings in the trade. They maintain that this percentage has not changed under the cargo reservation system. They contend that liberal administration of the waiver system has resulted in minimal, if any, disruptive impact on service. They contend that where Philippine vessels do not call at a port or where sailings are infrequent, waivers are given automatically or for extended periods. They point out that to the extent cargo has been shifted, it has gone for the most part to U.S. carriers that maintain high quality service. The U.S. carriers, it is alleged, offer a full range of service options, including intermodal service.

VII. Cargo Routing

A. Supporting Comment. The Port Authority of New York and New Jersey filed a comment expressing concern over the potential adverse impact of the Philippine waiver system on cargo routing. New York notes that virtually all of the liner cargo—both import and export—in the United States/Philippines trade that moves through the Port of New York is carried by third-flag carriers. Only one U.S.-flag carrier (Waterman) and one Philippine-flag carrier (MCP) serve New York in this trade. According to the port, exporters and importers at New York currently are not experiencing difficulties in obtaining waivers. Nevertheless, New York expresses concern that a more aggressive policy by the Philippine Government could drastically change the situation. New York contends that exclusion of third-flag carriers would effectively close New York to the trade and force shippers to turn to other ports, the most likely being minibridge service through Pacific Coast ports. Should such a situation occur, New York notes that neither option of the Proposed Rule—tariff suspension or restricted entry—would provide relief to the port. New York, therefore, requests the Commission, in fashioning an appropriate remedy to consider the special problem which the Philippine cargo sharing regime causes for ports served almost exclusively by third-flag carriers.

Virginia Port Authority states that the current waiver system is so burdensome as not to be a viable option. VPA asserts that it is losing cargo through minibridge service to the Pacific Coast. VPA states that it has no U.S.-flag service and only monthly Philippine-flag service.

Philadelphia states that the port is not served by either U.S. or Philippine-flag carriers. As a result, shippers must either use minibridge service to the Pacific Coast or obtain a waiver in order to use third-flag direct service to and from Philadelphia. Because there is no Philippine consultate in Philadelphia, obtaining a waiver is a time-consuming process. Philadelphia expresses the view that the solution to this problem is

[3] P. L. Thomas Paper Co., Inc. states generally that it has had problems with infrequent sailings and shipping delays but does not provide specific data.

a blanket exemption for Philadelphia and third-flag carriers serving the port with direct service to the Philippines.

Baltimore's concern is that full implementation of the Philippine cargo-sharing program might result in routing of cargo to the Pacific Coast to the detriment of Baltimore, third-flag carriers, and shippers.

The Port of Portland notes that it is not served by either U.S. or Philippine-flag carriers. Consequently, shippers must either ship cargo via Seattle, and perhaps incur additional trucking charges, or obtain a waiver. Because there is no consulate in Portland, the waiver must be obtained from San Francisco or Seattle. Portland states that it attempted to obtain a blanket exemption for all cargoes moving through Portland from the waiver requirement until U.S.-flag or Philippine-flag service is available. MARINA denied the requested exemption. Portland also states that Philippine government assurances that waivers will automatically be granted are not sufficient to protect the port's interests.

B. Opposing Comment. The Philippine carriers assert that waivers are granted for extended periods where Philippine vessels do not call at a port or where sailings are infrequent. In such circumstances the granting of a waiver is automatic. The Philippine carriers state that such a waiver has been provided for the Port of Portland. The Philippine carriers also respond to specific allegations of adverse impact on ports cited in the Notice of Proposed Rulemaking.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Meat Import Limitations; Second Quarterly Estimate

Pub. L. 88–482, enacted August 22, 1964, as amended by Pub. L. 96–177 (hereinafter referred to as the "Act"), provides for limiting the quantity of fresh, chilled, or frozen meat of cattle, sheep except lamb, and goats (TSUS 106.10, 106.22, and 106.25), and certain prepared or preserved beef and veal products (TSUS 107.55, 107.61, and 107.62), which may be imported into the United States in any calendar year. Such limitations are to be imposed when the Secretary of Agriculture estimates that imports of articles provided for in TSUS 106.10, 106.22, 106.25, 107.55, and 107.62 (hereinafter referred to as "meat articles"), in the absence of limitations under the Act during such calendar year, would equal or exceed 110 percent of the estimated aggregate quantity of meat articles prescribed for calendar year 1984 by subsection 2(c) as adjusted under subsection 2(d) of the Act.

As published on December 30, 1983 (48 FR 57576), the estimated aggregate quantity of meat articles prescribed by subsection 2(c), as adjusted by subsection 2(d) of the Act for calendar year 1984, is 1,117 million pounds.

In accordance with the requirements of the Act, I have determined that the second quarterly estimate for 1984 of the aggregate quantity of meat articles which would, in the absence of limitations under the act, be imported during calendar year 1984, is 1,190 million pounds.

Done at Washington, D.C. this 27th day of March, 1984.

[Order 84–3–107]

Rejection of Foreign Forwarder Registration

AGENCY: Civil Aeronautics Board.

ACTION: Rejection of Foreign Forwarder Registration; Order 84–3–107.

SUMMARY: The Board, having previously established in Orders 83–4–103, and 83–6–65 that there is unsatisfactory Philippines reciprocity for U.S. freight forwarders, rejected only the interstate and overseas air transportation portions of the foreign freight forwarder registration request of Queen's Maritime Ltd., which is 60 percent owned by citizens of the Philippines—Order 84–3–107 adopted March 26, 1984. The foreign air transportation portion of the applicant's registration was granted on February 10, 1984 and continues in effect.

To obtain a copy of the complete order, contact the C.A.B. Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428, (202) 673–5432. Persons outside the Washington metropolitan area may send a postcard request.

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q of the Board's Procedural Regulations (See, 14 CFR 302.1701 et seq.); Week Ended March 23, 1984

Subpart Q Applications

The due date for answers, comforming application, or motions to modify scope are set forth below for each application. Following the anwser period the Board may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Date filed	Docket No.	Description
Mar. 19, 1984	42051	Aerotours Dominicano, C. por A, c/o Ralph R. Curry, 2055 North 15th Street, Arlington, Va. 22201. Application of Aerotours Dominicano, C. por A. pursuant to Section 402 of the Act and Subpart Q of the Board's Procedural Regulations for a foreign air carrier permit to engage in non-scheduled foreign air transportation between the Dominican Republic and the U.S. Virgin Islands; San Juan Puerto Rico; Miami, Fla.; and Foreign Charter Air Transportation. Answers may be filed by April 16, 1984.
Do.	42053	Trans-Panama, S. A., c/o Richard P. Taylor, Steptoe & Johnson, 1250 Connecticut Avenue, NW., Washington, D.C. 20036. Application of Trans-Panama, S. A. pursuant to Section 402 of the Act for renewal of its foreign air carrier permit authorizing applicant to engage in non-scheduled foreign air transportation of property and mail between any point or points in the Republic of Panama and Miami, Florida, New York, N.Y., and Los Angeles, California, in the United States.
Mar. 21, 1984	42055	Arrow Air, Inc., c/o Lawrence D. Wasko, Seamon, Wasko, Ozment, 1211 Connecticut Ave., NW., Suite 300, Washington, D.C. 20036. Application of Arrow Air, Inc. pursuant to Section 401 of the Act and Subpart Q of the Board's Procedural Regulations requests a certificate of public convenience and necessity to engage in scheduled foreign air transportation of persons, property and mail as follows: Between Tampa, Florida and Merida, Cancun, and Cozumel, Mexico. Answers may be filed by April 18, 1984.
Mar. 23, 1984	42061	Malaysian Airline System Berhad, c/o James L. Devall, Zuckert, Scoutt, Rasenberger & Johnson, 888 Seventeenth Street, N.W., Washington, D.C. 20006. Application of Malaysian Airlines System Berhad pursuant to Section 402 of the Act and Subpart Q of the Board's Procedural Regulations requests a foreign air carrier permit to engage in foreign air transportation of persons, property and mail on the following route: Between a point or points in Malaysia and the terminal point San Francisco, California, via the intermediate point Tokyo, Japan. MAS does not request authority to carry persons originating in Tokyo to the United States or passengers originating in the United States whose final destination in Tokyo. Answers may be filed by April 20, 1984.
Do.	41342	Polynesian Airlines (Holdings) Limited and Polynesian Airlines (Operations) Limited, c/o Robert D. Paplin, Squire, Sanders & Dempsey, 1201 Pennsylvania Ave., NW., Washington, D.C. 20004. Amendment No. 1 to the Joint Application of Polynesian Airlines (Holdings) Limited and Polynesian Airlines (Operations) Limited requests (1) additional authority to engage in foreign air transportation of persons, property and mail between Apia, Western Somoa and Honolulu, Hawaii, via Pago Pago, American Samoa and Christmas Island, Republic of Kiribati; and (2) the inclusion of Niue as an additional point to be served beyond Pago Pago on the Applicants' initial route. As amended, the two requested routes would read as follows: Between the terminal point Apia, Western Samoa, the terminal point Pago Pago, American Samoa, and beyond Pago Pago to Rarotonga, the Cook Islands, Niue, and Papeete, Tahiti; Between the terminal point Apia, Western Samoa, the intermediate points Pago Pago, American Samoa and Christmas Island, Republic of Kiribati, and the terminal point Honolulu, Hawaii. Answers may be filed by April 20, 1984.

[C-489-058]

Amoxicillin Trihydrate and Its Salts From Spain; Preliminary Results of Administrative Review of Countervailing Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Preliminary Results of Administrative Review of Countervailing Duty Order.

SUMMARY: The Department of Commerce has conducted an administrative review of the countervailing duty order on amoxicillin trihydrate and its salts from Spain. The review covers the period January 1, 1982 through December 31, 1982. As a result of the review the Department has preliminarily determined the net subsidy to be 3.17 percent *ad valorem* for the period of review. Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: March 30, 1984.

FOR FURTHER INFORMATION CONTACT: Susan Silver or Laura Kneale, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On February 28, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 8322) the final results of its last administrative review of the countervailing duty order on amoxicillin trihydrate and its salts from Spain (44 FR 44154, July 27, 1979) and announced its intent to conduct the next administrative review. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of Spanish amoxicillin trihydrate and its salts ("amoxicillin"), an antibiotic which is a semi-synthetic penicillin. Such merchandise is currently classifiable under item 411.7400 of the Tariff Schedules of the United States Annotated.

The review covers the period January 1, 1982 through December 31, 1982, and four programs: (1) A rebate of indirect taxes upon exportation, under the Desgravacion Fiscal a la Exportacion ("the DFE"); (2) an operating capital loans program; (3) a short-term export credit program; and (4) research and development incentives.

Analysis of Programs

(1) Desgravacion Fiscal a la Exportacion

Spain employs a cascading tax system. Under this system, the government levies a turnover tax ("IGTE") on each sale of a product through its various stages of production, up to (but not including) the final sale in Spain. Upon exportation of the product, the government, under the DFE, rebates both these accumulated IGTE indirect taxes and certain final stage taxes.

Although the Spanish government rebates upon exportation all indirect taxes paid under the cascading tax system, the Tariff Act and the Commerce Regulations allow the rebate of only the following: (1) Indirect taxes borne by inputs which are physically incorporated in the exported product (see Annex 1.1 of part 355 of the Commerce Regulations); and (2) indirect taxes levied at the final stage (see Annex 1.2 of part 355 of the Commerce Regulations). If the payment upon export exceeds the total amount of allowable indirect taxes described above, the Department considers the difference to be an overrebate of indirect taxes and, therefore, a subsidy.

Physical incorporation is a question of fact to be determined for each product in each case. In this case, the physically incorporated inputs are the raw materials previously allowed by the Department. The rebate of two final stage taxes, the parafiscal tax on export licenses and the tax on freight and insurance, is also allowable when calculating whether or not there is an overrebate of indirect taxes under the DFE.

As of January 1, 1982, the Spanish government increased the IGTE rate from 3.80 percent to 4.60 percent, while maintaining the previous rate for the export rebate. We concluded in our last review that an earlier increase in the IGTE rate had eliminated the overrebate previously found countervailable. Based on our analysis of the indirect taxes on physically incorporated inputs and the two indirect taxes on the final product, we preliminarily find that the additional change in the IGTE rate for 1982 continues to eliminate the overrebate. Therefore, we preliminarily determine the net subsidy attributable to this program during the period of review to be zero percent.

(2) Operating Capital Loans

The Spanish government requires banks to set aside funds to provide short-term operating capital loans, as part of its Privileged Circuit Exporter Credit Program. These loans are granted for a period of less than one year. For 1982, the Spanish government fixed the interest rate for such loans at 10 percent. To determine the interest rate on comparable commercial loans, we took the average national prime interest rate for loans of comparable length, added the prevailing interest charge over prime facing borrowers of average creditworthiness and added the legally established fees and commissions. Comparing this benchmark with the 10 percent interest rate established for the operating capital loans program, we found a differential of 9.38 percent during the period of review.

In the absence of information regarding loans received on worldwide exports, we calculated the benefit under this program by multiplying the amount of operating capital loans received by the only known exporter of this merchandise to the United States, Antibioticos, S.A., in 1982 on its exports of amoxicillin to the U.S. by the interest rate differential in 1982. We then divided the results by Antibioticos' exports of amoxicillin to the U.S. in 1982. Using this methodology, we preliminarily determine the net benefit conferred under this program to be 2.48 percent *ad valorem* for 1982.

The maximum loan principal available to a given exporter is determined as a percentage of the firm's previous year's exports. This amount may be increased by 10 percent if the firm has a government-issued Exporter's Card. Antibioticos has such a card. Effective January 1, 1984, the Spanish government reduced the maximum percentage of eligibility for operating capital loans (including Exporter's Card eligibility) to 10.5 percent of the previous year's exports. Antibioticos has used its maximum eligibility on exports to the United States. Therefore, by multiplying this eligibility level by the interest rate differential for 1982 (9.38 percent) as the most recent information available, we preliminarily determine, for purposes of cash deposits of estimated countervailing duties, the net subsidy conferred under this program is 0.98 percent *ad valorem*.

(3) Short-Term Export Credits

The short-term export credit program, which is part of the Privileged Circuit Exporter Credit Program, provides loans for up to 90 percent of the value of a company's export shipment at a 10 percent interest rate for a maximum of one year. The Spanish government, in its response to our questionnaire, stated that Antibioticos obtained a loan under this program in 1982 to finance a shipment of amoxicillin to the U.S. Antibioticos held this loan for less than three months. Again we chose as our benchmark the average national prime interest rate for loans of comparable length and added the prevailing interest charge over prime facing borrowers of average creditworthiness plus the legally established fees and commissions. We multiplied the interest rate differential by the portion of the year over which the loan was outstanding, and then multiplied this prorated differential by the loan amount to find Antibioticos' interest savings. Dividing this amount by Antibioticos' 1982 exports of amoxicillin to the U.S., we preliminarily find an *ad valorem* benefit of 0.69 percent. As with the operating capital loan program, we used information on U.S. exports in the absence of information on worldwide exports.

(4) Research and Development Incentives

In its final determination in the countervailing duty investigation on certain steel products from Spain, the Department found that firms may receive government loans covering up to 50 percent of the cost of R&D projects. In its questionnaire response, the Spanish government informed us that Antibioticos received assistance under this program. However, we preliminarily determine that the project for which Antibioticos received funding was for the development of new products and did not benefit the production of amoxicillin.

Preliminary Results of the Review

As a result of the review, we preliminarily determine that the aggregate net subsidy conferred by the four programs is 3.17 percent *ad valorem* during 1982. Accordingly, the Department intends to instruct the Customs Service to assess countervailing duties of 3.17 percent of the f.o.b. invoice price on all shipments of Spanish amoxicillin exported on or after January 1, 1982 and entered, or withdrawn from warehouse, for consumption on or before June 30, 1982.

On July 1, 1982, the International Trade Commission ("the ITC") notified the Department that the Spanish Government had requested an injury determination for this order under section 104(b) of the Trade Agreements act of 1979. Should the ITC find that there is material injury or likelihood of material injury to an industry in the United States, the Department will instruct the Customs Service to assess countervailing duties in the amount of the estimated duties required to be deposited on all unliquidated entries of this merchandise entered, or withdrawn from warehouse, for consumption on or after July 1, 1982, and through the date of the ITC's notification to the Department of its determination.

Further, as provided for by section 751(a)(1) of the Tariff Act, the Department intends to instruct the Customs Service to collect a cash deposit of estimated countervailing tudies of 1.67 percent of the entered value on all shipments of Spanish amoxicillin entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of the current review. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.41 of the Commerce Regulations (19 CFR 355.41).

Dated: March 26, 1984.

Alan F. Holmer,

Deputy Assistant Secretary, Import Administration.

SUPPLEMENTARY INFORMATION:

Background

On February 20, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 8323) the final results of its last administrative review of the countervailing duty order on ampicillin, trihydrate and its salts from Spain (44 FR 17484, March 22, 1979) and announced its intent to conduct the next administrative review. As required by section 751 of the Tariff Act of 1930 ("the Tariff Act"), the Department has now conducted that administrative review.

Scope of the Review

Imports covered by the review are shipments of Spanish ampicillin trihydrate and its salts ("ampicillin"), an antibiotic which is a semi-synthetic penicillin. Such merchandise is currently classifiable under item 411.6000 of the Tariff Schedules of the United States Annotated.

The review covers the period January 1, 1982 through December 31, 1982, and four programs: (1) A rebate of indirect taxes upon exportation, under the Desgravacion Fiscal a la Exportacion ("the DFE"); (2) an operating capital loans program; (3) a short-term export credit program; and (4) research and development incentives. There were no known shipments of ampicillin to the United States in 1982 and there are no known unliquidated entries for the period.

Analysis of Programs

(1) Desgravacion Fiscal a la Exportacion

Spain employs a cascading tax system. Under this system, the government levies a turnover tax ("IGTE") on each sale of a product through its various stages of production, up to (but not including) the final sale in Spain. Upon exportation of the product, the government, under the DFE, rebates both these accumulated IGTE indirect taxes and certain final stage taxes.

Although the Spanish government rebates upon exportation all indirect taxes paid under the cascading tax system, the Tariff Act and the Commerce Regulations allow the rebate of only the following: (1) Indirect taxes borne by inputs which are physically incorporated in the exported product (see Annex 1.1 of part 355 of the Commerce Regulations); and (2) indirect taxes levied at the final stage (see Annex 1.2 of part 355 of the Commerce Regulations). If the payment upon export exceeds the total amount of allowable indirect taxes described above, the Department considers the difference to be an overrebate of indirect taxes and, therefore, a subsidy.

Physical incorporation is a question of fact to be determined for each product in each case. In this case, the physically incorporated inputs are the raw materials previously allowed by the Department. The rebate of two final stage taxes, the parafiscal tax on export licenses and the tax on freight and insurance, is also allowable when calculating whether or not there is an overrebate of indirect taxes under the DFE.

As of January 1, 1982, the Spanish government increased the IGTE rate from 3.80 percent to 4.60 percent, while maintaining the previous rate for the export rebate. We concluded in our last review that an earlier increase in the IGTE rate had eliminated the overrebate previously found countervailable. Based on our analysis of the indirect taxes on physically incorporated inputs and the two indirect taxes on the final product, we preliminarily find that the additional change in the IGTE rate for 1982 continues to eliminate the overrebate. Therefore, we preliminarily determine the net subsidy attributable to this program during the period of review to be zero percent.

(2) Operating Capital Loans

The Spanish government requires banks to set aside funds to provide short-term operating capital loans, as part of its Privileged Circuit Exporter Credit Program. These loans are granted for a period of less than one year. For 1982, the Spanish government fixed the interest rate for such loans at 10 percent. To determine the interest rate on comparable commercial loans, we took the average national prime interest rate for loans of comparable length, added the prevailing interest charge over prime facing borrowers of average creditworthiness and added the legally established fees and commissions. Comparing this benchmark with the 10 percent interest rate established for the operating capital loans program, we found a differential of 9.38 percent during the period of review.

The maximum loan principal available to a given exporter is determined as a percentage of the firm's previous year's exports. This amount may be increased by 10 percent if the firm has a government-issued Exporter's Card. The only known exporter of this merchandise to the United States, Antibioticos, S.A., has such a card. Effective January 1, 1984, the Spanish government reduced the maximum percentage of eligibility for operating capital loans (including Exporter's Card eligibility) to 10.5 percent of the previous year's exports.

By multiplying this eligibility level by the interest rate differential for 1982 (9.38 percent) as the most recent information available, we preliminarily determine, for purposes of cash deposits of estimated countervailing duties, the net subsidy currently attributable to this program is 0.98 percent *ad valorem*.

(3) Short-Term Export Credits

The short-term export credit program, which is part of the Privileged Circuit Exporter Credit Program, provides loans for up to 90 percent of the value of a company's export shipment at a 10 percent interest rate for a maximum of one year.

Absent shipments of ampicillin to the U.S., we estimated the potential benefit from this program to be the subsidy received by Antibioticos under this program on exports of amoxicillin to the U.S. in 1982. We have made this decision based on our knowledge that Antibioticos is eligible for and has received loans under this program. Therefore, we have reason to believe that the firm would have received loans on exports of ampicillin. We preliminarily find a potential *ad valorem* benefit of 0.69 percent.

(4) Research and Development Incentives

In its final determination in the countervailing duty investigation on certain steel products from Spain, the Department found that firms may receive government loans covering up to 50 percent of the cost of R&D projects. In its questionnaire response, the Spanish government informed us that Antibioticos received assistance under this program. However, we preliminarily determine that the project for which Antibioticos received funding was for

the development of new products and did not benefit the production of ampicillin.

Preliminary Results of the Review

As a result of the review, we preliminarily determine the potential aggregate net subsidy conferred by the four programs is 1.67 percent *ad valorem*.

Accordingly, as provided by section 751(a)(1) of the Tariff Act, the Department intends to instruct the Customs Service to collect a cash deposit of estimated countervailing duties of 1.67 percent of the entered value on all shipments of Spanish ampicillin entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of the current review. This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of issues raised in any such written comments or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 355.41 of the Commerce Regulations (19 CFR 355.41).

Dated: March 26, 1984.

Alan F. Holmer,

Deputy Assistant Secretary Import Administration.

BILLING CODE 3510-DS-M

[A-580-009]

Tubes for Tires, Other Than for Bicycle Tires, From the Republic of Korea; Postponement of Final Antidumping Determination

AGENCY: International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: This notice in forms the public that the department of Commerce (the Department) has received a request from counsel for petitioners, Carlisle Tire & Rubber Company; Copper Tire & Rubber Company; Cupples Company, Manufacturers; Firestone Tire & Rubber Company; B.F. Goodrich Company; Indianapolis Rubber Company; and Robbins Tire Company, that the final determination be postponed until not later than 135 days after the date of publication of the preliminary determination, as provided for in section 735(a)(2)(B) of the Tariff Act of 1930, as amended (the Act); and, that the Department has determined to postpone its final determination as to whether sales of tubes for tires, other than for bicycle tires from the Republic of Korea have occurred at less than fair value, until not later than June 25, 1984.

EFFECTIVE DATE: March 30, 1984.

FOR FURTHER INFORMATION CONTACT: Steven Lim or Gary Taverman, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, D.C. 20230, Telephone (202) 377-1776 or 0161.

SUPPLEMENTARY INFORMATION: On August 12, 1983, the Department of Commerce published a notice in the **Federal Register** (48 FR 36637) that it was initiating under section 732(b) of the Act (19 U.S.C. 1673(b)) an antidumping investigation to determine whether tubes for tires, other than for bicycle tires, from the Republic of Korea were being, or were likely to be, sold at less than fair value. On February 10, 1984, the Department published a negative preliminary determination (49 FR 5155). The notice stated that if the investigation proceeded normally, we would make a final determination by April 23, 1984. Section 735(a)(2)(B) of the Act provides that the Department may postpone its final determination concerning sales at less than fair value if the petitioner requests an extension after a negative preliminary determination.

All written views should be filed in accordance with 19 CFR 353.46 no later than April 27, 1984 and in at least 10 copies.

This notice is published pursuant to section 735(d) of the Act.

Dated: March 23, 1984.

Alan F. Holmer,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Marine Mammals; Receipt of Application for Permit; William S. Lawton

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), the Endangered Species Act of 1973 (16 U.S.C. 1531-1543), the National Marine Fisheries Service regulations governing endangered fish and wildlife permits (50 CFR Parts 217-222).

1. Applicant:

a. Name: Mr. William S. Lawton (P340).

b. Address: 3300 34th Avenue S., Seattle, Washington 98144.

2. Type of Permit: Scientific Research/ Scientific Purposes.

3. Name and Number of Animals: Humpback whale (*Megaptera novaeagliae*)—Unspecified number.

4. Type of Take: Potential harassment while conducting fluke and dorsal fin photography, underwater acoustical recording for population estimates and distribution.

5. Location of Activity: Southeast Alaska, Alexander Archipelago.

6. Period of Activity: 3 years.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publicatioin of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300

Whitehaven Street, NW., Washington, D.C.;

Regional Director, Northwest Region, National Marine Fisheries Service, 7600 Sand Point Way, NE., BIN C15700, Seattle, Washington 98115; and

Regional Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau Alaska, 99802.

Dated: March 26, 1984.

Richard B. Roe,

Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Establishing an Import Limit for Certain Man-Made Fiber Textiles Exported From Mexico

March 27, 1984.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on April 2, 1984. For further information contact William Boyd, International Trade Specialist (202) 377–4212.

Background

On December 27, 1983 a notice was published in the **Federal Register** (48 FR 56987) which established an import restraint limit of 703,471 pounds for acrylic spun yarn in Category 604pt. (only TSUSA 310.5049), produced or manfactured in Mexico and exported during the ninety-day period which began on January 1, 1984 and extends through March 31, 1984. The notice also stated that the Government of Mexico is obligated under the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 26, 1979, as amended and extended, if no mutually satisfactory solution is reached on a level for this category during consultations, to limit its exports during the twelve-month period which began on January 1, 1984, to 759,421 pounds.

The notice also stated that merchandise which exceeded the levels established for Category 604pt. (only TSUSA 310.5049) during 1983 and the aforementioned 90-day period might be charged to the twelve-month limit. Shipments from these prior periods are in excess of that limit. As a result, the twelve-month limit of 759,421 pounds will be filled at opening.

The United States remains committed to finding a solution concerning this category. Should such a solution be reached in consultations with the Government of Mexico, further notice will be published in the **Federal Register.**

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924) and December 14, 1983 (48 FR 55607), and December 30, 1983 (48 FR 57584).

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

March 27, 1984.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury,
Washington, D.C.

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of February 26, 1979, as amended and extended, between the Governments of the United States and Mexico; and in accordance with the provisions in Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on April 2, 1984, entry into the United States for consumption and withdrawal from warehouse for consumption of man-made fiber textile products in Category 604pt. (only TSUSA 310.5049), produced or manufactured in Mexico and exported during the twelve-month period which began on January 1, 1984, in excess of 759,421 pounds.[1]

Textile products in Category 604pt. (only T.S.U.S.A. No. 310.5049) which have been exported to the United States prior to January 1, 1984 shall be subject to this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924) and December 14, 1983 (48 FR 55607), and December 30, 1983 (48 FR 57584).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption

[1] The level of restraint has not been adjusted to reflect any imports after December 31, 1983.

to include entry for consumption into the Commonwealth of Puerto Rico.

The action taken with respect to the Government of Mexico and with respect to imports of man-made fiber textiles from Mexico has been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the Federal Register.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1984; Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to procurement list.

SUMMARY: This action adds to procurement list a commodity to be produced by and services to be provided by workshops for the blind and other severely handicapped.

EFFECTIVE DATE: March 30, 1984.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On October 28, November 25, and December 23, 1983, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (48 FR 49904, 48 FR 53148, and 48 FR 56819) of proposed additions to Procurement List 1984, October 18, 1983 (48 FR 48415).

After consideration of the relevant matter presented, the Committee has determined that the commodity and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77.

I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The actions will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The actions will not have a serious economic impact on any contractors for the commodity and services listed.

c. The actions will result in authorizing small entities to produce or provide a commodity and services procured by the Government.

Accordingly, the following commodity and services are hereby added to Procurement List 1984:

Class 7360

Dining Packet, Inflight: 7360-01-167-2610

SIC 7349

Janitorial Service, Federal Regional Center, Pinetree Boulevard, Thomasville, Georgia

SIC 7389

Commissary Shelf Stocking and Custodial, Peterson Air Force Base, Colorado.

C. W. Fletcher,

Executive Director.

[FR Doc. 84-8561 Filed 3-29-84; 8:45 am]

BILLING CODE 6820-33-M

Procurement List 1984; Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received proposals to add to Procurement List 1984 commodities to be produced by and a service to be provided by workshops for the blind and other severley handicapped.

Comments must be received on or before: May 2, 1984.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities and service listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities and service to Procurement List 1984, October 18, 1983 (48 FR 48415):

Class 7110

Bookcase, Steel, Contemporary Style: 7110-00-601-9823; 7110-00-149-1621

Class 7510

Envelope, Transparent, Type II: 7510-00-667-2604

SIC 7349

Janitorial Service; U.S. Post Office and U.S. Courthouse, 245 East Capitol Street, Jackson, Mississippi.

C. W. Fletcher,

Executive Director.

BILLING CODE 3810-01-M

Department of Defense Wage Committee; Closed Meetings

Pursuant to the provisions of section 10 of Pub. L. 92-463, the Federal Advisory Committee Act, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, May 1, 1984; Tuesday, May 8, 1984; Tuesday, May 15, 1984; Tuesday, May 22, 1984; and Tuesday, May 29, 1984 at 10:00 a.m. in Room 1E801, the Pentagon, Washington, D.C.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Manpower, Installations and Logistics) concerning all matters involved in the development and authorization of wage schedules for Federal prevailing rate employees pursuant to Pub. L. 92-392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Pub. L. 92-463, meetings may be closed to the public when they are "considered with matters listed in 5 U.S.C. 552b." Two of the matters so listed are those "related solely to the internal personnel rules and practices of an agency," (5 U.S.C. 552b(c)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 U.S.C. 552b(c)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy & Requirements) hereby determines that all portions of the meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 U.S.C. 552b(c)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b(c)(4)).

However, members of the public who may wish to do so are invited to submit material in writing to the chairman concerning matters believed to be deserving of the Committee's attention. Additional information concerning this meeting may be obtained by writing the Chairman, Department of Defense Wage Committee, Room 3D264, the Pentagon, Washington, D.C. 20301.

Dated: March 27, 1984.

M. S. Healy,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3910-01-M

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of Proposed Information Collection Requests.

SUMMARY: The Deputy Under Secretary for Management invites comments in the proposed information collection requests as required by the Paperwork Reduction Act.

DATES: Interested persons are invited to submit comments on or before April 30, 1984.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., Room 3208 New Executive Office Building, Washington, D.C. 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B., Webster, Department of Education, 400 Maryland Avenue, SW., Room 4074, Switzer Building, Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 426-7304.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The requirement for public consultation may be amended or waived by OMB to the extent that the public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform the statutory obligations.

The Deputy Under Secretary for Management publishes this notice containing proposed information requests prior to the submission of these requests to the Office of Management and Budget. Public comment is invited from the OMB at the address specified above. Copies of the requests may be obtained from Margaret Webster at the address specified above.

Dated: March 26, 1984.

Charles L. Heatherly,

Deputy Under Secretary for Management.

Office of Postsecondary Education

New

Talent Search and Educational Opportunity Centers Programs Performance and Financial Status Reports

Annually

State or Local Governments; Businesses or Other For-Profit; Non-Profit Institutions

Reporting Burden, Responses: 200; Burden Hours: 400

Abstract: These reports combine the separate financial and status reporting requirements of the two programs: Talent Search and Educational Opportunity Centers. Grantees are required to submit annual financial status and performance reports. The reports are used to determine whether progress is being made toward project goals, objectives, and program purpose.

Application for the Strengthening, Special Needs and Challenge Grant Programs under Title III, Higher Education Act of 1965

Annually

State or Local Governments; Non-Profit Institutions

Reporting Burden, Responses: 1,000; Burden Hours: 20,000

Abstract: This application consolidates the application forms for three programs: The Strengthening,

Special Needs and College Grant programs under Title III, Higher Education Act of 1965. The application will enable the program to evaluate the needs of the applicants to determine which applications should be funded and the total amount of any grant that may be awarded.

Revision

Pell Grant Program Student Validation Roster for 1983–1984
ED 255–4
Annually
State or Local Governments; Businesses or Other For-Profit; Non-Profit Institutions; Small Businesses or Organizations
Reporting Burden, Responses: 5,000; Burden Hours: 81,250
Recordkeeping Burden, Recordkeepers: 5,000; Burden Hours: 2,500

Abstract: The Student Validation Roster is the form which ED uses to collect adjustments or corrections to data originally reported on Student Aid Reports, and to obtain institutional verification of funds actually disbursed to each Pell Grant recipient. The Department uses this data to make end-of-year adjustments to the authorization of Pell Grant funds.

Extension

Request for Collection Assistance Under Federal Insured Student Loan Program
ED 1249
On Occasion
State or Local Governments; Businesses or Other For-Profit; Individuals or Households; Small Businesses or Organizations
Reporting burden, Responses: 32,500; Burden Hours: 10,725
Recordkeeping Burden, Recordkeepers: 13,000; Burden Hours: 1,040

Abstract: ED form 1249 is used by lenders to request skip trace assistance on delinquent student loans where the lender is unable to locate the student borrower. Prior to submission of a claim a lender must show due diligence. Skip tracing is a part of due diligence.

Existing

Financial and Performance Reports Under the Graduate and Professional Study Fellowships Program
ED 591A; ED 591B
Annually
State and Local Governments; Non-Profit Institutions
Reporting Burden, Responses: 30; Burden Hours: 3,840
Recordkeeping Burden, Recordkeepers: 128, Burden Hours: 6.4

Abstract: The reports are utilized to obtain information from grant recipients to assure that Federal funds were expended within the provision of all applicable laws and regulations and to assess the accomplishment of project goals and objectives.

State Student Incentive Grant Program Records
Annually
State or Local Governments
Reporting Burden, Responses: 114; Burden Hours: 342
Recordkeeping Burden, Recordkeepers: 40; Burden Hours: 2,280

Abstract: In each State, the designated agency responsible for the State Student Incentive Grant Program must maintain certain records to ensure proper administration of program funds.

Reinstatment

Application for Veterans' Cost-of-Instruction Payments to Institutions of Higher Education
ED 269
Annually
State of Local Governments; Businesses or Other For-Profit; Non-Profit Institutions Small Businesses or Organizations
Reporting Burden, Responses: 900; Burden Hours: 900
Recordkeeping Burden, Recordkeepers: 4; Burden Hours: 3,440

Abstract: Pub. L. 36–374 mandates payments to postsecondary institutions based on veteran student enrollments. The Veterans' Cost-of-Instruction Payments application obtains the necessary data to verify eligibility and calculate awards.

Office of Vocational and Adult Education

Extension

Financial Status Report for State Administered Vocational Education
ED 2465
Annually
State or Local Governments
Reporting Burden, Responses: 53; Burden Hours: 2,915
Recordkeeping Burden, Recordkeepers: 2,000; Burden Hours: 106,000

Abstract: The financial status report is needed to determine each State's compliance with the enabling statute, to close out each year's grant, and to provide information for the Secretary's Report to Congress on the status of vocational education.

Office of Bilingual Education and Minority Languages Affairs

Existing

Information Service Reaction Form

DEPARTMENT OF ENERGY

Office of the Secretary

National Petroleum Council, Refineries Task Group of the Committee on the Strategic Petroleum Reserve; Meeting

Notice is hereby given that the Refineries Task Group of the Committee on the Strategic Petroleum Reserve will

meet in April 1984. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on the Strategic Petroleum Reserve will address various aspects of the Strategic Petroleum Reserve and the long-term availability and movement patterns of tankers worldwide. Its analysis and findings will be based on information and data to be gathered by the various task groups. The time, location, and agenda of the Refineries Task Group meeting follows:

The Refineries Task Group will hold its first meeting on Monday, April 16, 1984, starting at 12:00 p.m., in Room Three, Amoco Oil Company, Third Floor, 200 East Randolph Drive, Chicago, Illinois.

The tentative agenda for the Refineries Task Group meeting follows:

1. Opening remarks by the Chairman and Government Co-Chairman.

2. Discuss the scope of the overall study.

3. Discuss the study assignment of the Refineries Task Group.

4. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Refineries Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Refineries Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Gerald J. Parker, Office of Oil, Gas and Shale Technology, Fossil Energy, 301/353–3032 prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meetings will be available for public review at the Freedom of Information Public Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C., between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C., on March 23, 1984.

William A. Vaughn,

Assistant Secretary for Fossil Energy.

International Atomic Energy Agreements; Proposed Subsequent Arrangement; EURATOM

Pursuant to Section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation Between the Government of the United States of America and the European Atomic Energy Community (EURATOM) Concerning Peaceful Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above mentioned agreement involves approval of the following sale:

Contract Number S–EU–800, one gram of uranium, enriched to approximately one percent in U–235, for use as standard reference material at the Atomic Energy Research Establishment, the United Kingdom.

In accordance with Section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the furnishing of the nuclear material will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen (15) days after the date of publication of this notice.

For the Department of Energy.

Dated: March 23, 1984.

BILLING CODE 6450-01-M

Office of Hearings and Appeals

Issuance of Proposed Decisions and Orders; Period of January 30 Through March 9, 1984

During the period of January 30 through March 9, 1984, the proposed decision and order summarized below was issued by the Office of Hearing and Appeals of the Department of Energy with regard to an application for exception.

Under the procedural regulations that apply to exception proceedings (10 CFR Part 205, Subpart D), any person who will be aggrieved by the issuance of a proposed decision and order in final form may file a written notice of objection within ten days of service. For purposes of the procedural regulations, the date of service of notice is deemed to be the date of publication of this Notice or the date an aggrieved person received actual notice, whichever occurs first.

The procedural regulations provide that an aggrieved party who fails to file a Notice of Objection within the time period specified in the regulations will be deemed to consent to the issuance of the proposed decision and order in final form. An aggrieved party who wishes to contest a determination made in a proposed decision and order must also file a detailed statement of objections within 30 days of the date of service of the proposed decision and order. In the statement of objections, the aggrieved party must specify each issue of fact or law that it intends to contest in any further proceeeding involving the exception matter.

Copies of the full text of this proposed decision and order is available in the Public Docket Room of the Office of Hearings and Appeals, Room 1E-234, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays.

Dated: March 22, 1984.

George B. Breznay,

Director, Office of Hearings and Appeals.

A. O. Smith Corporation, Milwaukee, Wisconsin, HXE-0072, Testing Requirements

On June 2, 1983, the A. O. Smith Corporation (Smith) filed an Application for Extension of Exception Relief from the testing requirements of 10 CFR Part 430, Subpart B, Appendix N, insofar as those requirements apply to the finned copper tube (FCT) boilers which it manufactures. In its submission, Smith asked that it receive an extension of the exception relief which it was previously granted in *A. O. Smith*, 9 DOE ¶ 81,042 (1982), until the Department of Energy modifies the testing procedures.

Proposed regulations addressing the problems recited in Smith's exception were issued for public comment on June 17, 1983. *See* 48 Fed. Reg. 28014 (1983). The DOE tentatively determined that in order to alleviate the gross inequity suffered by Smith, the firm should be granted an extension of exception relief until the final adoption of those amended testing procedures. On March 7, 1984, the DOE issued a Proposed Decision and Order which determined that Smith be granted exception relief to permit it to use the testing procedures specified for FCT boilers that were proposed by the DOE in June 1983. *See* 48 FR 28022 (1983).

BILLING CODE 6450-01-M

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Energy.

ACTION: Notice of Implementation of Special Refund Procedures and Solicitation of Comments.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding $92,691 in consent order funds to members of the public. This money is being held in escrow following the settlement of enforcement proceedings involving Willis Distributing Company, Inc., a reseller of refined petroleum products located in Erie, Pennsylvania.

DATE AND ADDRESS: Comments must be filed within 30 days of publication of this notice in the **Federal Register** and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20585. All comments should conspicuously display a reference to case number HEF-0197.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director, Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252-2094.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) of the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision relates to a consent order entered into by Willis Distributing Company, Inc., which settled possible pricing violations in the firm's sales of motor gasoline to its customers during the April 1, 1979 through September 30, 1979 audit period.

The Proposed Decision sets forth the procedures and standards that the DOE has tentatively formulated to distribute the contents of an escrow account funded by Willis pursuant to the consent order. The DOE has tentatively established procedures under which purchasers of Willis products during the audit period may file claims for refunds from the consent order fund. Applications for Refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized.

Any member of the public may submit written comments regarding the proposed refund procedures. Commenting parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice in the **Federal Register**, and should be sent to the address set forth at the beginning of this notice. All comments received in this proceeding will be available for public inspection between the hours of 1:00 to 5:00 p.m., Monday through Friday, except federal holidays, in the Public Docket Room of the Office of Hearings and Appeals, located in Room 1E-234, 1000 Independence Avenue, SW., Washington, D.C. 20585.

Dated: March 19, 1984.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order of the Department of Energy

Implementation of Special Refund Procedures

Name of Firm: Willis Distributing Company, Inc.

Date of Filing: October 13, 1983.

Case Number: HEF-0197.

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request the Office of Hearings and Appeals (OHA) to formulate and implement special procedures to make refunds in order to remedy the effects of actual or alleged violations of the DOE regulations. *See* 10 CFR Part 205, Subpart V. The Subpart V regulations set forth general guidelines by which the OHA may formulate and implement a plan of distribution for funds received as part of a settlement agreement or pursuant to a Remedial Order. The Subpart V process is intended to be used in situations where the DOE is unable readily to ascertain the persons who were injured or the amounts that such persons are eligible to receive as a result of enforcement proceedings. *See Office of Enforcement,* 9 DOE ¶ 82,553 at 85,284 (1982).

I. Background

Pursuant to the provisions of Subpart V, on October 13, 1983, the ERA filed a Petition for the Implementation of Special Refund Procedures in connection with a consent order entered into with Willis Distributing Company, Inc. (Willis). Willis is a "reseller" of refined petroleum products as that term was defined in 10 CFR 212.31, and is located in Erie, Pennsylvania. The firm was subject to the Mandatory Petroleum Price Regulations set forth in 10 CFR Part 212, Subpart F until January 28, 1981, when motor gasoline and other refined petroleum products were exempted from price and allocation controls. Exec. Order No. 12287, 46 FR 9909 (January 30, 1981). A DOE audit of Willis' records revealed possible regulatory violations in the amount of $213,557 with respect to the firm's pricing of motor gasoline during the period April 1 through September 30, 1979 (the audit period). In order to settle all claims and disputes between Willis and the DOE regarding the firm's sales of motor gasoline during the audit period, Willis and the DOE entered into a consent order on December 31, 1980, in which Willis agreed to remit $92,691 to the DOE. This payment was deposited into an interest-bearing escrow account for ultimate distribution to the parties injured by the alleged overcharges. This Proposed Decision concerns the distribution of the $92,691 that was deposited into the escrow account, plus accrued interest.

II. Proposed Refund Procedures

We have considered the ERA's Petition for the Implementation of Special Refund Procedures and determined that it is appropriate to establish such a proceeding with respect to the Willis consent order fund. As we have stated in previous Decisions, refunding moneys obtained through DOE enforcement proceedings is the focus of Subpart V proceedings. *See generally Office of Enforcement,* 8 DOE ¶ 82,597 (1981) (hereinafter cited as *Vickers*). Based upon our experience with Subpart V cases, we believe that the distribution of refunds in the present case should take place in two stages. The first stage will attempt to refund moneys to identifiable purchasers of motor gasoline who may have been injured by Willis' pricing practices during the period April 1 through September 30, 1979. After meritorious claims are paid in the first stage, a second stage refund procedure may become necessary. *See generally Office of Special Counsel,* 10 DOE ¶ 85,048 (1982) (hereinafter cited as *Amoco*) (refund procedures established for first stage applicants, second stage refund procedures proposed).

A. Refunds to Identifiable Purchasers

We propose that the Willis consent order funds be distributed to claimants who satisfactorily demonstrate that they have been adversely affected by Willis' alleged pricing practices. The ERA has identified 97 customers who were overcharged in their purchases of Willis motor gasoline. Of these 97 customers, 92 were identified as first purchasers and are listed in Appendix A. The 5 remaining customers who were not identified as first purchasers are listed in Appendix B. The motor gasoline purchased by these claimants was purchased either directly from Willis or from other firms in a chain of distribution leading back to Willis.

In order to receive a refund, each claimant will be required to submit a schedule of monthly purchases of Willis motor gasoline for the period April through September 1979. If the gasoline was not purchased directly from Willis, the claimant must include a statement setting forth his reasons for believing the product originated with Willis. In addition, a reseller or retailer of motor gasoline that files a claim generally will be required to establish that it absorbed the alleged overcharges and was thereby injured. To make this showing, each claimant will be required to show that it maintained "blanks" of unrecovered increased product costs in order to demonstrate that it did not subsequently recover those costs by increasing its prices. (*1*) *See Office of Enforcement,* 10 DOE ¶ 85,029 at 88,125 (1982) (hereinafter cited as *Ada*). In addition, it will have to demonstrate that, at the time it purchased motor gasoline from Willis, market conditions would not permit it to increase its prices to pass through the additional costs associated with the alleged overcharges.

However, as in many prior special refund cases, an applicant will not be required to submit any additional proof of injury if its refund claim is based on monthly purchases of less than 50,000 gallons. (*2*) *Ada* at 88,122. The adoption of a threshold level below which a claimant does not have to submit any evidence of injury is based on several factors. To conduct special refund proceedings with efficiency and reduced administrative costs, the Subpart V regulations authorize the use of presumptions. *See* 10 CFR 205.282(e). We are especially concerned that the cost of compiling information sufficient to show injury not exceed the amount of the refund to be gained. On balance, we believe that the establishment of a presumption of injury for all claims below 50,000 gallons per month is reasonable under the circumstances of this case. *See Office of Special Counsel: In the Matter of Conoco, Inc.,* 11 DOE ¶ ———, Case No. DFF-0003 (January 23, 1984) and cases cited therein.

If a reseller made only spot purchases from Willis, however, we propose that it should not receive a refund because it is not likely to have suffered an injury. As we have previously stated with respect to spot purchasers:

> [T]hose customers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot market purchases of [the firm's product] at increased prices unless they were able to pass through the full amount of [the firm's] quoted selling price at the time of purchase to their own customers.

Vickers at 85,396–97. We believe the same rationale holds true in the present case, and we will establish a rebuttable presumption that spot purchasers were not injured. Accordingly, a spot purchaser which files a claim should sumbit additional evidence to rebut the presumption and to establish that it was unable to recover the increased prices it paid for Willis motor gasoline. *See Amoco* at 88,200.

With respect to customers who were consumers or end-users of Willis motor gasoline, a showing of injury wil not be required in order to qualify for a refund. *See Standard Oil Co. (Indiana)/Union Camp Corp.,* 11 DOE ¶ 85,007 (1983); *Standard Oil Co. (Indiana)/Elgin, Joliet, and Eastern Railway,* 11 DOE ¶ 85,105 (1983) (end-users of various refined petroleum products granted refunds solely on the basis of documented purchased volumes). Therefore, in this proceeding a consumer need only document the specific quantities of Willis motor gasoline it purchased during the consent order period.

A successful refund applicant will receive a refund based upon a volumetric method of allocating refunds. Under this method, a volumetric refund amoung is calculated by dividing the settlement amount by the total gallonage of motor gasoline covered by the consent order. In the present case, based on the information available to us at this time, the volumetric refund amount is $.0144298 per gallon ($92,691 received from Willis divided by 6,423,576 gallons of motor gasoline sold by Willis during the audit period). Successful claimants will receive refunds based on their eligible purchase volumes multiplied by the volumetric refund amount, plus a proprotionate share of the interest accrued on the consent order fund since it was remitted to the DOE. As of January 31, 1984, accrued interest will increase the per gallon refund amount to $.024252. Consequently, a successful claimant who purchased 50,000 gallons of Willis motor gasoline during each of the six months of the audit period will receive a refund of $7,276.

As in previous cases, we will establish a minimum refund amount of $15.00 for first

stage claims. We have found through our experience in prior refund cases that the cost of processing claims in which refunds are sought for amounts less than $15.00 outweighs the benefits of restitution in those situations. *See, e.g., Uban Oil Co.*, 9 DOE ¶ 82,541 at 85,225 (1982).

Detailed procedures for filing applications will be provided in a final Decision and Order. Before disposing of any of the funds received as a result of the consent order involved in this proceeding, we intend to publicize widely the distribution process to solicit comments on the proposed refund procedures and to provide an opportunity for any affected party to file a claim. In addition to publishing notice in the Federal Register, notice will be provided to the Independent Gasoline Marketers council, the National Oil Jobbers Council, the service Station Dealers of America, and the Society of Independent Gasoline Marketers of America. These organizations should be helpful in advising potential claimants of this proceeding. In addition, we are continuing our efforts to obtain a more complete list of the names and addresses of firms and individuals who purchased Willis motor gasoline.

B. Distribution of the Remainder of the Consent Order Funds

In the event that money remains after all first stage claims have been disposed of, undistributed funds could be distributed in a number of different ways. For example, they could be deposited into the miscellaneous receipts account of the United States Treasury. However, we will not be in a position to decide what should be done with any remaining funds until the first stage refund procedure is completed.

It Is Therefore Ordered That:

The $92,691 refund amount remitted by Willis Distributing Company, Inc. pursuant to the consent order executed on December 31, 1980 will be distributed in accordance with the foregoing Decision.

Footnotes

(*1*) The price rules applicable to sales of motor gasoline by retailers were amended effective July 14, 1979. 44 FR 42542 (July 19, 1979). The amended regulation, 10 CFR 212.93(a)(2), provided for a fixed per-gallon markup of 15.4 cents (later increased) for retail sales of motor gasoline, and eliminated the "banking" provisions formerly in effect. Since the fixed markup rule was in effect through part of the period covered by the Willis consent order, no showing of cost banks will be required of retailers from July 14, 1979 through September 30, 1979. The use of banking remained optional for larger resellers of motor gasoline; firms that elected to continue cost banking will be required to submit this information throughout the audit period if they apply for refunds based on purchases greater than 50,000 gallons per month.

(*2*) Resellers whose monthly purchases during the period for which a refund is claimed exceed 50,000 gallons, but who cannot establish that they did not pass through the price increases, or who limit their claims to the threshold amount, will be eligible for a refund for purchases up to the 50,000 gallons per month threshold amount without being required to submit evidence of injury. *See Vickers* at 85,396; *see also Ada* at 88,122.

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Energy.

ACTION: Notice of Implementation of Special Refund Procedures and Solicitation of Comments.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding $36,000 in consent order funds to members of the public. This money is being held in escrow following the settlement of enforcement proceedings involving the Windham Gas Oil Company, a reseller of refined petroleum products located in Windham, Ohio.

DATE AND ADDRESS: Comments must be filed within 30 days of publication of this notice in the **Federal Register** and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20585. All comments should conspicuously display a reference to case number HEF-0198.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director, Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, D.C. 20585 (202) 252-2094.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) of the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and Order set out below. The Proposed Decision relates to a consent order entered into by the Windham Gas Oil Company, which settled possible pricing violations in the firm's sales of motor gasoline to its customers during the March 1, 1979 through August 31, 1979 audit period.

The Proposed Decision sets forth the procedures and standards that the DOE has tentatively formulated to distribute the contents of an escrow account funded by Windham pursuant to the consent order. The DOE has tentatively established procedures under which purchasers of Windham products during the audit period may file claims for refunds from the consent order fund. Applications for Refund should not be filed at this time. Appropriate public notice will be given when the submission of claims is authorized.

Any member of the public may submit written comments regarding the proposed refund procedures. Commenting parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice in the **Federal Register**, and should be sent to the address set forth at the beginning of this notice. All comments received in this proceeding will be available for public inspection between the hours of 1:00 to 5:00 p.m., Monday through Friday, except federal holidays, in the Public Docket Room of the Office of Hearings and Appeals, located in Room 1E-234, 1000 Independence Avenue, SW., Washington, D.C. 20585.

Dated: March 20, 1984.

George B. Breznay,
Director, Office of Hearings and Appeals.

Proposed Decision and Order of the Department of Energy

Implementation of Special Refund Procedures

Name of Case: Windham Gas Oil Company.
Date of Filing: October 13, 1983.
Case Number: HEF-0198.

Under the procedural regulations of the Department of Energy (DOE), the Economic Regulatory Administration (ERA) may request the Office of Hearings and Appeals (OHA) to formulate and implement special procedures to make refunds in order to remedy the effects of violations of the DOE regulations. *See* 10 CFR Part 205, Subpart V. The Subpart V regulations set forth general guidelines by which the OHA may formulate and implement a plan of distribution for funds received as part of a settlement agreement or pursuant to a Remedial Order. The Subpart V process is intended to be used in situations where the DOE is unable readily to ascertain the persons who were injured or the amounts that such persons are eligible to receive as a result of enforcement proceedings. *See Office of Enforcement*, 9 DOE ¶ 82,553 at 85,284 (1982).

I. Background

Pursuant to the provisions of Subpart V, on October 13, 1983, the ERA filed a Petition for the Implementation of Special Refund Procedures in connection with a consent order entered into with the Windham Gas Oil Company (Windham). Windham is a "reseller" of refined petroleum products as that term was defined in 10 CFR 212.31, and is located in Windham, Ohio. The firm was subject to the Mandatory Petroleum Price Regulations set forth in 10 CFR Part 212, Subpart F until January 28, 1981, when motor gasoline and other refined petroleum products were exempted from price and allocation controls. Exec. Order No. 12287, 46 FR 9909 (January 30, 1981). A DOE audit of Windham's records revealed possible regulatory violations in the amount of $384,534.49 with respect to the firm's pricing of motor gasoline during the period March 1 through August 31, 1979 (the audit period). In order to settle all claims and disputes between Windham and the DOE regarding the firm's sales of motor gasoline during the audit period, Windham and the DOE entered into a consent order on February 10, 1981, in which Windham agreed to remit $36,000 to the DOE. This payment was deposited into an interest-bearing escrow account for ultimate distribution to the parties injured by the alleged overcharges. This Proposed Decision concerns the distribution of the $36,000 that was deposited into the escrow account, plus accrued interest.

II. Proposed Refund Procedures

We have considered the ERA's Petition for the Implementation of Special Refund Procedures and determined that it is appropriate to establish such a proceeding with respect to the Windham consent order fund. As we have stated in previous Decisions, refunding moneys obtained through DOE enforcement proceedings is the focus of Subpart V proceedings. *See generally Office of Enforcement*, 8 DOE ¶ 82,597 (1981) (hereinafter cited as *Vickers*). Based upon our experience with Subpart V cases, we believe that the distribution of refunds in the present case should take place in two stages. The first stage will attempt to refund moneys to identifiable purchasers of motor gasoline who may have been injured by Windham's pricing practices during the period March 1 through August 31, 1979. After meritorious claims are paid in the first stage, a second stage refund procedure may become necessary. *See generally Office of Special Counsel*, 10 DOE ¶ 85,048 (1982) (hereinafter cited as *Amoco*) (refund procedures established for first stage applicants, second stage refund procedures proposed).

A. Refunds to Identifiable Purchasers

We propose that the Windham consent order funds be distributed to claimants who satisfactorily demonstrate that they have been adversely affected by Windham's alleged pricing practices. The information available to us at this time regarding Windham's operations during the consent order period does not provide specific names and addresses of the firm's customers. However, from our experience with Subpart V proceedings, we believe that the claimants in this proceeding will fall into the following categories: (1) Resellers (including retailers) of motor gasoline, and (2) firms, individuals, or organizations that were consumers (end-users) of motor gasoline. The motor gasoline purchased by these claimants was purchased either directly from Windham or from other firms in a chain of distribution leading back to Windham. In order to received a refund,

each claimant will be required to submit a schedule of monthly purchases of Windham motor gasoline for the period March through August 1979. If the gasoline was not purchased directly from Windham, the claimant must include a statement setting forth his reasons for believing the product originated with Windham. In addition, a reseller or retailer of motor gasoline that files a claim generally will be required to establish that it absorbed the alleged overcharges and was thereby injured. To make this showing, each claimant will be required to show that it maintained "banks" of unrecovered increased product costs in order to demonstrate that it did not subsequently recover those costs by increasing its prices. *See Office of Enforcement*, 10 DOE ¶ 85,029 at 88,125 (1982) (hereinafter cited as *Ada*). In addition, it will have to demonstrate that, at the time it purchased motor gasoline from Windham, market conditions would not permit it to increase its prices to pass through the additional costs associated with the alleged overcharges.

However, as in many prior special refund cases, a reseller will not be required to submit any proof of injury if its refund claim is based on monthly purchases of less than 50,000 gallons.* *Ada* at 88,122. The adoption of a threshold level below which a claimant does not have to submit any evidence of injury is based on several factors. To conduct special refund proceedings with efficiency and reduce administrative costs, the Subpart V regulations authorize the use of presumptions. *See* 10 CFR ¶ 205.282(e). We are especially concerned that the cost of compiling information sufficient to show injury not exceed the amount of the refund to be gained. On balance, we believe that the establishment of a presumption of injury for all claims below 50,000 gallons per month is reasonable under the circumstances of this case. *See Office of Special Counsel: In the Matter of Conoco, Inc.*, 11 DOE ¶ ——, Case No. DFF–0003 (January 23, 1984) and cases cited therein.

If a reseller made only spot purchases from Windham, however, we propose that it should not receive a refund because it is not likely to have suffered an injury. As we have previously stated with respect to spot purchasers:

> [T]hose customers tend to have considerable discretion in where and when to make purchases and would therefore not have made spot market purchases of [the firm's product] at increased prices unless they were able to pass through the full amount of [the firm's] quoted selling price at the time of purchase to their own customers.

Vickers at 85,396–97. We believe the same rationale holds true in the present case. Accordingly, a spot purchaser which files a claim should submit additional evidence to establish that it was unable to recover the increased prices it paid for Windham motor gasoline. *See Amoco* at 88,200.

With respect to customers who were consumers of Windham motor gasoline, a showing of injury will not be required in order to qualify for a refund. *See Standard Oil Co. (Indiana)/Union Camp Corp.*, 11 DOE ¶ 85,007 (1983); *Standard Oil Co. (Indiana)/Elgin, Joliet, and Eastern Railway*, 11 DOE ¶ 85,105 (1983) (end-users of various refined petroleum products granted refunds solely on the basis of documented purchase volumes). Therefore, in this proceeding a consumer need only document the specific quantities of Windham motor gasoline it purchased during the consent order period.

A successful refund applicant will receive a refund based upon a volumetric method of allocating refunds. Under this method, a volumetric refund amount is calculated by dividing the settlement amount by the total gallonage of motor gasoline covered by the consent order. In the present case, based on the information available to us at this time, the volumetric refund amount is $.0041597 per gallon ($36,000 received from Windham divided by 8,654,389 gallons of motor gasoline sold by Windham during the audit period). Successful claimants will receive refunds based on their eligible purchase volumes multiplied by the volumetric refund amount, plus a proportionate share of the interest accrued on the consent order fund since it was remitted to the DOE. As of January 31, 1984, accrued interest will increase the per gallon refund amount to $.0061285. Consequently, a successful claimant who purchased 50,000 gallons of Windham motor gasoline during each of the six months of the audit period will receive a refund of $1,839.

As in previous cases, we will establish a minimum refund amount of $15.00 for first stage claims. We have found through our experience in prior refund cases that the cost of processing claims in which refunds are sought for amounts less than $15.00 outweighs the benefits of restitution in those situations. *See, e.g., Uban Oil Co.*, 9 DOE ¶ 82,541 at 85,225 (1982).

Detailed procedures for filing applications will be provided in a final Decision and Order. Before disposing of any of the funds receiving as a result of the consent order involved in this proceeding, we intend to publicize widely the distribution process to solicit comments on the proposed refund procedures and to provide an opportunity for any affected party to file a claim.

In addition to publishing notice in the **Federal Register**, notice will be provided to the Southeastern Independent Oil Marketers Association, and also to the Independent Gasoline Marketers Council, the National Oil Jobbers Council, the Service Station Dealers of America, the National Association of Convenience Stores, the National Association of Truck Stop Operators, and the Society of Independent Gasoline Marketers of America. These organizations should be helpful in advising potential claimants of this proceeding. In addition, we are continuing our efforts to obtain a list of the names and addresses of first purchasers of Windham motor gasoline.

B. Distribution of the Remainder of the Consent Order Funds

In the event that money remains after all first stage claims have been disposed of, undistributed funds could be distributed in a number of different ways. For example, they could be deposited into the miscellaneous receipts account of the United States Treasury. However, we will not be in a position to decide what should be done with any remaining funds until the first stage refund procedure is completed. We encourage the submission of comments containing proposals for alternative distribution schemes.

It Is Therefore Ordered That:

The refund amount remitted to the Department of Energy by the Windham Gas & Oil Company pursuant to the consent order executed on February 10, 1981 will be distributed in accordance with the foregoing Decision.

Footnote

*Resellers whose monthly purchases during the period for which a refund is claimed exceed 50,000 gallons, but who cannot establish that they did not pass through the price increases, or who limit their claims to the threshold amount, will be eligible for a refund for purchases up to the 50,000 gallons per month threshold amount without being required to submit evidence of injury. *See Vickers* at 85,396; *see also Ada* at 88,122.

BILLING CODE 6450–01–M

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Energy.

ACTION: Notice of Implementation of Special Refund Procedures and Solicitation of Comments.

SUMMARY: The Office of Hearings and Appeals of the Department of Energy solicits comments concerning the appropriate procedures to be followed in refunding $91,913 in consent order funds to members of the public. This moeny is being held in escrow following the settlement of enforcement proceedings involving Waller Petroleum Company, Inc., a reseller-retailer of middle distillates and residual fuel located in Towson, Maryland.

DATE AND ADDRESS: Comments must be filed within 30 days of publication of this notice in the **Federal Register** and should be addressed to the Office of Hearings and Appeals, Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20585. All comments should conspicuously display a reference to case number HEF–0191.

FOR FURTHER INFORMATION CONTACT: Thomas O. Mann, Deputy Director, Office of Hearings and Appeals, 1000 Independence Avenue, SW., Washington, D.C. 20585 (202) 252–2094.

SUPPLEMENTARY INFORMATION: In accordance with § 205.282(b) of the procedural regulations of the Department of Energy, 10 CFR 205.282(b), notice is hereby given of the issuance of the Proposed Decision and

Order set out below. The Proposed Decision relates to a consent order entered into by Waller Petroleum Company, Inc., which settled possible pricing violations in the firm's sales of middle distillates and residual fuel to its customers during the November 1, 1973 through May 31, 1974 audit period.

The Proposed Decision sets forth the procedures and standards that the DOE has tentatively formulated to distribute the contents of an escrow account funded by Waller pursuant to the consent order. The DOE has tentatively established procedures under which purchasers of Waller products during the audit period may file claims for refunds from the consent order fund. Applications for Refund should not be filed at this time. Apropriate public notice will be given when the submission of claims is authorized.

Any member of the public may submit written comments regarding the proposed refund procedures. Commenting parties are requested to submit two copies of their comments. Comments should be submitted within 30 days of publication of this notice in the **Federal Register**, and should be sent to the address set forth at the beginning of this notice. All comments received in this proceeding will be available for public inspection between the hours of 1:00 to 5:00 p.m., Monday through Friday, except federal holidays, in the Public Docket Room of the Office of Hearings and Appeals, located in Room 1E–234, 1000 Independence Avenue, SW., Washington, D.C. 20585.

Dated: March 19, 1984.

George B. Breznay,

Director, Office of Hearings and Appeals.

Proposed Decision and Order of the Department of Energy

Special Refund Procedures

Name of Firm: Waller Petroleum Company, Inc.

Date of Filing: October 13, 1983.

Case Number: HEF–0191.

Under the procedural regulations of the Department of Energy, the Economic Regulatory Administration (ERA) may request that the Office of Hearings and Appeals formulate and implement special procedures to make refunds in order to remedy the effects of violations of DOE regulations. *See* 10 CFR Part 205, Subpart V. The Subpart V regulations set forth general guidelines by which the Office of Hearings and Appeals may formulate and implement a plan of distribution for funds received as a result of an enforcement proceeding. The Subpart V process is intended to be used in situations where DOE is unable readily to ascertain the persons who may be eligible to receive refunds as a result of enforcement proceedings or the amounts that such persons should receive. *See Office of Enforcement*, 9 DOE ¶82,553 (1982).

Pursuant to the provisions of Subpart V, on October 13, 1983, the ERA filed a Petition for the Implementation of Special Refund Proceedings in connection with a consent order entered into with Waller Petroleum Company, Inc. (Waller). Waller is a "reseller-retailer" of middle distillates and residual fuel oils as those terms were defined in 10 CFR 212.31, and is located in Towson, Maryland. A DOE audit of the firm's records revealed possible pricing violations in the firm's sales of No. 2 heating oil and Nos. 4, 5 and 6 fuel oil to its customers during the period from November 1, 1973 through May 31, 1974 (the audit period). In order to settle all claims and disputes between Waller and the DOE regarding the firm's sales of middle distillates and residual fuel oils during the audit period, the firm and the DOE entered into a consent order on August 21, 1979, in which Waller agreed to pay $508,087 directly to 50 identified customers plus $91,913 (including interest to that time) to the DOE in settlement of the firm's potential liability with respect to sales to Waller's other customers during the audit period. The payment to the DOE was deposited into an interest bearing escrow account for ultimate distribution to the parties bearing the burden of the alleged overcharges. This Decision concerns the distribution of the $91,913 that was deposited into the escrow account, plus accrued interest to date.

During the audit of the firm, 61 customers were identified by the ERA has having been overcharged. Pursuant to the Consent Order, 50 of these customers have received payment for their alleged injuries. On September 7, 1979, each of these customers were paid amounts specifically set forth in the Consent Order from the $508,087 fund. Eleven other customers, which were identified as first purchasers, have not yet been paid. These identified first purchasers, together with the amount of the firm's settlement payment attributable to each, are set forth in the table below.

Customer	Portion of settlement amount
Annapolis Utilities, P.O. Box 1871, Annapolis, MD 22404	$1,779
Bulk Sales, 1015 Ingleside Ave., Baltimore, MD 21228	1,270
Eastern Petroleum 706 Baltimore Annapolis Blvd. NE., Glen Burnie, MD 21061	1,766
E. Stewart Mitchell, 1400 Caddox St., Baltimore, MD 21225	1,259
Southern Maryland Oil, Route 301 South, La-Plata, MD 20646	3,506
Space Petroleum, 5602 Baltimore National Pike, Suburban Building, Suite 701, Baltimore, MD 21228	13,188
Stape Beat Co., 3465 North 6th St., Harrisburg, PA 17105	3,017
Tower Sales, 936 East Grant Ave., Tower City, PA 17980	22,492
Tri Gas & Oil Co., P.O. Box 246, Federalsburg, MD 21632	1,770
Way Oil Co., 1062 Old Manheim Pike, P.O. Box 4768, Lancaster, PA 17604	56,825
Wooten Oil & Fuel, P.O. Box 1277, Goldsboro, NC 27530	5,847
Total	91,913

On the basis of the information in the record at this time, we are inclined to distribute the money in the Waller refund pool to the customers indicated above in the amounts specified. In view of the small amount of money involved in this proceeding and since the record indicates that these firms are the parties most likely to have been injured by Waller pricing practices, we have tentatively decided that this would be most equitable and efficient method of accomplishing restitution. (*1*) We recognize, however, that other customers not identified by the ERA audit may be entitled to a portion of the consent order fund. If additional meritorious claims are filed, the appropriate amount of refund to each firm will be determined after analyzing those claims.

In order to obtain a refund, each of the firms will be required to file a refund application in which it certifies to the Office of Hearings and Appeals the amount of its purchases from Waller during the audit period and that there has been no change in ownership of the refund applicant since that time. If there has been a change in ownership, we will determine which owner is entitled to the refund. In addition, a firm that requests a refund of more than $25,000 will need to show that it did not pass through the effects of the alleged overcharges to its customers. (*2*) *See, e.g., Enterprise Products Company*, 10 DOE ¶ 85,017 (1982); *Tenneco Oil Co./Mid-Continent Systems, Inc.*, 10 DOE ¶ 85,009 (1982).

In the event that money remains after all claims are disposed of, undistributed funds could be distributed in various ways. For example, they could be deposited into the miscellaneous receipts account of the United States Treasury or be distributed to the states or counties where the firms' sales were apparently made, provided the state or county files a plan with this Office to use these funds for an energy related project which meets with our approval. *See Worldwide Energy Corp.*, 11 DOE ¶ 85,023 (1983). However, it is premature to decide this issue now, since we do not know how much, if any, money will remain unclaimed. We therefore reserve judgment on this issue.

It Is Therefore Ordered That:

The $91,913 refund remitted to the Department of Energy by Waller Petroleum Company, Inc. pursuant to the Consent Order executed on August 21, 1979 will be distributed in accordance with the foregoing Decision.

Footnotes

(*1*) In previous decisions concerning special refund proceedings, we have generally required a party claiming a portion of a consent order fund who is not a consumer to demonstrate that it did not pass through the effects of the overcharges to its customers. We have also stated in our prior decisions, however, that a party that purchased a relatively small amount of product need not make such a showing. *See Office of Special Counsel (Tenneco)*, 9 DOE ¶ 82,536 at 85,202–05 (1982); *Office of Enforcement (Lyon County Cooperative)*, 10 DOE ¶ 85,016 (1982). In the present case, although data pertaining to the purchase volumes of the customers identified are not in the record, it appears that all except one of the purchase volumes and refunds will be relatively small. We therefore propose that all firms except Way

Oil Co. not be required to demonstrate that they absorbed the alleged overcharges.

(2) Our decision to adopt a threshold level below which applicants do not have to submit any further evidence of injury permits the OHA to conduct special refund proceedings with much greater efficiency and lower administrative costs. It also lessens the burden of what might otherwise be an onerous or impossible task for small firms and is authorized by the Subpart V regulations. *See* 10 CFR 205.282(e). In the past, we have set the threshold level on the basis of volumetric purchases. *See, e.g., Office of Special Counsel (Tenneco),* 9 DOE ¶ 85,538 at 82,203–05 (1982); *Office of Enforcement (Vickers),* 8 DOE ¶ 82,597 at 85,396 (1981). However, because we do not have adequate volumetric information in this case, we have established a threshold level based on the claimant's potential refund amount. This amount was determined by consideration of the same factors considered in setting volumetric thresholds. *See Office of Enforcement (Sid Richardson),* 10 DOE ¶ 85,056 at 88,275–76 (1983).

BILLING CODE 6450–01–M

Western Area Power Administration

Fryingpan-Arkansas Project Reallocation; Intent To Reallocate Power and Call for Applications for Allocations

AGENCY: Western Area Power Administration, DOE.

ACTION: Notice of intent to reallocate power and call for applications for allocations.

SUMMARY: The Western Area Power Administration (Western) adopted a final marketing plan for power from the Mt. Elbert Pumped-Stofage Powerplant of the Fryingpan-Arkansas Project (Fry-Ark) which was published in the **Federal Register** on June 23, 1981 (46 FR 32491). That marketing plan provided, in part, for the reallocation of power allocated under the plan but not placed under contract. Western has calculated the amount of Fry-Ark power to be reallocated, and is publishing this notice to announce the reallocation and solicit applications for allocations from eligible entities.

DATES: Written comments on the proposal and/or applications for power are due in the office of the Area Manager at the address given below, no later than 30 days from the publication of this notice in the **Federal Register**. This proposal will become final 30 days from its publication in the **Federal Register** unless Western publishes another **Federal Register** notice reflecting any differences between this proposal and any amended final determination.

ADDRESS: Comments and/or applications for allocations may be mailed to:

Mr. Peter G. Ungerman, Area Manager, Loveland-Fort Collins Area Office, Western Area Power Administration, P.O. Box 3700, Loveland, CO 80539, (303) 224–7201.

FOR FURTHER INFORMATION CONTACT:

Mr. Peter G. Ungerman, Area Manager, Loveland-Fort Collins Area Office, Western Area Power Administration, P.O. Box 3700, Loveland, CO 80539, (303) 224–7201.

Mr. John DiNucci, Director, Division of Marketing and Rates, Western Area Power Administration, P.O. Box 3402, Golden, CO 80401, (303) 231–1545.

SUPPLEMENTARY INFORMATION:

I. Regulatory Procedural Requirements

A. *Determination Under Executive Order 12291.* The Department of Energy has determined that this is not a major rule because it does not meet the criteria of section 1(b) of Executive Order 12291, 46 FR 13193 (February 19, 1981). In addition, Western has an exemption from sections 3, 4, and 7 of the Executive Order.

B. *Regulatory Flexibility Analysis.* Pursuant to the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) each agency, when required by 5 U.S.C. 553 to publish a proposed rule, is further required to prepare and make available for public comment an initial regulatory flexibility analysis to describe the impact to the proposed rule on small entities.

The Administrator of Western certified that the Fry-Ark power marketing plan (46 FR 32491) is not a rule under the Regulatory Flexibility Act, and that it would not, if promulgated, have a significant economic impact on a substantial number of small entities. The Administrator's certification was published with the marketing plan and was sent to the Chief Counsel for Advocacy of the Small Business Administration.

C. *Environment Evaluation.* The reallocation of power under the existing marketing plan was evaluated before implementation of the plan and found not to be a major Federal action which significantly affects the environment. An environmental assessment or environmental impact statement is, therefore, not required under the National Environmental Policy Act of 1969.

D. *Statutory Basis.* This reallocation was authorized in the final marketing plan for power from the Mt. Elbert Powerplant established by Western pursuant to the Department of Energy Organization Act (42 U.S.C. 7101, *et seq.*) and the Reclamation Act of 1902 (43 U.S.C. 372, *et seq.*) as amended and supplemented by subsequent enactments, particularly by section 9(c) of the Reclamation Project Act of 1939 (43 U.S.C. 485h(c)) and the Fryingpan-Arkansas Project Acts (Pub. L. 87–590, 76 Stat. 389 (August 16, 1962) and Pub. L. 93–493, 88 Stat. 1486 (October 27, 1974)).

II. Background

Western's Loveland-Fort Collins Area Office markets power generated at 18 hydroelectric powerplants in Colorado, Wyoming, and Montana to 56 customers in a 200,000 square mile service area. Seventeen of these powerplants and their associated transmission facilities comprise the Pick-Sloan Missouri Basin Program-Western Division power system. The remaining powerplant, the Mt. Elbert Powerplant, and its associated transmission line comprise the Fry-Ark from which power is to be allocated under this **Federal Register** notice.

On March 9, 1976, the United States Bureau of Reclamation published a proposed marketing plan and rate for power from Fry-Ark (41 FR 10116).

After reviewing the proposal and the public comments on that proposal, Western held a public meeting on April 12, 1978, at which Western presented a modified plan for marketing Fry-Ark power. Delays in the scheduled inservice date of the Mt. Elbert Powerplant caused delays in preparing a final marketing plan. On receipt of notification of a new scheduled inservice date for the powerplant, Western reviewed the changing power supply conditions in the Loveland-Fort Collins Area and determined that additional public participation would be helpful in developing a final marketing plan. On September 30, 1980, a public information meeting was held at which additional public comments were solicited.

A proposed marketing plan was published in the **Federal Register** on March 31, 1981 (46 FR 19809). Public information and comment forums were held in Thornton, Colorado, on April 8, 1981, and April 29, 1981. After consideration of the comments received at these public forums, a final marketing plan was published in the **Federal Register** on June 23, 1981 (46 FR 32491).

Allocations of Fry-Ark power were approved by the Administrator of Western and were announced by a letter to all customers and interested parties in the marketing area as well as by press release. Because of problems

encountered by allottees in securing transmission arrangements for the delivery of Fry-Ark power and/or pump-back energy, and problems encountered in the operation of the first unit of the Mt. Elbert Powerplant, Western extended the deadline for placing allocations under contract on several occasions. On September 13, 1983, Western sent certified letters to all allottees of Fry-Ark power informing the allottees that any Fry-Ark allocation not under contract by November 30, 1983, would be rescinded. Ten customers responded prior to the deadline with total allocations under contract of 129,794 kilowatts in summer seasons and 133,224 kilowatts in winter seasons. The remaining Fry-Ark power, to be reallocated under the marketing plan, is 70,206 kilowatts in summer seasons and 66,776 kilowatts in winter seasons.

The reallocation method for Fry-Ark power appears below.

Reallocation of Fryingpan-Arkansas Project Power

1. *Applicability of Final Marketing Plan.* Except as otherwise specifically provided in this **Federal Register** notice, all power to be allocated hereunder shall be allocated and furnished in accordance with the provisions of the "Fryingpan-Arkansas Project Power Marketing Plan" published in the **Federal Register** on June 23, 1981 (46 FR 32491).

2. *Allocation Procedures.* In lieu of the procedures set forth in section 6 of the "Fryingpan-Arkansas Project Power Marketing Plan," the following procedures will be followed in reallocating the available Fry-Ark capacity:

a. Entities desiring an allocation of the available Fry-Ark capacity shall submit a request so that it is received by the Area Manager within 30 days after publication of this notice in the **Federal Register**. Entities should request power separately for the winter and summer seasons. System peakloads for the 1982–1983 winter season and the 1983 summer season should be set forth as part of the application. For preference entities that have a portion of their load within the marketing area, peakloads should be calculated only for that portion of its system within the marketing area.

b. Allotment of the available Fry-Ark capacity will be made first to preference entities in the Fry-Ark market area.

c. *Undersubscription.* If preference entities in the Fry-Ark market area do not subscribe for all the capacity available, the remaining capacity will be allotted first to preference entities outside the marketing area, then to nonpreference entities. If capacity remains undersubscribed, it may be sold on a seasonal, short-term, or withdrawable basis by Western through the 1989 summer season.

d. *Oversubscription.* If the total amount of capacity applied for exceeds the capacity available, a percentage of the total available capacity shall be reserved for the group of requesting preference entities having 1980 Fry-Ark marketing area peakloads of 20 MW or less. The percentage to be reserved for this group of small customers shall be determined by considering the number of members of this group and the total capacity requested by all preference entities.

If all of the capacity reserved for this group is not subscribed, the remainder will be added to the amount available for the group of preference entities with loads greater than 20 MW.

Capacity available in any season for each group will be apportioned among the members of the group by using the following formula:

$$(\text{Fry-Ark Allocation} + \text{CROD}_I) \div \text{Loads}_I = (\text{CROD}_A + \text{CROD}_T) \div \text{Load}_T$$

Where: Fry-Ark Allocation = The amount of Fry-Ark capacity allocated to the individual group member for the service season

Load_I = 1983 seasonal load of the individual group member

CROD_I = Federal resources allocated to the group member

Load_T = Total 1983 seasonal load of all the members of the group

CROD_A = Fry-Ark capacity available for allocation to the group

CROD_T = Federal resource allocated to all members of the group

If use of this formula results in a negative allocation to any group member, that member shall receive a zero allocation. The remaining allocations shall then be recomputed using the above formula. Separate allocations will be made for the summer and winter seasons, as defined in the marketing plan. No entity shall receive an allocation larger than that for which it applies.

3. *Term of Contract:* In place of the provisions set forth in section 9 of the Fryingpan-Arkansas Project Marketing Plan the following shall be applied to allocations made pursuant to this **Federal Register** notice:

Contracts for Fry-Ark capacity allocated hereunder shall be entered into on or before July 15, 1984. The term of these contracts shall be through the 1989 summer season.

Western reserves the right to rescind any allocation if, by July 15, 1984, an allottee has not entered into a contract to take and/or pay for its allotted capacity from and after the date specified in its contract. Power which is allocated, but not contracted for by the allottee by July 15, 1984, may be sold on a seasonal, short-term, or withdrawable basis by Western through the 1989 summer season.

Allottees may contract to take the allocated capacity on a staged basis, until the first full service season which occurs 1 year after the inservice date of the second Mt. Elbert unit. Power available during the buildup period, because of allocations being taken on a stepped up basis, may be sold by Western on a short-term basis, subject to withdrawal.

Issued at Golden, Colorado, March 22, 1984.

Robert L. McPhail,

Administrator.

BILLING CODE 6712-01-M

Meeting of the Assembly of the Telecommunications Industry Advisory Group

Pursuant to Section 10(a) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Telecommunications Industry Advisory Group's Assembly scheduled to meet on Wednesday, May 2, 1984. The meeting will be held at 9:30 a.m. in Room 856 of the Federal Commission's offices at 1919 M Street, NW., Washington, D.C. The meeting will be open to the public.

The agenda is as follows:

I. General Administrative Matters
II. Proposed Amendment To The By-Laws
III. Review Final Steering Committee Account Proposal
IV. Other Business
V. Presentation of Oral Statements
VI. Adjournment

With prior approval of the Group Chairman, Gerald P. Vaughan, oral statement, while not favored or encouraged, may be allowed if time permits and if the Group Chairman determines that an oral presentation is conducive to the effective attainment of Advisory group objectives. Anyone not a member of the Assembly and wishing to make an oral presentation should contact Stephen T. Duffy, Group Vice-Chairman (202/634-1509), at least five days prior to the meeting date.

William J. Tricarico,

Secretary, Federal Communications Commission.

Radio Advisory Committee; Meeting

April 12, 1984.

The next meeting of the Advisory Committee on Radio Broadcasting has been scheduled for 9:30 a.m., Thursday, April 12, 1984, in Room 330, 1200 19th Street, NW., Washington, D.C.

The Committee will consider recommendations to the FCC concerning: Implementation of the new bilateral agreement between the United States and Canada on AM broadcasting which adapts to particular U.S. and Canadian needs the Final Acts of the 1981 Rio de Janeiro Conference on AM broadcasting in Region 2 and supersedes the North American Regional Broadcasting Agreement (NARBA), insofar as the United States and Canada are concerned; the development of similar revisions to the U.S. Mexican AM Radio Broadcasting Agreement; and other business.

The meetings of the Committee are public, and are open for participation by all interested persons. The meeting scheduled for April 1984, may, if the participants so decide, be recessed for resumption at such other time and place as they may designate.

For further information please contact the Committee Chairman, Louis C. Stephens, or Jonathan David, at F.C.C. Headquarters, (202) 632-7792.

William J. Tricarico,

Secretary, Federal Communications Commission.

BILLING CODE 6712-01-M

[MM Docket No. 84-284; File No. BPCT-831027KH]

John R. Powley, et al.; Hearing Designation Order

Adopted: March 21, 1984.
Released: March 23, 1984.

In re Applications of John R. Powley, MM Docket No. 84-284, File No. BPCT-831027KH; Matlock Communications, Inc., MM Docket No. 84-285, File No. BPCT-831121KI; Barbara Chavez and Robert Vinson, d.b.a. Logan Television Company, Ltd., MM Docket No. 84-286, File No. BPCT-840104KG; For Construction Permit for new TV Station on Channel 12, Logan, Utah.

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications of John R. Powley, Matlock Communications, Inc. (Matlock), and Logan Television Company, Ltd. (Logan) for authority to construct a new commercial television station on Channel 12, Logan, Utah.

2. No determination has been made that the tower heights and locations proposed by the applicants would not constitute a hazard to air navigation. Accordingly, an appropriate issue will be specified.[1]

3. John R. Powley and Logan each proposes to construct transmitting facilities at the same site on top of Mount Pisgah. This site is 55 miles from the reference point of Channel 13, Salt Lake City, Utah. Section 73.610(c)(1) of the Commission's Rules requires a minimum separation of 60 miles. The applicants, therefore, would be short-spaced 5 miles to Channel 13, Salt Lake City, Utah.[2] An issue will be specified to determine whether circumstances exist warranting a waiver. In assessing the circumstances to determine whether a waiver is warranted, the Administrative Law Judge should consider the fact that the other applicant in this proceeding has specified a fully-spaced site.

4. Section V-C, Item 10, FCC Form 301, requires that an applicant submit figures for the area and population within its predicted Grade B contour. Matlock has not submitted figures for the population. Consequently, we are unable to determine whether there would be a significant difference in the size of the area and population that each applicant proposes to serve. Matock will be required to submit an amendment

[1] The Commission is not in receipt of FAA's determination for John R. Powley and Matlock.

[2] There are six (6) pending applications for Channel 13, Salt Lake City, Utah. However, the site proposed by John R. Powley and Logan is not short-spaced to any of the sites specified by the Salt Lake applicants.

showing the required information, within 20 days after this Order is released, to the presiding Administrative Law Judge. The presiding Administrative Law Judge will consider any significant difference in the areas and populations served under the standard comparative issue.

5. The terrain profiles submitted by Matlock have not been determined in accordance with Section 73.684 of the Commission's Rules. Section 73.684(g) generally requires use of U.S. Geological Survey Topographic Quadrangle Maps, if available for the area involved, in constructing terrain profiles from which average terrain elevations are determined. Use of information from the *National Oceanic and Atmospheric Administration Thirty Second Interval Point Elevation Data Base* does not comply with § 73.684(g). Matlock will be required to compute the radial elevations, site elevation and contour distances in accordance with § 73.684 and to submit copies of the profile graphs and topographic maps employed to the presiding Administrative Law Judge within 20 days after the date of the release of this Order.

6. An applicant seeking authority to construct a commercial television station is required to afford equal employment opportunity to qualified persons. See § 73.2080 of the Commission's Rules and Section VI, FCC Form 301. Pursuant to this requirement, an applicant who proposes to employ five or more full-time station employees must establish a program of practices to assure equal employment opportunities. Although Logan intends to employ at least five full-time employees, it has failed to submit the model EEO program required by FCC Form 301. Therefore, we cannot conclude that the applicant has complied with § 73.2080. Accordingly, Logan will be required to submit its model EEO program to the presiding Administrative Law Judge within 20 days after this Order is released.

7. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. Since these applications are mutually exclusive, the Commission is unable to make the statutory finding that their grant will serve the public interest, convenience, and necessity. Therefore, the applications must be designated for hearing in a consolidated proceeding on the issues specified below.

8. Accordingly, it is ordered, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine where there is a reasonable possibility that the tower height and location proposed by each applicant would constitute a hazard to air navigation.

2. To determine whether the proposals of John R. Powley and Logan are consistent with the minimum mileage separation requirements of § 73.610 of the Commission's Rules, and if not, whether circumstances exist which would warrant a waiver of the rule.

3. To determine which of the proposals would, on a comparative basis, best serve the public interest.

4. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

9. It is further ordered, That Matlock shall submit an amendment stating the population within its predicted Grade B contour, within 20 days after this Order is released, to the presiding Administrative Law Judge.

10. It is further ordered, That Matlock shall compute its radial elevations, site elevation and contour distances in accordance with § 73.684 and to submit copies of the profile graphs and topographic maps employed to the presiding Administrative Law Judge within 20 days of the date of the release of this Order.

11. It is further ordered, That Logan shall submit its model EEO program to the presiding Administrative Law Judge within 20 days of the date of the release of this Order.

12. It is further ordered, That the Federal Aviation Administration is made a party respondent to this proceeding with respect to Issue 1.

13. It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants and the party respondent herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

14. It is further ordered, That the applicants herein shall, pursuant to 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Roy J. Stewart,

Chief, Video Services Division, Mass Media Bureau.

BILLING CODE 6712-01-M

FEDERAL RESERVE SYSTEM

Bankers Trust New York Corporation, et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (49 FR 794) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of regulation Y (49 FR 794) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in section 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 18, 1984.

A. Federal Reserve Bank of New York (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Bankers Trust New York Corporation,* New York, New York; to engage *de novo* through its subsidiary, BT Commercial Corporation, in making or acquiring loans and other extensions of credit such as would be made by a commercial finance company, including commercial loans secured by a borrower's accounts receivable, inventory, or other assets; purchasing or acquiring accounts receivable and making advances thereon as would be done by a factor, servicing such loans or accounts for others; and acquiring and selling participants in such obligations; making or acquiring leases and installment sale contracts of personal property; servicing such leases and installment sales contracts for others; acting as agent, broker or adviser in connection with such transactions; and acquiring participations in the obligations arising for such transactions; 225.25(b) (1) and (5).

2. *B.N.Y. Holdings (Delaware),* Wilmington, Delaware, and *The Bank of New York Company, Inc.,* New York, New York; to engage *de novo* through their subsidiaries, ARCS Mortgage, Inc., Canoga Park, California, ARCS Mortgage Corp., New York, New York, The Bank of New York Trust Company of Florida, N.A., Miami, Florida, the Bank of New York Life Insurance Co., Inc., Phoenix, Arizona, and BNY Financial Corporation, New York, New York in the following activities: ARCS Mortgage Corp.—making, acquiring or servicing loans or other extensions of credit for the company's account or for the account of others, such as would be made by a mortgage company; ARCS Mortgage, Inc.—making, acquiring or servicing loans or other extensions of credit for the company's account or for the account of others, such as would be made by a mortgage company; The Bank of New York Life Insurance Co., Inc.—underwriting, on a reinsurance basis, credit life insurance and credit accident lending affiliates of the Bank of New York Company, Inc., serving the states of New York and Delaware; The bank of New York Trust Company of Florida, N.A.—performing functions or activities that may be performed by a trust company (including activities of a fiduciary, agency, or custodial nature), in the manner authorized by federal or state law including acceptance of deposits that are generated from trust funds not currently invested and that are properly secured to the extent required by law, deposits representing funds received for a special use in the capacity of managing agent or custodian for an owner of, or investor in, real property, securities dealers or purchasing money market instruments such as certificates of deposit, commercial paper, government or municipal securities, and bankers acceptances, serving the state of Florida; B.N.Y. Financial corporation—making, acquiring or servicing loans or other extensions of credit for the company's account or for the account of others, such as would be made by a mortgage company.

Board of Governors of the Federal Reserve System, March 26, 1984.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Citizens Bancorp of Morehead, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (49 FR 794) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than April 20, 1984.

A. **Federal Reserve Bank of Cleveland** (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *Citizens Bancorp of Morehead, Inc.,* Morehead, Kentucky; to become a bank holding company by acquiring 100 percent of the voting shares of the Citizens Bank, Morehead, Kentucky. Comments on this application must be received not later than April 23, 1984.

2. *Jessamine Bancshares, Inc.,* Nicholasville, Kentucky; to become a bank holding company by acquiring 80 percent of the voting shares of The First National Bank & Trust Company, Nicholasville, Kentucky. Comments on this application must be received not later than April 23, 1984.

B. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *C.S.B. Holding Corporation,* Wyoming, Iowa; to become a bank holding company by acquiring 80 percent of the voting shares of Citizens State Bank, Wyoming, Iowa.

2. *Peoples Bankshares, Ltd.,* Waterloo, Iowa; to acquire 80 percent of the voting shares of First State Bank, Britt, Iowa.

C. **Federal Reserve Bank of St. Louis** (Delmar P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Community Bancorp of McLean County, Kentucky, Inc.,* Island, Kentucky; to become a bank holding company by acquiring at least 80 percent of the voting shares of First Security Bank of McLean County, Island, Kentucky.

D. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Britton Bancshares, Inc.,* Ellsworth, Kansas; to become a bank holding company by acquiring 100 percent of the voting shares of Citizens State Bank & Trust Co., Ellsworth, Kansas.

Board of Governors of the Federal Reserve System, March 26, 1984.

James McAfee,

Associate Secretary of the Board.

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 15 U.S.C. 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the

premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period:

Transaction	Waiting period terminated effective
(1) 84-0155—Mr. Alan E. Symonds' proposed acquisition of voting securities of Vertipile, Incorporated.	Mar. 8, 1984.
(2) 84-0156—Vertipile Incorporated's proposed acquisition of assets of Quaker Fabric Corporation (Mr. Alan E. Symonds, UPE).	Do.
(3) 84-0160—K mart Corporation's proposed acquisition of voting securities of Newco.	Do.
(4) 84-0162—Hechinger Company's proposed acquisition of voting securities of Newco.	Do.
(5) 84-0171—Asgot Incorporated's proposed acquisition of voting securities of Altair International Incorporated (Charles Hamitzy, UPE).	Do.
(6) 84-0176—Asgot Incorporated's proposed acquisition of voting securities of Altair International Incorporated (Clifford Cloutier, UPE).	Do.
(7) 84-0169—Kings Entertainment Company's proposed acquisition of assets of Taft Broadcasting Company.	Do.
(8) 84-0164—Wetterau Incorporated's proposed acquisition of assets of The Kroger Company.	Do.
(9) 84-0167—International Thoroughbred Breeders, Incorporated's proposed acquisition of assets of Eagle Downs Racing Association.	Do.
(10) 84-0166—International Thoroughbred Breeders, Incorporated's proposed acquisition of assets of Continental Thoroughbred Racing Association (Herbert Barness and Irma Barness, UPE's).	Do.
(11) 84-0161—David A. Jones (Concord Corporation), proposed acquisition of Bishop Incorporated.	Mar. 13, 1984.
(12) 84-0106—General Instrument Corporation's proposed acquisition of TOCOM Incorporated.	Do.
(13) 84-0133—Land of Lincoln Savings and Loan's proposed acquisition of voting securities of The Illinois Company, Incorporated.	Do.
(14) 84-0136—The 1964 Simmons Trust's proposed acquisition of voting securities of GAF Corporation.	Do.
(15) 84-0148—GFI/Knoll International Holding Company's proposed acquisition of voting securities of Masonite Corporation.	Do.
(16) 84-0168—IMASCO Limited's proposed acquisition of voting securities of Peoples Drug Stores Incorporated.	Do.
(17) 84-0167—IMASCO Limited's proposed acquisition of voting securities of Peoples Drug Stores Incorporated.	Do.
(18) 84-0154—Richard W. Snyder's proposed acquisition of assets of Arco Comfort Products Company (Atlantic Richfield Company, UPE).	Mar. 14, 1984.
(19) 84-0144—GB-Inno-BM's proposed acquisition of voting securities of Scotty's Incorporated.	Do.
(20) 84-0122—Allegheny and Western Energy Corporation's proposed acquisition of voting securities of Columbia Gas of West Virginia, Incorporated (The Columbia Gas System, Incorporated, UPE).	Mar. 15, 1984.
(21) 84-0168—John W. Kluge's proposed acquisition of voting securities of Metromedia Incorporated.	Do.
(22) 84-0173—Reed International P.L.C.'s proposed acquisition of assets of Whitcom Investment Company.	Do.
(23) 84-0176—Gerber Products Company's proposed acquisition of voting securities of Bates Nitewear Company and Bates Realty Company (Victor Bates, UPE).	Do.
(24) 84-0165—Campbell Soup Company's proposed acquisition of voting securities of Mendeleon-Zeller Company, Incorporated.	Do.
(25) 84-0189—Ashland Oil Incorporated's proposed acquisition of voting securities of Daniel, Mann, Johnson and Mendenhall.	Do.
(26) 84-0194—Crownx Incorporated's proposed acquisition of assets of Seven Nursing and Convalescent Centers (Sidney B. Ames, UPE).	Do.
(27) 84-0199—Elsinore Corporation's proposed acquisition of voting securities of Playboy of New Jersey, Incorporated, Playboy Enterprises, Incorporated (Hugh M. Hefner, UPE).	Do.
(28) 84-0202—Pantry Pride, Incorporated's proposed acquisition of voting securities of Devon Stores Corporation (Philip Devon, UPE).	Do.
(29) 84-0102—Roy M. Huffington (Huffington, Inc.), proposed acquisition of assets of Pacific Oasis Corporation.	Mar. 19, 1984.
(30) 84-0191—Safeway Stores Incorporated's proposed acquisition of assets of Thriftmart Incorporated.	Do.
(31) 84-0132—Energy Methods Corporation's proposed acquisition of voting securities of Tenneco, Incorporated.	Mar. 20, 1984.
(32) 84-0183—Schlumberger Limited's proposed acquisition of voting securities and assets of the Offield Service Business in U.S. and Canada (The Dow Chemical Company, UPE).	Do.
(33) 84-0192—Schlumberger Limited's proposed acquisition of voting securities of NEWCO.	Do.
(34) 84-0193—The Dow Chemical Company's proposed acquisition of voting securities of NEWCO.	Do.
(35) 84-0153—Sumitomo Corporation's proposed acquisition of voting securities of Auburn Steel Company, Incorporated (Chisenachi Tatemono Company, Limited, UPE).	Do.
(36) 84-0185—Gibraltar Financial Corporation of California's proposed acquisition of Cathedral Mortgage Company Incorporated (Avco Corporation, UPE).	Do.
(37) 84-0196—Bitoil PLC's proposed acquisition of assets of Amax Petroleum Corporation (Amax, Incorporated, UPE).	Do.

GENERAL SERVICES ADMINISTRATION

Office of the Administrator Advisory Board; Meeting

Notice is hereby given that the GSA Advisory Board's subcommittees on Supply and Distribution and Contracting will meet on April 17, 1984 from 9:00 a.m. to 4:30 p.m. in room 1121, Crystal Mall 4, 1941 Jefferson Davis Highway Arlington, Va. 20406.

The agenda will cover management initiatives of GSA's Office of Federal Supply & Services (FSS), including productivity improvement efforts; actions to maximize civilian agency procurement through FSS sources; and, FSS business relationships with foreign and mutli-national corporations. This meeting is open to the public.

Questions regarding this meeting should be directed to Mr. James Dean on (202) 566-0382.

Dated: March 20, 1984.

Roger C. Dierman,

Deputy Associate Administrator.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Services (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on March 23.

Public Health Service

Office of the Assistant Secretary for Health

Subject: National Health and Nutrition Examination Survey I Epidemiologic Followup Study: Continued Followup 1985-86—new
Respondents: Individuals
Subject: Evaluation of Data Dissemination and Data Use—new
Respondents: Individuals, State and local governments, businesses, Federal agencies or employees
OMB Desk Officer: Fay S. Iudicello

Food and Drug Administration

Subject: Environmental Impact Considerations—existing collection
Respondents: Business firms
Subject: Notice of Participation—existing collection
Respondents: Business firms
Subject: Adverse Drug Reaction, Lack of Effectiveness, Product Defect Report (0910-0012)—extension no change
Respondents: Business firms

Subject: (Petition for) Administrative Reconsideration of Action—existing collection
Respondents: Business firms
Subject: Advisory Opinions—existing collection
Respondents: Business firms
OMB Desk Officer: Bruce Artim

Office of the Secretary

Subject: Awareness of and Attitudes About Selected Types of Consumer Information—new
Respondents: Households
OMB Desk Officer: Milo Sunderhauf

Social Security Administration

Subject: Vocational Rehabilitation "301" Program Development (0960–0282)—revision
Respondents: State vocational rehabilitation agencies
Subject: Quality Control Negative Case Action Worksheet/Review Schedule (0960–0156)—revision
Respondents: State agencies administering Aid to Families with Dependent Children and adult financial assistance programs
OMB Desk Officer: Milo Sunderhauf

Copies of the above information collection clearance packages can be obtained by calling the HHS Reports Clearance Officer on 202–245–6511.

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, D.C. 20503, ATTN: (name of OMB Desk Officer).

Dated: March 26, 1984.

Robert F. Sermier,

Deputy Assistant Secretary for Management Analysis and Systems.

Food and Drug Administration

[FDA-225-84-2003]

Memorandum of Understanding With the Interstate Shellfish Sanitation Conference

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has executed an agreement with the Interstate Shellfish Sanitation Conference (ISSC). The purpose of the agreement is to establish a basis upon which to foster and to improve the sanitation and quality of shellfish in this country by stating the responsibilities of FDA and ISSC in the establishment of the Interstate Sanitation Program (ISSP) and the ISSC Procedures (Procedures).

EFFECTIVE DATE: This agreement became effective March 14, 1984.

FOR FURTHER INFORMATION CONTACT: Walter J. Kustka, Intergovernmental and Industry Affairs Staff (HFC–50), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1583.

SUPPLEMENTARY INFORMATION: In accordance with § 20.108(c) (21 CFR 20.108(c)), which states that all agreements and memoranda of understanding between FDA and others shall be published in the **Federal Register**, the agency is publishing the following memorandum of understanding:

Memorandum of Understanding Between the Interstate Shellfish Sanitation Conference and the Food and Drug Administration

I. Purpose

This agreement will establish a basis upon which to foster and improve the sanitation and quality of shellfish in this country by stating the responsibilities of the Food and Drug Administration (FDA) and the Interstate Shellfish Sanitation Conference (ISSC) in the establishment of the Interstate Shellfish Sanitation Program (ISSP) and the ISSC Procedures (Procedures).

II. Definitions

A. "Conference meetings" means the duly called meetings of the ISSC.

B. "ISSC" means the Interstate Shellfish Sanitation Conference. The ISSC consists of agencies from shellfish producing and receiving States, FDA, the shellfish industry, and the National Marine Fisheries Service of the U.S. Department of Commerce.

C. "ISSP" means the Interstate Shellfish Sanitation Program adopted by the ISSC. The ISSP is a set of guidelines for sanitary control of shellfish that is adequate to insure that the shellfish produced in States that comply with these guidelines will be safe and sanitary.

D. "NSSP" means the National Shellfish Sanitation Program. The NSSP consists of agencies from shellfish producing States, FDA, and the shellfish industry. Under international agreements with FDA,foreign governments also participate in the NSSP.

E. "Procedures" means the formally adopted methods of accomplishing ISSC business not otherwise established in the constitution or bylaws of the ISSC. The Procedures will establish methods for uniform application of the ISSP and will guide the activities and relationships of ISSC participants.

F. "Shellfish" means all edible species of molluscan bivalves, the most common of which are the fresh frozen oyster, clam, and mussel. All scallop species from the family Pectinidae are excluded from this definition.

G. "State shellfish regulatory officials" means those officials that have responsibility for any one of the following regulatory activities: Classification of shellfish growing waters; patrol of shellfish growing waters; sanitation of shellfish processing, storage or distribution facilities, or laboratory analysis of shellfish samples.

III. Background

FDA is the Federal agency responsible for enforcing the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 301 et seq., the Fair Packaging and Labeling Act, 15 U.S.C. 1451 et seq., and certain portions of the Public Health Service Act, including 42 U.S.C. 241, 242, 243, and 264. These laws require that all foods shipped in interstate commerce, including shellfish, be prepared, packed, and held at all times under sanitary conditions; that they be honestly and informatively labeled; and that the food itself be safe, clean, and sanitary. FDA is authorized to accept assistance from State and local authorities in the enforcement of laws to prevent and to suppress the spread of communicable disease, 42 U.S.C. 243 and 21 U.S.C. 372.

This latter authority gave rise to the NSSP, which was initiated in 1925 and has continued, to date, as a voluntary FDA, State, and shellfish industry program. The NSSP Manual of Operations, last published in 1965, sets forth the standards and procedures that govern the NSSP, including the recommended sanitary control practices for regulating the production and shipment of shellfish in interstate commerce.

The ISSC was formed September 21, 1982, at a meeting held in Annapolis, MD. Participants at the meeting included regulatory officials from 22 States, FDA, the National Marine Fisheries Service of the U.S. Department of Commerce, and members of the shellfish industry. At this meeting, the State officials ratified a constitution, bylaws, and minimum procedures for the formation of the ISSC.

The purpose of the ISSC is to provide a formal structure wherein State

regulatory authorities can establish updated guidelines, and procedures for the uniform application of those guidelines, for sanitary control of the shellfish industry. The ISSC is a voluntary organization and is open to all persons interested in fostering controls that will assure sources of safe and sanitary shellfish.

IV. Substance of Agreement

A. FDA agrees to:

1. Recognize the ISSC as the primary voluntary national organization of State shellfish regulatory officials that will provide guidance and counsel on matters for the sanitary control of shellfish.

2. Evaluate State shellfish sanitary control programs using the guidelines of the ISSP, the Procedures, and other appropriate criteria including applicable Federal laws and regulations.

3. Provide the ISSC with information on any State shellfish sanitation control program that FDA finds not to be in substantial compliance with the criteria referenced in IV.A.2.

4. Promote and maintain shellfish sanitation Memorandums of Understanding (MOU) with foreign countries that have agreed to follow the NSSP Manual of Operations. FDA will inform the ISSC of the agency's evaluation of these foreign shellfish sanitation control programs. FDA will take appropriate steps to assure that references to the NSSP in existing MOU's are changed to the ISSP as the MOU's are revised or updated.

5. Coordinate Federal interagency affairs on matters of concern to the ISSC, including classification of shellfish growing waters under Federal jurisdiction.

6. Support or provide shellfish sanitation training, seminars, technical assistance, and scientific research as resources permit. FDA will make every effort to maintain a current scientific basis for the ISSP guidelines and standards.

7. In a manner consistent with paragraph IV.C.2. of this agreement, publish revisions to the ISSP and issue interpretations of the ISSP.

8. Publish and distribute monthly a current listing of all State certified interstate shippers as furnished to FDA on Form FD–3038b, SHELLFISH CERTIFICATION, by each State.

9. Participate to the fullest extent possible in the ISSC meetings, committees, and other deliberative groups that are necessary for the ISSC and the ISSP to function effectively.

B. ISSC agrees to:

1. Adopt the NSSP Manual of Operations, Parts I and II, and the amendments adopted at Workshops as the ISSP. The ISSC further agrees that the Procedures and any future revisions and documents adopted by the ISSC will be used as the set of guidelines for sanitary control of shellfish.

2. Furnish FDA with any pertinent information that indicates that a member State's program may not be in substantial compliance with the ISSP and assist FDA by whatever means available to secure necessary corrective measures.

3. Notify FDA of any interstate shipments of shellfish that may not be in compliance with the ISSP or that may be adulterated or misbranded within the meaning of the Federal Food, Drug, and Cosmetic Act.

4. Furnish FDA with copies of all revisions or changes to the ISSP or Procedures for review for consistency with existing laws, regulations, and policies of FDA.

5. Review evaluation reports of State shellfish sanitation control programs submitted by FDA in accordance with paragraph IV.A.3. of this agreement and request appropriate reviews among ISSC members. The ISSC will inform FDA of the recommendations or actions taken in response to the information furnished.

6. Allow representatives of foreign governments that have effective agreements with FDA concerning sanitary control of shellfish to attend the Conference meetings.

C. ISSC and FDA mutually agree to:

1. Exchange information concerning the Procedures, the ISSP, and the matters that arise from the Conference meetings in a timely manner.

2. Resolve problems of interpretations and policy that involve the Procedures, the ISSP, and the ISSC.

3. Recognize that the ISSP and the ISSC Procedures contain the principal standards and procedures for the sanitary control of shellfish.

V. Name and Address of Participating Organizations

A. Food and Drug Administration, 5600 Fisher Lane, Rockville, MD 20857.

B. Interstate Shellfish Sanitation Conference (current address), 2111 Kenbridge Drive, Austin, TX 78758.

VI. Liaison Officers

The liaison officer for each party will be responsible for facilitating exchanges of information and expeditiously informing other interested parties within each respective organization on matters requiring prompt attention. Each party agrees to provide notification of any changes in liaison officer appointments. Such notification shall constitute an amendment to and not require a revision of this agreement.

A. For Food and Drug Administration: FDA member to ISSC Executive Board (currently J. David Clem), Chief, Shellfish Sanitation Branch, HFF–344, Bureau of Foods, Food and Drug Administration, 200 C St. SW.,

Washington, DC 20204, FTS: 202–485–0149, Commercial: 202–485–0149.

B. For Interstate Shellfish Sanitation Conference: ISSC Chairman of the Board (currently Mr. Neil B. Travis), 2111 Kenbridge Drive, Austin, TX 78758, 512–458–7537.

VII. Period of Agreement

This agreement will become effective upon acceptance by both parties and shall continue until terminated. The agreement may be revised by mutual consent, or terminated by either party upon a 30-day advance written notice to the other party.

VIII. Acceptance

Approved and Accepted for the Interstate Shellfish Sanitation Conference.

By: Neil B. Travis.

Title: ISSC Chairman of the Board.

Date: March 14, 1984.

Approved and Accepted for the Food and Drug Administration, Department of Health and Human Services.

By: Mark Novitch.

Title: Acting Commissioner of Food and Drugs.

Dated: March 14, 1984.

Effective date. This agreement became effective March 14, 1984.

Dated: March 23, 1984.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160–01–M

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Advisory Council on Historic Preservation, Protection of Historic and Cultural Properties; Comments

AGENCY: Advisory Council on Historic Preservation (ACHP).

ACTION: Notice.

SUMMARY: Pursuant to Section 106 of the National Historic Preservation Act of 1966 and Section 800.6(d) of the regulations of the Advisory Council on Historic Preservation (Council), "Protection of Historic and Cultural Properties," the Council met on February 27, 1984, to consider a proposal by the Federal Highway Administration to assist in construction of the Presidential Parkway, Atlanta, Georgia. This project will adversely affect the following historic properties: The Druid Hills Historic District, the Inman Park Historic District, and the Candler Park Historic District, three historic districts included in the National Register of Historic Places; the Moreland Historic District, the North Highland/North Avenue Historic District, and an extension of the Martin Luther King, Jr., Historic District, areas eligible for inclusion in the National Register; and possible historic archaeological remains associated with the 1864 Battle of Atlanta. At the meeting, the Council adopted comments which have been transmitted to the Secretary of Transportation.

This notice, pursuant to 36 CFR 800.6(d)(5), is to advise parties that copies of these comments are available upon request from the Executive Director, Advisory Council on Historic Preservation, The Old Post Office, 1100 Pennsylvania Avenue, NW., Washington, DC 20004, 202–786–0505, Attn: Ronald D. Anzalone.

Dated: March 26, 1984.

Robert R. Garvey, Jr.,

Executive Director.

BILLING CODE 4310–10–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Final Federal Coal Lease Form

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: By notice published December 18, 1980, the Bureau of Land Management issued a Notice of Revision of Coal Lease Form 3400–12 (formerly 3520–1 (July 1977)), to solicit comments on the revisions proposed to bring the coal lease form into conformance with new coal-related laws and regulations. Public comments were received from an industry trade association, four energy companies, and two individuals.

On April 28, 1983, the Bureau of Land Management requested comments on a proposed combined mineral lease form, which included coal as well as phosphate, sodium, potassium, gilsonite, sulfur in the States of Louisiana and New Mexico, asphalt in Oklahoma, and hardrock minerals. Seven mining companies, three mining associations, and two individuals submitted comments on the combined mineral lease form.

The combined mineral lease form proposed was an attempt to establish consistency among the leasing of various federally owned commodities. Generally, the comments received on the proposed combined lease form supported the concept of consistency; however, they preferred separate forms for each of the various minerals, particularly coal and phosphate. By virtue of this notice a separate form is established for the leasing of Federal coal. The final coal lease form closely follows the format of the combined mineral lease form from which it was separated. All comments received on the two proposed lease forms have been considered in the development of the final Federal coal lease form, which follows this notice. A discussion of the comments follows.

EFFECTIVE DATE: April 30, 1984. Director (650), Bureau of Land Management, 18th and C Streets NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: Carole Smith, (202) 343–4774.

SUPPLEMENTARY INFORMATION: The comments are discussed below as they appear section-by-section in the proposed combined mineral lease form. Discussion of the comments received on the December 18, 1980, proposed coal lease form are integrated by subject matter under the appropriate section.

Part I. Lease Rights Granted

Sec. 1—All commenters objected to the phrase "or . . . hereafter in force," which appeared in section 1. They stated that the terms and conditions of mineral leases cannot be altered by regulation until the leases are subject to readjustment. The April 1983 lease form proposed to require lessees to comply with later-promulgated regulations and orders "where not inconsistent with the lease terms, regulations and orders hereafter promulgated."

Upon consideration, it has been decided to adopt for use in the Federal coal lease form the concept which has been used for the Federal oil and gas lease forms since the 1930's. Coal lessees will be subject to later promulgated regulations only when those regulations are not inconsistent with the specific provisions of the lease. The "when not inconsistent" clause now appears in all Federal coal, geothermal, and oil and gas lease forms.

It is thought that the use of the "when not inconsistent" clause will provide the lessor needed flexibility in administering the lease terms and conditions and the lessee stronger assurance that the terms and conditions of his lease will not necessarily change with each regulatory revision.

One commenter requested that the phrase "for a period of 20 years and so long thereafter as the condition of continued operation is met" be changed to "for a term of 20 years and for so long thereafter as coal is produced annually

in commercial quantities from that lease." The latter wording conforms with the Mineral Lands Leasing Act of 1920, as amended (30 U.S.C. 181–287). The language has been changed to reflect the Act and the comment.

Sec. 2—Four comments were received on this section of the April 28, 1983, proposed lease form. One commenter objected to the granting clause, believing that it made the lessee responsible for paying all bonuses due at one time. To clarify that each coal lease is issued subject only to those lease-related payments which become due, the word "any" has been inserted before the word "bonuses."

Thus, a competitive coal lease issued on the basis of a deferred bonus would bind the lessee to submit one-fifth of the bonus bid at the time of the sale, and the remaining four-fifths of the bonus in four equal payments due on each anniversary date of the coal lease. Royalties would be payable monthly once production begins in the manner prescribed in the regulations.

Section 2 gives the lessee broad authority to drill for, mine, remove, and dispose of the coal leased. Specific development methods and conditions are addressed in exploration plans and later in the resource recovery and protection plans and mining permit packages which must be approved prior to entry upon the lands. The language of this section answers the objections of five commenters on the December 1980 coal lease form, who were concerned about restrictions on their rights to mine coal by unconventional methods—coal gasification, synthetic fuel development, and the like. Lessees' obligations to meet diligence and maximum economic recovery requirements on all coal leases, whether mined by conventional methods or not, will be addressed during approval of the resource recovery and protection plan and/or the mining permit application package.

The section also grants "on-lease rights-of-way." Separate rights-of-way under Title V are not needed for roads, power lines, and similar improvements within the boundaries of the lease. Lessor reserves the power to manage these activities as part of the mining plan; however, no separate authorization or payment of fees is needed.

Part II. Terms and Conditions

Sec. 1. Rentals—No comments specific to coal were received on the April 28, 1983, proposed lease form. No comments were received on the rental section of the December 1980 coal lease form. Nevertheless, to clarify that the August 4, 1976, coal amendments to the Act eliminated lessees' rights to credit coal lease rentals against coal lease royalties, a new paragraph, b, has been added to section 1 in this final coal lease form.

Sec. 2. Royalties.—Four comments received on the December 1980 proposed lease form objected to the method used to calculate the value of coal for royalty computation purposes. The valuation method remains unchanged. During the coal management program regulatory review (1981–1982), several methods for valuing coal were analyzed. It was concluded that any other method than one used currently would result in closer government scrutiny of individual coal lessees and additional paperwork requirements without any appreciable increase in the amount collected.

No comments relevant to coal were received on this section on the April 28, 1983, proposed lease form.

Sec. 3. Bonds—Two commenters on the April 28, 1983, form and three commenters on the December 1980 form requested clarification of the language on coal lease bonds. The Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*) established a reclamation bond for surface-mined coal separate and apart from the lease bond required as part of lease issuance. The bond required by section 3 does not include this reclamation bond or any lessee protection bond, also required by SMCRA, if such a bond is required. Office of Surface Mining Reclamation and Enforcement regulations at 30 CFR Chapter VII, describe these bonding requirements in detail.

Sec. 4. Diligence—Two commenters on the December 1980 form requested greater detail on the diligence and continued operation requirements for coal in the lease form. The language of section 4 is an attempt to provide more information about coal production requirements.

Sec. 5. Logical Mining Units (LMU)—No comments were received on this section.

Sec. 6. Documents, evidence and inspection—Eight comments were received on this section of the April 28, 1983, form, and eight comments were received on the corresponding section of the December 1980 coal lease form. All objected to the types of information required or to the access and copying requirements.

The language of this section has been revised to reflect the comments received. The reservation of the authority to copy lessee records has been limited to those documents necessary to verify compliance with lease terms and conditions. The manner of access to and examination of coal lease-related records and reports is described in the regulations at 43 CFR Group 3400 and 30 CFR Chapter VII.

The Secretary may exercise his reserved authority to inspect such documents or arrangements as, for example, contracts for the sale of production from leased deposits, processing agreements, transportation agreements, or marketing arrangements. The right of the Secretary to have access to such documents is intended to include transactions to which the lessee or its related corporate entities are parties.

To emphasize that much of the information contained in these documents and arrangements is protected from disclosure under the Freedom of Information Act, the language of the last sentence of the section has been changed.

Sec. 7. Damages to property and conduct of operations—Eight comments were received on this section and five comments were received on related sections of the December 1980 coal lease form. The section has been rewritten to reflect the concerns expressed and to state the lessor's and lessee's responsibilities with respect to multiple mineral development.

The first paragraph of this section adopts the language of one commenter, who noted that the language appears in Federal oil and gas leases and in Indian leases. Because one of the goals of this final coal lease form is to make it consistent with other leasable mineral forms to the extent possible (the language appears in the final combined mineral lease form as well as the two forms mentioned earlier), this language is adopted. The third paragraph of this section entirely adopts the language of one commenter and accomplishes several purposes: it notifies the coal lessee of his/her obligations to prevent injury or damage to life, health, or property and to prevent waste, damage or degradation to the environment of the leased area; and it informs the lessee that other uses may be made of the leased lands so long as they do not interfere with the lessee's rights. The third paragraph also mentions the concept of "multiple use" as established by the Federal Land Policy and Management Act of 1976 and the Multiple Mineral Development Act of 1955 (30 U.S.C. 521–531).

Section 14, Cultural Resources, and Section 15, Paleontological Resources, of the December 1980 coal form have been eliminated as standard stipulations in this final lease form. All commenters on this form objected to some aspect of these two lease sections. The primary

objection was the requirement that cultural and paleontological inventories be conducted on both the mine plan area and the areas adjacent to it.

A consideration of the comments led to the conclusion that the cultural and paleontological resources of leased areas differ sufficiently so that standard protection stipulations for these resources would be inadequate. Therefore, the general environmental protection language of section 6 of this final form will authorize the lessor to require the lessee to protect cultural and paleontological as well as other environmental resources.

For leases in areas where cultural or paleontological resources occur, site-specific (special) stipulations will be developed to protect these resources. If further protection measures are necessary, then they can be included in approved mine plans for the lease area.

Sec. 8. Protection of diverse interests and equal opportunity—Three comments were received on this section. One commenter questioned the meaning of the term "complete freedom of purchase." One requested deletion of the section and its replacement with a statement that lessees comply with all applicable laws. The third commenter questioned the requirement for an 8-hour workday.

The final lease form retains the language of the proposed form of April 1983 because section 30 of the Mineral Leasing Act of 1920 requires that these provisions be included in all mineral leases issued under the Act.

No comments were received on the applicable sections of the proposed coal lease form published for comment in December 1980.

Sec. 9. Transfer of lease interest and relinquishment of lease—Three comments were received on this section. They requested clarification of the term "legal subdivision" and a recognition of partial relinquishments. The language of this section has been revised to delete the term "legal subdivision" and to recognize partial relinquishments.

One commenter also requested a recognition of reduction in the rental when the lease was partially relinquished. The language of this section now reflects this reduction.

Consistent with the regulations, relinquishment only relieves the lessee of obligations which have not yet arisen. For obligations that have already accrued, the lessee remains liable and the period of liability under lessee's bond will not be terminated until these obligations are satisfied.

Sec. 10. Delivery of premises, removal of machinery, equipment, etc.—The five comments received on this section were concerned that the language of the section exceeds the authority of the Department under existing laws and regulations. For reclamation requirements for surface-mined coal, the provisions of the Surface Mining Control and Reclamation Act of 1977 and its implementing regulations apply. For underground mined coal, the approved mine plan required by the Act governs the conduct of mining and reclamation operations.

The language of this section merely states, in general terms, the requirements for reclamation and abandonment of mined-out areas. No comments were received on this topic on the December 1980 proposed coal lease form.

Sec. 11. Proceedings in case of default—This section is similar to Section 23 of the December 1980 coal lease form. No objections specific to coal were received on either proposed lease form for this subject.

Sec. 12. Heirs and successors-in-interests—No coal-related comments were received on this subject.

Sec. 13. Indemnification—This section was inadvertently omitted from the April 1983 lease form, although it appeared in the December 1980 coal lease form. It requires the lessee to indemnify and hold the United States harmless from all claims against lessee's activities and operations under the lease.

Sec. 14. Special statutes—This section was inadvertently omitted from the April 1983 lease form. The Federal Coal Leasing Amendments Act of 1976 specifically requires all Federal coal leases to contain provisions requiring compliance with the Federal Water Pollution Control Act (33 U.S.C. 1151–1175) and the Clean Air Act (42 U.S.C. 1857 *et seq.*). The reference to the requirements of Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 *et seq.*), appears in this section also. As two commenters on the December 1980 coal lease form pointed out, that law does not grant leasing authority and was incorrectly placed in the leasing authority section.

In addition, coal lessees must comply with the provisions of a number of other laws and their implementing regulations. These include, but are by no means limited to, the Endangered Species Act, 16 U.S.C. 1531 *et seq.*; and the laws governing the handling and disposal of hazardous waste materials on public lands, including the Comprehensive Environmental Response, Conservation, and Liability Act of 1980 (94 Stat. 2767 *et seq.*) and the Resource Conservation and Recovery Act of 1976 (42 U.S.C. 6901 *et seq.*).

Three commenters on the December 1980 coal lease form objected to language which conditioned lease issuance to compliance with the Federal Water Pollution Control Act and the Clean Air Act. This objection has been responded to in the final lease form by changing the word "conditioned" to the phrase "is subject to."

We believe that this final coal lease form is more concise and clearer than the proposed coal lease form, that it is consistent with the other Federal mineral lease forms to the extent possible, and that it reflects public concerns within the extent allowable by law and regulations.

The primary author of this final coal lease form is Carole Smith, Division of Solid Mineral Leasing, Bureau of Land Management, assisted by staff of the Division of Energy and Resources, Office of the Solicitor, Department of the Interior, and other Bureau of Land Management staff.

The environmental impacts of coal leasing were addressed in the environmental assessment prepared for the July 1982 revisions to the Federal coal management rules at 43 CFR Group 3400 and 30 CFR Part 211 (now 43 CFR Part 3480). That document resulted in the finding that no significant impact would result from publication of the final rulemaking. The rulemaking was published in the **Federal Register** on July 30, 1982, on pages 33114 through 33151. This lease form was specifically mentioned in that rulemaking at 43 CFR 3475.1 as a revision to the then-existing rules and is therefore included in the environmental assessment for the revised rules. The environmental assessment is incorporated by reference here.

The July 1982 rulemaking also concluded that the final rules did not constitute a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) was required. Because this coal lease form results from that rulemaking, the determination of no significant impact is incorporated by reference for this form.

The Department of the Interior determined that the July 1982 rulemaking from which this form arises was not a major rule under Executive Order 12291 and would not have a significant effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as described in the July 1982 final coal rulemaking. That

determination is incorporated by reference here.

The information collection requirements contained in the coal lease form have been approved by the Office of Management and Budget and assigned clearance numbers 1004–0073, 1004–0143, and 1004–0144. Therefore, no additional approval is required.

The final coal lease form follows below.

Dated: March 9, 1984.

Robert F. Burford,

Director.

BILLING CODE 4310-84-M

Form 3400-12
(April 1984)
(Formerly 3520-11)

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT

COAL LEASE

Serial Number

PART I. LEASE RIGHTS GRANTED

This lease, entered into by and between the UNITED STATES OF AMERICA, hereinafter called lessor, through the Bureau of Land Management, and *(Name and Address)*

hereinafter called lessee, is effective *(date)* , for a period of 20 years and for so long thereafter as coal is produced in commercial quantities from the leased lands, subject to readjustment of lease terms at the end of the 20th lease year and each 10-year period thereafter.

Sec. 1. This lease is issued pursuant and subject to the terms and provisions of the:

☐ Mineral Lands Leasing Act of 1920, Act of February 25, 1920, as amended, 41 Stat. 437, 30 U.S.C. 181-287, hereinafter referred to as the Act;

☐ Mineral Leasing Act for Acquired Lands, Act of August 7, 1947, 61 Stat. 913, 30 U.S.C. 351-359;

and to the regulations and formal orders of the Secretary of the Interior which are now or hereafter in force, when not inconsistent with the express and specific provisions herein.

Sec. 2. Lessor, in consideration of any bonuses, rents, and royalties to be paid, and the conditions and covenants to be observed as herein set forth, hereby grants and leases to lessee the exclusive right and privilege to drill for, mine, extract, remove, or otherwise process and dispose of the coal deposits in, upon, or under the following described lands:

containing acres, more or less, together with the right to construct such works, buildings, plants, structures, equipment and appliances and the right to use such on-lease rights-of-way which may be necessary and convenient in the exercise of the rights and privileges granted, subject to the conditions herein provided.

PART II. TERMS AND CONDITIONS

Sec. 1. (a) RENTAL RATE - Lessee shall pay lessor rental annually and in advance for each acre or fraction thereof during the continuance of the lease at the rate of $ for each lease year.

(b) RENTAL CREDITS - Rental shall not be credited against either production or advance royalties for any year.

Sec. 2. (a) PRODUCTION ROYALTIES - The royalty shall be percent of the value of the coal as set forth in the regulations. Royalties are due to lessor the final day of the month succeeding the calendar month in which the royalty obligation accrues.

(b) ADVANCE ROYALTIES - Upon request by the lessee, the authorized officer may accept, for a total of not more than 10 years, the payment of advance royalties in lieu of continued operation, consistent with the regulations. The advance royalty shall be based on a percent of the value of a minimum number of tons determined in the manner established by the advance royalty regulations in effect at the time the lessee requests approval to pay advance royalties in lieu of continued operation.

Sec. 3. BONDS - Lessee shall maintain in the proper office a lease bond in the amount of $. The authorized officer may require an increase in this amount when additional coverage is determined appropriate.

Sec. 4. DILIGENCE - This lease is subject to the conditions of diligent development and continued operation, except that these conditions are excused when operations under the lease are interrupted by strikes, the elements, or casualties not attributable to the lessee. The lessor, in the public interest, may suspend the condition of continued operation upon payment of advance royalties in accordance with the regulations in existence at the time of the suspension. Lessee's failure to produce coal in commercial quantities at the end of 10 years shall terminate the lease. Lessee shall submit an operation and reclamation plan pursuant to Section 7 of the Act not later than 3 years after lease issuance.

The lessor reserves the power to assent to or order the suspension of the terms and conditions of this lease in accordance with, inter alia, Section 39 of the Mineral Leasing Act, 30 U.S.C. 209.

Sec. 5. LOGICAL MINING UNIT (LMU) - Either upon approval by the lessor of the lessee's application or at the direction of the lessor, this lease shall become an LMU or part of an LMU, subject to the provisions set forth in the regulations.

The stipulations established in an LMU approval in effect at the time of LMU approval will supersede the relevant inconsistent terms of this lease so long as the lease remains committed to the LMU. If the LMU of which this lease is a part is dissolved, the lease shall then be subject to the lease terms which would have been applied if the lease had not been included in an LMU.

Sec. 6. DOCUMENTS, EVIDENCE AND INSPECTION - At such times and in such form as lessor may prescribe, lessee shall furnish detailed statements showing the amounts and quality of all products removed and sold from the lease, the proceeds therefrom, and the amount used for production purposes or unavoidably lost.

Lessee shall keep open at all reasonable times for the inspection of any duly authorized officer of lessor, the leased premises and all surface and underground improvements, works, machinery, ore stockpiles, equipment, and all books, accounts, maps, and records relative to operations, surveys, or investigations on or under the leased lands.

Lessee shall allow lessor access to and copying of documents reasonably necessary to verify lessee compliance with terms and conditions of the lease.

While this lease remains in effect, information obtained under this section shall be closed to inspection by the public in accordance with the Freedom of Information Act (5 U.S.C. 552).

Sec. 7. DAMAGES TO PROPERTY AND CONDUCT OF OPERATIONS - Lessee shall comply at its own expense with all reasonable orders of the Secretary, respecting diligent operations, prevention of waste, and protection of other resources.

Lessee shall not conduct exploration operations, other than casual use, without an approved exploration plan. All exploration plans prior to the commencement of mining operations within an approved mining permit area shall be submitted to the authorized officer.

Lessee shall carry on all operations in accordance with approved methods and practices as provided in the operating regulations, having due regard for the prevention of injury to life, health, or property, and prevention of waste, damage or degradation to any land, air, water, cultural, biological, visual, and other resources, including mineral deposits and formations of mineral deposits not leased hereunder, and to other land uses or users. Lessee shall take measures deemed necessary by lessor to accomplish the intent of this lease term. Such measures may include, but are not limited to, modification to proposed siting or design of facilities, timing of operations, and specification of interim and final reclamation procedures. Lessor reserves to itself the right to lease, sell, or otherwise dispose of the surface or other mineral deposits in the lands and the right to continue existing uses and to authorize future uses upon or in the leased lands, including issuing leases for mineral deposits not covered hereunder and approving easements or rights-of-way. Lessor shall condition such uses to prevent unnecessary or unreasonable interference with rights of lessee as may be consistent with concepts of multiple use and multiple mineral development.

Sec. 8. PROTECTION OF DIVERSE INTERESTS, AND EQUAL OPPORTUNITY - Lessee shall: pay when due all taxes legally assessed and levied under the laws of the State or the United States; accord all employees complete freedom of purchase; pay all wages at lease twice each month in lawful money of the United States; maintain a safe working environment in accordance with standard industry practices; restrict the workday to not more than 8 hours in any one day for underground workers, except in emergencies; and take measures necessary to protect the health and safety of the public. No person under the age of 16 years shall be employed in any mine below the surface. To the extent that laws of the State in which the lands are situated are more restrictive than the provisions in this paragraph, then the State laws apply.

Lessee will comply with all provisions of Executive Order No. 11246 of September 24, 1965, as amended, and the rules, regulations, and relevant orders of the Secretary of Labor. Neither lessee nor lessee's subcontractors shall maintain segregated facilities.

Sec. 9. (a) TRANSFERS

- ☐ This lease may be transferred in whole or in part to any person, association or corporation qualified to hold such lease interest.
- ☐ This lease may be transferred in whole or in part to another public body or to a person who will mine the coal on behalf of, and for the use of, the public body or to a person who for the limited purpose of creating a security interest in favor of a lender agrees to be obligated to mine the coal on behalf of the public body.
- ☐ This lease may only be transferred in whole or in part to another small business qualified under 13 CFR 121.

Transfers of record title, working or royalty interest *must* be approved in accordance with the regulations.

(b) RELINQUISHMENT - The lessee may relinquish in writing at any time all rights under this lease or any portion thereof as provided in the regulations. Upon lessor's acceptance of the relinquishment, lessee shall be relieved of all future obligations under the lease or the relinquished portion thereof, whichever is applicable.

Sec. 10. DELIVERY OF PREMISES, REMOVAL OF MACHINERY, EQUIPMENT, ETC. - At such time as all portions of this lease are returned to lessor, lessee shall deliver up to lessor the land leased, underground timbering, and such other supports and structures necessary for the preservation of the mine workings on the leased premises or deposits and place all workings in condition for suspension or abandonment. Within 180 days thereof, lessee shall remove from the premises all other structures, machinery, equipment, tools, and materials that it elects to or as required by the authorized officer. Any such structures, machinery, equipment, tools, and materials remaining on the leased lands beyond 180 days, or approved extension thereof, shall become the property of the lessor, but lessee shall either remove any or all such property or shall continue to be liable for the cost of removal and disposal in the amount actually incurred by the lessor. If the surface is owned by third parties, lessor shall waive the requirement for removal, provided the third parties do not object to such waiver. Lessee shall, prior to the termination of bond liability or at any other time when required and in accordance with all applicable laws and regulations, reclaim all lands the surface of which has been disturbed, dispose of all debris or solid waste, repair the offsite and onsite damage caused by lessee's activity or activities incidental thereto, and reclaim access roads or trails.

Sec. 11. PROCEEDINGS IN CASE OF DEFAULT - If lessee fails to comply with applicable laws, existing regulations, or the terms, conditions and stipulations of this lease, and the noncompliance continues for 30 days after written notice thereof, this lease shall be subject to cancellation by the lessor only by judicial proceedings. This provision shall not be construed to prevent the exercise by lessor of any other legal and equitable remedy, including waiver of the default. Any such remedy or waiver shall not prevent later cancellation for the same default occurring at any other time.

Sec. 12. HEIRS AND SUCCESSORS-IN-INTEREST - Each obligation of this lease shall extend to and be binding upon, and every benefit hereof shall inure to, the heirs, executors, administrators, successors, or assigns of the respective parties hereto.

Sec. 13. INDEMNIFICATION - Lessee shall indemnify and hold harmless the United States from any and all claims arising out of the lessee's activities and operations under this lease.

Sec. 14. SPECIAL STATUTES - This lease is subject to the Federal Water Pollution Control Act (33 U.S.C. 1151—1175), the Clean Air Act (42 U.S.C. 1857 et. seq.), and to all other applicable laws pertaining to exploration activities, mining operations and reclamation, including the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 et. seq.).

Correction

In FR Doc. 84–6972 beginning on page 9781 in the issue of Thursday, March 15, 1984, make the following corrections.

1. On page 9781, second column, remove the word "lots" in the eleventh, twelfth, and thirteenth lines.

2. On page 9781, third column, sixth line, "R. 13 E." should read "R. 12 E."; and in the tenth line "SE ⅛ " should read "SE ¼ ".

Lakeview District Multi-Use Advisory Council; Meeting

Notice is hereby given, in accordance with Pub. L. 92–463 and 43 CFR 1784 that a meeting of the Lakeview District Multi-Use Advisory Council will be held May 16, 1984, at 10:00 a.m. in the BLM's Conference Room at 1000 S. 9th Street, Lakeview, Oregon 97630.

The agenda will include the following topics:

1. Introductory Remarks by New District Manager.
2. Election of Officers.
3. Cooperative Management Areas.
4. Progress Report on District Programs.
5. Bombing Range Update.
6. Wilderness Briefing.
7. Wildlife Briefing.
8. Forestry Briefing.
9. Geothermal.
10. Public Comment—1:30–2:30 p.m.

The meeting will be open to all interested parties who desire to attend. Interested persons may make oral statements to the Council or file a written statement for the Council's consideration.

Summary minutes of the Council meetings will be maintained in the District Office and available for public inspection during regular business hours within 30 days following the meeting.

Dated: March 19, 1984.

Jerry E. Asher,

District Manager.

BILLING CODE 4310–84–M

Lakeview Grazing District Advisory Board; Meeting

Notice is hereby given, in accordance with Pub. L. 94–579 and 43 CFR 4120.6–1(e) that a meeting of the Lakeview Grazing District Advisory Board will be held May 10, 1984, at 10:00 a.m. at the BLM's Poor Jug Administrative Site, approximately 65 miles north of Lakeview, in Lake County, Oregon.

The agenda will include the following:

1. Tour of Fire Rehabilitation Area.
2. Specifics on Allocation of Forage From Estimated Forage Increase.
3. Presentation of Commendation Resolutions.
4. Public Comment—1:30–2:30 p.m.
5. Progress Report on District Programs.

The meeting will be open to all interested parties who desire to attend. Interested persons may make oral statements to the Board or file a written statement for the Board's consideration. Persons interested in attending the meeting can obtain a map to the Poor Jug site at the Lakeview District Office, 1000 South 9th Street, Lakeview, Oregon 97630.

Summary minutes of the Board meeting will be maintained in the District Office and available for public inspection during regular business hours within 30 days following the meeting.

Dated: March 19, 1984.

Jerry E. Asher,

District Manager.

[W–23432]

Nebraska; Classification Revoked and Lands Open to Entry

March 16, 1984.

Public Land Order 5323, dated December 21, 1972, published as FR Doc. 73–13 on pages 735–736 of the issue of January 4, 1973, classified the following described lands for lease or sale under the provisions of the Recreation and Public Purposes Act of June 14, 1926, as amended. The classification segregated the lands from other use or disposition under the public land laws.

Sixth Principal Meridian, Nebraska

T. 31 N., R. 7 W.,
Sec. 4, lot 1.
T. 32 N., R. 8 W.,
Sec. 17, lot 3.
T. 32 N., R. 10 W.,
Sec. 1, lot 4.
T. 32 N., R. 31 W.,
Sec. 1, lots 1 and 2.
T. 33 N., R. 30 W.,
Sec. 31, SW¼SE¼.

The areas described aggregate 132.90 acres in Knox, Boyd, and Cherry Counties, Nebraska.

The classification of the above described land is hereby revoked and the segregation on the lands is terminated.

This land is now open to all forms of appropriation under the public land laws including location under the mining laws, subject to valid existing rights, and the requirements of applicable law. All valid applications received shall be considered in the order of filing. The land has been and will remain open to applications and offers under the mineral leasing laws.

Inquiries concerning the land should be addressed to the Chief, Branch of Land Resources, Bureau of Land Management, P.O. Box 1828, Cheyenne, Wyoming 82003.

Hillary A. Oden,

State Director, Wyoming.

BILLING CODE 4310–22–M

[NM 036230]

New Mexico; Proposed Reinstatement of Terminated Oil and Gas Lease

Under the provisions of Pub. L. 97–451, Energy Reserve Group, Inc., and

Conoco, Inc., petitioned for reinstatement of oil and gas lease NM 036230 covering the following described lands located in Eddy County, New Mexico:

T. 19 S., R. 31 E., NMPM
Sec. 1: NE¼SE¼.
Sec. 11: N½NE¼.
Containing 120.00 acres.

It has been shown to my satisfaction that failure to make timely payment of rental was due to inadvertence.

No valid lease has been issued affecting the lands. Payment of back rentals and administrative cost of $500.00 has been paid. Future rentals shall be at the rate of $5.00 per acre per year and royalties shall be at the rate of 16⅔ percent. Reimbursement for cost of the publication of this notice shall be paid by the lessee.

Reinstatement of the lease will be effective as of the date of termination, November 1, 1983.

Dated: March 21, 1984.

Leroy C. Montoya,

Acting State Director.

[FR Doc. 84-8633 Filed 3-29-84; 8:45 am]

BILLING CODE 4310-FB-M

Minerals Management Service

Request for Supplemental Information; Sand and Gravel Leasing Offshore Alaska

Purpose

The Secretary of the Interior is reviewing ongoing Outer Continental Shelf (OCS) lease sales. Interested parties are invited to provide him with up-to-date information on the necessity of holding sand and gravel lease sales offshore Alaska. Comments are also requested on the proposed Mineral Materials Lease form.

Use of Information

The information will assist the Secretary in determining if any Alaska sand and gravel sales should be held in the next 2 years under the Department of the Interior's (DOI) hardrock mineral leasing program.

Background Information

In 1982, the DOI developed a program for hardrock mineral leasing for the OCS. In 1983, prelease steps were completed for a Beaufort Sea proposed sand and gravel lease sale. Subsequently, the following related documents were issued: on March 3, 1983, a final environmental impact statement; on April 11, 1983, a Notice of Tentative Terms and Conditions for an Arctic Sand and Gravel Sale (see 48 FR 15541); and on July 27, 1983, a proposed Mineral Materials Lease form (see 48 FR 34143). Comments were requested and considered on the documents.

Four oil and gas companies and the State of Alaska commented on the Beaufort Sea Notice of Tentative Terms and Conditions. The State generally supported the proposal but recommended that areas around Weller Bank, Stamuki Shoals, and part of Stefansson Sound be deleted from the proposed sale. Sohio Alaska Petroleum Company commented that the lease terms and conditions should be designed to meet two additional goals: (1) Avoid exclusivity of the mineral holdings; and (2) provide a mechanism whereby sales could be held on a regular basis. Exxon Company, U.S.A., believed that holding an Arctic sand and gravel sale was premature until issues related to correlative rights were addressed. Marathon Oil Company and Texaco Inc. provided technical comments.

On August 16, 1983, comments were also requested on four proposed sand and gravel lease sales to be located in the Beaufort and Bering Seas. These sales were scheduled through 1986 (see 48 FR 37087). Comments by Exxon on that schedule indicated the first sale was premature and should be delayed and that sand and gravel sales in the Bering Sea are unnecessary. Sohio commented that the proposed conditions for the first Arctic sale, previously scheduled for October 1983, were unsatisfactory and recommended several changes. These included using a Call for Nominations on individual blocks, definition of the term "highest cash bonus" (i.e., highest bid per cubic yard), requiring the submittal of 5 percent of the bonus with the bid, treating the bonus as the royalty, and allowing multiple leases of the same tract by requiring late participants to pay an identical bonus to the Government and a rising fee based on time to the original leaseholder. Sohio had no comments on the other proposed sales. Amoco Production Company had no comment on the timing of proposed sales and was supportive of the April 11 proposed terms and conditions.

Instructions on Request for Supplemental Information

Information on industry interest is requested on the need for holding offshore sand and gravel lease sales. If such sales are necessary, information on their location, sequence, and timing is also desired. It is believed there may be insufficient industry interest to hold sales in the next 2 years in any of the following planning areas: Diapir Field, Navarin, St. George, or North Aleutian Basins. Comments are requested on that conclusion. The Mineral Materials Lease form, first published on July 27, 1983, has been revised and is also published for comment.

Information should be provided by letter. If new or supplemental information is submitted on specific areas which industry would like to have offered for lease sale, it should be depicted on the request for Supplemental Information Map, available free from the Regional Supervisor, Leasing and Environment. Interest should be defined as specifically as possible by outlining blocks or area(s) along block lines. Although individual and industry indications of interest are considered to be privileged and confidential information, the names of persons or entities submitting such information will be a matter of public record.

In order to be incorporated in the review process, information must be submitted no later than 30 days following publication of this document in the **Federal Register**. Correct receipt of the information will be facilitated if envelopes are marked "Request for Supplemental Information on Proposed Sand and Gravel Lease Sales Offshore Alaska."

Letters and maps should be sent to the Regional Supervisor for Leasing and Environment, Alaska OCS Region, P.O. Box 101159, 620 East 10th Avenue, Anchorage, Alaska 99510. A copy should be sent to the Chief, Offshore Leasing Management Division, Minerals Management Service, 12203 Sunrise Valley Drive, Mail Stop 645, Reston, Virginia 22091. Hand deliveries to the DOI may be made to 18th and C Sts., N.W., Room 2510, Washington, D.C. Telephone contacts may be made to Joan Hagans (907) 261-2469 (Alaska) or to Yvonne Morehouse (202) 343-5121 (Washington, D.C.).

Dated: March 23, 1984.

William D. Bettenberg,

Director, Minerals Management Service.

Dated: March 27, 1984.

Approved:

Leona A. Power,

Acting Assistant Secretary for Land and Minerals Management.

Form MMS-2038 (September 1983)

UNITED STATES DEPARTMENT OF THE INTERIOR MINERALS MANAGEMENT SERVICE

Mineral Lease of Submerged Lands Under the Outer Continental Shelf Lands Act

This form does not constitute an information collection as defined by 44 U.S.C.

3502 and therefore does not require approval by the Office of Management and Budget.

Office ———
Serial Number ———
Cash bonus ———
Acres, hectares ———
Rental rate per acre, hectare or fraction thereof ———
Minimum royalty rate per acre, hectare or fraction thereof ———

This lease is effective as of ——— (hereinafter called the "Effective Date") and shall continue for an initial period of ——— years (hereinafter called the "Initial Period") by and between the United States of America (hereinafter called the "Lessor"), by the Minerals Management Service, its authorized officer, and (hereinafter called the "Lessee"). In consideration of any cash payment heretofore made by the Lessee to the Lessor and in consideration of the promises, terms, conditions, and covenants contained herein, including the Stipulation(s) numbered ——— attached hereto, the Lessee and Lessor agree as follows:

Sec. 1. *Statutes and Regulations.* This lease is issued pursuant to the Outer Continental Shelf Lands Act of August 7, 1953, 67 Stat. 462; 43 U.S.C. 1331 et seq., as amended (92 Stat. 629), (hereinafter called the "Act"). The lease is issued subject to the Act; all regulations and orders issued pursuant to the Act and in existence upon the Effective Date of this lease; all regulations and orders issued pursuant to the Act in the future providing for the prevention of waste and conservation of the natural resources of the Outer Continental Shelf, and the protection of correlative rights therein; and all other applicable statutes, regulations, and orders.

Sec. 2. *Rights of Lessee.* The Lessor hereby grants and leases to the Lessee the exclusive right and privilege to prospect for, mine, extract, remove, and dispose (hereinafter referred to as "production"), of all (hereinafter referred to as the "Leased Mineral"), located in, on, or under the submerged lands of the Outer Continental Shelf containing approximately ——— acres or ——— hectares (hereinafter referred to as the "Leased Area"), described as follows:

These rights include:

(a) The nonexclusive right to conduct within the Leased Area geological and geophysical explorations and core sampling activities in accordance with applicable regulations, and orders; (b) the nonexclusive right to drill water wells within the Leased Area, unless the water is part of geopressured-geothermal and associated resources, and to use the water produced therefrom for operations pursuant to the Act free of cost, on the condition that the drilling is conducted in accordance with procedures approved by the Director of the Minerals Management Service or the Director's delegate (hereinafter called the "Director"); and (c) the right to construct or erect and to maintain within the Leased Area artificial islands, equipment, installations, and other devices permanently or temporarily attached to the seabed and other works and structures necessary to the full enjoyment of the lease, subject to compliance with applicable laws, regulations, and orders.

Sec. 3. *Term.* This lease shall continue from the Effective Date of the lease for the Initial Period and thereafter so long as the Leased Mineral is produced from the Leased Area, or approved mining activities are conducted, or an approved suspension of operations is in effect, or as otherwise provided by regulation or orders.

Sec. 4. *Rentals.* The Lessee shall pay the Lessor, on or before the first day of each lease year which commences prior to production of the Leased Mineral on the Leased Area, a rental as shown on the face hereof.

Sec. 5. *Minimum Royalty.* The Lessee shall pay the Lessor at the expiration of each lease year which commences after production has begun, a minimum royalty as shown on the face hereof.

Sec. 6. *Payments.* The Lessee shall make all payments to the Lessor by check, bank draft, or money order unless otherwise provided by regulations, orders, or by direction of the Lessor. Rentals, royalties, and any other payments required by this lease shall be made payable to the Minerals Management Service and tendered to the Director. Determinations made by the Lessor as to the amount of payment due shall be presumed to be correct and paid as due.

Sec. 7. *Bonds.* The Lessee shall maintain at all times a bond in the amount specified in the notice of lease offering conditioned on compliance with all requirements applicable to this lease and shall furnish such additional security as may be required by the Lessor if, after operations have begun, the Lessor deems such additional security to be necessary.

Sec. 8. *Plans.* The Lessee shall conduct all operations on the Leased Area in accordance with the provisions of an approved mining plan, this lease, regulations, and orders. The Lessee may depart from an approved mining plan only as provided by applicable regulations, orders, or written instructions.

Sec. 9. *Performance.* The Lessee shall comply with all applicable regulations, orders, written instructions, and the terms and conditions set forth in the notice of lease offering. After due notice in writing, the Lessee shall conduct such Outer Continental Shelf mining activities at such rates as the Lessor may require in order that the Leased Area or any part thereof may be properly and timely developed and produced in accordance with sound operating principles.

Sec. 10. *Inspection.* The Lessee shall permit duly authorized and identified representatives of the Secretary of the Interior to conduct periodic on-site inspections, both scheduled and unscheduled, of any mining facility to assure compliance with applicable operating, environmental, and safety regulations.

Sec. 11. *Safety Requirements.* The Lessee shall: (a) Maintain all places of employment within the Leased Area in compliance with occupational safety and health standards and, in addition, free from recognized hazards to employees of the Lessee or of any contractor or subcontractor operating within the Leased Area; (b) maintain all operations within the Leased Area in compliance with regulations and orders intended to protect persons, property, and the environment on the Outer Continental Shelf; and (c) allow prompt access, at the site of any operation subject to safety regulations, to any authorized Federal inspector and shall provide any documents and records which are pertinent to occupational or public health, safety, or environmental protection as may be requested.

Sec. 12. *Suspension and Cancellation.* (a) The Lessor may suspend or cancel this lease pursuant to section 5 of the Act and compensation shall be paid as provided by the Act. (b) The Lessor may, upon recommendation of the Secretary of Defense, during a state of war or national emergency declared by Congress or the President of the United States, suspend operations under the lease, as provided in section 12(c) of the Act, and just compensation shall be paid to the Lessee for such suspension.

Sec. 13. *Indemnification.* The Lessee shall indemnify the Lessor for, and hold it harmless from, any claim, including claims for loss or damage to property or injury to persons caused by or resulting from any operation on the Leased Area conducted by or on behalf of the Lessee. However, the Lessee shall not be held responsible to the Lessor under this section for any loss, damage, or injury caused by or resulting from: (a) Negligence of the Lessor other than the commission or omission of a discretionary function or duty on the part of a Federal agency whether or not the discretion involved is abused; or (b) the Lessee's compliance with an order or directive of the Lessor against which an administrative appeal by the Lessee is filed before the cause of action for the claim arises and is pursued diligently thereafter.

Sec. 14. *Disposition of Production.* In time of war, or when the President of the United States shall so prescribe, the Lessor shall have the right of first refusal to purchase at the market price all or any portion of the Leased Mineral produced from the Leased Area, as provided in section 12(b) of the Act.

Sec. 15. *Unitization Agreements.* Within such time as the Lessor may prescribe, the Lessee shall subscribe to and operate under a unit agreement embracing all or part of the lands subject to this lease as the Lessor may determine to be appropriate or necessary. Where any provision of a unit agreement, approved by the Lessor, is inconsistent with a provision of this lease, the provision of the agreement shall govern.

Sec. 16. *Equal Opportunity Clause.* During the performance of this lease, the Lessee shall fully comply with paragraphs (1) through (7) of section 202 of Executive Order 11246, as amended (reprinted in 41 CFR 60–1.4(a)), and the implemention regulations, which are for the purpose of preventing employment discriminating against persons on the basis of race, color, religion, sex, or national origin. Paragraphs (1) through (7) of section 202 of Executive Order 11246, as amended, are incorporated in this lease by reference.

Sec. 17. *Certification of Non-segregated Facilities.* By entering into this lease, the Lessee certifies, as specified in 41 CFR 60–1.8, that it does not and will not maintain or provide for its employees any segregated facilities at any of its establishments, and

that it does not and will not permit its employees to perform their services at any location under its control where segregated facilities are maintained. As used in this certification, the term "segregated facilities" means, but is not limited to, any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Lessee further agrees that it will obtain identical certifications from proposed contractors and subcontractors prior to award of contracts or subcontracts unless they are exempt under 42 CFR 60–1.5.

Sec. 18. *Reservations to Lessor.* All rights in the Leased Area not expressly granted to the Lessee by the Act, the regulations, orders, the notice of lease offering, or this lease are hereby reserved to the Lessor. Without limiting the generality of the foregoing, reserved rights include: (a) The right to authorize geological and geophysical exploration in the Leased Area which does not unreasonably interfere with or endanger actual operations under the lease, and the right to grant such easements or rights-of-way upon, through, or in the Leased Area as may be necessary or appropriate to the working or development of other lands which may or may not be leased or to the treatment and shipment of products therefrom by or under authority of the Lessor; (b) the right to grant leases for any minerals other than the Leased Mineral within the Leased Area, except that operations under such leases shall not unreasonably interfere with or endanger operations under this lease; (c) the right, as provided in section 12(d) of the Act, to restrict operations in the Leased Area or any part thereof which may be designated by the Secretary of Defense, with approval of the President, as being within an area needed for national defense, and so long as such designation remains in effect no operations may be conducted on the surface of the Leased Area or the part thereof included within the designation except with the concurrence of the Secretary of Defense. If operations or production under this lease within any designated area are suspended pursuant to this paragraph, any payments of rentals and royalty prescribed by this lease likewise shall be suspended during such period of suspenion of operations and production, and the term of this lease shall be extended by adding thereto any such suspension period, and the Lessor shall be liable to the Lessee for such compensation as is required to be paid under the Constitution of the United States.

Sec. 19. *Transfer of Lease.* The Lessee shall file for approval (in the appropriate field office of the Minerals Management Service), any instrument of assignment or other transfer of interest in this lease. This requirement includes changes in lease ownership and any obligation to make royalty or other payments under the lease or the Act.

Sec. 20. *Surrender of Lease.* The Lessee may surrender this entire lease or any officially designated subdivision of the Leased Area by filing with the appropriate field office of the Minerals Management Service a written relinquishment, in triplicate, which shall be effective as of the date of filing. No surrender of this lease or of any portion of the Leased Area shall relieve the Lessee or its surety of the obligation to pay all accrued rentals, royalties, and other financial obligations or to abandon the area to be surrendered in a manner satisfactory to the Director.

Sec. 21. *Removal of Property on Termination of Lease.* Within a period of 1 year after termination of this lease in whole or in part, the Lessee shall remove all devices, works, and structures from the premises no longer subject to the lease in accordance with applicable regulations, orders, and instructions of the Director. However, the Lessee may, with the approval of the Director, continue to maintain devices, works, and structures on the Leased Area for operations on other leases. Artificial islands may be abandoned if approved by the Director.

Sec. 22. *Remedies in Case of Default.* (a) Whenever the Lessee fails to comply with any of the provisions of the Act, the regulations or orders issued pursuant to the Act, or the terms of this lease, the lease shall be subject to cancellation in accordance with the provisions of section 5 (c) and (d) of the Act and the Lessor may exercise any other remedies which the Lessor may have, including the penalty provisions of section 24 of the Act. Furthermore, pursuant to section 8(o) of the Act, the Lessor may cancel the lease if it is obtained by fraud or misrepresentation. (b) Nonenforcement by the Lessor of a remedy for any particular violation of the provisions of the Act, the regulations or orders issued pursuant to the Act, or the terms of this lease shall not prevent the cancellation of this lease or the exercise of any other remedies under subparagraph (a) of this section for any other violation or for the same violation occurring at any other time.

Sec. 23. *Unlawful Interest.* No member of, or Delegate to, Congress, or Resident Commissioner, after election or appointment, or either before or after they have qualified, and during their continuance in office, and no officer, agent, or employee of the Department of the Interior, except as provided in 43 CFR Part 20, shall be admitted to any share or part in this lease or derive any benefit that may arise therefrom. The provisions of section 3741 of the Revised Statutes, as amended, 41 U.S.C. 22, and the Act of June 25, 1948, 62 Stat. 702, as amended, 18 U.S.C. 431–433, relating to contracts made or entered into, or accepted by or on behalf of the United States, form a part of this lease insofar as they may be applicable.

The United States of America, Lessor

BILLING CODE 4310-MR-M

Minerals Management Service Request for Supplemental Information; Gulf of Alaska/Cook Inlet Sale 88

Purpose

The Secretary of the Interior is reviewing ongoing Outer Continental Shelf (OCS) oil and gas lease sales. Interested parties are invited to provide him with up-to-date information so a reassessment can be made on the advisability of offering areas in the Gulf of Alaska/Cook Inlet (GOA/CI) for lease. The proposed offering for Lease Sale 88 is scheduled for October 1984.

The Secretary is seeking specific information on the current level of industry interest in leasing and exploring the area covered by the GOA/CI Federal proposal. This is the area studied in the draft environmental impact statement (EIS) and outlined on the attached map. The EIS was made available to the public in January 1984; public hearings were held in Alaska the week of February 13, 1984. In addition, the Minerals Management Service has been examining a number of options affecting lease terms for Sale 88. They involve variations in bidding systems royalty rates, length of lease term, size of lease block, minimum bid level, and rental rates. The effects of the alternatives on the economics of exploration and development are being examined both individually and in various combinations. We would appreciate your comments relative to these factors, as will as any other lease terms and conditions that you feel are appropriate.

Use of Information

The information will assist the Secretary in determining if portions of the proposed sale area should be deferred or eliminated or whether the proposed sale should be rescheduled in the current 5-year Planning Schedule or cancelled.

Description of the Area

The general location of the areas for which information is requested is offshore the State of Alaska in the Gulf

of Alaska and Cook Inlet. It is the area studied in the EIS as the Federal proposal (see the attached map). With some exceptions it lies between the 3-geographical-mile boundary and the 2,000-meter isobath. It covers 4,792 blocks (approximately 10.1 million acres).

Summary of Comments Received From the Call for Information

The Call for Information covered two planning areas, the Gulf of Alaska and Cook Inlet. Together they contain about 37 million acres. Four companies responded to the Call; three indicated leasing interest in a total of about 18.3 million acres. Industry interest in the Gulf of Alaska planning area began west of Icy Bay and continued east and south until the U.S./Canada jurisdiction line was reached. Interest began at the 3-geographical-mile line and generally went out to the 2,000-meter isobath.

In Cook Inlet interest was shown in two areas: south of Kalgin Island to the northern end of Augustine Island and south of the Barren Islands, through the Shelikof Strait, to approximately 57°30′ N. latitude.

Comments were received from the State of Alaska; U.S. Department of Commerce, National Marine Fisheries Service; the City of Cordova; and Yak-Tat Kwaan, Inc. Agencies of the State provided comments on the possible effects of hydrocarbon development on the fisheries industry; on renewable resources and their habitats (fish, waterfowl, shorebirds, seabirds, and marine mammals); on the lack of technology to contain and clean up large offshore oil spills; on industry's ability to safely conduct activities in severe weather and sea conditions; on the advisability of using drilling rigs with zero pollution/discharge containment systems; on refuges, monuments, and State critical habitat areas; and on the culture of Native villages adjacent to the Call area.

The National Marine Fisheries Service commented on the possible conflicts between fisheries and marine mammal resources and oil and gas exploration. The City of Cordova commented on fisheries conflicts and Costal Zone Management funding. The Yak-Tat Kwaan generally supported leasing in certain portions of the Gulf of Alaska planning area and commented on the importance of salmon stocks.

The Environmental Impact Statement

If a copy of the draft EIS would be helpful in responding to this supplemental request, inquiries may be made to the Regional Supervisor for Leasing and Environment, Alaska OCS Region, P.O. Box 101159, Anchorage, Alaska 99510, (907) 261–2464.

Instructions on Request for Supplemental Information

Information on the interest industry has in leasing and exploring in the GOA/CI should be provided by letter. If new or supplemental information is submitted on areas which industry would like to have offered for lease sale, it should be depicted on the Request for Supplemental Information Maps. These maps are available at no cost from the Regional Supervisor for Leasing and Environment. Industry interest should be defined as specifically as possible by outlining blocks or area(s) along block lines. Areas of concern may also be indicated on these maps in the same manner. Although individual and industry indications of interest are considered to be privileged and confidential information, the names of persons or entities submitting such information and/or comments will be a matter of public record.

Respondents should rank blocks and/or areas according to priority of interest (e.g., priority 1 (high), 2, or 3). Priority information submitted will be proprietary.

In order to be incorporated in the review process, information and comments must be submitted no later than 30 days following publication of this document in the **Federal Register**. Correct receipt of the information will be facilitated if envelopes are marked "Request for Supplemental Information on Proposed Lease Sale 88—Gulf of Alaska/Cook Inlet".

Letters and maps should be sent to the Regional Supervisor for Leasing and Environment, Alaska OCS Region, P.O. Box 101159, 620 East 10th Avenue, Anchorage, Alaska 99510. A copy should be sent to the Chief, Offshore Leasing Management Division, Minerals Management Service, 12203 Sunrise Valley Drive, Mail Stop 645, Reston, Virginia 22091. Hand deliveries to the Department of the Interior may be made at 18th and C Sts., N.W., room 2510, Washington, D.C. Telephone contacts may be made to Joan Hagans (907) 261–2469 (Alaska), or to Yvonne Morehouse (202) 343–5121 (Washington, D.C.).

Date: March 27, 1984.

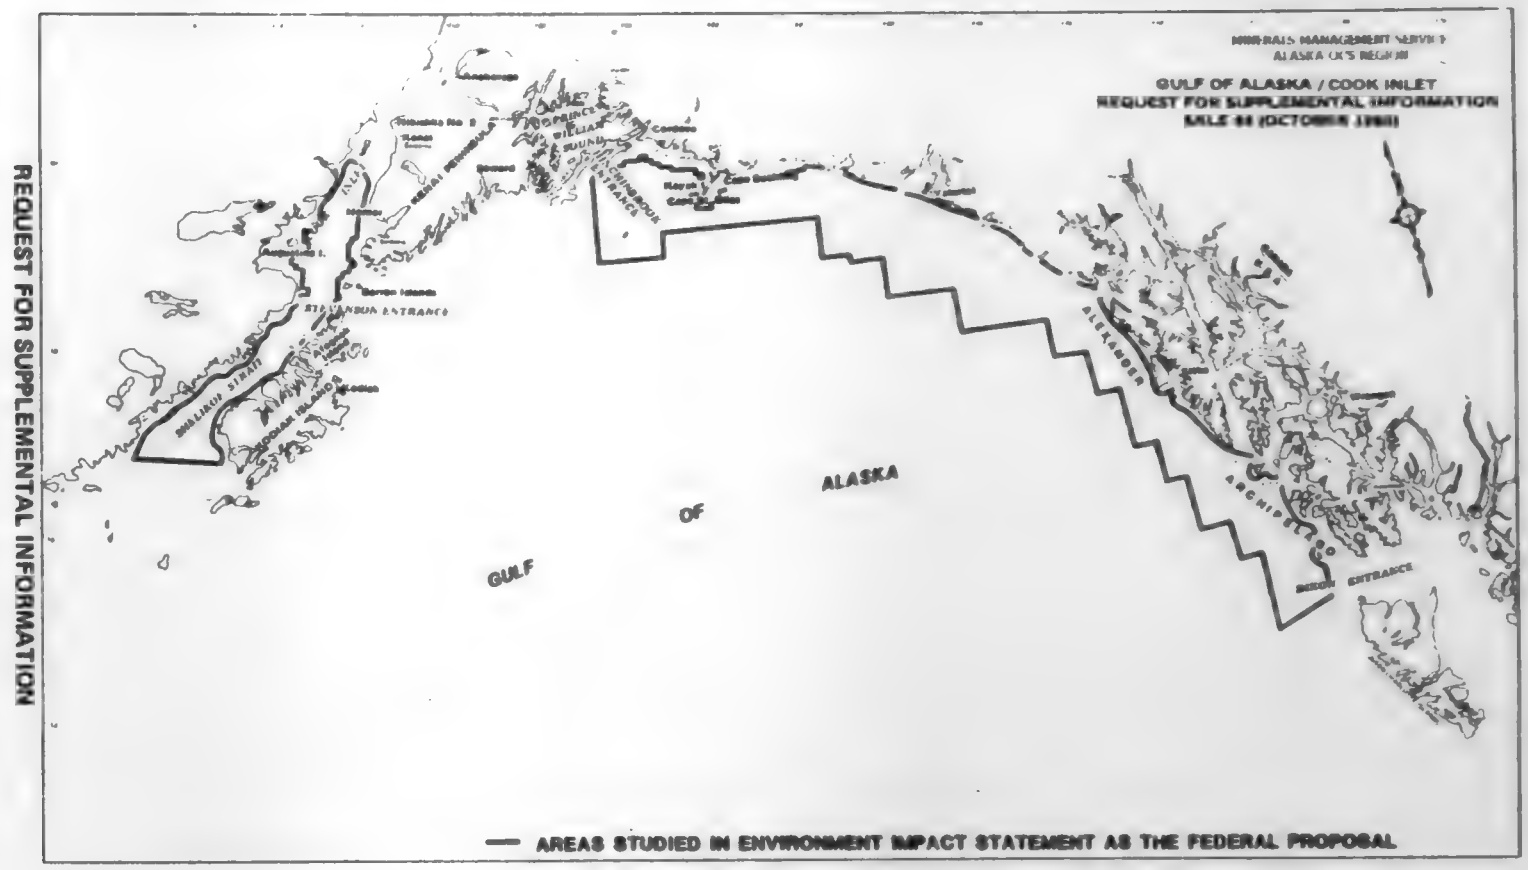
William D. Bettenberg,

Director, Minerals Management Service.

Approved:

Leona A. Power,

Assistant Secretary for Land and Minerals Management.



REQUEST FOR SUPPLEMENTAL INFORMATION

March 1984

[FR Doc. 84-8634 Filed 3-29-84; 8:45 am]
BILLING CODE 4310-MR-M

Request for Supplemental Information Sale 90—South Atlantic

Purpose of Request

As part of the Secretary of the Interior's ongoing review of Outer Continental Shelf (OCS) lease sales, interested parties are invited to provide up-to-date information related to the Federal proposal for Sale 90—South Atlantic, scheduled for January 1985 (see attached map).

The Secretary is seeking specific information on the current level of industry interest in leasing and exploring within the South Atlantic area depicted on the attached map. Potential bidders are requested to provide new information or clarify or supplement earlier information indicating their interest in areas for possible oil and gas leasing under the OCS Lands Act (43 U.S.C. 1331–1343).

In addition, the Minerals Management Service has been examining a number of options that affect lease terms and conditions for Sale 90. They involve variations in bidding systems, royalty rates, length of lease term, size of lease block, minimum bid level, and rental rates. The effects of the alternatives on the economics of exploration and development are being examined both individually and in various combinations. We would appreciate your comments relative to these factors, as well as any other lease terms and conditions that you feel are appropriate.

Use of Information From Request

Information received in response to this request will be used to help design a proposed sale area which best reflects a reasonable balance between industry interest and environmental, national defense, or other potential resource conflicts.

Description of Area

The area covered by this request is generally offshore the States of North Carolina, South Carolina, Georgia, and Florida and is depicted as the cross-hatched area on the attached map. The area shown represents the Area Identification decision made in August 1983 (40.8 million acres) and is the proposed Federal action.

Summary of Response to Call for Information

The Call for Information encompassed approximately 99 million acres. Two companies responded indicating leasing interest in about 22 million acres.

Comments were received from the States of North Carolina, South Carolina, and Florida, the National Oceanic and Atmospheric Administration, and the Natural Resources Defense Council. Concerns expressed included: leasing within the 200-meter isobath off North Carolina; leasing within the 500-meter isobath south of the 30° N. latitude; leasing adjacent to marine and estuarine sanctuaries; effects of leasing on tourism and environmentally sensitive areas; and length of lease terms. The Department of Defense and National Aeronautics and Space Administration have requested deferral of the area south of 31° N. latitude.

Instructions on Request

Information on the interest industry has in leasing and exploring in the South Atlantic should be provided by letter. If new or supplemental information is submitted on specific areas which

industry would like to have offered for lease sale, it should be depicted on the Request for Supplemental Information map, available free from the Regional Manager, Atlantic Region, MMS, 1951 Kidwell Drive, Suite 601, Vienna, Virginia 22180. Interest should be as specific as possible and should be shown by outlining blocks or area(s) along block lines. Areas of concern may be indicated on these maps in the same manner. Although individual indications of interests are considered to be privileged and proprietary information, the names of persons or entities submitting indications of interest and/or comments will be a matter of public record.

Respondents should rank blocks and/or areas according to priority of interest (e.g., priority 1 (high), 2, or 3). Priority information submitted will be held proprietary.

Supplemental information on indications of interests and comments must be submitted no later than 30 days following publication of this document in the **Federal Register** in envelopes labeled "Request for Supplemental Information on Proposed Lease Sale 90—South Atlantic."

Letters and maps should be sent to the Regional Supervisor for Leasing and Environment, Atlantic Region, Minerals Management Service, 1951 Kidwell Drive, Suite 601, Vienna, Virginia, 22180. A copy should be sent to the Chief, Offshore Leasing Management Division, MMS, Mail Stop 645, 12203 Sunrise Valley Drive, Reston, Virginia 22091 or hand delivered to the Department of the Interior, Room 2510, 18th and C Streets, NW., Washington, D.C. 20240. Telephone contacts should be made to Wallace Macnow (202) 343–5121 (Washington, DC) or Home Benton (703) 285–2207 (Vienna, Virginia). For additional information, please refer to the Call for Information published in the **Federal Register** on May 26, 1983 at 48 FR 23723.

Dated: March 23, 1984.

Outer Continental Shelf Oil and Gas Lease Sales; List of Restricted Joint Bidders; Chevron U.S.A. Inc., et al.

This Notice supersedes the List of Restricted Joint Bidders published in the **Federal Register** on October 4, 1983, at 48 FR 43318. Pursuant to the authority vested in the Director of the Minerals Management Service by the joint bidding provisions of 30 CFR 256.41, each entity within one of the following groups shall be restricted from bidding with any entity in any other of the following groups at Outer Continental Shelf oil and gas lease sales to be held during the bidding period of May 1, 1984, through October 31, 1984.

Group I: Chevron U.S.A. Inc.; Standard Oil Company of California.
Group II: Exxon Corporation.
Group III: Mobil Oil Corporation; Mobil Oil Exploration and Producing Southeast Inc.; Mobil Producing Texas & New Mexico Inc.
Group IV: MTS Limited Partnership (Mesa Petroleum Co., Texaco Inc., and Sequoia Petroleum Inc.); Texaco Inc.
Group V: Shell Offshore Inc.; Shell Oil Company; Shell Western E&P Inc.

Dated: March 26, 1984.

BILLING CODE 4310-MR-M

Notification of Procedural Changes for OCS Bid Adequacy

AGENCY: Minerals Management Service, Interior.

ACTION: Notification of Procedural Changes.

SUMMARY: The Minerals Management Service has made three modifications in its existing bid adequacy procedures for ensuring receipt of fair market value on OCS leases. These procedures: (1) Allow for the classification of tracts as nonviable in Phase 1 only when adequate data and maps exist to support such a determination; (2) discontinue application of items labeled D through M in the discussion of the Phase 2 criteria, with the exception of item H (drainage costs), until a rigorous procedure is developed for quantitatively applying them; and (3) eliminate the geometric mean of the bids rule in Phase 1.

DATE: These modifications will be implemented beginning with the Navarin Basin Lease Offering (April 1984).

FOR FURTHER INFORMATION CONTACT: Dr. Marshall Rose, Minerals Management Service, MS643, 12203 Sunrise Valley Drive, Reston, Virginia 22091, telephone (703) 860-7571.

SUPPLEMENTARY INFORMATION: On February 22, 1983, the Department of the Interior (Department) adopted new procedures to evaluate bids received on tracts in OCS lease offerings to assure receipt of fair market value.

The refined bid adequacy system placed increased reliance upon competition in the free market through implementation of a two-phase process. All bids received would be evaluated through at least the first phase proceeding, if necessary, to a detailed economic and engineering analysis. The two-phase postsale review of bids allowed for bid adequacy decisions to be made shortly after the offering date. Bid adequacy guidelines incorporating these changes were promulgated on April 21, 1983. In conjunction with the changes listed above, the current bid adequacy procedure is described below:

Phase 1

Phase 1 is composed of criteria designed to partition block receiving bids into three general categories:

- Those receiving bids which Minerals Management Service (MMS) has identified as being non-prospective;
- Those where opportunities for strategic underbidding, information asymmetry, collusion, and other noncompetitive practices might most likely occur and where the Government has the most detailed and reliable data; and
- Those where the competitive market forces can be relied upon to assure fair market value.

Based on these categories, the following three Phase 1 criteria are applied to all blocks receiving bids:

1. High bids on all blocks classified by MMS as being either development or drainage will be referred directly for further evaluation in Phase 2.

2. All legal high bids for blocks judged by MMS not to be located on a viable prospect will be accepted.

3. After screening for anomalously low bids through application of the "one-eighth rule," [1] all legal high bids will be accepted for prospective wildcat and proven blocks receiving three or more bids and more than the average number of bids for prospective blocks bid upon in the offering, i.e., whichever is more.

Phase 1 is conducted block-by-block and will generally be completed within 3 days of the Bid Opening.

Phase 2

All prospective wildcat and proven blocks which are not accepted as a result of the application of the Phase 1 criteria and all drainage and development blocks will receive further evaluation by comparing the high bids with the MROV, DMROV, and GAEOT. In addition, if in the judgment of the Regional Manager a block is or may be subject to drainage, the relevant costs due to delays associated with bid rejection will be considered in the bid adequacy determination.

While it is expected that most analyses would be undertaken based upon data available at the time of the sale, additional geological and geophysical analyses can be undertaken postsale at the discretion of the Regional Manager.

The bid adequacy recommendations developed in Phase 2 will generally be completed within 3 weeks of the sale, however, the Regional Manager may extend this period when necessary to assure a thorough evaluation.

William D. Bettenberg,

Director, Minerals Management Service.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Lodging of Judgment Orders Pursuant to the Clean Air Act; Jones & Laughlin Steel Inc., et al.

In accordance with Departmental Policy, 28 CFR 50.7, notice is hereby given that a proposed Judgment Order in *United States of America, et al.* v. *Jones & Laughlin Steel, Incorporated, et al.*, Civil Action Numbers 79-426-K and 79-1193-A, has been lodged with the United States District Court for the Western District of Pennsylvania. Also, a proposed Judgment Order in *United States of America* v. *Jones & Laughlin Steel Incorporated, et al.*, Civil Action Number H-79-65, has been lodged with the United States District Court for the northern District of Indiana. Further, a proposed Judgment Order in *United States of America, et al.*, v. *Jones & Laughlin Steel Incorporated, et al.*, Civil Action Numbers C-77-144-Y and C-81-12, has been lodged with the United State District Court for the Northern District of Ohio.

Motions for entry of the proposed Judgment Orders were made by Jones & Laughlin Steel Incorporated and The LTV Corporation. The United States has preliminarily indicated that it does not oppose entry of the Judgment Orders, conditioned upon the publication of this Notice, and the evaluation of any comments received in response to this Notice.

The contempt motions previously filed by the United States alleged violations of existing Federal Consent Decrees and the Clean Air Act by Jones & Laughlin Steel Incorporated and The LTV Corporation at its Aliquippa Works, Aliquippa, Pennsylvania; Pittsburgh Works, Pittsburgh, Pennsylvania; Indiana Harbor Works, East Chicago, Indiana; Campbell Works, Campbell, Ohio; and Cleveland Works, Cleveland, Ohio. The contempt motions sought injunctive relief to require Jones & Laughlin Steel Incorporated and The LTV Corporation to comply with its existing Federal Consent Decrees and the Clean Air Act. The contempt motions also sought stipulated civil penalties for past violations of the Consent Decrees.

The Judgment orders provide that Jones & Laughlin Steel Incorporated and The LTV Corporation will comply with the Clean Air Act and undertake installation of necessary pollution control equipment in accordance with a schedule set forth in the Judgment Orders. Jones & Laughlin Steel Incorporated and The LTV Corporation are required to pay a civil penalty of $4,000,000 in settlement of stipulated civil penalty claims.

The U.S. Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Judgment Orders. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, U.S. Department of Justice, Washington, D.C. 20530, and should refer to *United States of America, et al.* v. Jones & Laughlin Steel Incorporated, et al., D.J. Ref. 90-5-2-3-1011.

The proposed Judgment orders may be examined at the offices of the United States Attorney for the Western District of Pennsylvania, 633 U.S. Post Office and Courthouse, 7th Avenue and Grant Street, Pittsburgh, Pennsylvania 15219; United States Attorney for the Northern District of Indiana, Room 312, Federal Building, 507 State Street, Hammond, Indiana 46320; and the United States Attorney for the Northen District of Ohio, Suite 500, 1404 East Ninth Street, Cleveland, Ohio 44114. Further, the proposed Judgment Orders may be examined at the offices of Region III of the U.S. Environmental Protection Agency, Curtis Building, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106 and Region V of the U.S. Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois 60604. Copies of the Judgment Orders may be examined at the Environmental Enforcement Section, Land and Natural Resources Division, U.S. department of Justice, Room 1517 or 1644, 9th Street and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed Judgment Orders may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division, U.S. Department of Justice. In requesting a copy, please enclose a check in the amount of $20.00 ($0.10 per page reproduction charge) payable to the Treasurer of the United States.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-09-M

Manufacturer of Controlled Substances; Registration; Hoffman La Roche Inc.

By Notice dated May 9, 1983, and published in the **Federal Register** on May 18, 1983 (48 FR 22385), Hoffman La Roche Inc., Kingland Road and Bloomfield Avenue, Nutley, New Jersey 07110, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of the basic classes of controlled substances listed below:

Drug	Schedule
Alphaprodine (9010)	II
Levorphanol (9220)	II

No comments or objections have been received. Therefore, pursuant to section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and Title 21, Code of Federal Regulations, Section 1301.54(e), the Deputy Assistant Administrator hereby orders that the bulk manufacturer of the basic classes of controlled substances listed above is granted.

Dated: March 23, 1984.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 84-8602 Filed 3-29-84; 8:45 am]

BILLING CODE 4410-09-M

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-14,709, 15,103, 15,104]

Wean United, Inc., Youngstown and Warren, Ohio, Vandergrift, Pennsylvania; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

Pursuant to section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor issued two notices of certification of eligibility to apply for worker adjustment assistance on February 2, 1984 in response to three petitions from workers and former workers of Wean United, Incorporated, in Youngstown, Ohio (TA-W-14,709), Warren, Ohio (TA-W-15,103) and Vandergrift, Pennsylvania (TA-W-15,104). The Notices of Certification were published in the **Federal Register** on February 14, 1984 (49 FR 5703).

Subsequently, the United Steelworkers of America asked to have the November 30, 1982 impact date for workers at the Vandergrift, Pennsylvania plant changed to May 6, 1982 because of investigation findings that production at that plant was integrated with the Youngstown and Warren plants. The USWA claims that the scope of the Department's factfinding investigation conducted in response to the first petition filed on behalf of workers of Wean United's Youngstown plants should have been expanded to include the Vandergrift and Warren plants when integration of production of the plants was identified rather than requiring the USWA to file separate petitions for the Warren and Vandergrift plants.

Findings in the investigation file show integration of production among all four plants and support the USWA's position that the scope of the initial investigation for Wean workers at the Youngstown plant under petition TA-W-14,709 dated May 6, 1983 should have been expanded to include Wean United's workers at the Warren and Vandergrift plants. Had the Department taken this action, Wean workers at Vandergrift and Warren would have been controlled by the earlier petition, TA-W-14,709 which permits an earlier impact date. Findings in the investigation file support an earlier impact date.

Other findings which support the USWA position show that domestic sales and production of finishing line machinery decreased in 1982 compared to 1981 and in the first eight months of

1983 compared to the same period in 1982 for all four plants.

Aggregate employment decreased at the four plants in 1982 compared to 1981 and in the first eight months of 1983 compared to the same period in 1982.

U.S. imports of metal-forming presses and miscellaneous machines for working metal increased relative to U.S. shipments in 1982 compared to 1981 and in the first 6 months of 1983 compared to the same period in 1982. U.S. imports of rolling mill machinery and parts increased absolutely in the first 9 months of 1983 compared to the same period in 1982.

Wean United submits bids for most of its capital equipment sales. The Department of Labor findings on lost bids by Wean United in 1981, 1982 and 1983 show that potential customers representing a significant portion of Wean's sales declines in 1982 and in the first 8 months of 1983 compared to the respective period in 1982, awarded bids to foreign sources where Wean United was the low domestic bidder. Because of the lead time involved in the capital goods industry between bids and the commencing of production, lost bids by Wean in 1981 would impact on 1982 production. Therefore, lost bids in 1981 were a factor in reduced production by Wean United in 1982 and would support an earlier impact date.

The Department's findings support consolidating Wean United facilities covered by the three petitions under one certification and certifying all workers producing finishing line machinery who were adversely affected by increased imports. Therefore, the certification for workers at Wean United's Vandergrift, Pennsylvania plant (TA–W–15,104) and Wean United Warren, Ohio plant (TA–W–15,103) are hereby withdrawn. Aggregate sales, production and workforce data, and increased imports of like or directly competitive products support changing the impact date to May 6, 1982.

The amended certification for TA–W–14,709 is hereby issued as follows: "All workers of Wean United in Youngstown and Warren, Ohio and Vandergrift, Pennsylvania who became totally or partially separated from employment on or after May 6, 1982 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974."

Signed at Washington, D.C., this 21st day of March 1984.

Harold A. Bratt,

Deputy Director, Office of Program Management, UIS.

BILLING CODE 4510-30-M

Pension and Welfare Benefit Programs

[Application No. D–4514 et al.]

Proposed Exemptions; Canterbury Tales, Inc. Employee Profit Sharing Plan et al.

AGENCY: Pension and Welfare Benefit Programs, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this **Federal Register** Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, NW., Washington, D.C. 20216.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of pendency of the exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Canterbury Tales, Inc., Employee Profit Sharing Plan (the Plan), Located in Alexandria, Virginia

[Application No. D–4514]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the cash sale of a certain limited partnership interest (the Partnership Interest) in the Canterbury Tales Limited Partnership (the Partnership), located in Washington, D.C. by the Plan to David H. Pensky and Richard J. Hindin, parties in interest with respect to the Plan, provided the sales price is not less than the fair market value of the Partnership Interest at the time of sale.

Summary of Facts and Representations

1. The Plan is a multi-employer profit sharing plan that had approximately 113 participants and total assets of $1,375,867 as of February 28, 1982. The sponsors (the Sponsors) of the Plan are Canterbury Tales, Inc. and its wholly-owned subsidiaries, Britches of Georgetown, Inc., D.C., Britches of Lenox Square, Britches of Georgetowne-Preachtree Ctr., Inc., Britches of Georgetowne, Inc., Maryland and Britches of Georgetowne, Inc., Virginia, all of which are engaged in the retail or wholesale clothing trade. The investment decisions of the Plan are

made by the trustees (the Trustees), who are David H. Pensky and Richard J. Hindin, the principal shareholders and officers of the Plan Sponsors and the combined owners of 95% and the general partner of the Partnership.

2. In 1970, prior to the enactment of the Act, as part and parcel of an equity participation loan (the Loan), the Plan made a $16,000 loan to the Partnership, in exchange for a ten-year promissory note from the Partnership in the amount of $16,000, with interest at the then prevailing interest rate of 9% per annum, plus a 5% Partnership Interest in the Partnership. The business of the Partnership is the ownership and operation of a parcel of improved real property (the Property), located at 1241 Wisconsin Avenue, N.W., Washington, D.C. The Property, which is encumbered by a first mortage (the Mortgage) held by First National Bank of Maryland (the Bank), is rented on a net-net lease basis to its tenants (Tenants). In 1980, the Loan, together with all interest, was paid in full. It is represented that the Loan did not constitute a prohibited transaction by reason of the transitional rules contained in section 414 of the Act.[1] It is further represented that neither the Bank nor any of the Tenants is related to the parties to the transaction.

3. The 5% Partnership Interest has been and continues to be non-income producing. Since its inception, the Partnership incurred net losses in each year except for 1981 and 1982. In 1981 and 1982, the Partnership produced a small net profit due to the fact that the building on the Property had then been fully depreciated. As a result of the income received above, the negative capital accounts of the Partners in the Partnership decreased from $77,341 to $37,938. It is anticipated that future cash distributions to the Plan relative to the market value of the 5% Partnership Interests will be small.

4. In addition to the fact that the 5% Partnership Interest is non-income producing, the Trustees believe that the projected liquidity needs of the Plan support the conversion of this asset to cash. The Trustees, therefore, propose to sell the Partnership Interest to themselves, as individuals, for $20,087, which is based upon the sales price for Partnership Interests sold in March of 1983. At that tie a 25% partnership interest was sold by Mr. Stanley Smith, an unrelated limited partner, to Messrs. Hindin and Pensky for $100,000 payable with a note for the full sales price with interest at 10%. The note provides for interest only payments for 60 months with the entire principal due on April 1, 1988.

No commissions will be paid in connection with the sale nor will the Plan be required to pay the Partnership any portion of its negative capital balance. The outstanding balance of the Mortgage as of May, 1983 was $113,252. An appraisal performed by Kevin O. Curnyn, president of Thos J. Owen & Son, Inc. of Washington, D.C., on March 14, 1983, valued the Property at $515,000. Accordingly, the net equity of the Partnership in the Property is $401,748. It is represented that on the basis of $401,748, the fair market value of the Partnership Interests is $20,087.

5. In summary, the applicant represents that the proposed sale by the Plan would meet the statutory criteria for an exemption under section 408(a) of the Act because: (a) The Trustees have determined that the transactions are appropriate for the Plan and are in the best interests of the Plan's participants and beneficiaries; (b) the sale is a one-time transaction for cash; (c) the Plan will be able to dispose of the investment which is non-income producing for cash and reinvest the proceeds in more liquid income producing investments; (d) the sales price is equal to the most recent sales price paid for Partnership Interest; and (e) no commissions will be paid in connection with the sale.

Notice to Interested Persons: Notice to interested persons will be provided by the applicant within 30 days of the date of publication in the **Federal Register.** Comments and hearing requests are due 60 days after the date of publication.

Norquist Salvage Corp., Inc. Profit Sharing Plan (the Plan), Located in Burlingame, California

[Application No. D–4598]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed sale by the Plan of an interest (the Partnership Interest) in a real estate limited partnership to Norquist Salvage Corp., Inc. (the Employer), the sponsor of the Plan, for $50,000 in cash, provided that the sales price for the Partnership Interest is no less than the fair market value of the Partnership Interest at the time of such sale.

Summary of Facts and Representations

1. The Plan is a qualified profit sharing plan with 89 participants and assets of approximately $400,000 as of December 31, 1982. The Plan is administered by Brandt M. Norquist (the Trustee), who is an officer of the Employer. On June 6, 1982, an investment committee of the Plan headed by the Trustee purchased on behalf of the Plan the Partnership Interest in a California real estate limited partnership known as REYN Fairmont "A" Ltd. (the Partnership) for a purchase price of $50,000. The general partner of the Partnership was REYN Financial, Inc. (REYN), a California corporation which operated as a general partner for a number of other projects similar to the Partnership. The Partnership Interest consists of an undivided 12.5 percent interest in a twelve-month deed of trust note (the Note) in the principal amount of $400,000. The Note was to provide a return of 22 percent over its twelve-month term. The Note was executed July 27, 1982 and provided for monthly payments of $7,333.33 with a balloon payment of all unpaid principal and interest on August 1, 1983. Investors in the Partnership consisted primarily of qualified employees benefit plans and other retirement vehicles in the San Francisco Bay area. The Trustee represents that the Plan's purchase of the Partnership Interest was highly recommended by reliable local investment advisors, that 150 plans and individuals had invested in excess of five million dollars into similar REYN projects, and a careful study of REYN supported the Trustee's opinion at the time of the purchase of the Partnership Interest that such investment would be an exercise of prudent financial responsibility on behalf of the Plan.

2. In September of 1982, REYN encountered major financial difficulties and the Partnership along with eleven other REYN projects went into default. On October 19, 1982, the Partnership filed a voluntary bankruptcy petition in the U.S. Bankruptcy Court for the Northern District of California. On behalf of the Plan the Trustee retained an attorney, Thomas J. LoSavio (LoSavio), to protect the Plan's investment in the Partnership. After a

[1] The Department expresses no opinion as to the applicability of section 414 of the Act in this instance.

review of the facts and circumstances surrounding the bankruptcy of the Partnership, LoSavio gave his opinion on June 21, 1983 that the likelihood of recovery of the Plan's investment in the Partnership was not great enough to justify pursuit of a case on behalf of the Plan on a contingency fee basis. The agent of the Partnership's general partner, Arthur Bigelow, president of REYN, verified to the Trustee on August 1, 1983 that the Partnership, which is no longer in existence, is without any assets. The Trustee represents that the Partnership Interest is now worthless and that there is no likelihood that legal proceedings could recover the Plan's original investment of $50,000 in the Partnership Interest.

3. The Trustee is requesting an exemption to permit the Employer to purchase the Partnership Interest from the Plan for $50,000 in cash. The Partnership Interest represents approximately 12.6 percent of the Plan's total assets as of December 31, 1982. The Trustee represents that, in light of the likelihood that legal action to recover the original investment in the Partnership Interest would not recover the investment, it is appropriate for the Plan to dispose of the Partnership Interest to prevent a hardship on the Plan and its participants and beneficiaries. If the Employer is allowed to purchase the Partnership Interest from the Plan, all of the Plan's rights with respect to the Partnership Interest will be transferred to the Employer. The pursuit of legal recovery efforts will be the responsibility of and at the expense of the Employer and the risk of a complete loss on the original investment of $50,000 will become the Employer's. The Trustee represents that there is no market for the Partnership Interest and that if the Employer does not purchase the Partnership Interest from the Plan the Plan will realize a principal loss of $50,000 and any opportunity for income on that amount for as long as it holds the Partnership Interest.

4. In summary, the Trustee represents that the Employer's purchase of the Partnership Interest from the Plan for $50,000 in cash will satisfy the criteria of section 408(a) of the Act because (1) the purchase of the Partnership Interest will constitute a single cash transaction which will not require any subsequent monitoring; (2) the sale of the Partnership Interest by the Plan is necessary to prevent a principal and interest loss to the Plan; and (3) the purchase of the Partnership Interest by the Employer will allow the Plan to invest in more liquid assets with a definite income potential rather than incurring legal expenses toward a likely loss of the original investment in the Partnership Interest.

First American Corporation Comprehensive Employee Benefit Plan and Trust (the Plan), Located in Nashville, Tennessee

[Application No. L-4622]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act shall not apply to the proposed transfer of a group term life insurance policy (the Policy) to the Plan by First American Corporation (the Corporation), a party in interest to the Plan, provided that in the event the Corporation claims a deduction on its Federal income tax return for the transfer of the Policy, the deduction will not exceed the fair market value of the Policy on the date of its transfer to the Plan.

Summary of Facts and Representations

1. The Corporation is a bank holding company organized under the laws of the State of Tennessee. The Corporation established the Plan for the benefit of its own employees and the employees of 12 of its subsidiaries that have adopted the Plan.

The Plan, which provides survivor income, death, disability and health care benefits, had 1,962 participants and $1,983,082 in assets as of December 31, 1982. The trustee of the Plan (the Trustee) is First American National Bank of Nashville, a subsidiary of the Corporation.

2. To be eligible for the survivor income benefit under the Plan, a Plan participant was required to have a year of service and to participate in a group term life insurance plan maintained by the Corporation and its subsidiaries under which the participant contributed a fixed dollar amount per month. Pursuant to the group term life insurance plan, the Corporation has been the group policyholder of the Policy number GL-18279 issued by Bankers Life Company of Des Moines (Bankers). The Corporation, with contributions from its affiliates, has made all premium payments and other payments necessary to maintain the Policy in excess of the fixed rate of contributions made by the participants of the group term life insurance plan.

3. The most recent amendment to the Plan, which became effective as of May 1, 1983, adds group term life insurance benefits to Part I of the Plan which previously had provided for survivor income benefits. Pursuant to this amendment, the Plan will become the group policyholder of a group term life insurance policy and will pay all of the premiums and other amounts necessary to provide the benefits under Part I in excess of the contributions which will be required of those participants who elect to participate in Part I of the Plan. By combining the group life insurance benefit with the survivor income benefit, all interest, dividends and experience rating refund payments received on the group insurance policy will be made to the Plan.

In order to implement the latest amendment to the Plan, it is proposed that the Corporation transfer the Policy to the Plan. Following the transfer, the Plan would make the premium payments on the Policy from employee and employer contributions and would receive all dividends, interest and experience rating refunds on the Policy.

4. Reserves under the Policy amounted to $23,763 on January 1, 1983. These reserves for incurred but unreported claims would be held by Bankers for 13 months following cancellation of the Policy and at that time any remaining reserves and the final dividends which had accrued to the date of termination would be paid to the policyholder. In addition to the reserves, $105,000 is being held by Bankers to pay future death claims for persons who are currently disabled. These claims are payable whether or not the Policy is in force. If a disabled person recovers while the Policy is in force, the amount being held to pay the claim is credited to the policyholder. If the Policy is cancelled and a disabled person recovers, no funds revert to the prior policyholder. Both the $23,763 reserves and the $105,000 would transfer with the Policy.

5. The Policy would be transferred to the Plan at no cost to the Plan. The Policy has no readily ascertainable dollar value and no attempt has been made to place a specific value on the Policy due to the many contingencies involved in any value for the Policy. No deduction would be claimed by the Corporation for Federal income tax purposes in connection with the transfer of the Policy unless it were determined by the Internal Revenue Service that the transfer created taxable income for the Corporation, in which case an offsetting

deduction equal to the amount of such income would be claimed. In no event would a deduction be claimed by the Corporation for more than the fair market value of the Policy on the date of its transfer to the Plan.

There are no liabilities associated with the Policy other than the obligation, if the Policy is to be maintained in force, to pay monthly premiums as they become due. The Corporation is not delinquent with respect to the payment of any premium.

6. Bankers reviewed the Policy and determined that in addition to the reserves under the Policy which would transfer with the Policy, there were other advantages to the Plan in accepting the Policy rather than acquiring a new policy. Bankers estimates that a new policy would have gross retention charges of 8.9% of the first year premium as compared with 8.7% on the Policy. Further, during the first year of a new policy, reserve requirements of 12% of the non-pooled portion of the premium would be fulfilled by deducting the amount required from paid premiums, thereby reducing the amount of premium on which dividends would be payable.

Bankers concluded that in view of the potential cost savings if the Policy is transferred, it is in the best interest of the Plan and its participants and beneficiaries for the Trustee to accept the transfer of the Policy to the Plan. The Trustee also considers the transfer of the Policy to be in the best interests of the Plan and its participants and beneficiaries.

7. In summary, the applicant represents that the proposed transaction meets the statutory criteria for an exemption under section 408(a) of the Act because: (a) The transfer of the Policy is a one-time transaction which will be docu nented with Bankers; (b) the transfer of the Policy will result in lower costs to the Plan in providing group term life insurance benefits than would result if the Plan purchased a new group term life insurance policy; (c) Bankers has reviewed the Policy and determined that it would be in the best interests of the Plan and its participants to accept the transfer of the Policy; and (d) the Trustee also has concluded that the transfer of the policy would be in the best interests of the Plan and its participants and beneficiaries.

Drs. Bickmore, Boyles & Steinfurth, Inc. Employees' Profit-Sharing Plan (the Profit Sharing Plan) and Drs. Bickmore, Boyles & Steinfurth, Inc. Employees' Pension Plan (the Pension Plan) (collectively, the Plans) Located in Dayton, Ohio

[Application Nos. D–4911 and D–4912]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted and restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the cash sale of a parcel of unimproved real property (the Property) by the Plans to Practical Interests Limited (PIL), a party in interest with respect to the Plans, provided that the price paid for the Property is no less than its fair market value at the time the sale is consummated.

Summary of Facts and Representations

1. The Plans are both defined contribution plans with 13 participants in each. As of March 31, 1983, the Profit Sharing Plan had assets of $763,125.17 and the Pension Plan has assets of $722,803.73. The trustees of the Plans (the Trustees) are John T. Bickmore, M.D., John H. Bolyes, Jr., M.D., and Lee Steinfurth, M.D. Each Trustee owns 25% of the shares of Dayton Ear, Nose & Throat Surgeons, Inc., the sponsor of the Plans (the Sponsor). Arthur Gardikes, M.D., a plan participant, owns the remaining shares of the Sponsor. The Trustees have the right to direct the investment of the Plans' assets.

2. On July 28, 1978, the Plan purchased the Property from Scott H. Cappel, an unrelated party with respect to the Plans, for investment purposes. On the same date, Dr. Boyles purchased an adjacent parcel of real property from Mr. Cappel.[1] The Plans paid $40,000 in cash for the Property with each Plan paying one-half of the purchase price and receiving a one-half interest in the Property. Since the purchase, the Plans have paid $1,286.89 in real estate taxes. The Plans have incurred no other holding costs with respect to the Property. The Property has produced no income for the Plans.

3. The Property has appreciated an average of 4.5% per annum since it was purchased. The assets of the Profit Sharing Plan, excluding its share of the Property, have appreciated an average of 10.7% per annum. The assets of the Pension Plan, excluding its share of the Property, have appreciated an average of 10.9% per annum. The Plans desire to convert the Property into cash in order to invest in assets that will provide a higher rate of return.

4. Accordingly, the Plans propose to sell the Property for $50,000 in cash to PIL. PIL is a partnership which is owned one-third by Dr. Boyles, one-third by Dr. Steinfurth, and one-third by Dr. Gardikes. On August 22, 1983, Donald E. Stout, MAI, appraised the Property and determined that the fair market value of the Property as of that date was $50,000. With respect to the property owned by Dr. Boyles which is adjacent to the Property, in a letter dated January 27, 1984, Mr. Stout states that the value of assemblage does not exist to any degree in this instance because the developer platted the individual lots equal to the optimum size for whatever improvements would normally be constructed in this development. The Plans will incur no costs with respect to the sale of the Property to PIL.

5. In summary, the applicant represents that the proposed transaction meets the statutory criteria for an exemption under section 408(a) of the Act because: (a) The sale will be a one-time transaction for cash; (b) the sales price of the Property was determined by an independent appraiser; and (c) the sale will enable the Plans to divest themselves of a non-income producing asset which is appreciating at a lower rate than the other assets of the Plans.

For Further Information Contact: David M., Cohen of the Department, telephone (202) 523–8671. (This is not a toll-free number.)

Pitometer Associates, Inc. Profit Sharing Plan (the Plan) Located in New York, New York

[Application No. D–5129]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application

[1] In this proposed exemption, the Department expresses no opinion as to whether the Plans' acquisition or holding of the Property violates any provision of Part 4 of Title I of the Act.

of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the making of loans (the Loans) by the Plan under the terms of a loan commitment (the Loan Commitment) of the lesser of $250,000 or an amount not to exceed 25 percent of the net assets of the Plan, to Pitometer Associates, Inc. (the Employer), provided the terms and conditions of the Loans are at least as favorable to the Plan as those obtainable in an arm's length transaction with an unrelated party.

Temporary Nature of Exemption: This exemption is temporary in nature and will expire ten years after the date of the grant.

Summary of Facts and Representations

1. The Employer is an engineering firm which has engaged in business throughout the world since 1904. The Employer specializes in waste water and trunk main surveys, water distribution studies and water measurement and special hydraulic investigations. The Employer maintains its principal offices at 100 Church Street, New York, New York.

2. The Plan is a non-contributory profit sharing plan that was established by the Employer on December 27, 1945 for the benefit of the Employer's eligible employees and their beneficiaries. As of December 31, 1982, the Plan had 43 participants and total assets of $1,460,858. The trustees of the Plan (the Trustees), who serve as directors or officers of the Employer, are Messrs. G. Brewster Cole, William F. H. Gros and William D. Hudson. The Trustees make investment decisions for the Plan.

3. Over the past several years, the Employer has found it necessary to enter the credit market on a short term basis to meet part of its cash flow needs at certain times of the year. These periods generally coincide with the payment by the Employer of periodic bonuses to its employees, or the unexpected arrival of other extraordinary expenses. To offset its cash flow needs, the Employer has entered into loans with third party lenders. Typically, these loans have been made at the prime rate or one-half of one point over the prime rate and have been repaid by the Employer within a six month period.

4. To pay the expenses incident to the operation of its business, the Employer requests an exemption that will allow it to borrow amounts, which when aggregated with other Loans to the Employer that are outstanding, represent the lesser of $250,000 or 25 percent of the net value of the Plan's assets. The Loans will be drawn in varying amounts by the Employer. Any such Loans will be repaid within five years. No Loan entered into under the Loan Commitment will be made or continued ten years from the date of the grant of this exemption.

5. The Loans will carry interest at the rate of one percent above the prime rate charged by the Irving Trust Company (Irving) of New York for similar-type loans. In addition, the interest rate will feature a floor of ten percent per annum. Mr. John Kilminster (Mr. Kilminster), who will serve as the independent fiduciary for the Plan in monitoring the Loans, will have the discretion to adjust the interest rate on a quarterly basis as of the first day of each quarter following the date of the making of a Loan. Mr. Kilminster will be empowered to adjust the interest rate upward and in excess of one percent over Irving prime if the circumstances dictate an increase is required. However, Mr. Kilminster will not have the power to reduce the interest rate below the 10 percent level.

6. As documentation of the transaction, the Plan, the Employer and Mr. Kilminster will enter into a loan agreement (the Loan Agreement) that will set forth the terms and conditions of the Loans as well as the rights of the parties. To evidence each of the Employer's Loans under the Loan Agreement, a separate promissory note will be issued. The note will require repayment over a period of no longer than five years in equal quarterly payments of principal plus accrued interest. Each note may be prepaid in whole or in part at any time and will not subject the Employer to a penalty or premium.

7. The Loans will be secured by a first security interest in all of the accounts receivable (the Receivables) of the Employer. The Plan's security interest in the Receivables will constitute a continuing general lien on all such Receivables, including those arising or coming into existence after the date the Loan Commitment is executed until the Loans are paid in full. The Plan's security interest in the Receivables will be granted pursuant to a security agreement and UCC financing statement which will be executed and filed with the New York Secretary of State. At all times, the value of the collateral will exceed 150 percent of the outstanding balance of the Loans. If the value of the collateral falls below 150 percent of the outstanding balance of the Loans, Mr. Kilminster will require that the Employer pledge additional security.

8. A description of the Employer's Receivables has been provided by Mr. John W. Lappin (Mr. Lappin), the Employer's accountant. Although Mr. Lappin describes both firm and unbilled Receivables in his letter to the Department dated November 10, 1983, the Employer has represented that it will pledge only firm Receivables as security for the Loans.

In his letter, Mr. Lappin states that in 1981, the Employer's balance sheet reflected year-end Receivables of $721,155 which included unbilled Receivables of $165,991. In 1982, Mr. Lappin represents, the year-end figures were $535,063 including unbilled Receivables of $143,354. Mr. Lappin explains that the figures for both years, including the unbilled amounts, are placed on the Employer's books after field work required on any given contract has been completed and the right to receive payment is firm. According to Mr. Lappin, the unbilled Receivables represent the final payments to be made under a given contract and are the equivalent of a "retainage" which is customary in most engineering and construction contracts.

Mr. Lappin also states that historically, the Employer's Receivables are very secure since the Employer's clientele consists largely of governments, municipalities and public authorities. During the year 1981, Mr. Lappin represents that the Employer collected the Receivables in full on the average, within 60 days of the time they were due. In 1982, Mr. Lappin states that the collection period was reduced to an average of 45 days.

9. As discussed above, Mr. Kilminster, an attorney having experience in the areas of estate administration and taxation and who has no present relationship with either the Plan or the Employer, has agreed to serve as the independent fiduciary for the Plan with respect to approving, enforcing and collecting the Loans. Mr. Kilminster's appointment is set forth in the Loan Agreement. In addition to the independent fiduciary duties described previously, Mr. Kilminster will have authority and responsibility for: (a) Reviewing Employer and Plan financial statements; (b) approving or disapproving amounts drawn by the Employer; (c) requesting and receiving monies from the Trustees for the purpose of making disbursements to the Employer or paying fees or expenses; (d) obtaining and holding promissory notes and other documents; (e) collecting principal and interest payments on the Loans; (f) enforcing collection on the promissory notes and the secured party's rights; (g) accelerating any Loan if default occurs under a promissory note, the security agreement or the Loan Agreement or if the conditions of the

exemption are not satisfied or maintained; and (h) taking any steps that are necessary to protect the interests of the Plan.

Mr. Kilminster states that he intends to treat each request by the Employer for a Loan as a separate transaction. He indicates he would feel constrained to approve these requests unless the circumstances which might affect the Employer's financial position and past loan history are not fully examined. He also states that whenever any Loan is proposed (or while any earlier Loan remains outstanding) he will periodically confirm that the position of the Receivables has not changed in any material way that may be detrimental to the Plan's security.

Mr. Kilminster states that he has reviewed the exemption application and the various documents that are to be executed at the time any individual Loan is undertaken. Based on the terms set forth therein, he considers the Loans to be an appropriate and suitable investment for the Plan and its participants and beneficiaries. He also feels that there are adequate safeguards to ensure that the Plan will be fully protected.

Among the factors considered in determining the suitability of this type of investment for the Plan, Mr. Kilminster states that he has examined the overall investment portfolio of the Plan and its cash flow need as reflected in the Plan's balance sheets for the years 1979–1982. Since the Plan's portfolio consists basically of stocks and bonds of a high investment quality, Mr. Kilminster asserts that the Plan's cash flow needs are very limited. In view of this situation, he thinks the addition of the Loans will comport very well with the basic diversification and investment scheme of the Plan since the notes to be given are in many respects similar to the corporate bonds already maintained in the Plan's portfolio. In fact, he states, they will add a desired element since they will be of relatively short duration and thus Plan assets will not be locked into a specified interest rate for extended periods of time.

In addition, Mr. Kilminster regards the interest rate that each promissory note will bear to be in the Plan's best interest because it is higher than what is available in the marketplace for investments of a comparable grade. He states that he has examined the Employer's Receivables and shares Mr. Lappin's opinion that the Receivables are an appropriate form of collateral. He thinks the Receivables will render the Plan fully secure in the event of a default on any Loan.

Mr. Kilminster also believes the 25 percent limitation on the amount of the Plan's assets that can be borrowed and the Plan's first security interest in the Receivables are adequate and prudent safeguards which fully protect the Plan. Additional safeguards, Mr. Kilminster notes, are provided to the Plan in the powers afforded him as the independent fiduciary.

10. In summary, it is represented that the proposed transaction will satisfy the statutory requirements for an exemption under section 408(a) of the Act because: (a) The Loans will be approved and administered by Mr. Kilminster, who will monitor the Loans and also be authorized to protect the interests of the participants and beneficiaries of the Plan; (b) the Loans will be secured by a first security interest in all of the Receivables of the Employer; (c) any Loan made under the Loan Agreement will be limited to five years' duration; and (d) the Loans will at no time exceed 25 percent of the assets of the Plan.

For Further Information Contact: Ms. Jan D. Broady of the Department, telephone (202) 523–8971. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan;

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, D.C., this 27th day of March 1984.

Elliot I. Daniel,

Acting Assistant Administrator for Fiduciary Standards, Office of Pension and Welfare Benefit Programs, U.S. Department of Labor.

BILLING CODE 4510–29–M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[84–28]

NASA Advisory Council, Space Applications Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Applications Advisory Committee, Informal Advisory Subcommittee on Microgravity Science and Applications.

DATE AND TIME: April 2, 1984, 9 a.m. to 5 p.m.

ADDRESS: National Aeronautics and Space Administration, Room 226B, 600 Independence Avenue SW., Washington, D.C. 20546.

FOR FURTHER INFORMATION CONTACT: Dr. Dudley G. McConnell, Code E, National Aeronautics and Space Administration, Washington, D.C. 20546 (202/453–1420).

SUPPLEMENTARY INFORMATION: The Informal Advisory Subcommittee on Microgravity Science and Applications will meet to develop a position paper for microgravity science and applications. The Subcommittee chaired by Dr. Robert F. Sekerka, is comprised of five members

The meeting will be open to the public up to the seating capacity of the room (approximately 10 people including the Subcommittee members and participants). The meeting has been scheduled for this date to coincide with an already-scheduled meeting of the full NAC Space Applications Advisory Committee to be held on April 3 and 4, 1984.

Type of Meeting: Open.

Dated: March 26, 1984.

Richard L. Daniels,

Deputy Director, Logistics Management and Information Programs Division, Office of Management.

[FR Doc. 84-8506 Filed 3-29-84; 8:45 am]

BILLING CODE 7510-01-M

[84-29]

NASA Advisory Council, Space Applications Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Applications Advisory Committee, Informal Advisory Subcommittee on Remote Sensing.

DATE AND TIME: April 4, 1984, 1 p.m. to 3 p.m.

ADDRESS: National Aeronautics and Space Administration, Room 226B, 600 Independence Avenue, SW., Washington, DC. 20546.

FOR FURTHER INFORMATION CONTACT: Dr. Dudley G. McConnell, Code E, National Aeronautics and Space Administration, Washington, DC. 20546 (202/453-1420).

SUPPLEMENTARY INFORMATION: The Informal Advisory Subcommittee on Remote Sensing was established to investigate the details of the NASA program in remote sensing on behalf of the Committee and report its findings to the Committee. The Subcommittee chaired by Mr. Ernest L. LaPorte is comprised of four members.

The meeting will be open to the public up to the seating capacity of the room (approximately 10 people including the Subcommittee members and participants). The meeting has been scheduled for this date to coincide with an already-scheduled meeting of the full NAC Space Applications Advisory Committee to be held on April 3 and 4, 1984.

Type of Meeting: Open.

Agenda:

April 4, 1984

1 p.m.—Review the Earth Radiation Budget Experiment.

2 p.m.—Review the Upper Atmosphere Research Satellite program.

3 p.m.—Adjourn.

Richard L. Daniels,

Deputy Director, Logistics Management and Information Programs Division, Office of Management.

[FR Doc. 84-8505 Filed 3-29-84; 8:45 am]

BILLING CODE 7510-01-M

NATIONAL FOUNDATION OF THE ARTS AND THE HUMANITIES

Office of the General Counsel

Humanities Panel Meetings

AGENCY: National Endowment for the Humanities.

ACTION: Notice of Meetings.

SUMMARY: Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given that the following meetings will be held at the Old Post Office, 1100 Pennsylvania Avenue NW., Washington, D.C. 20506:

1. Date: April 18-19, 1984.
Time: 8:30 a.m. to 5:30 p.m.
Room: M-07.
Program: This meeting will review applications submitted for the Humanities Projects in Museums and Historical Organizations Program, Division of General Programs, for projects beginning after October 1, 1984.

2. Date: April 19-20, 1984.
Time: 9:00 a.m. to 5:30 p.m.
Room: 430.
Program: This meeting will review applications submitted for Special Projects/ Programs Development Programs, Division of General Programs, for projects beginning after October 1, 1984.

3. Date: April 25, 1984.
Time: 8:30 a.m. to 6:00 p.m.
Room: 315.
Program: This meeting will review Summer Seminars for College Teachers applications in Politics and Society, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1985.

4. Date: April 26, 1984.
Time: 8:30 a.m. to 6:00 p.m.
Room: 315.
Program: This meeting will review Summer Seminars for College Teachers applications in History II, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1985.

5. Date: April 26-27, 1984.
Time: 8:30 a.m. to 5:00 p.m.
Room: 415.
Program: This meeting will review applications submitted for the Humanities Panel in Media, Division of General Programs, for projects beginning after October 1, 1984.

6. Date: April 27, 1984.
Time: 8:30 a.m. to 6:00 p.m.
Room: 315.
Program: This meeting will review Summer Seminars for College Teachers applications in English and American Literature, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1985.

7. Date: April 30, 1984.
Time: 8:30 a.m. to 6:00 p.m.
Room: 315.
Program: This meeting will review Summer Seminars for College Teachers applications in the Arts, submitted to the Division of Fellowships and Seminars, for projects beginning after May 1, 1985.

The proposed meetings are for the purpose of panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged or confidential; (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; and (3) information the disclosure of which would significantly frustrate implementation of proposed agency action; pursuant to authority granted me by the Chairman's Delegation of Authority To Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c) (4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information about these meetings can be obtained from Mr. Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, D.C. 20506, or call (202) 786-0322.

Stephen J. McCleary,

Advisory Committee Management Officer.

[FR Doc. 84-8515 Filed 3-29-84; 8:45 am]

BILLING CODE 7536-01-M

NATIONAL SCIENCE FOUNDATION

Advisory Panel Social and Developmental Psychology; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science

Foundation announces the following meeting:

Name: Advisory Panel for Social and Developmental Psychology.

Date and Time: April 18–20, 1984: 9:00 a.m. to 5:00 p.m. each day.

Place: Room 338, National Science Foundation, 1800 G Street, NW., Washington, D.C.

Type of Meeting: Part Open—Open April 19—9:00 a.m.—11:00 a.m. Closed April 18—9:00—5:00. Closed April 19—11:00—5:00. Closed April 20—9:00—5:00.

Contact Person: Dr. Jean B. Intermaggio, Program Director for Social and Developmental Psychology, Room 320, National Science Foundation, Washington, D.C. 20550, telephone/202–357–9485.

Summary Minutes: May be obtained from the contact person as listed above.

Purpose of Advisory Panel: To provide advice and recommendations concerning support for research in Social and Developmental Psychology.

Agenda: Open—April 19, 9:00 a.m.—11:00 a.m. General discussion of research trends and opportunities in Social and Developmental Psychology.

Closed—to review and evaluate research proposals as part of the selection process for awards.

Reason for Closng: The proposal being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in Sunshine Act.

Authority to Close Meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determination by the Director, NSF, on July 6, 1979.

Dated: March 26, 1984.

M. Rebecca Winkler,

Committee Management Coordinator.

[FR Doc. 84–8508 Filed 3–29–84; 8:45 am]

BILLING CODE 7555–01–M

DOE/NSF Nuclear Science Advisory Committee; Open Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: DOE/NSF Nuclear Science Advisory Committee.

Date, Time and Place: April 16, 1984—9:00 a.m.–6:00 p.m., Bldg. 26, Room 414, Laboratory for Nuclear Science and Engineering, Massachusetts Institute of Technology, Cambridge, Massachusetts.

April 17, 1984—9:00 a.m.–4:30 p.m., Conference Room, Bates Linear Accelerator, Middleton, Massachusetts.

Type of Meeting: Open.

Contact Person: Dr. Harvey B. Willard, Head, Nuclear Science Section, National Science Foundation, Washington, D.C. 20550, 202/357–7993.

Summary Minutes: May be obtained from Ms. Dawn Frohlich, Physics Division, National Science Foundation, Washington, D.C. 20550.

Purpose of Committee: To provide advice on a continuing basis to both DOE and NSF on the management of and long range planning for basic nuclear science in the United States.

Agenda:

April 16, 1984—9:00 a.m.–6:00 p.m.

Presentations and discussions concerning the physics opportunities that can be addressed with a relativistic heavy ion collider facility. A round table/panel discussion of the accelerator performance criteria necessary for execution of the highest priority lines of research.

April 17, 1984—9:00 a.m.–4:30 p.m.

Continuation of above discussions, tour of Bates Facility, Subcommittee activities, and other business.

Dated: March 26, 1984.

M. Rebecca Winkler,

Committee Management Coordinator.

[FR Doc. 84–8510 Filed 3–29–84; 8:45 am]

BILLING CODE 7555–01–M

Advisory Panel for Ecology; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Ecology.

Date and Time: April 16 and 17, 1984—8:30 a.m. to 5:00 p.m. each day.

Place: Room 1141, National Science Foundation, 1800 G St., NW., Washington, D.C. 20550.

Type of Meeting: Closed.

Contact Person: Dr. Nancy L. Stanton, Program Director, Ecology (202) 357–9734, Room 1140, National Science Foundation, Washington, D.C. 20550.

Purpose of Panel: To provide advice and recommendations concerning support for research in ecology.

Agenda: Review and evaluation of research proposals and projects as part of the selection process of awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to Close Meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

Dated: March 26, 1984.

M. Rebecca Winkler,

Committee Management Coordinator.

[FR Doc. 84–8509 Filed 3–29–84; 8:45 am]

BILLING CODE 7555–01–M

NATIONAL TRANSPORTATION SAFETY BOARD

Availability of Reports, Recommendations and Responses

Reports Issued:

Marine Accident Report: Ramming of the Bayou Steel Company Pier Facility Two Miles South of LaPlace, Louisiana, by the Dutch Bulk Carrier M/V AMSTELVOORN, September 26, 1982 (NTSB/MAR–83/08) (NTIS Order No. PB83–916408).

Marine Accident Report: Ramming of the Poplar Street Bridge by the Towboat M/V CITY OF GREENVILLE and its Four-Barge Tow, St. Louis, Missouri, April 2, 1983 (NTSB/MAR–83/10) (NTIS Order No. PB83–916410).

Marine Accident Report: Sinking of the Charter Fishing Boat JOAN LA RIE III Off Manasquan Inlet, New Jersey, on October 24, 1982 (NTSB/MAR–84/02) (NTIS Order No. PB84–916402).

Highway Accident Report: Multiple Vehicle Collisions and Fires Under Limited Visibility conditions, Interstate Route 75, at Ocala, Florida, February 28, 1983 (NTSB/HAR–83/04) (NTIS Order No. PB83–916204).

Railroad Accident Report: Derailment of Burlington Northern Railroad Company Freight Train No. MTC–0718, near Crystal City, Missouri, July 18, 1983 (NTSB/RAR–84/01) (NTIS Order No. PB84–916301).

Railroad Accident Reports: Brief Format, Issue Number 2—1982 (NTSB/RAB–83/05) (NTIS Order No. PB83–917205).

Railroad Accident Reports: Brief Format, Issue Number 3—1982 (NTSB/RAB–84/01) (NTIS Order No. PB84–917201).

Note.—Reports may be ordered from the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161, for a fee covering the cost of printing, mailing, handling, and maintenance. For information on reports call 703–487–4650 and to order subscriptions to reports call 703–487–4630.

Recommendations to

Aviation—*Federal Aviation Administration: Feb. 21: A–84–7:* In conjunction with the United Kingdom Civil Aviation Authorities, evaluate Rolls-Royce Modification 1736 and 1719 as presented in Rolls-Royce Dart Aero Engine Service Bulletin Numbers Da–72–423 and Da–72–443, respectively, for modification of flame tube suspension systems in Rolls Royce Dart 520 and 530 series engines to determine which of these modifications are appropriate for mandatory installation. Upon completion of this review, require the installation of the appropriate modification in applicable Rolls Royce Dart 520 and 530 series turboprop engines at the earliest feasible date. *Feb. 8: A–84–10:* Issue an Airworthiness Alert

(Advisory Circular 43-16) to operators of Piper model PA-28 airplanes advising of the hazard of operating high-time engines in very cold weather conditions without winterization kits on crankcase breather lines. *A-84-11:* Evaluate the design of crankcase breather line installations of all Piper model 28 airplanes and piper models with similar engine installations to determine the need to provide icing protection on crankcase breather tubes for cold weather operations, and take appropriate action to initiate a retrofit of those models of airplanes that need such protection. *Feb. 8: A-84-12:* Require that after December 3, 1984, only devices which meet the standards of TSO-C69a will be acceptable for installation on newly manufactured airplanes which are to be equipped with passenger evacuation devices. *A-84-13:* Specify a date by which airplane passenger evacuation devices which do not meet the standards of TSO-C69a must be taken out-of-service or upgraded to meet the standards of TSO-C69a. *Mar. 14: A-84-14:* Issue an air carrier maintenance bulletin to emphasize: (1) the need for air carrier airworthiness inspectors to require during the certification process that the air carrier's manuals and maintenance organizational structure conform to regulatory requirements regarding the separation of maintenance and inspection functions, and (2) the need to conduct surveillance in a manner that will verify that the air carrier is performing maintenance/inspections functions and duties in accordance with the requirements. *A-84-15:* Issue air carrier maintenance and operations bulletins to emphasize to air carrier airworthiness and operations inspectors the regulatory requirements related to the recording of mechanical irregularities in aircraft maintenance logs and the need for proper surveillance to confirm conformity with the requirements, including scrutiny of aircraft maintenance logs and other maintenance records to verify that applicable maintenance corrective actions correlate to mechanical irregularities recorded by flightcrews in the aircraft maintenance logs. *Mar. 9: A-84-16:* Extend the terms of FAA Order 8440.5A Section 5, Waiver of Section 91.79(a) and (c), Motion Picture and Television Flight Operations Manual, to require an FAA-approved flight operations manual for all types of aircraft.

Highway—*Motor Vehicle Manufacturers Association: Feb. 23: H-84-3:* Review current state-of-the-art technology related to motor vehicle fuel systems and determine which elements of that technology might be used in the design, engineering, placement in the vehicle, and protection of fuel system components to reduce breaches of the fuel system and to minimize fuel spillage if the fuel system is breached. Consider high-speed impacts and underride/override impact dynamics in selecting effective countermeasures. *H-84-4:* After selecting the technology to enhance fuel system integrity, strongly encourage all Association members to employ that technology in the manufacture of motor vehicles.

Marine—*Saint Lawrence Seaway Development Corporation: Feb. 8: M-84-1:* Establish a lighted range at Point Vivian for the channel centerline between Comfort Island Shoal and Pullman Island Shoal. *M-84-2:* Restrict large vessels from attempting to meet and pass at night in the Saint Lawrence River, American Narrows Channel, between Comfort Island Shoal and Pullman Shoal until a lighted range can be established on Point Vivian which accurately delineates the centerline of the channel between those shoals. *M-84-3:* Publish in suitable form for use by mariners the available Saint Lawrence River current and velocity survey measurement data, and update such information as additional survey data become available.

Railroad—*Burlington Northern Railroad Company: Feb. 21: R-84-4:* Issue instructions which embody the guidelines of the Association of American Railroads, the Federal Railroad Administration, and the Railway Progress Institute Track Train Dynamics program for train makeup to those personnel who are involved in the makeup of trains and provide training in the instructions. *R-84-5:* In situations where train makeup does not conform with the guidelines of the Association of American Railroads, the Federal Railroad Administration, and the Railway Progress Institute Track Train Dynamics program, advise train engineers so that they can take compensating action in handling the train. *Feb. 22: R-84-8:* Revise and enforce inspection and maintenance requirements for maintenance-of-way cars to be moved in revenue freight trains to make the cars suitable for safe operation up to the maximum speeds at which the cars will be operated. *R-84-9:* Revise the procedure for the issuance and cancellation of a restricting train order due to high ambient temperatures to require that the order be issued for a specific restricting speed and be cancelled by the dispatcher when the ambient temperature falls below a predetermined level.

Association of American Railroads: Feb. 21: R-84-6: Advise its members of the consequences of improper distribution of loaded and empty cars in trains as illustrated by the derailment on the Missouri Pacific Railroad on July 25, 1981, near Jacksonville, Texas; the derailment on the Illinois Central Gulf Railroad on September 28, 1982, near Livingston, Louisiana; and the derailment on the Burlington Northern Railroad on May 6, 1983, near Hallet, Oklahoma. *R-84-7:* Form an Advisory Committee to develop a methodology for the practical application in railroad operations of the guidelines on train makeup, train handling, and engineer training developed in the joint Association of American Railroads, Federal Railroad Administration, Railway Progress Institute Track Train Dynamics program. *Feb. 22: R-84-11:* Urge its member railroads to review and revise as necessary their procedures for inspecting, maintaining, and operating maintenance-of-way cars to be moved in revenue freight trains so as to prevent accidents similar to that which occurred near Crystal City, Missouri, on July 18, 1983. *R-84-12:* Notify the Safety Board of the results of the reviews by its member railroads of their procedures for inspecting, maintaining, and operating maintenance-of-way cars to be moved in revenue freight trains. *Mar. 15: R-84-13:* Immediately advise member railroads, shippers, and receivers that handle hazardous materials in tank cars of the accident at Baton Rouge, Louisiana, on July 30, 1983, and of the subsequent findings regarding improperly positioned excess flow valves for protection against an undesired outward flow of hazardous materials from tank cars during loading, unloading, maintenance, or repair operations. *R-84-14:* Immediately issue a service bulletin to all Association of American Railroads-certified facilities emphasizing the need to verify the proper installation, maintenance, and testing of excess flow valves on tank cars.

Federal Railroad Administration: Feb. 22: R-84-10: Require that maintenance-of-way cars meet the Railroad Freight Car Safety Standards or, in the alternative, impose operating restrictions on maintenance-of-way cars being moved in revenue freight trains to compensate for the actual mechanical condition of the cars. *Mar. 15: R-84-15:* Immediately initiate inspections of tank cars equipped with excess flow valves to determine the extent to which these tank cars may have improperly positioned excess flow valve seats, determine the cause of deficient conditions found, and require correction of deficiencies before inspected tank cars are returned to service.

Chemical Manufacturers Association: Mar. 15: R-84-16: Immediately advise its members of the hazardous materials accident at Baton Rouge, Louisiana, on July 30, 1983, and of the subsequent findings regarding improperly positioned excess flow valve seats, and alert them not to rely upon tank car excess flow valves for protection against an undesired outward flow of hazardous materials from tank cars during loading, unloading, maintenance, or repair operations.

The American Short Line Railroad Association: Mar. 19: R-84-16: Immediately advise its members of the hazardous materials accident at Baton Rouge, Louisiana, on July 30, 1983, and of the subsequent findings regarding improperly positioned excess flow valve seats, and alert them not to rely upon tank car excess flow valves for protection against an undesired outward flow of hazardous materials from tank cars during loading, unloading, maintenance, or repair operations.

Pipeline—*Municipality of Anchorage, Alaska: Mar. 22: P-84-5:* Require contractors and other persons who perform excavation activities to notify, at least 48 hours in advance of beginning excavations, operators of nearby underground facilities either by contacting each operator or by providing notice to a one-call excavation notification system. *P-84-6:* Encourage and assist operators of underground facilities in the Anchorage area to develop and implement a one-call excavation notification and damage prevention system.

Note.—Single copies of these recommendation letters are available on written request to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594. Please include recommendation number in your request. Copies of recent recommendations are free of charge while supplies last. Recommendations that must be photocopied will be billed at a

cost of 14 cents per page ($1 minimum charge).

Recommendation Responses From

Aviation—*Federal Aviation Administration: Feb. 23: A–83–61:* Is investigating the susceptibility of the hydraulic tubing in Fairchild (Swearingen) airplanes to stress of fatigue cracking. *Mar. 15: A–81–100:* The main cabin door markings of Nord 262 aircraft, operated by certificated air carriers, conform to those described in the flight attendant's manual. *Mar. 13: A–83–56:* Is conducting a special certification review of Mitsubishi MU–2 airplanes. *Mar. 15: A–82–132:* February 1984 issue of the General Aviation Airworthiness Alerts (Advisory Circular 43–16) emphasizes the proper maintenance and inspection of mixture control linkage assemblies of general aviation airplanes.

Highway—*Federal Highway Administration: Feb. 17: H–81–54:* Efforts to expedite, complete, validate, and increase the use of barrier impact computer simulation programs are underway. *Mar. 5: H–78–2:* Specifications for the design of dolphins, fenders, and other energy-absorption and/or vessel redirection devices for the protection of both bridge and vessel during an accidental impact have been developed by the Coast Guard through a research contract and have been submitted to FHWA for further action. *Mar. 19: H–82–51:* The issue of distance gap between the end of railroad-highway crossing gates and the middle of the road is addressed in the Tariff Control Devices Handbook issued in November 1983. *H–83–52:* Is studying the use of median barriers and channelizing devices at railroad/highway grade crossing to deter motorists from driving around lowered railroad crossing gates.

Rhode Island Department of Transportation: Feb. 17: H–83–51: Will provide information on the misuse of child safety seats to persons who instruct seat users on the use these seats.

Washington State Superintendent of Public Instruction: Feb. 17: H–83–67: Will require that any schoolbus interior that is refurbished must be done so in compliance with Federal Motor Vehicle Safety Standard 222.

American Association of Motor Vehicle Administrators: Feb. 21: H–84–2: Checked various State driver manuals and some privately issued ones and did not find any information about driving in smokes of any kind—either natural or chemical. Will discuss the smoke problem at it International Driver License, Driver Control Workshop.

State of New Jersey: Feb. 22: H–82–18: The Conference of Northeastern Governors passed a resolution calling for a uniform regional minimum drinking age at its December meetng. Raising the drinking age in New Jersey has resulted in a reduction in drunk driving fatal accidents.

Research and Special Programs Administration: Mar. 7: H–83–29: RSPA and FHWA are reviewing and rewriting the regulations governing the manufacture, maintenance, repair, and retest of DOT Specification MC–306, MC–307, and 312 cargo tanks. *H–83–30:* RSPA and FHWA have jointly funded an ongoing research study involving the integrity of DOT Specification MC–307/312 cargo tanks.

State of Massachusetts: Mar. 16: H–83–51: Will continue to emphasize the misuse of child passenger restraints in its safety programs.

California Highway Patrol: Feb. 29: H–83–67: Although supportive of the concept of upgrading seats and restraining barriers of pre-1973 type 1 schoolbuses to the specifications of Federal Motor Vehicle Safety Standard 222, implementation would be a problem because of product liability and costs.

Marine—*C.L. Dill Co., Inc.: Mar. 9: M–80–49 through –51:* Has no record of receiving recommendations regarding employee supervision at tank batteries and other hazardous locations in oil fields; employee training in emergency procedures; and employee attendance at safety meetings.

Marine Transport Lines, Inc.: Mar. 13: M–83–53: The Military Sealift Command intends to supply exposure suits to the nine Sealift Class Tankers which Marine Transport Lines operates as well as all contract operated tankers.

Faris, Ellis, Cutrone & Gilmore (representing the owner of the M/V TESTBANK): Mar. 14: M–81–36: Will forward recommendation regarding on-deck placement of containers with dangerous cargo on board vessels to the TESTBANK owners.

Texaco, U.S.A.: Mar. 12: M–80–44 through –48: Has ordered and has applied for permits to install signs warning where active pipelines cross navigable waters of the Mississippi River Delta to prohibit mooring with spuds or anchors and warning against smoking at tank batteries.

New Oreleans Steamboat Company: Mar. 16: M–81–34: The Natchez was guarding both the VTS channel and the bridge-to-bridge channel at the time of the accident with the Exxon Baltimore on Mar. 29, 1980. *M–81–35:* The Natchez has always participated fully in VTS.

American Bureau of Shipping: Feb. 14: M–84–9: Issued a revised circular recommending that surveyors consider structural gaugings at the drydocking intervals, which is very 30 months in the present ABS Rules, after a vessel reaches 20 years of age. *M–84–10:* Issued a revised circular indicating the allowable thicknesses for wastage at which hatch covers should be considered for extensive renewals or replacement of sections, and requesting surveyors to carry out gaugings of hatch covers at special surveys whenever there is an indication upon examination of serious general wastage. *M84–11:* Issued a circular to require the examination of the tops and bottoms of hatch covers visually for wastage at all annual surveys. .

Trans-Atlas Marine Corporation: Feb. 24: M–81–81: Participates in the New Orleans VTS System. All pilots are trained and cognizant of the inland rules of the road and the New Oreleans VTS System, and a notice to all pilots and crews about the VTS system is posted in the wheelhouse of all vessels.

U.S. Coast Guard: Feb. 22: M–83–45 and –46: Does not feel that modification of the raked bow barge design would have a significant effect on the extent of collision damage to other vessels and structures because of the amount of energy that must be absorbed. The use of extensive fendering would most likely result in some reduction in the extent of collision damge. *Feb. 23: M–83–79:* Is considering changing 46 CFR 185.25–1(d) to require a safety orientation announcement and a general list of conditions under which passengers will be requested or required to don life preservers on board small passenger vessels that operate on other than protected waters. *M83–80:* A regulatory requirement specifying that life preservers be worn by children when departing protected waters is too broad and cannot be justified. *M–83–81:* Is considering changing 46 CFR 180.25–5 to require a life preserver suitable for each person carried on board a vessel for any voyage. *Mar. 19: M–83–82:* Does not concur with the recommendation to establish a requirement that self-propelled vessels of 1,600 gross tons or greater navigating in narrow rivers, channels, and harbors of the United States have the steering gear compartment manned by a competent person trained to switch the steering gear to all alternate modes of control and operation. A properly designed, constructed, and maintained main and auxiliary steering system obviates the need for manning of the steering gear compartment. *M–83–83:* Issued a Notice of Proposed Rulemaking (NPRM) on Oct. 14, 1983, proposing that all self-propelled vessels over 1,600 gross tons be required to conduct emergency steering drills at least once every 3 months and to have instructions for steering gear changeover procedures permanently displayed on the navigating bridge and in the steering gear compartment. *M–80–42:* The NPRM published on Oct. 14, 1983, proposes to require each self-propelled vessel of 1,600 gross tons or greater navigating in confined or congested waters of the United States to have operating instructions and a block diagram that clearly and simply explain the changeover procedures for the remote steering gear control systems and steering gear power units on the vessel. *M–83–3:* The recommendation to have operating instructions for vital emergency equipment and vital ship data, such as stability information, printed in a language which is readily understood by the ship's officers was raised at a meeting of the International Maritime Organization Subcommittee on Ship Design and Equipment in Feb. 1984. *Mar. 2: M–83–50:* Existing boarding requirements for inflatable liferafts will be improved under provisions of the revised Chapter III on Lifesaving Systems and Arrangements to the Safety of Life at Sea Convention (SOLAS), 1974. *M–83–51:* The final rule published on Feb. 7, 1984, regarding requirements for vessels to carry exposure suits did not exempt vessels operating between 35 degrees north latitude and 35 degrees south latitude on the outer continental shelf in the Atlantic Ocean because the water temperature there may be below 60 degrees in the winter. *M–83–52:* The final rule published on Feb. 7, 1984, requires tank vessels, cargo and miscellaneous vessels, mobile offshore drilling units, offshore supply vessels, and

oceanographic vessels to have exposure suits for each crewmember when operating in areas where the water temperature is below 60 degrees. Small passenger vessels are not included in any plans for exposure suit requirements at this time. The revision of SOLAS Chapter III includes provisions for individual thermal protection for everyone on board ships with open life boats. Our regulation proposals to incorporate the new SOLAS requirements will include provisions for this equipment on oceangoing passenger vessels.

The Barge and Towing Industry Association: Feb. 29: M–83–89: Informed its members of the benefits of having formal qualification procedures to insure that operators piloting towing vessels have sufficient experience and knowledge regarding all areas of their assigned routes to navigate safely in all prevailing waterway conditions.

Federal Highway Administration: Mar. 5: M–81–20: Because of the low probability of occurrence of ship-bridge collisions, the extraordinary costs required to design bridge piers to withstand the massive forces associated with the impacts of large ships, and the limited funds available to carry out the national bridge program, the FHWA and the Coast Guard have agreed that it is usually neither cost-effective nor desirable to design all water piers in navigable waters to withstand the full impact loads of modern vessels. Instead, each bridge crossing is being evaluated on by case-case basis and the degree of pier protection determined for the particular navigational conditions associated with the crossing. *M–81–21:* Does not have the resources to conduct a study to determine which existing bridges over the navigable waterways of United States ports and harbors are not equipped with adequate structural pier protection; however, all highway bridges are now being inspected regularly by the respective highway agencies. *M–81–22:* The results of each bridge inspection are provided to the appropriate bridge authorities for the review and subsequent action to correct identified deficiencies.

United States Power Squadrons: Mar. 10: M–83–75: References to alcohol usage will be included in the rewritten Boating Course given to 40,000 to 50,000 persons annually.

Railroad—*The Kansas City Southern Railway Company, Louisiana & Arkansas Railway Company: Feb. 23: R–83–60 and –61:* While we will continue to closely monitor the performance of our operating employees in regard to intoxicants or narcotics, we do not plan to advise others of the contents of our instructions and procedures or the number of or outcome of checks that are made by supervisors.

Burlington Northern Railroad: Mar. 8: R–84–4: Placement of cars in a train cannot always conform to the guidelines of the Association of American Railroads (AAR), the Federal Railroad Administration (FRA), and the Railway Progress Institute Track Train Dynamics because of craft work agreements, blocking requirements, and train placement restrictions for placarded cars. *R–84–5:* BN's air brake and train handling rules include specific instructions regarding appropriate train handling and operation procedures with specific reference to train makeup. *Mar. 8: R–84–8:* Currently established inspection and maintenance instructions for maintenance-of-way cars will be reissued to all mechanical personnel. Regional field inspectors will be instructed to give increased attention to maintenance-of-way cars during their routine inspections to insure this equipment conforms to all applicable AAR and FRA rules and procedures. *R–84–9:* Has formulated guidelines to assist in reduction of track buckling occurrences which will alleviate the necessity for issuing a train order regarding ambient temperatures.

State of California: Mar. 2: R–83–45: Has requested the Public Utilities Commission to respond to the recommendation concerning the State's operating practice inspections of railroad operations.

Southern Pennsylvania Transportation Authority: Mar. 8: R–82–111: Will not be modifying the inward opening passenger doors in the existing diesel rail cars to facilitate passenger evacuation in emergency situations because the rail diesel cars are being taken out of service and will not be returned to service.

Association of American Railroads: Feb. 14: R–83–108 and –109: Has distributed a circular to member railroads concerning abnormal weather conditions that may adversely affect train movements.

Terminal Railroad Association of St. Louis: *Mar. 20: R–83–60:* Forwarded documents regarding supervisory procedures at crew-change terminals for determining that operating department employees coming on duty at any hour of the day are physically fit and capable of complying with all pertinent operating rules. *R–83–61:* Forwarded copies of training courses attended by railroad officers.

Pipeline—El Paso Natural Gas Company: *Mar. 2: P–83–31:* Each plant superintendent is responsible for reviewing his maintenance records at least once per month. *P–83–32:* All plants that operate reciprocating compressors will incorporate in their maintenance and operations manual appropriate torquing specifications for each compressor in critical service. *P–83–33:* Plant maintenance personnel will be instructed and tested in torquing procedures. *P–83–34:* All emergency plant plans will be reviewed to make sure that they contain proper instructions that explain the intended use and operation of all shutdown and blowdown facilities. *P–83–35:* Employees will go through a simulated fire drill and be tested at least once per year on emergency procedures. *P–83–36:* Emergency blowdown activators for compressor plants A & B at Blanco Station will be installed in 1984. *P–83–37:* It would be impossible to familiarize a volunteer fire department on a continuing basis because of the high turnover in such departments. Will use our own trained personnel to shut down and blow down the plant and contain the fire with existing firefighting facilities.

Alaska Public Utilities Commission: *Mar. 1: P–84–1:* It is more appropriate to implement one-call systems on a regional rather than a statewide basis where utilities have installed underground facilities for distribution of flammable materials. *P–84–2:* Would support legislation requiring persons excavating near underground utilities to contact the one-call system operator.

Note.—Single copies of these response letters are available on written request to: Public Inquiries Section, National Transportation Safety Board, Washington, D.C. 20594. Please include respondent's name, date of letter, and recommendation number(s) in your request. The photocopies will be billed at a cost of 14 cents per page ($1 minimum charge).

H. Ray Smith, Jr.,

Federal Register Liaison Officer.

BILLING CODE 7533-01-M

NUCLEAR REGULATORY COMMISSION

Advisory Panel for the Decontamination of Three Mile Island, Unit 2

Notice is hereby given pursuant to the Federal Advisory Committee Act that the Advisory Panel for the Decontamination of Three Mile Island, Unit 2 will be meeting on April 12, 1984, from 7:00 p.m. to 10:00 p.m. at the Holiday Inn, 23 South Second Street, Harrisburg, Pennsylvania 17101. The meeting will be open to the public.

The purpose of this meeting is for the Advisory Panel to discuss issues pertaining to the ongoing cleanup activities at the Three Mile Island Nuclear Station, Unit 2.

Further information on the meeting may be obtained from Dr. Michael T. Masnik, Three Mile Island Program Office, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone 301/492–7466.

Dated: March 27, 1984.

John C. Hoyle,

Advisory Committee Management Officer.

[FR Doc. 84-8620 Filed 3-29-84; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50–250 and 50–251]

Florida Power and Light Company; Exemption

I.

Florida Power and Light Company (the Licensee) is the holder of Facility Operating License Nos. DPR–31 and DPR–41 which authorize the operation of the Turkey Point Plant, Unit Nos. 3 and 4 (the facilities) at steady-state power level not in excess of 2200 megawatts thermal. The facilities are pressurized water reactors (PWRs) located at the licensee's site in Dade County, Florida.

II

Section III.A of Appendix R to 10 CFR Part 50 requires "two separate water supplies shall be provided to furnish necessary water volume and pressure to the main fire loop." In the case of Turkey Point Plant this required that Florida Power and Light Company (FPL) must, as a minimum (1) modify the existing on-site 500,000-gallon water tank by installing a new standpipe to dedicate a minimum of 300,000 gallons of capacity of that tank to fire protection purposes; (2) design, engineer, procure, and construct a new on-site water tank of 750,000-gallon capacity, to include a redundant water supply of at least 300,000 gallons; and (3) install an automatic starting diesel fire pump to supply the fire systems.

The schedule, set out in § 50.48(c)(2) applies to the installation of the modifications described above. That schedule requires that those modifications be installed nine months after the effective date of the rule, or by November 19, 1981. By letter dated November 9, 1981, the NRC granted FPL an exemption form the schedular requirements of 10 CFR 50.48(c)(2). The exemption extended the date by which Turkey Point Plant must be in compliance with Section III.A of Appendix R to 10 CFR Part 50 to March 31, 1984. The basis for granting the schedular exemption was the time required for engineering, procurement and construction associated with the modifications described above.

III

By letter dated February 10, 1984, FPL requests that an extension be granted to December 31, 1984, by which time they must be in compliance with Section III.A of Appendix R. The extension is required due to premature failure of protective coatings in both the existing and new Raw Water Storage Tanks (RWT) which contain the water supply for fire protection and identification of non-dedicated water connections on the fire main.

The problem was identified initially in preparing to place the new RWT in service. It was noted that rust spots were developing on the roof plating where the protective coating had failed. The upper portion of the existing tank was inspected indicating the original protective coating had completely failed on the interior ceiling and roof framing, the heavy rust scale resulting from the failed protective coating could impact the structural capability. The wall coating also exhibited cracks and blistering which could result in additional rusting.

In addition to the protective coating problem, water connections on the fire protection main have been identified which are not for fire protection purposes. Some of the connections were installed underground during the initial construction of Turkey Point fossil Units 1 and 2. These connections were not identified by the licensee or the NRC during the initial fire protection reviews. However, the licensee identified the connections during a recent internal audit and intends to remove all connections from the fire mains which are not dedicated for fire protection purposes.

The request for the schedular extension to December 31, 1984, is necessary to perform the following corrective actions:

(1) Make necessary repairs to the RWT's structure and protective coatings.

(2) Remove the connections from the fire protection main which are not for fire protection purposes.

(3) Perform modifications necessary to transfer the non-dedicated connections to the Service Water System.

(4) Perform other modifications to improve and enhance the Fire Protection System operability including installation of redundant jockey pumps.

The preventive and corrective maintenance performed on the RWTs will minimize future tank downtime and the removal of the non-dedicated connection from the fire protection main will assure dedication of the required water volume for fire protection purposes.

In the interim period, FPL will maintain one of the two RWTs available for a source of fire water and the capability to provide additional fire water from the discharge header of the three screen wash pumps. Each of the screen wash pumps are capable of supplying 1,680 gallons per minute and are sufficient to meet the maximum area of water demand. The analysis to support the adequacy of this interim action is provided in the licensee's letter dated May 7, 1980 relating to fire protection. Thus, the necessary redundancy of fire water supplies is met. This compensatory action coupled with the Turkey Point Fire Protection Program provides sufficient protection against fire hazards.

Based on the details provided above, the Commission has determined that an extension of the schedular requirements identified in § 50.48(c)(2) to assure compliance with Section III.A "Water Supplies for Fire Suppression System" of Appendix R to 10 CFR Part 50 should be granted.

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, an exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest and hereby grants the following exemption with respect to the schedular requirements of § 50.48(c)(2) as it relates to Section III.A of Appendix R to 10 CFR Part 50:

The date which FPL must be in full compliance with Section III.A of Appendix R to 10 CFR Part 50 is December 31, 1984.

The NRC staff has determined that the granting of this Exemption will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) and environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

Dated at Bethesda, Maryland this 21st day of March, 1984.

For the Nuclear Regulatory Commission.

Edson G. Case,

Deputy Director, Office of Nuclear Reactor Regulation.

[FR Doc. 84-8617 Filed 3-29-84; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-250 and 50-251]

Florida Power and Light Co.; Consideration of Issuance of Amendments to Facility Operating Licenses and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. DPR-31 and DPR-41, issued to Florida Power and Light Company (the licensee), for operation of the Turkey Point Plant Unit Nos. 3 and 4 located in Dade County, Florida.

The proposed license amendments were initially noticed December 21, 1983 (48 FR 56502). This notice includes requested changes provided in a submittal dated October 26, 1983 which were not included in the initial notice of December 21, 1983. The proposed amendments request the deletion of non-radiological Environmental Technical Specifications (Appendix B) which address the groundwater monitoring program and environmental protection limits. The justification for the requested deletions are based on the results of eight years of studies, the revised agreement with the South Florida Water Management District and an effective

National Pollutant Discharge Elimination System (NPDES) Permit from the Environmental Protection Agency in accordance with the licensee's applicaton for amendment dated September 12, 1983, as modified October 26, 1983.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the request for amendments involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possiblity or a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The amendments would delete the nor-radiological monitoring programs related to the groundwater monitoring and environmental protection limits. The amendments would not change any current limitations related to the operation of the plants. Since no operational limitations are being changed, the staff proposes to determine that the amendments do not involve a significant increase in the probability or consequences of an accident from any accident previously evaluated, do not create the possibility of a new or different kind of accident from any accident previously evaluated and do not involve a significant reduction in a margin of safety. The staff, therefore, proposes to determine that the amendments do not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission,. Washington, D.C. 20555, Attn: Docketing and Service Branch.

By April 27, 1984, the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject mater of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendments under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendments request involve no significant hazards consideration, the Commission may issue the amendments and make them effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendments.

If the final determination is that the amendments involve a significant hazards consideration, any hearing held would take place before the issuance of any amendments.

Normally, the Commission will not issue the amendments until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result in derating or shutdown of the facility, the Commission may issue the license amendments before the expiration of the 30-day notice period, provided that its final determination is that the amendments involve no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Att: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephoine call to Western Union operator at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Steven A. Varga, Branch Chief, Operating Reactors Branch No. 1, Division of Licensing: petitioner's name and telephone number; date petition was mailed; plant name; and publication

date and page number of the **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Harold F. Reis, Esquire, Lowenstein, Newman, Reis and Axelrad, 1025 Connecticut Avenue, N.W., Suite 1214, Washington, D.C. 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application for the amendments which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Environmental and Urban Affairs Library, Florida International University, Miami, Florida 33199.

Dated at Bethesda, Maryland, this 20th day of March 1984.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50–388]

Pennsylvania Power & Light Company, Allegheny Electric Cooperative, Inc., Susquehanna Steam Electric Station, Unit No. 2; Issuance of Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission), has issued Facility Operating License No. NPF–22, to Pennsylvania Power & Light Company and Allegheny Electric Cooperative, Inc. (licensees) which authorizes operation of the Susquehanna Steam Electric Station, Unit No. 2 (the facility) at reactor core power levels not in excess of 3293 megawatts thermal in accordance with the provision of the License and the Technical Specifications. Authorization to operate beyond five percent (164.4 megawatts thermal) is still under consideration and will require specific Commission approval.

Susquehanna Steam Electric Station, Unit 2 is a boiling water nuclear reactor located at the licensees' site in Luzerne County, Pennsylvania. The license is effective as of the date of issuance.

The application for the license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license. Prior public notice of the overall action involving the proposed issuance of an operating license was published in the **Federal Register** on August 9, 1978 (43 FR 35406).

The Commission has determined that the issuance of this license will not result in any environmental impacts other than those evaluated in the Final Environmental Statement since the activity authorized by the license is encompassed by the overall action evaluated in the Final Environmental Statement.

For further details with respect to this action, see (1) Facility Operating License No. NPF–22, complete with Technical Specifications, (2) the report of the Advisory Committee on Reactor Safeguards, dated August 11, 1981, (3) the Commission's Safety Evaluation Report, dated April 1981, Supplement No. 1, dated June 1981, Supplement No. 2, dated September 1981, Supplement No. 3, dated July 1982, Supplement No. 4, dated November 1982, Supplement No. 5, dated March 1983, and Supplement No. 6 dated March 1984, (4) the Final Safety Analysis Report and amendments thereto; and (5) the Final Environmental Statement, dated June 1981.

These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555 and at the Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701. A copy of Facility Operating License No. NPF–22 may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing. Copies of the Safety Evaluation Report and its Supplements (NUREG–0776) may be purchased at current rates from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161, and through the NRC GPO sales program by writing to the U.S. Nuclear Regulatory Commission, Attention: Sales Manager, Washington, D.C. 20555. GPO deposit account holders can call (301) 492–9530.

Dated at Bethesda, Maryland, this 23rd day of March 1984.

For the Nuclear Regulatory Commission.

B. J. Youngblood,

Chief, Licensing Branch No. 1, Division of Licensing.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 23261; 70–6964]

Central and South West Corp.; Proposed Issuance and Sale of Common Stock Pursuant to Dividend Reinvestment and Stock Purchase Plan

March 26, 1984.

Central and South West Corporation ("CSW"), 2121 San Jacinto Street, Dallas, Texas 75266–0164, a registered holding company, has filed a declaration with this Commission pursuant to Sections 6(a) and 7 of the Public Utility Holding Company Act of 1935 ("Act") and Rule 50(a)(5) thereunder.

By orders entered in File No. 70–6529, CSW was authorized to issue and sell through December 31, 1985, not to exceed 4,000,000 shares of its authorized and unissued common stock, par value $3.50 per share, pursuant to CSW's Dividend Reinvestment and Stock Purchase Plan ("Plan"). As of December 31, 1983, CSW has issued and sold pursuant to the Plan 3,261,199 shares of its common stock. CSW now requests authority to increase the number of shares of common stock authorized to be issued and sold under the Plan by 2,000,000 shares ("New Shares") to bring the total number of shares authorized to be issued and sold under the Plan to 6,000,000 shares. No other changes in the Plan are contemplated at this time. CSW states that since the effective date of the Plan, participation by shareowners has increased each year. Based on CSW's current estimate, approximately 2,702,702 additional shares will be issued under the Plan during the period January 1, 1984 to December 31, 1985, resulting in a total requirement of 5,963,901 shares. Proceeds derived by CSW from the sale of the New Shares will be applied through loans or equity contributions toward the continuing construction program of CSW's subsidiary companies.

The declaration and any amendments thereto are available for public inspection through the Commission's Office of Public Reference. Interested person wishing to comment or request a hearing should submit their views in writing by April 23, 1984, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the declarant at the address specified above. Proof of service (by affidavit or, in the case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the declaration, as filed or as it may be amended, may be permitted to become effective.

For the Commission, by the Office of Public Utility Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 84-8021 Filed 3-29-84; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-20786; Filed No. SR-AMEX-84-9]

Self-Regulatory Organizations; Proposed Rule Change; American Stock Exchange, Inc.; Exchange's Equities Specialist Allocations Procedures

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on March 12, 1984, the American Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The American Stock Exchange, Inc. ("Amex" or the "Exchange") hereby files for Commission approval a 12-month pilot program under the Exchange's equities allocations procedures which would permit a newly listed company which so desires to select its specialist from a list composed of seven specialist units selected by the Exchange's Committee on Equities Allocations.

II. Self-Regulatory Organization's Statement of the Propose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Items IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

(1) *Purpose.* The Exchange has previously filed and is awaiting Commission approval of its procedures for the evaluation of equities specialist performance and for the allocation and reallocation of equities (File No. SR-AMEX-83-27). These allocations procedures include a procedure which permits those newly listed companies which so desire to participate to a limited extent in the selection of their specialist. The purpose of this proposed rule change is to substitute for this procedure, on a pilot basis, a new modified procedure which will expand a company's participation in the section of its specialist, without significantly impinging on the integrity of the performance-based allocations process.

Under the current procedure, the Committee on Equities Allocations ("Allocations Committee")[1] submits a list of ten eligible specialist units to a newly listed company which has indicated its desire to participate in the specialist selection process. The Company may eliminate up to three units on the list from further consideration. The Allocations Committee then reconvenes to make its final selection from the remaining seven or more units.

In the Exchange's efforts to list new companies it has become clear that the selection of a specialist is extremely important to prospect companies, and the inability to be more directly involved in the selection process may be a disincentive to listing.

To address the concerns of these companies, the Exchange has adopted, on a 12-month pilot basis, a new procedure designed to increase company involvement in the allocation process. Under this procedure, the company would be given the choice of either letting the Allocations Committee acting independently select its specialist, or of participating in the process itself. If the company chooses to participate, the Allocations Committee would select a list of seven specialist units, based on the same performance-related criteria it presently uses for making allocations, and the company would be permitted to select its specialist unit from that list.

Moreover, whether or not the company chooses to participate, if a newly listed company should become dissatisfied with its specialist unit within the first year of listing, it would be permitted to request a change. Such a request could not be made until at least 120 days after the commencement of trading and the company would be expected to furnish an explanation of the basis for its dissatisfaction. If after counseling the company and the specialist unit such a change were still desired, the Exchange would reallocate the stock within 30 days. In any such reallocation the Exchange would follow its regular procedures, without any company involvement. Since the initial selection of a specialist unit under this new procedure would be in effect a conditional allocation, the subsequent reallocation would be without prejudice to the initial specialist.

The proposed procedure would be available only to those companies which complete the listing process during the pilot period; a company could only invoke the reallocation request once during the one year period following its listing.

The pilot program would allow newly listed companies greater participation in what is viewed by them as a major decision affecting the market for their securities, while preserving the basic concept of performance-based allocations procedures. The Allocations Committee, in furnishing the company with a list of seven specialist units, would continue to select the most eligible units for that particular stock, based on the perfomance criteria now used by Allocations Committees. The new procedure would thus continue to reward superior performance and encourage competition among specialists units for such new allocations.

To address the possibility that this new procedure could increase the likelihood of companies and specialists developing inappropriate or prohibited

[1] The Allocations Committee has been delegated authority by the Board to allocate securities, and to reallocate securities on the recommendation of the Committee on Specialist and Registered Trader Performance.

relationships, the Exchange intends to monitor the pilot program closely. The Exchange's rules and policies at present prohibit business and other types of relationships that might raise problems of conflict of interest, receipt of non-public information, and improper communications, and these policies will continue in place. During the pilot period, prospect companies and specialists will be reminded of the limits on their relationships. Additional surveillance measures will also be instituted which will be geared to close surveillance of trading in those companies which are participating in the pilot, as well as those specialists units which are allocated stocks under the new procedure.

(2) *Basis.* The proposed rule change is consistent with Section 6(b) of the Act in general and furthers the objectives of Section 6(b)(5) in particular in that the proposed procedure is designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system, and protect investors and the public interest. The proposed rule change also furthers the purposes of Section 11A(a)(1)(C)(ii) in that it will stimulate fair competition among brokers and dealers, among exchange markets, and between exchange markets and markets other than exchange markets.

B. Self-Regulatory Organization's Statement on Burden on Competition

The proposed rule change will impose no burden on competition. Rather, the proposed rule change, by rewarding superior performance, will enhance competition among Exchange specialists, and, by improving the ability of the Exchange to attract prospect companies which desire greater participation in the specialist selection process, will enhance competition among markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 5th Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any persons, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 5th Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: March 22, 1984.

George A. Fitzsimmons,

Secretary.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Information Security Policy; Directive Concerning the Classification, Declassification and Control of National Security Information

AGENCY: Department of Transportation.

ACTION: Notice of directive concerning information security policy.

SUMMARY: The Department of Transportation is required by Section 5.3 of Executive Order 12356 of April 2, 1982, to publish in the **Federal Register** unclassified regulations that establish agency security policy and unclassified guidelines for systematic declassification review. Department of Transportation (DOT) Order 1640.4C constitute these regulations and guidelines. This notice publishes the directive, except for those portions that do not significantly affect the public. The directive is unclassified and is available for inspection in its entirety at the address below.

FOR FURTHER INFORMATION CONTACT: Thomas P. Colihan, Acting Chief, Security Staff, Department of Transportation, 400 7th Street, SW., Washington, D.C., 20590, Room 2318. The telephone number for this office is (202) 426–4677. The office is open Monday thru Friday, from 9:00 a.m. to 5:30 p.m. e.t.

Issued in Washington, D.C. on February 2, 1984.

Jon Seymour,

Deputy Assistant Secretary for Administration.

Classification, Declassification, and Control of National Security Information

1. *Purpose.* This Order implements Executive Order 12356, National Security Information, and Executive Order 10865, Safeguarding Classified Information Within Industry.

2. *Cancellation.*

a. DOT Order 1640.4B, Classification, Declassification, and Control of National Security Information, of 2–11–80.

b. DOT Order 1640.3C, National Security Information, of 11–21–79.

3. *Assignments.*

a. In addition to other actions directed by this Order, the Chief, Security Staff, Office of the Secretary, shall evaluate the overall application of and adherence to security policies and requirements prescribed herein and report his findings and recommendations to the Assistant Secretary for Administration and, as appropriate, to the heads of operating

administrations and the Secretary. The Chief, Security Staff, shall be the Departmental point of contact with the Information Security Oversight Office, established by E.O. 12065, and shall furnish such information as that office may require. The Chief, Security Staff, shall develop changes to Departmental directives which may be needed to comply with amendments to E.O. 12065, supplementing instructions from the National Security Council, or resulting from changed conditions.

b. Secretarial Officers and Heads of Operating Administrations shall assure:

(1) The effective administration of the provisions prescribed;

(2) That adequate personnel and funding are provided for this purpose, and;

(3) That corrective actions which may be warranted are taken promptly.

Appendix I—Equivalent Foreign Security Classifications
Appendix II—Definitions

Chapter I. General

1–1. Discussion

a. The interests of the United States and its citizens are best served by making information regarding the affairs of government readily available to the public. This concept of an informed citizenry is reflected in the Freedom of Information Act and in the current public information policies of the Executive Branch.

Within the Federal Government there is some official information and material which, because it bears directly on the effectiveness of our national defense and the conduct of our foreign relations, must be subject to some constraints for the security of our Nation and the safety of our people and our allies. To protect against actions hostile to the United States, of both and overt and covert nature, it is essential that such official information and material be given only limited dissemination.

To ensure that such information and material is protected against unauthorized disclosure, this Order identifies the information to be protected, prescribes classifications, downgrading, declassification and safeguarding procedures to be followed, and establishes a monitoring system to ensure its effectiveness.

b. This Departmental Order is intended to achieve a coordinated and uniform policy throughout the Department of Transportation (DOT) in maintaining the security of classified information. It is applicable to all classified information in the custody of DOT regardless of whether the information or material was produced within DOT or originated outside DOT and released to it.

1–2. Security Principles

a. Official information which requires protection against unauthorized disclosure in the interest of the national defense or foreign relations of the United States (hereinafter collectively termed "national security") is designated classified information. Classification of information shall be solely on the basis of national security considerations.

b. Knowledge or possession of classified information shall be permitted only to persons whose official duties or contractual obligations require such access, and only if they have been determined to be trustworthy. Unless both standards are met, i.e., need-to-know and trustworthiness, the individual obtaining access is an unauthorized person and his/her gaining access constitutes an unauthorized disclosure.

c. The policies, standards, and requirements established by this Order are designed to assure proper classification/declassification of information and to prevent unauthorized persons from gaining knowledge of information designated as classified. These principles shall be kept foremost in mind when local procedures are developed to implement the provisions of this Order.

1–3. Security Planning.

Security is not an end of itself. Rather, it is an integral part of operations and of program administration. Accordingly, managers of programs or projects which may involve classified information shall consult with the appropriate security element to assure that security planning, which includes classification and declassification planning, is provided at the outset and as the project develops.

1–4. Order Format and Use.

This Order is designed to be both a statement of Departmental policies and requirements and an employee operating manual. Headquarters, facility and office implementing procedures should be filed in the appropriate Chapter. In this way the reader may find easily and quickly the answers and guidance he/she is seeking. Requests for any modification or deviation from this Order, including supporting justification shall be submitted to the OST, Chief Security Staff, M–441, through appropriate channels.

1–5. Notification by Field Activities of Classified Material Held.

Field activities shall advise the security element of the appropriate region, district or national headquarters when any of the following occur:

a. An activity which does not have custody of classified material receives such material. The notification shall include a statement as to the highest classification level of the material received.

b. The highest classification level of the material held changes. For example, an activity which holds Confidential material receives Secret material, or an activity having had both Secret and Confidential material destroys or otherwise gives up custody of the Secret material.

c. An activity which had custody of classified material no longer possesses such material.

Chapter III. Declassification and Downgrading

3–1. Discussion

a. Information which is properly classified at the time it is developed does not necessarily require protection indefinitely. Most classified information has diminishing significance to the national security as time passes and as technological or other developments occur.

b. The lack of attention to downgrading and declassification in the past has resulted in the accumulation and protection of large volumes of material which actually no longer require protection, or which require a lesser degree of protection than afforded. Although attempts to correct this condition have been made, emphasis is still needed in this area.

c. The salient downgrading/declassification features of E.O. 12356 are:

(1) Declassification of classified material shall be given emphasis comparable to that afforded classification.

(2) Classified information shall be declassified as early as national security considerations permit.

(3) Decisions concerning declassification shall be based on the loss of the information's sensitivity with

the passage of time or on the occurrence of a declassification event.

3–2. Definitions

a. *Downgrade*—To determine that classified information requires a lesser degree of protection against unauthorized disclosure in the interest of national security than that currently assigned, e.g., Top Secret is downgraded to Secret; Secret is downgraded to Confidential. Material will be remarked to reflect this determination.

b. *Declassify*—To determine that information no longer requires protection against unauthorized disclosure in the interest of national security. Material will be remarked to reflect this determination, e.g., Top Secret, Secret or Confidential material is remarked as Unclassified.

3–3. Authority to Downgrade or Declassify

a. *Originally Classified Material.* Original classification authorities, a successor in capacity or a supervisory official of either, a higher authority, and the Departmental Security Review Committee, are authorized to downgrade or declassify information originally classified by DOT. In addition, the following headquarters security elements are authorized to downgrade or declassify information originally classified by an official within their respective organizational element and to resolve classification conflicts or doubts as to the appropriate classification of that information:

OST and DOT Administrations other than USCG and FAA-OST Security Staff
FAA—Office of Civil Aviation Security
USCG—Intelligence and Security Division
MARAD—Deputy Administrator; Deputy Administrator for Inland Waterways and Great Lakes; Chief Counsel; Associate Administrators for Maritime Aids, Shipbuilding and Ship Operations, Marketing and Domestic Enterprise, and Research and Development; Eastern, Central, Western, and Great Lakes Region Directors; Superintendent, U.S. Merchant Marine Academy; and Security Officer.

b. *Derivatively Classified Material.* Declassification authority designated above and the appropriate District or Regional security elements within the USCG and FAA are authorized to declassify or downgrade derivatively classified material when such action does not conflict with classification decisions evidenced by the source material or instructions from an original classification authority.

3–4. Marking New Material for Declassification or Downgrading

a. New material which derives its classification from information classified on or after August 1, 1982, shall be marked with the declassification date or event assigned to the source document.

b. New material that derives its classification from information classified prior to August 1, 1982, shall be treated as follows:

(1) If the source material bears a declassification date or event twenty (20) years or less from the date of origin, that date or event shall be carried forward on the new material.

(2) If the source material bears a downgrading date or event, that date or event shall be carried forward on the new material.

3–5. Notification to holders

a. Whenever information is declassified by appropriate authority, other than changes pre-determined to occur automatically, the authority making the determination shall notify all known holders of the change.

b. This notification shall include the authority for the change (name and title) and the effective date of the change. Notification may be by general notice rather than personal notice so long as the general notice is designed to achieve the intended result.

3–6. Automatic Downgrading or Declassification

Old material which is marked for automatic downgrading or declassification requires no further authority from the originator by any holder to remark the material. The marking itself conveys this authority.

3–7. Effect of Open Publication

The fact that information currently classified has been disseminated by a public medium of communication does not automatically mean that it has been declassified. Classification shall continue to be respected until advised to the contrary by the originating agency or higher authority. Questions as to the propriety of continued classification in these cases should be promptly brought to the attention of the originator. If the originator cannot be readily identified, the matter should be referred to the OST Chief, Security Staff.

3–8. Declassification of Presidential Papers

The Archivist of the United States has the authority to review for declassification or downgrading, information and material which has been classified by a President, his/her White House Staff or special committee or commission appointed by him/her and which the Archivist has in his/her custody at any archival depository, including a Presidential Library. Such declassification shall only be undertaken in accord with: (i) The terms of the donor's deed or gift, (ii) consultations with the Departments having a primary subject-matter interest, and (iii) the provisions of this Chapter with respect to the material of concern to DOT.

3–9. Mandatory Review for Declassification

a. E.O. 12356 requires that procedures be established to handle requests by a U.S. Citizen or permanent resident alien, a federal agency, or a State or local government, to declassify and release information. In order to be acted upon, a request needs to describe the information with sufficient particularity to permit the record to be identified and located. Agency responses to mandatory declassification review requests shall be governed by the amount of search and review time required to process the request. After review, the record or any reasonably segregable portion thereof that no longer is in the interest of national security shall be declassified and released unless withholding is otherwise warranted under applicable law.

b. Requests for classified records made under the Freedom of Information Act (FOIA), as amended, are processed differently than requests made under the Mandatory Review provision. (See Paragraph 3–11.)

c. An agency in possession of a classified document may not, in response to a request for the document made under the Freedom of Information Act or the Mandatory Review provision of E.O. 12356, refuse to confirm the existence or non-existence of the document, unless the fact of its existence or non-existence would itself be classified.

3–10. Procedures for Submitting and Handling Requests for Mandatory Review

a. The Chief, Security Staff, M–441, Office of the Secretary of Transportation, 400 7th Street, SW., Washington, D.C. 20590, is hereby designated as the official to whom a member of the public or another department or agency will submit a request for mandatory review of classified material produced by or under the primary cognizance of the Department of Transportation. Elements of the Department which may receive a

request directly shall immediately notify the Chief.

b. If the request involves material produced by or under the cognizance of the U.S. Coast Guard or the Federal Aviation Administration, the Chief will forward the request to the headquarters security staff of the element for action. If the request involves material produced by other Departmental elements, the Chief shall serve as the action officer.

c. Action offices shall:

(1) Immediately acknowledge receipt of the request and provide a copy of the correspondence to the Chief. If a fee for search of records is involved, pursuant to the Department of Transportation regulations, 49 CFR Part 7, in implementation of the Freedom of Information Act, the requester shall be so notified.

(2) Conduct a security review which shall include consultation with the office which produced the material and with source authorities when the classification, or exemption of material from automatic declassification, was based upon determinations by an original classifying authority.

(3) Assure that the requester is notified of the determination in a timely manner (or given an explanation as to why further time is necessary) and provide a copy of the notification to the OST Chief, Security Staff.

d. Whenever a request does not reasonably describe the records sought, the requester shall be notified that no further action can be taken without more specificity as to the records in question.

e. If the determination reached is that continued classification is required, the determination shall include a statement as to why the requested material cannot be declassified. The determination shall also advise the requester of the right to appeal. A requester who may wish to appeal a classification review decision, or who has not been notified of a decision after sixty (60) days, should submit the appeal to the Chairman, Security Review Committee, M–1, Department of Transportation, 400 7th Street, SW., Washington, D.C. 20590.

f. If the determination reached is that continued classification is not required, the information shall be declassified and the material remarked. The action office will then refer the request to the Director of the Office of Public Affairs or to the head of the operating element, as the case may be, responsible for the material to determine if it is otherwise available for public release under 5 U.S.C. 552 (The Freedom of Information Act) and implementing regulations.

(1) If the material is releasable, the requester shall be advised that the material has been declassified and is available. If the request involves the furnishing of copies and a fee is to be included, the requester shall be so advised pursuant to 49 CFR 7.91 through 7.95.

(2) If the material is not releasable, the requester shall be advised that the material has been declassified but that the record is exempt from disclosure, pursuant to the Freedom of Information Act, and that the provisions of 49 CFR 7.81, which pertains to appeals, is applicable.

g. Upon receipt of an appeal from a classification review determination based upon continued classification, the Departmental Security Review Committee shall immediately acknowledge receipt and act on the matter within thirty (30) days. With respect to information originally classified by or under the primary cognizance of DOT, the Committee, acting for the Secretary, has the authority to overrule previous determinations in whole or in part when, in its judgment, continued protection in the interest of national security is no longer required. When the classification of the DOT-produced material was based upon a classification determination made by another department or agency, the Security Review Committee (SRC) will immediately consult with its counterpart committee for that department.

(1) If it is determined that the DOT material requires continued classification, the requester will be so notified.

(2) If it is determined that the material no longer requires classification, it shall be declassified and remarked. The Committee shall refer the request to the Director of the Office of Public Affairs, or the head of the operating element concerned, as the case may be, to determine if the material is otherwise available for public release under Title 5, U.S.C. Section 552, and implementing directives, and the provisions set forth in subparagraphs (1) and (2), paragraph f, above, shall be followed. A copy of the response shall be provided to the Committee.

3–11. Procedures for Handling Requests Under the Freedom of Information Act Involving Classified Records

a. Amendments to the Freedom of Information Act, Title 5, U.S.C., Section 552, authorize withholding of records from public availability which are "(A) specifically authorized under criteria established by an Executive Order to be kept Secret in the interest of national defense or foreign policy and (B) are in fact properly classified pursuant to such Executive Order."

b. Persons who request records from an agency under the provisions of the Act, and whose requests are denied, may petition the courts to enjoin the agency from withholding the record, and in this event, the burden is on the agency to sustain its actions.

c. The Amendments also impose time limits for determinations on FOIA reqeusts. A determination on an initial request must be made within ten (10) working days after receipt of the request. In case of an appeal to an initial denial, a determination must be made within twenty (20) working days after receipt of the appeal. Except for unusual circumstances, failure to make a determination within the stated time limits means that a requester has exhausted the administrative remedies and may bring suit immediately.

d. To assure that FOIA requests involving classified records are subjected to a thorough classification review and response is made within the specified time limits, the procedures in paragraphs e. and f. shall apply.

e. The procedure for initial requests involving classified records is as follows:

(1) The office having responsibility to act upon a FOIA request shall consult immediately with the appropriate security element which shall conduct a classification review.

(2) If the record is declassified, the action officer shall be so advised and a determination of releasability shall be made without further reference to security considerations. A copy of the declassification decision shall be forwarded to the OST Chief, Security Staff.

(3) If the record warrants continued classification, the action officer shall be advised prior to the expiration of the time limit. The action officer shall advise the requester of the denial following the provisions of 49 CFR 7.21, "Initial Determination."

(4) If the classification review cannot be completed within the statutory time limit, due to unusual circumstances, the security element will so advise the action officer. The action officer will arrange for an extension of time in accordance with the Act (5 U.S.C. 552 (a)(6)(B) and 49 CFR 7.25, "Extension" and implementing Departmental regulations.

(5) A copy of the determination to deny based on classification of the record shall be forwarded immediately to:

(a) The OST Director of the Office of Public Affairs, the General Counsel, or

to the head of an operating element, as the case may be; and

(b) The OST Chief, Security Staff, through the appropriate headquarters security staff.

f. The procedure for receipt of an appeal for reconsideration of release of a classified record is as follows:.

(1) The Departmental official receiving the appeal shall immediately refer the matter to the Departmental Security Review Committee which shall conduct a classification review. With respect to information originally classified by or under the primary cognizance of the Department, the Committee, acting for the Secretary, has authority to overrule previous determinations in whole or in part when, in its judgment, continued protection in the interest of national security is no longer required. When the classification of the record produced in the Department is based upon a classification determination made by another department or agency, the Security Review Committee shall consult immediately with its counterpart committee for that department. Before reaching a decision the Committee may consult with additional departments or committees as may be appropriate.

(2) If the Committee determines that the record is in fact properly classified pursuant to an Executive Order, the Committee shall so inform the head of the operating element concerned and the OST General Counsel. The head of the operating element concerned, or the General Counsel, as the case may be, shall issue a final denial to the requester.

(3) If the Committee determines that the record no longer requires classification, the head of the operating element concerned or the General Counsel, as the case may be, will be so informed. The head of the operating element or the General Counsel, as the case may be, shall determine if the material is otherwise available for public release and notify the requester.

(4) In its deliberations and notification to the head of the operating element or the General Counsel, as the case may be, the Committee shall determine, to the maximum extent possible, what portions of a requested record contains information properly classified and what unclassified portions may be reasonably segregated for the purpose of public availability.

(5) Actions upon appeal for reconsideration of requested records shall be completed within the prescribed time limits.

g. The OST Chief, Security Staff, is designated as the officer to whom another department or agency should submit a request for a classification review of classified material produced by or under the primary cognizance of the Department. If the reason for the review is based upon a request received by the other department or agency under the Freedom of Information Act, the Chief shall immediately inform the Chairman of the Security Review Committee who shall assure that action which is appropriate to the circumstances is taken. If the reason for the request for review is not based on the Freedom of Information Act, the Chief shall refer the matter to the operating element concerned or shall act directly on the matter. In either event, he shall assure that a proper and timely response is made.

3–12. Public Availability of Declassified Information

a. It is a fundamental policy of DOT to make information available to the public to the maximum extent permitted by law. Information which is declassified, for any reason, loses its protective status in the interest of national security. Accordingly, declassified information shall be handled in every respect on the same basis as all other unclassified information. Declassified information is subject to the Department of Transportation regulations (49 CFR Part 7) in implementation of the Freedom of Information Act and public information policies and procedures.

b. Information may be classified or reclassified after an agency has received a request under the Freedom of Information Act (5 U.S.C. 552) or the order if such classification meets the requirements of the order and is accomplished personally and on a document-by-document basis by officials designated by the Order.

Chapter XI. Dissemination of Classified Information

11–1. Discussion.

Information has no real value unless it is made available to those who can use it. This principle applies also to classified information. However, The Dissemination of Classified Information is Limited to Those Whose Official Duties Require Knowledge or Possession Thereof and Further to Those who Will Respect This Limitation.

11–2. Basic Provisions

a. Classified information may be released only to persons who have an official need for the information and only after they have been determined by designated authorities to be trustworthy for the classification level of information to be disclosed. For example, persons who are cleared at the SECRET level may not be given access to information at the TOP SECRET LEVEL. However, clearance for one level, i.e., TOP SECRET, conveys authority for release of information classified at lower levels, i.e., SECRET or CONFIDENTIAL when a need for release exists. The mere fact that an individual is employed by DOT or another Department or Agency of the Government or is a member of the Armed Forces does not mean that he has been Cleared for Access to Classified information.

b. A security clearance shall be administratively rescinded when an individual no longer requires access to classified information in the performance of official duties. Likewise, when an individual no longer needs access to a particular security classification category, the security clearance will be adjusted to the classification category still required for the performance of his/her duties. In both instances, such action shall be taken without prejudice to the person's eligibility for security clearance should the need arise again. DOT Order 1630.2, Personnel Security Program, sets forth policies, standards, procedures, and designated authorities for issuing and withdrawal of security clearances for DOT personnel.

c. After a person has been found eligible for access to classified information, but before being allowed such access, the individual shall be required to sign a SF–189, "Classified Information Nondisclosure Agreement". The completed agreement will be retained in a file system that will assure its expeditious recovery for the 50 year retention.

d. Access to certain types of information may require additional authorization and controls. As an example, a person having access to Sensitive Compartmented Information (SIC) would be required to sign a Form 4193, "Sensitive Compartmented Information Nondisclosure Agreement".

e. Supervisors are responsible for controlling the dissemination of classified information received or generated in their offices to persons under their jurisdiction.

f. The responsibility for determing whether an individual has a need for specific items of classified information rests with the person or activity which has possession or control of the information and not with the prospective recipient.

g. Classified material originated by another department or agency and furnished to DOT shall not be further distributed outside DOT without the prior consent of the originating

department or agency. This restriction applies to the distribution to contractors who require the informatin in performance of DOT contracts.

h. Classified material shall not be released to an employee or other person for his/her private use (personal, commercial, or as background material) even though the individual may have been partly or solely responsible for producing the material.

i. Before approving a release of classified information to a person who serves in more than one capacity, e.g., a contractor employee who also acts as a private consultant, the releasing official shall determine in which capacity the intended recipient is acting and will follow the release and clearance procedures established for the appropriate category.

j. Personnel shall refuse access to classified information for which they lack either the required authorization or need-to-know.

k. Officials who disclose classified information verbally will insure that the recipients have the proper security clearance and also advise the recipients of the classification of the information divulged.

l. Additional provisions for dissemination in connection with visiting are set forth in Chaptr XII.

11–3. Dissemination within the Executive Branch.

Classified information originated by DOT activities may be disseminated to other departments and agencies of the Executive Branch as necessary for the conduct of official business.

11–4. Dissemination Outside the Executive Branch.

Classified information shall not be disseminated outside the Executive Branch without the specific authorization of designated officials as indicated below. Classified material which is to be physically released to the U.S. entities outside the Executive Branch shall be marked as prescribed by Chapter IV.

11–5. To the Congress

a. Provided other Departmental policies and procedures regarding legislative affairs are met, classified information may be disseminated to the Congress when necessary in the interests of the national security and as authorized by the Secretary or the head of an operating administration. As used herein, the Congress includes members, committees, subcommittees, and staffs of members and committees.

b. DOT personnel who are to appear as witnesses before a Congressional Committee or who will met with staff representatives shall obtain prior approval from an authority designated above for the disclosure of classified information which he/she anticipates will be requested.

c. A DOT witness who is requested to disclose classified information which he/she has not been authorized to release shall respectfully state that he/she does not have authority to testify on the matter but that he/she will endeavor to obtain authority or have the information furnished.

d. Witnesses shall request that classified testimony be given in Executive session only, that any record of such testimony be identified as classified and not appear in any document subject to public inspection or availability, and shall obtain the assurance of a committee representative that everyone present has a security clearance commensurate to the classification of the information to be released or discussed.

e. Offices which release classified documents are responsible to assure that they will be provided adequate physical safeguards.

f. Personal communications to Congress shall not include classified information. Classified information shall not be furnished for further release to a constituent.

g. Classified information to be disclosed shall be reviewed specifically to assure that the assigned classification is still valid.

11–6. To Representatives of the General Accounting Office (GAO)

Properly cleared and identified representatives of the GAO may be granted acess to DOT classified information at DOT activities when such information is relevant to the performance of their statutory responsibilities and duties in accordance with the following:

a. The GAO will give advance notice to the heads of DOT activities to be visited. Each announcement of a planned visit will include the purpose of the visit, names of the representatives, and if access to classified information is anticipated, a certification as to the level of clearance of each representative.

b. The following GAO officials are authorized to certify security clearances: the Comptroller General, his Deputy, and Assistants; the General Counsel and Deputy General Counsel; the Director and Deputy Director, Office of Policy; the Directors, Deputy Directors, Associate Directors, and Assistant Directors of the following Divisions: General Government Resources and Economic Development, Resources and Economic Development, Manpower and Welfare, International, Transportation and Claims, Procurement and Systems Acquisition, Federal Personnel and Compensation, Logistics and Communications, Financial and General Management Studies; and Regional Managers.

c. GAO personnel can be identified by special credential cards issued by the Comptroller General. Each card is serially numbered and bears the photograph and signature of the authorized holder.

d. Requests for the following types of information shall be forwarded to the OST Chief, Security Staff, for the determination of whether or not the information is relevant to the performance of the GAO's statutory responsibilities and for authorization for release or access:

(1) Top Secret information;

(2) Other sensitive classified information falling in the general areas of tactical operations, intelligence and communications security; and

(3) Classified information originated by another department or agency of the Executive Branch, including FBI reports.

e. When classified documents are furnished to GAO representatives, they shall be informed of the classified nature of the information and of the need for safeguarding it properly. In this connection, the Comptroller General has agreed to establish a security system at least equal to that prescribed by the Executive Branch.

11–7. To the Government Printing Office (GPO).

Classified material, except TOP SECRET and similarly unique material, may be released to GPO plants, Washington and field, for reproduction when necessary as determined by DOT officials responsible for meeting printing and reproduction needs. The Public Printer has established policies and standards commensurate with those of the Executive Branch for the clearance of GOP personnel and for the safeguarding of classified information.

11–8. To the Judiciary

Every effort shall be taken to prevent the disclosure of classified information in proceedings before civil courts or a general courts-martial. If classified information becomes, or it appears that it might become, involved, the matter will be referred immediately to the OST General Counsel. The General Counsel in consultation with the OST Chief, Security Staff, will furnish advice and

guidance as appropriate to the circumstances of the given situation.

11–9. To Foreign Governments, Foreign Nationals, and International Organizations

a. The release of classified information to foreign nationals (orally, visually or in documentary form) requires special attention and controls. This paragraph deals only with the protection and controlled release of classified information. Other Departmental directives in the area of international relations should be consulted also. The term Foreign National includes a U.S. citizen acting as a representative of a foreign government or firm and is defined in Appendix 2—Item 23.

b. In rate instances, a DOT activity may wish to hire a foreign national as an employee or consultant in his/her capacity as a private individual. In this regard, the provisions of applicable directives and the Federal Personnel Manual will be followed. In addition, if access to classified information is involved, the activity or office shall submit a request to the security manager of the headquarters of the respective operating administration or the OST Chief, Security Staff for authorization together with necessary personnel security forms. The following requirements shall be fulfilled:

(1) The request shall identify precisely the classified information intended for release. The security staff shall determine RELEASIBILITY of the information in the manner described below as though the information were to be released to the government of the country of which the individual is a national. Activities shall permit access only to that classified information for which authorization has been obtained. Procedural controls shall be established to effectively screen all information furnished to the foreign national employees.

(2) A full field investigation shall be completed and evaluated before access is granted. Interim authorizations are not permitted. Since investigations overseas will be involved, delays in completing the investigation should be anticipated. If it is not possible to obtain full investigation coverage, authorization shall be denied. Upon completion and evaluation, a clearance as defined by Appendix 2, Item 13, will not be issued. Rather, authorization will be granted for access only to specifically identified information.

c. Except for the above, classified information as a matter of principle and policy is not made available to a foreign national as an individual, but is disclosed to his/her government. By this means, the parent government accepts responsibility for the clearance of the individual and for the protection of the information.

(1) Policies governing the disclosure of classified military information to foreign governments are formulated by the National Military Information Disclosure Policy Committee (NDPC). Releases of certain other classified information, including Restricted Data, intelligence, and communications security information, are made pursuant to policies established by the agency or interagency entity having cognizance of the information proposed for release. Often the determination of cognizance is difficult and involved and, in many cases, more than one department or agency may need to be consulted for approval.

(2) As a prerequisite for release the department or agency proposing such release must make a clear determination that the benefits to the U.S. outweigh the disadvantages of disclosure. The cognizant department or agency must concur in this determination.

(3) The foreign government proposed as a recipient of U.S. classified information must officially assure this government that the information will be used only for official purposes, will be afforded protection at least equal to our requirements, will not be released to any other person or nation without our express permission, and corporate or proprietary rights (if any) in the information will be respected.

d. No release of classified information to a foreign national or foreign government may be made by a DOT activity without the express consent of the chief of the security manager of the headquarters of the appropriate operating administration or the OST Chief, Security Staff.

e. Application for visits of foreign nationals to DOT activities wherein access to classified information may be involved, shall be made to the appropriate security manager or OST Chief, Security Staff, at least thirty days in advance of the proposed visit. In the case of a civilian or military representative of a foreign government application may be made by a civilian or military attaché of the mission of the country concerned. For all other foreign nationals (including U.S. citizens representing foreign interests), application shall be made by the Chief of Mission (ambassador, minister, etc.) of the country concerned. Applications shall contain the following information concerning the proposed visitor:

(1) Name in full, rank, title, and position;

(2) nationality, date and place of birth (in case of a civilian, furnish passport number);

(3) employer or sponsor (if other than government making appliction);

(4) name and address of installation(s) to be visited;

(5) date, time, and duration of proposed visit;

(6) purpose of visit in detail, including estimated degree of access required;

(7) security clearance status of visitor with his/her own government;

(8) where known and appropriate, names of individuals to be visited; and

(9) a certification that the visitor has been subjected to a military and political screening and does not constitute a security risk to the United States, that the visit and visitor are officially sponsored by his/her government which has officially cleared him/her to receive information on the stated purpose, that responsiblity for the security of the information obtained is officially accepted by his/her government, that all information obtained will be used for official purposes only and will not be released to any other person or nation without the express consent of the U.S. Government, and that corporate or proprietary rights involved, patented, or not, will be respected and protected.

f. Requests for documentary release of classified information shall be processed generally in accordance with the procedures prescribed in 11–9c above. Documents containing classified information approved for release shall be delivered to the appropriate security manager or OST Chief, Security Staff for onward transmission by means appropriate to the circumstances.

g. It is emphasized that these provisions apply to all situations where in a foreign national may gain access to classified information in the custody of DOT. They apply to visits of DOT personnel to foreign countries, participants in exchange missions, conferences, meetings, symposia, etc. To avoid embarrassment, personnel should be careful to avoid firm initations or commitments to foreign nationals which may involve access to classified information until the express consent for acess is obtained. Other department or agency approval of sponsorship of a foreign national visit, sometimes referred to as a clearance, does not authorize access to classified information in the custody of DOT. Any proposed release of, or access to, classified information involving a foreign national, which is not covered in these provisions shall be submitted to the appropriate security manager, or

chief, Security Staff, OST, for handling on a case-by-case basis.

(1) That he/she will abide by regulations issued by DOT:

11–10. To Historical Researchers.

a. Persons outside the Executive Branch who are engaged in historical research projects may have access to classified information provided that: (1) Access to the information will be clearly consistent with the interests of national security, and (2) the person to be granted access is trustworthy.

b. The provisons of this paragraph apply only to persons who are conducting historical research as private individuals or under private sponsorship and do not apply to research conducted under government contract or sponsorship. Further, the provisions are applicable only to situations where the classified information concerned, or any part of it, was orginated by DOT or by DOT contractors or where the information, if originated elsewhere, is in the sole custody of DOT. If any person requests access to material originated in another agency or to information under the exclusive jurisdiction of the National Archieves and Records Service, General Services Administration, he/she should be referred to the other agency or to the National Archives and Records Service.

c. When a request for access to classified information for historical research is received, it will be referred to the appropriate local security office. The security office shall obtain from the applicatnt completed Standard Form 86 in triplicate, Investigation Data for Sensitive Position, and Stndard Form 87, Fingerprint Chart; a statement in detail to justify access, including identification of the kind of information desired and the organization or organizations, if any, sponsoring the research; and a written statement (signed, dated, and witnessed) with respect to the following:

(1) That he/she will abide by regulations issued by DOT:

(a) To safeguard classified information: and

(b) To protect information which has been determined to be proprietary or privileged and is not eligible thereby for public dissemination.

(2) That he/she understands that any classified information which he/she receives affects the security of the U.S.

(3) That he/she acknowledges an obligation to safeguard classified information or privileged information of which he/she gains possession or knowledge as a result of his/her access to files of the Department.

(4) That he/she agrees not to reveal to any person or agency any classified information or privileged information obtained as a result of his/her access, except as specifically authorized in writing by the DOT and further agrees that he/she shall not use the information for purposes other than that set forth in his/her application.

(5) That he/she agrees to authorize a review of his/her notes and manuscript for the sole purpose of determining that no classified information or material is contained therein.

(6) That he/she understands that failure to abide by conditions of this statement will constitute sufficient cause for cancelling his/her access to classified information and for denying him/her any future access, and may subject him/her to criminal provisions of Federal law as referred to in this statement.

(7) That he/she is aware and fully understands the provisions of Title 18, U.S. Code, Crimes and Criminal Procedures, and of the Internal Security Act of 1950, as amended. Title 50, U.S. Code, prescribes, under certain circumstances, criminal penalties for the unauthorized disclosure of information respecting the national security and for loss, destruction or compromise of such information.

(8) That this statement is made to the U.S. Government to enable it to exercise its responsibilities for the protection of information affecting the national security. That he/she understands that any material false statement which he/she makes knowingly and willfully will subject him/her to the penalties of Title 18, U.S. Code, Section 1001.

d. The security office shall process the forms in the same manner as specified for a preappointment National Agency Check (NAC) for a critical-sensitive position. Upon receipt of the completed NAC, the security office, if warranted, may determine that access by the applicant to the information will be clearly consistent with the interests of national security and the person to be granted access is trustworthy. If deemed necessary, before making its determination, the office may conduct or request further investigation. Before access is denied in any case, the matter will be referred through channels to the OST Chief, Security Staff, for review and submission to the Secretary for final denial.

e. If access to TOP SECRET, intelligence or communications security information is involved, a full field investigation is required. However, this investigation shall not be requested until the matter has been referred through channels to the OST Chief, Security Staff, for determination as to adequacy of the justification and consent of other agencies as required.

f. When it is indicated that an applicant's research may extend to material originating in the records of another agency, approval must be obtained from the other agency prior to the grant of access.

g. Approvals for access shall be valid for the duration of the current research project but no longer than two years from the date of issuance, unless renewed. If a subsequent request for similar access is made by the individual within one year from the date of completion of the current project, access may again be granted without obtaining a new NAC. If more than one year has elapsed, a new NAC must be obtained. The local security office shall promptly advise its security manager of the appropriate headquarters, of all approvals of access granted under these provisions.

h. An applicant should be given access only to that classified information which is directly pertinent to his/her approved project. He/she may review files or records containing classified information only in offices under the control of DOT. Procedures should be established to identify classified material to which he/she is given access. He/she should be briefed on local procedures established to prevent unauthorized access to the classified material while in the custody, for the return of the material for secure storage at the end of the daily working period, and for the control of his/her notes until they have been reviewed. In addition to the security review of the applicant's manuscript, the manuscript should be reviewed by appropriate offices to assure that it is technically accurate insofar as material obtained from the Department is concerned and is consistent with the Department's public release policies.

11–11. To Former Presidential Appointees

Persons who previously occupied policy-making positions to which they were appointed by the President may be granted access to classified information or material which they originated, reviewed, signed, or received while in public office, provided that:

a. It is determined that such access is clearly consistent with the interests of national security; and

b. The person agrees to safeguard the information, to authorize a review of his/her notes to assure that classified information is not contained therein, and that the classified information will

not be further disseminated or published.

11–12. To Contractors.

Classified information may be disclosed to DOT contractors, subcontractors, bidders, and grantees, and to contractors of other Government agencies, provided access to the information is necessary to the performance of the contract and required security clearances have been issued (see Chapter XII).

11–13. To the National Defense Executive Reservists (NDER's).

For the purposes of dissemination, members of the DOT NDER program are considered to be in the same category as employees. Classified information may be disclosed to DOT NDER's for which they have a need provided clearances have been issued pursuant to the provisions of DOT Order 1630.2, Personnel Security Program. However, classified material shall not be physically released to the custody of NDER's except upon request to the Director of Emergency Transportation, RSPA, and in accordance with procedures established by the latter after consultation with the OST Chief, Security Staff.

11–14. To Reserve Military Personnel for Training and to Retired and Inactive Status Military Personnel.

The Commandant, U.S. Coast Guard, shall establish policies and procedures for the dissemination of classified information to reserve, retired, and inactive status personnel. Releases to retired and inactive status personnel shall be on a selective basis, limited to those persons and to that information deemed warranted in the furtherance of the USCG or overall Departmental mission. Dissemination shall be orally or visually as distinguished from the physical release of documentary material. Classified information to be used in training courses for reserve personnel shall be screened and justified.

11–15. Contact with News Media.

No person in DOT will discuss with or provide classified information to the news media. All contacts with the news media involving classified information, whether written or oral, will be referred to the OST Chief, Security Staff. The security element shall be consulted before any commitment to or understanding with the individual or entity has been made.

11–16. Prepublication Review.

Persons having access to Sensitive Compartmented Information (SCI) will be reqired to submit for security review to the Headquarters Security Staff all information or materials, including works of fiction, which contain or purport to contain SCI or description of activities that produce or relate to SCI or are believed to be derived from SCI. The request must be submitted in written form with complete justification.

11–17. Dissemination Through Meetings.

a. DOT activities which host or convene a classified conference, symposium, seminar, exhibit, or scientific and technical gathering (hereinafter referred to as a meeting) shall assure that security measures, appropriate to the circumstances, are taken. Requirements include, but are not limited to, the following:

(1) All persons attending the meeting shall be properly authorized and have a need for the information. In this regard, all attendees may not have a need for all of the information to be presented, particularly at a meeting covering a wide range of topics. In such instances, the agenda should be drawn and the meeting conducted in a manner to provide for selective attendance.

(2) Attendees shall be positively identified before being admitted to the meeting room.

(3) Persons who present classified information shall be advised of any limitations on their presentations which may be necessary because of the level of clearance or need-to-know of certain members of the audience. The speaker is responsible also for seeking such guidance and for keeping his/her disclosures within the prescribed limits.

(4) Notes, minutes, summaries, recordings, proceedings, reports, etc., on the classified portions of the meeting shall be safeguarded and controlled throughout the duration of the meeting. Such material, as appropriate, shall be forwarded to attendees by secure means at the conclusion of the meeting rather than being handcarried by them from the meeting site (except for local attendees).

(5) Physical and technical security controls shall be established as appropriate to the classification and sensitivity of the information to be discussed. Because of the security hazards inherent in the use of any normally public meeting place for the presentation or discussion of classified information, classified meetings or classified sessions of a meeting, shall, whenever possible, be held only on a U.S. Government installation or a cleared contractor facility. Exception to this provision may be approved by the appropriate security element.

BILLING CODE 4910–62–M

Federal Aviation Administration

Draft Advisory Circular on Use of Child/Infant Seats in Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to issue an Advisory Circular.

SUMMARY: The FAA has prepared an Advisory Circular that provides information on the proper use of child or infant seats aboard aircraft and precautions for rapid evacuations during emergencies. The Advisory Circular is not a regulation and will be issued for guidance purposes only.

DATE: Commenters must identify file number 120–XX (AWS–110) and comments must be received on or before May 14, 1984.

ADDRESSES: Send all comments on the draft Advisory Circular AC to:

Policy and Procedures Branch, AWS–110, Aircraft Engineering Division, Office of Airworthiness—File No. 120–XX (AWS–110), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591

Or deliver comments to:

Room 335D, 800 Independence Avenue, SW., Washington, D.C. 20591

FOR FURTHER INFORMATION CONTACT: Arthur J. Hayes, Policy and Procedures Branch, AWS–110, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591, telephone: (202) 426–8374.

Comments received on the draft AC may be inspected, before and after the closing date for comments, in Room 335D, FAA Headquarters Building (FOB–10A), 800 Independence Avenue, SW., Washington, D.C. 20591, between 8:00 a.m. and 4:30 p.m.

SUPPLEMENTARY INFORMATION: The telephone number given at the end of the draft AC may be used by the general public to obtain information on child or infant restraint devices approved for use in aircraft. When the AC is issued, that telephone number will be changed to an FAA Office of Public Affairs telephone number. Until then, public inquiries are still welcomed at the telephone number in the draft AC.

Comments Invited

Interested persons are invited to comment on the draft AC by submitting such written data, views, or arguments as they may desire. Commenters should identify AC file number 120–XX (AWS–110) and comments should be submitted to the address specified above. All comments received on or before the closing date specified above for comments will be considered by the Director of Airworthiness before issuing the final AC.

How to Obtain Copies

A copy of the draft AC may be obtained by contacting the person under "FOR FURTHER INFORMATION CONTACT."

Issued in Washington, D.C. on March 21, 1984.

M. C. Beard,

Director of Airworthiness.

Draft Advisory Circular

Subject: Use of Child/Infant Seats in Aircraft

Initiated by: AWS–110

[*AC No:* 120]

1. *Purpose.* This advisory circular provides information to assist the public in the proper use of child/infant seats aboard aircraft and provides precautions so all passengers are able to evacuate aircraft rapidly during emergencies.

2. *Related Federal Aviation Regulations (FAR) Sections.* Section 91.14, 121.311, 125.211, and 127.109.

3. *Background.*

a. *Establishing the Need.* A Federal Aviation Administration (FAA) Task Force on Child Restraint was convened in February 1979 to evaluate child restraint device use aboard aircraft and to explore the options for allowing child restraint devices in aircraft. Based on work previously done by the Civil Aeromedical Institute and the Flight Standards National Field Office in the FAA and the National Highway Traffic Safety Administration (NHTSA) of the Department of Transportation, the Task Force submitted a recommendation to the FAA Administrator on June 1, 1979; the recommendation indicated that the most suitable manner of allowing child restraint devices aboard aircraft would be to adopt the Federal Motor Vehicle Safety Standard No. 213, Child Restraint Systems, with additional provisions for the aircraft environment.

b. *The Aircraft Environment.* (1) In most nontransport category aircraft, there are small cabins; passenger seats with safety belts and shoulder harnesses; a need to evacuate entire aircraft rapidly in emergencies; aft, forward, and side facing passenger seats; passenger seats with backs that fold over, occasionally a single entrance/exit door; and up and down loads during inflight turbulance/gusts.

(2) In transport category aircraft, there are passenger seats with fold-over backs, safety belts, and arm rests (some may be folded up out of the way); a need to evacuate entire aircraft rapidly in emergencies; aft, forward, and side facing passenger seats; and up and down loads during inflight turbulence/gusts.

c. *Performance Standards.* Following development of the performance standards that account for the aircraft environment and after providing public notice, the FAA issued the standards in Technical Standard Order (TSO) C100, Child Restraint Systems, on May 28, 1982. The FAA issued the TSO for child restraint systems, i.e., child/infant seats, to provide for use of child/infant seats, which would not be a hazard to the child/infant or other passengers during an emergency in the air transportation environment.

d. *FAA approval.* A child/infant seat with an FAA TSO approval or a Parts Manufacturer Approval (PMA) may be used in all phases of flight and fully complies with FAR §§ 121.311(b), 125.211(b), and 127.109(b).

4. *Discussion.*

a. *Child/Infant Seats are Optional.* The FAA does not require the use of child/infant seats for small children aboard aircraft; however, air travelers are given the option, at their own expense, to use child/infant seats in accordance with paragraph 4b during all phases of an airline's flight operations. To exercise this option, the air traveler may be obliged, at the discretion of the airline, to purchase a ticket for an infant less than 2 years old.

b. *Approved Child/Infant Seats.* An air traveler may use a child/infant seat that either complies with TSO–C100 or is approved under a supplemental type certificate (STC)–PMA issued by the FAA. The child/infant seat should be clearly marked with one of these approvals or the original Federal Motor Vehicle Safety Standard label should be attached, and the seat's use should be acceptable to the airline (see paragraph 7).

c. *General Precautions.* (1) The owner of an FAA-approved child/infant seat has the responsibility to maintain and to use the seat in accordance with the maintenance, care, and use instructions provided with each seat.

(2) Instructions are provided with each child/infant seat to assure its proper use. All straps, especially shoulder straps, should always be used per the instructions, which should always be available and followed carefully. If all instructions are not followed for proper use of the child/infant seat, the device will at best provide only false security to the user, and at worst, be an actual hazard to a child/infant and other passengers.

(3) Unless the child/infant seat is stowed as carry-on luggage under a passenger seat, in an overhead compartment, or in another secured area identified by a flight attendant, the child/infant seat should be properly secured to a passenger seat at all times during flight, even while unoccupied by a child/infant; no other passenger may occupy that same seat.

(4) If a passenger seat is not available for an infant less than 2 years old, only the infant may be held by an adult. The infant should be taken out of the child/infant seat and held in the adult's lap. An infant in a child/infant seat held by an adult is more hazardous to other passengers.

(5) During takeoff or landing, the child/infant seat should not be occupied if placed in a sideward facing passenger seat.

5. *Precautions (Nontransport Category Aircraft).*

a. *Weight.* The weight of the child/infant seat should be considered in the weight and balance of the aircraft.

b. *Location.* Regardless of where the child/infant seat is placed in a small aircraft cabin, the possibility of it hindering evacuation in an emergency is real; however, the following precautions should improve evacuation capabilities:

(1) The child/infant seat should be located in an aft located passenger seat when available. Although the child/infant seat may be located anywhere, *an aft located seat is the preferred location* when another adult is also a passenger.

(2) The child/infant seat should not be located near an entry door or emergency exit except in 2-place aircraft where there is no other choice.

(3) The child/infant seat should not interfere with the full travel of the control wheel/yoke. Controls should be moved in all directions with the occupied child/infant seat in place. A special emphasis item may be placed in the takeoff and landing check list to ensure full travel of controls before takeoff and sufficient freedom of controls for landing. After a child/infant seat is secured in a safe position, care should be exercised if the seat is moved in flight.

c. *Shoulder Harnesses.* The child/infant seat should be attached using only the lap belt per manufacturer's instructions. Aircraft shoulder harnesses

should not be used to secure or to stabilize the child/infant seat as shoulder harnesses may result in injury to the child/infant.

6. *Precautions (Transport Category Aircraft).*

a. *Weight.* The weight of the child/infant seat is considered to be negligible in the normal situation where only a few passenger seats are occupied with children in restraint devices.

b. *Location.* (1) The child/infant seat should be located in a row that is neither the same row of an emergency exist nor the row forward or aft of an emergency exist. *A window passenger seat is the preferred location;* however, other locations are acceptable provided a responsible person occupies a seat next to the child/infant.

(2) The child/infant seat may also be located in the middle row of seats in a 2-aisle airplane but should not be located in an aisle seat. Again, an aisle seat may be acceptable provided all other seats in that row are occupied by persons responsible for the child/infant.

(3) More child/infant seats per row are allowed if the children are from the same family or traveling group.

(4) The child/infant seat should not block access ways and passageways to any emergency exit.

c. *Safety Belt Signs.* The child/infant should occupy its seat when the crew turns on the "Fasten Safety Belt" signs.

d. *Emergency Evacuation.* During an actual evacuation, any child/infant seat should remain attached to the passenger seat. Only the child/infant should be removed from the aircraft.

7. *Approval of Existing "Car Seats."*

a. *Privileges.* If a manufacturer receives a TSO–C100 authorization or an STC–PMA approval for a previously NHTSA approved model "car seat" without changes, each owner may be allowed to use one of those model "car seats" as a child/infant seat in an aircraft. To use the "car seat," the original Federal Motor Vehicle Safety Standard label should be attached, the "car seat" should be of a make and model that is FAA-approved, and the seat's use should be acceptable to the airline.

b. *Eligibility.* All airlines are provided with an updated listing of approved "car seat" models to allow a determination of the eligibility of a particular "car seat" for use on aircraft. An air traveler may check with the FAA (telephone: (202) 426–8374 on weekdays between 8:30 a.m. and 4:30 p.m.) or an airline to determine whether a particular "car seat" is eligible for use in aircraft and may check with the airline providing the transportation to determine whether it will accept the seat's use and whether it will require the purchase of a ticket for the seat's use.

[Docket No. 8429]

Petition for Reconsideration of Denial of Exemption From Northern Air Cargo, Inc.; Meeting and Invitation for Comments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of public meeting and invitation for comments.

SUMMARY: This notice requests comments and announces a public meeting to afford interested persons the opportunity to present information and views regarding the petition of Northern Air Cargo Inc. (NAC), to the Administrator to reconsider denial of Exemption No. 770N issued on December 27, 1983. That action denied a petition for exemption from NAC to extend and expand Exemption No. 770 which authorized NAC to use restricted category C–82 airplanes to carry only out-sized cargo for compensation or hire within Alaska. The FAA plans to use information received at the meeting in reconsidering its decision.

DATES: Public Meeting: Wednesday, April 25, 1984, 9:00 a.m. until all interested persons present are heard. Written Comments by: April 27, 1984.

ADDRESSES: Public Meeting: Sheffield Anchorage Hotel, 720 West Fifth Avenue, Anchorage, Alaska: Telephone: (907) 276–7676. Send written comments on the petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC–204), Petition Docket No. 8429, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: Mr. Larry Bedor, Project Development Branch, Air Transportation Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone (202) 472–4621.

SUPPLEMENTARY INFORMATION:

Background

The Federal Aviation Act of 1958 (FA Act) requires the FAA to give full consideration to the duty resting upon air carriers to perform their services with the highest possible degree of safety in the public interest and to make classifications of such standards, rules, regulations, and certificates appropriate to the differences between air transportation and other air commerce. To fulfill this responsibility, the Federal Aviation Regulations specify that airplanes engaged in carrying cargo for compensation or hire shall meet the airworthiness standards for certification in the normal or transport category. Until December 31, 1983, NAC was exempted from these standards in the public interest to allow it to carry, in its C–82 airplanes, only out-sized cargo, within the State of Alaska, which was too large, heavy, or bulky to be loaded aboard, unloaded from, or carried by conventional (side-loading) cargo airplanes.

In issuing Exemption No. 315 to Sholton and Carlson (now NAC) on April 7, 1964, the FAA based its grant of exemption on the fact that standard category airplanes which meet all required safety standards were not available in the Alaska area to fill the public need for the ventral-loading capabilities of the C–82 type airplane. After nearly two decades of granting relief to NAC, the FAA determined on December 27, 1983, that it would no longer be in the public interest to renew or expand NAC's exemption based on the grounds that standard category airplanes, which meet the minimum airworthiness safety standards prescribed in the FAR, are now available to meet the public safety and air transportation needs of Alaska.

The FAA is requesting public participation in the consideration of the NAC petition. The season for high activity in air transportation in Alaska is short and approaching rapidly. Accordingly, the FAA is making every effort to complete action on the NAC petition with all deliberate speed. Therefore, the schedule for the public meeting and the period for receiving written comments is not as liberal as might otherwise be the case. The FAA urges interested persons to mail written comments to the Docket to ensure they arrive by the closing date for comments.

Request To Make a Presentation

Interested persons are invited to attend the meeting and to participate by making oral or written statements. Written statements should be submitted in duplicate and will be made a part of the docket. Requests to make an oral presentation at the meeting should identify Docket No. 8429, indicate the time required, and be sent to: Ms. Ronnie Davis, Flight Standards Division, AAL–200, Federal Aviation Administration, 701 C Street, Box 14, Anchorage, Alaska 99513; Telephone: (907) 271–5514. Requests must be received on or before April 20, 1984.

Presentations will be scheduled on a first-come first-served basis.

Meeting Procedures

Persons who plan to attend the meeting should be aware of the following procedures to be followed:

(a) The meeting will be informal in nature and will be conducted by the designated representative of the Administrator under 14 CFR 11.33. Each participant will be given an opportunity to made a presentation.

(b) The meetings will begin at 9:00 a.m. (local time). There will be no admission fee or other charge to attend and participate. The meeting will be open to all persons on a space available basis. All persons wishing to make a statement will be permitted to do so, however, the meeting will be adjourned once all persons present have had an opportunity to speak.

(c) All meeting sessions will be recorded by a court reporter. Anyone interested in purchasing the transcript should contact the court reporter directly. A copy of the court reporter's transcript will be filed in the docket.

(d) Position papers or other handout material relating to the substance of the meeting may be accepted at the discretion of the presiding officer. Participants submitting handout materials must present and original and two copies to the presiding officer for approval before distribution. If approved by the presiding officer, there should be an adequate number of copies provided for further distribution to all participants.

(e) Statements made by FAA participants at the hearing should not be taken as expressing a final FAA position.

(Secs. 313(a), 314(a), 601 through 610, and 1102 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1355(a), 1421 through 1430, and 1502); 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983))

Issued in Washington, D.C., on March 27, 1984.

Kenneth S. Hunt,

Director of Flight Operations.

Bureau of Alcohol, Tobacco and Firearms

[Notice No. 506; Ref: ATF O 1100.126A]

Delegation to the Associate Director (Compliance Operations) of Authorities of the Director in 27 CFR Part 13, the Gauging Manual; Delegation Order

1. *Purpose.* This order delegates certain authorities of the Director to the Associate Director (Compliance Operations) and permits redelegation to other Compliance Operations personnel.

2. *Cancellation.* ATF O 1100-126, Delegation Order—Delegation to the Assistant Director (Regulatory Enforcement) of Authorities of the Director in 27 CFR Part 13, dated April 1, 1980, is canceled.

3. *Background.* Under current regulations, the Director has the authority to take final action on matters relating to the gauging manual. We have determined that certain of these authorities should, in the interest of efficiency, be delegated to a lower organizational level.

4. *Delegations.* Under the authority vested in the Director, Bureau of Alcohol, Tobacco and Firearms, by Treasury Department Order No. 221, dated June 6, 1972, and by 26 CFR 301.7701-9, authority to take final action on the following matters is delegated to the Associate Director (Compliance Operations):

a. To approve the use of other instruments for determination of specific gravity, under 27 CFR 13.21.

b. To approve other devices or methods and to authorize their use for determination of the quantity of distilled spirits or denatured spirits by volume; and to authorize the determination of the quantity of distilled spirits or denatured spirits by a statistical control method, under 27 CFR 13.36 and 13.51.

5. *Redelegation.*

a. The authorities in paragraph 4 may be redelegated to Bureau Headquarters personnel not lower than the position of branch chief.

b. The authorities in paragraph 4 may be redelegated to regional directors (compliance) to approve, without submission to Headquarters, subsequent requests which are identical to those previously approved by Bureau Headquarters. Regional directors (compliance) may redelegate these authorities to personnel not lower than the position of technical section supervisor.

6. *For Information Contact.* Virginia Yusken, Procedures Branch, 1200 Pennsylvania Avenue, NW., Washington, DC 20226, (202) 566–7602.

7. *Effective Date.* This delegation order becomes effective on March 30, 1984.

Approved: March 23, 1984.

Stephen E. Higgins,

Director.

[FR Doc. 84–8530 Filed 3–29–84; 8:45 am]

BILLING CODE 4810–31–M

[Notice No. 508; Ref: ATF O 1100.84A]

Delegation to the Associate Director (Compliance Operations) of Authority of the Director in 27 CFR Part 252, Exportation of Liquors; Delegation Order

1. *Purpose.* This order delegates certain authorities of the Director to the Associate Director (Compliance Operations) and permits redelegation to other Compliance Operations personnel.

2. *Cancellation.* ATF O 1100.84, Delegation Order—Delegation to the Assistant Director (Regulatory Enforcement) of Authorities of the Director in 27 CFR Part 252, dated March 9, 1978, is canceled.

3. *Delegation.* Under the authority vested in the Director, Bureau of Alcohol, Tobacco and Firearms, by Treasury Department Order No. 221, dated June 6, 1972, and by 26 CFR 301.7701–9, there is delegated to the Associate Director (Compliance Operations) the authority to prescribe, pursuant to 27 CFR 252.2, all forms required by 27 CFR Part 252.

4. *Redelegation.* The authority delegated to the Associate Director (Compliance Operations) may be redelegated to personnel in Bureau Headquarters not lower than the position of branch chief.

5. *For Information Contact.* David M. Purcell, Procedures Branch, 1200 Pennsylvania Avenue, NW., Washington, D.C. 20226, (202) 566–7602.

6. *Effective Date.* This delegation order becomes effective on March 30, 1984.

Approved: March 23, 1984.

Stephen E. Higgins,

Director.

BILLING CODE 4810–31–M

Customs Service

Domestic Interested Party Petition Concerning Tariff Classification of Polypropylene Rope; Additional Comments Requested

AGENCY: U.S. Customs Service, Treasury.

ACTION: Domestic interested party petition; additional comments requested.

SUMMARY: This document requests additional comments from interested members of the public with respect to a domestic interested party petition concerning the tariff classification of certain imported polypropylene ropes. Imported polypropylene ropes are currently classified for duty purposes as other articles of plastics, not specially provided for. If these ropes are products of a beneficiary developing country, they are accorded duty-free entry under the Generalized System of Preferences (GSP). The petitioner contends that these ropes should be classified under the tariff provision for cordage of man-made fibers subject to a higher rate of duty and not eligible for duty-free entry under the GSP even if imported from a beneficiary developing country. A notice inviting the public to comment on the receipt of this petition was previously published in the **Federal Register**. Based upon Customs review of this matter and analysis of the comments received, additional matters have been raised regarding the proper classification. Customs believes that because of the complexity of the issues involved, additional comments on the new matters are warranted before a final determination is made with regard to the tariff classification of the subject articles.

DATE: Comments must be received on or before May 29, 1984.

ADDRESS: Written comments (preferably in triplicate) may be addressed to the Commissioner of Customs, Attention: Regulations Control Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT: Phil Robins, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202–566–8181).

SUPPLEMENTARY INFORMATION:

Background

A petition dated November 9, 1982, was filed with the Customs Service under section 516, Tariff Act of 1930, as amended (19 U.S.C. 1516), by the Sunshine Cordage Corporation, an American manufacturer of synthetic twines, ropes, and cordage. The petitioner contends that certain imported polypropylene ropes made from strips and "plexiform filaments", which are currently classified by Customs under the provision for other articles of plastics, not specially provided for, in item 774.55, Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202), are more appropriately classified under the provision for cordage of man-made fibers in items 316.55 and 316.58, TSUS, depending on diameter. The current rate of duty for articles classified under item 774.55, TSUS, is 6.5 percent ad valorem and the current rate of duty for articles classified under items 316.55 and 316.58, TSUS, is 6 cents per pound plus 11.5 percent ad valorem and 12.5 cents per pound plus 15 percent ad valorem, respectively. The petitioner correctly notes that articles classified under item 774.55, TSUS, can be entered free of duty under the Generalized System of Preferences ("GSP") (see sections 10.171–10.178, Customs Regulations (19 CFR 10.171–10.178)), if imported directly from a beneficiary developing country, whereas articles classified under items 316.55 and 316.58, TSUS, cannot be entered free of duty under the GSP.

An amended petition, dated December 14, 1982, was submitted by the Sunshine Cordage Corporation and filed with Customs to support its original petition and set forth further arguments as to why the classification of polypropylene ropes should be changed. The polypropylene ropes which are the subject of both the petition and the amended petition, are composed of fibrillated strips, which Customs has considered to be man-made plexiform

filaments, in a folded, twisted, or crimped condition.

A notice inviting the public to comment on the receipt of this petition was published in the Federal Register on April 29, 1983 (48 FR 19510). A document correcting certain omissions in the April 29, 1983, notice was published on May 25, 1983 (48 FR 23513), and a subsequent document extending the period of time for submitting comments was published on July 26, 1983 (48 FR 33961).

In reviewing the comments received, additional questions concerning the appropriateness of classification have been raised. These questions were not presented in the original notice for public consideration and comments. Customs believes that the public should have the opportunity to present comments in regard to the new issues under consideration that were not previously mentioned.

New Issues

Issue 1

The first issue that was not previously considered is whether fibrillated strips, even those which are derived from solid strips measuring less than 1 inch in width, are plexiform filaments. As the tariff schedules were originally drafted, no provisions were made for plexiform filaments. In a submission made by the Man-Made Fiber Producers Association to the U.S. Tariff Commission, it was urged that a provision for plexiform fibers or filaments be included in the new tariff schedules. The following is an excerpt from that submission which describes plexiform fibers.

> Following the major classification categories of monofilaments and bands or strips we recommend a new category for plexiform fibers or filaments. These new manmade fibers of very recent development are neither in the traditional form of monofilaments or grouped filaments. Their structure is as the term connotes a complicated networklike fibrous structure in strands. In the manufacture of a manmade fiber of this type the filament comes out of a single orifice in the spinneret and as the solvent evaporates the nature of the material is such that the filament breaks into fibrils. Some of these may have free ends like splinters. Others may go back into the main body of the fiberlike loops. The fibrils are literally a plexus, or network, being intertwined or intermeshed in random fashion. The fiber or filament so composed is a retiform or weblike structure which is decidedly longitudinal in dimension.
>
> Essentially, the plexiform fiber is a monofilament of continuous length and should receive the same duty treatment as monofilaments. A separate classification is recommended because these plexiform filaments are quite new to commerce and their plexus nature may lead to some uncertainty as to whether they are grouped filaments or monofilaments. Since they are a distinct form of manmade fiber, they should be separately provided for and it is our judgment that they are more like monofilamentrs and, hence, should be dutiable at the rate applicable to monofilaments. (Tariff Classification Study, Explanatory and Background Materials, schedule 3, November 15, 1960, at pg. 516).

In view of the above, a substantial question has been raised whether any filbrillated strips can constitute plexiform filaments and, therefore, whether Customs' established and uniform practice of considering fibrillated strips derived from man-made fiber strips to be plexiform filaments is clearly wrong.

Issue 2

The second issue to be considered is, assuming that plexiform filaments are determined not to include filbrillated strips, are those filbrillated strips considered textile man-made fibers for tariff purposes. Headnote 3(f), schedule 3, TSUS, defines the term "fibers" as including filaments and strips and any other fibrous structure suitable for the manufacture of textiles. It would appear that a fibrillated strip used in the manufacture of cordage is fibrous structure which is suitable for the manufacture of textiles and, therefore, should be considered to be included under the definition for "fibers." If this merchandise were considered to be within the definition of "fibers," and is suitable for the manufacture of textiles, it would appear to be classifiable when imported in article form as opposed to material, under the provision for articles of textile materials not specially provided for, not ornamented and not knit, of man-made fibers, in item 389.62, TSUS, at a higher rate of duty than if it were classifiable as plexiform filaments, in item 309.10, TSUS.

Issue 3

The third issue not previously mentioned is whether a single fibrillated strip which has been twisted and imported as twine or cord may constitute cordage for tariff purposes. Headnote 1(a), part 2, schedule 3, TSUS, defines the term "cordage" as meaning "assemblages of textile fibers or yarn, in approximately cylindrical form and of continuous length." Customs has an established and uniform practice to classify twine or cord made from a single fibrillated strip as cordage. However, in view of the language contained in headnote 1(a), which refers to *assemblages* of textile fibers or yarns, the correctness of that practice is doubtful and the merchandise may be more properly classifiable under the provision for articles not specially provided for, not ornamented, of man-made fibers, in item 389.62, TSUS. Comments in this area should be directed to whether the present practice of classification applicable to single fibrillated strips being imported as twine or cord is clearly wrong.

Comments

Pursuant to § 175.21(a), Customs Regulations (19 CFR 175.21(a)), before making a determination on this matter, Customs invites written comments from interested parties on the petition and the correctness of Customs classification of these articles.

The domestic interested party petition and the amended petition, as well as all comments received in response to the first notice and this notice, will be available for public inspection in accordance with section 103.11(b), Customs Regulations (19 CFR 103.11(b)), between the hours of 9:00 a.m. to 4:30 p.m. on normal business days, at the Regulations Control Branch, Headquarters, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

Authority

This notice is published in accordance with section 175.21(a), Customs Regulations (19 CFR 175.21(a), Customs Regulations (19 CFR 175.21(a)).

Drafting Information

The principal author of this document was James S. Demb, Regulations Control Branch, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

William von Raab,

Commissioner of Customs.

Approved: March 16, 1984.

John M. Walker, Jr.,

Assistant Secretary of the Treasury.

BILLING CODE 4820-02-M

UNITED STATES INFORMATION AGENCY

Privacy Act of 1974; Report of New System

AGENCY: United States Information Agency.

ACTION: Notice of new system of records.

SUMMARY: In accordance with the Privacy Act of 1974, we are proposing to establish a new system of records. The system will be manually operated at first, and will be for internal use only. It

is intended to maintain, in one location, the names, backgrounds and qualifications of USIA employees who are working in positions which involve procurement activity, or who are proposed for appointment to positions as Contracting Officers. The system will also be used to monitor the contracting workforce of USIA.

DATE: Comments are due by April 30, 1984.

ADDRESS: The public should address comments to: Director, Office of Contracts, U.S. Information Agency, 1717 H Street NW., Washington, D.C. 20547.

FOR FURTHER INFORMATION CONTACT: Director, Office of Contracts, U.S. Information Agency, 1717 H Street NW., Washington, D.C. 20547.

SYSTEM NAME:

USIA Procurement Personnel Information System.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Office of Contracts, U.S. Information Agency, 1717 H Street NW., Washington, D.C. 20547.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

USIA employees involved with procurement activities.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, office, position title, series and grade, service computation date, position description, education, training, experience, professional recognition, career objectives.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

Authority for this system is derived from the Federal Records Act, 44 U.S.C. 3101, and Federal Acquisition Regulation, Subpart 1–6.

PURPOSE(S):

The U.S. Information Agency intends to establish a register of trained and qualified individuals who may be appointed as Contracting Officers at all grade levels. In accordance with Section 1(g) of Executive Order 12352, clear lines of contracting authority and accountability must be established. The system will be used to establish and monitor the contracting workforce.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Identification of employees who have met standards of experience, education, and training for appointment as Contracting Officers and to analyze procurement system performance such as functional placement, system training needs, and workforce size. Information is available to personnel of the U.S. Information Agency as may be required for performance of official duties. Information on individuals will not normally be available outside the U.S. Information Agency as it falls within the excepted guidelines of the Freedom of Information Act.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

All information will be maintained in a paper hard copy file which will be automated as soon as possible.

RETRIEVABILITY:

Records are retrieved by name, office, series and grade.

SAFEGUARDS:

Files are kept in the Office of Contracts in bar lock cabinets and may be accessed only by the office staff. As soon as the file is automated, it will be password protected.

RETENTION AND DISPOSAL:

Files will be retained as long as the individual remains an employee of the U.S. Information Agency, and will be destroyed upon the employee's separation.

SYSTEM MANAGER(S) AND ADDRESS:

Director, Office of Contracts, U.S. Information Agency, 1717 H Street NW., Washington, D.C. 20547.

NOTIFICATION PROCEDURE:

Access to Information Officer (M/AGP), U.S. Information Agency, 301 Fourth Street SW., Washington, D.C. 20547.

RECORDS ACCESS PROCEDURES:

Requests from individuals should be addressed to Access to Information Officer (M/AGP), U.S. Information Agency, 301 Fourth Street SW., Washington, D.C. 20547.

CONTESTING RECORD PROCEDURES:

The U.S. Information Agency's rules for access and for contesting contents and appealing initial determinations by the individual concerned are published in Part 505, Title 22, United States Code of Federal Regulations.

RECORD SOURCE CATEGORY:

Information is provided by the individual concerned.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Dated: March 23, 1984.

Charles Z. Wick,

Director.

Sunshine Act Meetings

Federal Register
Vol. 49, No. 63
Friday, March 30, 1984

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONTENTS

	Item
Consumer Product Safety Commission	1
Equal Employment Opportunity Commission	2
International Trade Commission	3
Legal Services Corporation	4
Nuclear Regulatory Commission	5
Securities and Exchange Commission	6

1

CONSUMER PRODUCT SAFETY COMMISSION

TIME AND DATE: 10:00 a.m., Wednesday, April 4, 1984.

LOCATION: Third Floor Hearing Room, 1111-18th Street, NW., Washington, D.C.

STATUS: Open to the Public.

MATTERS TO BE CONSIDERED:

1. Squeeze Toys: Options

The staff will brief the Commission on options to address the choking hazards associated with squeeze toys and similar infant products.

2. Gas Heating Systems: Status

The staff will brief the Commission on the current status of this priority project.

3

FOIA Regulations: Proposed Amendment

The staff will brief the Commission on the proposed amendments to the regulations implementing the Freedom of Information Act, 16 CFR 1015.

For a recorded message containing the latest agenda information call, 301-492-5709.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sheldon D. Butts, Office of the Secretary, 5401 Westbard Avenue, Bethesda, Md. 20207 301-492-6800

Sheldon D. Butts,

Deputy Secretary.

March 28, 1984.

BILLING CODE 6355-01-M

2

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

DATE AND TIME: 9:30 a.m. (Eastern Time), Tuesday, April 3, 1984.

PLACE: Commission Conference Room No. 200-C on the 2nd Floor of the Columbia Plaza Office Building, 2401 "E" Street, NW., Washington, D.C. 20507.

STATUS: Part will be open to the public and part will be closed to the public.

MATTERS TO BE CONSIDERED:

1. Announcement of Notation Votes
2. A Report on Commission Operations (Optional)
3. Freedom of Information Act Appeal No. 83-1-FOIA-4-BI, concerning a request for information from a charge file.
4. Freedom of Information Act Appeal No. 84-02-FOIA-6-IN, concerning a request for information from a charge file.
5. Freedom of Information Act Appeal No. 84-2-FOIA-22-CL, concerning a request for documents from a closed ADEA charge file.
6. Freedom of Information Act Appeal No. 84-1-FOIA-2-NO, concerning a request for information from a closed Title VII charge file.
7. Proposed Annual Report—Coordination of Federal Equal Employment Opportunity Programs
8. Proposed Compliance Manual Section 612, Plant Relocation
9. Ten Proposed Compliance Manual sections of Volume I.
10. Proposed Amendments to Title VII Procedural Regulations

Closed

1. Litigation Authorization; General Counsel Recommendations
2. Consideration of Certain Subpoenas

Note.—Any matter not discussed or concluded may be carried over to a later meeting. (In addition to publishing notices on EEOC Commission Meetings in the **Federal Register**, the Commission also provides recorded announcements a full week in advance on future Commission sessions. Please telephone (202) 634-6748 at all times for information on these meetings.)

CONTACT PERSON FOR MORE INFORMATION: Treva McCall, Executive Secretary to the Commission at (202) 634-6748.

Dated: March 27, 1984.

Treva McCall,

Executive Secretary to the Commission.

INTERNATIONAL TRADE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENTS: 49 FR 11748 (3/27/84).

PREVIOUSLY ANNOUNCED TIMES AND DATES OF THE MEETINGS: Monday, April 2, 1984 and Thursday, April 5, 1984.

CHANGES IN THE MEETING: Cancellation of the meeting to be held on Monday, April 2, 1984, and addition of those agenda items to the meeting on Thursday, April 5, 1984, at 2:30 p.m., as follows:

4. Investigations 731-TA-134 and -135 [Final] (Color Television Receivers from the Republic of Korea and Taiwan)—briefing and vote.
5. Agenda.
6. Minutes.
7. Ratifications.
8. Any items left over from previous agenda.

In conformity with 19 CFR 201.37(b), Commissioners Eckes, Stern, Haggart, and Lodwick, determined by action jacket CO59-84-003, on March 26, 1984, that item No. 5 on the agenda for April 2, 1984, should be rescheduled to the meeting of April 5, 1984. By deliberations on March 27, 1984, the Commission voted to reschedule the items remaining on the April 2nd agenda to the meeting on April 5, 1984, determined that Commission business requires the changes to the agenda and affirmed that no earlier announcement of the changes was possible, and directed issuance of this notice at the earliest practicable time. Commissioner Rohr did not participate in the vote.

Kenneth R. Mason,

Secretary.

NUCLEAR REGULATORY COMMISSION

DATE: Tuesday, March 27, 1984 (Revised), Friday, March 30, 1984 (Revised), and Week of April 2, 1984.

PLACE: Commissioners' Conference Room, 1717 H Street, NW., Washington, D.C.

STATUS: Open and Closed.

MATTERS TO BE DISCUSSED:

Tuesday, March 27

10:00 a.m.
Briefing on Status of Utility and NRC Compliance with TMI Action Plan (Public Meeting) (As Announced)

2:00 p.m.
Briefing by Executive Branch (Closed—Ex. 1) (Replaces Discussion of the Terms "Important to Safety" and "Safety Related")

Friday, March 30

10:00 a.m.
Affirmation/Discussion and Vote (Public Meeting) (New Item) a. Earthquakes—Diablo Canyon (postponed from March 23)

2:00 p.m.
Discussion/Possible Vote on Full Power Operating License for WPPSS–2 (Public Meeting) (As Announced)

3:30 p.m.
Discussion of Letter to Mr. J. Miller (Ref: 2/28 Human Factors Meeting) (Public Meeting) (New Item)

Week of April 2

Tuesday, April 3

10:00 a.m.
Briefing on COBALT–60 Contamination of Mexican Steel (Public Meeting)

2:00 p.m.
Discussion and Possible Vote on QA Report to Congress and Status of QA Initiatives (Public Meeting)

Wednesday, April 4

10:00 a.m.
Discussion of Management-Organization and Internal Personnel Matters (Closed—Ex. 2 & 6)

2:00 p.m.
Briefing on PORVs in CE Plants (Public Meeting)

Thursday, April 5

10:00 a.m.
Briefing on Intergrated Safety Assessment Program (ISAP) (Public Meeting)

2:00 p.m.
Meeting with Advisory Committee on Reactor Safeguards (Public Meeting)

ADDITIONAL INFORMATION: Briefing on Public Comments on ANPR—Role of the Staff scheduled for March 22, *postponed.*

Part II

Department of Energy

41 CFR Ch. 109

Property Management Regulations; Proposed Rule

DEPARTMENT OF ENERGY

41 CFR Ch. 109

Property Management Regulations

AGENCY: Department of Energy.

ACTION: Proposed rule.

SUMMARY: The Department of Energy (DOE) proposes to amend the DOE Property Management Regulations (DOE/PMR) (41 CFR Chapter 109) which were published on January 3, 1979 (44 FR 986). The revisions are intended to update the regulations to reflect (i) organizational, policy, and procedural changes that have occurred subsequent to their issuance; (ii) amendments to the Federal Property Management Regulations (41 CFR Chapter 101); and (iii) the proposed issuance of the Federal Acquisition Regulations (FAR) and the Department of Energy Acquisition Regulations (DEAR) which will become effective April 1, 1984. Because of the extensive changes to the DOE-PRM, with the exception of Parts 109–35 and 109–40, they are printed in their entirety in this proposed amendment.

DATE: Comments must be submitted on or before April 30, 1984.

ADDRESS: Comments should be addressed to the Department of Energy, Property and Equipment Management Division, MA–422, Forrestal Building, Washington, D.C. 20585.

FOR FURTHER INFORMATION CONTACT:
John D. French, Director, Property and Equipment Management Division, Procurement and Assistance Management, Department of Energy, Washington, D.C. 20585, (202) 252–8255.
Elliot Winnick, Office of General Counsel, Department of Energy, Room 6B–190, Washington, D.C. 20585, (202) 252–1526.

SUPPLEMENTARY INFORMATION:

I. Legislative Background
II. Procedural Requirements
III. Public Comments

I. Legislative Background

Under Section 644 of the Department of Energy Organization Act (Pub. L. 95–91, 91 Stat. 565, 42 U.S.C. 7101 *et seq*) the Secretary of Energy is authorized to prescribe such procedural rules and regulations as may be deemed necessary or appropriate to accomplish the functions vested in him. The Department of Energy Property Management Regulations (DOE–PMR) were promulgated on January 3, 1979 (44 FR 986, 41 CFR Chapter 109).

Significant changes in the regulations being proposed by this amendment are: (1) Clarification of definitions of heads of field offices and of contractors (109–1.100–51); (92) description of the DOE–PMR (109–1.102–50); (3) description of delegated authority (109–1.5004); (4) clarification of the responsibilities of various Department officials (109–1.5005); (5) requirement for designation of property management officers (109–1.5005–2 and –5); (6) more detailed physical inventory requirements (109–1.5106–5); (7) revised listing of required reports (109–1.5148); (8) a new subpart on policy and responsibilities for contractor's personal property management programs (109–1.52); (9) requirement to report precious metals and lead to the DOE pool in lieu of reporting them to GSA (109–14.103–1.50); (10) requirement to utilize existing furniture and office machines (109–25.104); (11) inclusion of inventory management objectives (109–27.50); (12) revised definition of equipment held for future projects (109–27.5101); (13) requirement to maintain records of equipment held for future projects (109–27.5103); (14) a new subpart on policies, principles, and guidelines to be used in the management of precious metals (109–27.53); (15) requirement for control of GSA shopping plates (109–28.3); (16) requirement to purchase fuel efficient light trucks (109–38.1307); (17) a new subpart on policy and procedures for management of watercraft (109–38.53); (18) changes in the reporting of excess property for utilization within DOE (109–43.311–1.50); (19) establishment of the DOE lead bank (109–43.313–57); (20) policies for utilization and disposal of chemically contaminated property (109–45.50); and (21) deletion of the requirement for reclamation of wastepaper (109–42.50).

In addition to the foregoing significant changes, numerous other sections of the DOE–PMR are proposed to be revised or deleted for reasons of clarification, to reflect organizational changes, or because they are no longer deemed necessary.

II. Procedural Requirements

A. Review Under Executive Order 12291

Inasmuch as this proposed rule relates to agency management of personal property under the DOE procurement function, the OMB clearance procedures set forth in Executive Order 12291 (February 17, 1981) are not applicable.

B. Review Under the Regulatory Flexibility Act

This proposed rule was reviewed under the Regulatory Flexibility Act of 1980, Publ. L. 96–354, which requires preparation of a regulatory flexibility analysis for any rule which is likely to have significant economic impact on a substantial number of small entities. DOE has determined that this proposed rule will not have a significant economic impact on a substantial number of small entities and, therefore, no regulatory flexibility analysis has been prepared.

C. Review Under the Paperwork Reduction Act

The information collection and recordkeeping requirements that are imposed on the public by this proposed rulemaking have been cleared by the Office of Management and Budget (OMB) in accordance with section 3504(h) of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* OMB clearance number 1901–0261 has been assigned with an expiration date of March 31, 1984.

D. Public Hearing

The Department has concluded that this proposed rule does not involve a substantial issue of fact or law and that the proposed rule should not have a substantial impact on the Nation's economy of large numbers of individuals or businesses. Therefore, pursuant to Pub. L. 95–91, the DOE Organizational Act, the Department does not plan to hold a public hearing on this proposed rule.

III. Public Comments

Interested persons are invited to participate by submitting data, views or arguments with respect to the proposed DOE–PMR amendments set forth in this notice. All written comments received will be carefully assessed and fully considered prior to publication of the proposed amendment as a final regulation.

List of Subjects in 41 CFR Ch. 109

Government property, DOE property management regulations.

For the reasons set in the preamble, Chapter 109 of Title 41 of the Code of Federal Regulations, is proposed to be amended by revising Parts 109–1, 109–14, 109–25—109–28, 109–30, 109–36, 109–38, 109–39, 109–42—109–46, 109–48, 109–50, 109–51, and 109–60 as set forth below.

Issued in Washington, D.C. March 20, 1984.

Thomas J. Davin, Jr.,
Deputy Director, Procurement and Assistance, Management Directorate.

Sec.
109–1.000–50 Scope of part.

Subpart 109–1.1—Regulation System

109–1.100–50 Scope of subpart.
109–1.100–51 Definitions.
109–1.102–50 Department of Energy Property Management Regulations.
109–1.103–50 DOE–PMR Bulletins.
109–1.104–50 Publication and distribution of DOE–PMR.
109–1.104–1–50 Publication.
109–1.104–2–50 Distribution.
109–1.106–50 Applicability of Federal and Departmental regulatory issuances.
109–1.107–50 Consultation regarding DOE–PMR.
109–1.108 Agency implementation and supplementation of FPMR.
109–1.109–50 Numbering of DOE–PMR.
109–1.110–50 Deviation procedures.

Subpart 109–1.50—Personal Property Management Program

109–1.5000 Scope of subpart.
109–1.5001 Policy.
109–1.5002 Property management program objectives.
109–1.5003 Definitions.
109–1.5004 Delegation of authority.
109–1.5005 Responsibilities.
109–1.5005–1 The Director of Procurement and Assistance Management.
109–1.5005–2 The Departmental Property Management Officer.
109–1.5005–3 The Director of Administration.
109–1.5005–4 Director, Office of Procurement Operations, Procurement and Assistance Management.
109–1.5005–5 Heads of field offices.
109–1.5005–6 Organizational Property Management Officer.
109–1.5005–7 Contracting officers.

Subpart 109–1.51—Personal Property Management Standards and Practices

109–1.5100 Scope of subpart.
109–1.5101 Definition.
109–1.5102 Official use of property.
109–1.1503 Maximum use of property.
109–1.5104 Loan of property.
109–1.5105 Borrowing of property.
109–1.5106 Control of property.
109–1.5106–1 Identification marking of property.
109–1.5106–2 Segregation of property.
109–1.5106–3 Physical protection of property.
109–1.5106–4 Control of sensitive items.
109–1.5106–5 Physical inventories.
109–1.5107 Retirement of property.
109–1.5108 Property belonging to others.
109–1.5109 Employee participation.
109–1.5110 Use of non-Government-owned property.
109–1.5148 Personal property management reports.

Subpart 109–1.52—Contractors' Personal Property Management Program

109–1.5200 Scope of subpart.
109–1.5201 Policy.
109–1.5202 Designation of property administrator.
109–1.5203 Review and approval of contractor's property management system.
109–1.5204 Property management appraisals.
109–1.5205 Reporting.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109–1.000–50 Scope of part.

This part establishes a system by which the Department of Energy (DOE) implements and supplements the Federal Property Management Regulations (FPMR) (41 CFR Chapter 101) issued by the General Services Administration (GSA).

Subpart 109–1.1—Regulation System

§ 109–1.000–50 Scope of subpart.

This subpart established the Department of Energy Property Management Regulations (DOE–PMR), Chapter 109 of the Federal Property Management Regulations System (FPMR), (41 CFR Chapter 109).

§ 109–1.000–51 Definitions.

As used in this chapter for following definitions apply:

(a) "Heads of field offices" are the heads of any Departmental office located outside the Washington, D.C. metropolitan area. In addition, the Federal Energy Regulatory Commission, Headquarters, shall be considered a field office for purposes of these regulations. See § 109–1.5005–4 concerning the responsibilities of the Director, Office of Procurement Operations, Procurement and Assistance Management Directorate, Headquarters.

(b) "Direct operations" means operations conducted by DOE personnel.

(c) "Contractor" means a management and operating contractor, as that term is defined in the Federal Acquisition Regulation (FAR) 48 CFR 17.601 as supplemented by the Department of Energy Acquisition Regulations (DEAR) 48 CFR 917.604–70, and such other contractors as may be designated by the Procurement Executive or head of the contracting activity as subject to the provisions of this chapter.

§ 109–1.102–50 Department of Energy Property Management Regulations.

The DOE–PMR, established in this part, implement and supplement the FPMR provisions governing the acquisition, utilization, management, and disposal of personal property. The DOE–PMR are issued to establish uniform property management policies and, as necessary, procedures for the Department of Energy. (See 109–1.106–50(d) and (e) with respect to management of property in the possession of other DOE contractors and financial assistance recipients).

§ 109–1.103–50 DOE–PMR Bulletins.

A DOE–PMR Bulletin will be used to disseminate information not affecting policy or to clarify instructions in actions required by the FPMR or the DOE–PMR.

§ 109–1.104–50 Publication and distribution of DOE–PMR.

§ 109–1.104–1–50 Publication.

The DOE–PMR will be published in the **Federal Register** and will appear in the Code of Federal Regulations as Chapter 109 of Title 41, Public Contracts and Property Management. Looseleaf publications will be distributed to DOE offices.

§ 109–1.104–2–50 Distribution.

The responsibilities and authorities for distribution of publications in the FPMR series are as follows:

(a) The Director of Procurement and Assistance Management—

(1) Designates an official to serve as liaison with GSA;

(2) Establishes and maintains distribution patterns; and

(3) Processes DOE–PMR Handbooks for final approval and publication.

(b) The Director of Administration—

(1) Distributes publications in accordance with established patterns;

(2) Maintains a stock of FPMR and DOE–PMR publications for furnishing additional copies; and

(3) Provides additional support services as required.

(c) Heads of field offices—

(1) Provide the Director of Procurement and Assistance Management with field organization requirements;

(2) Forward one-time requests for additional copies of centrally distributed publications to the Office of Administrative Services, Headquarters (MA–234.2); and

(3) Distribute publications to their offices and contractors in accordance with established distribution patterns.

§ 109–1.106–50 Applicability of Federal and Departmental regulatory issuances.

(a) The FPMR and this DOE–PMR apply to all direct operations.

(b) Unless otherwise provided in the appropriate part or subpart, contracting officers shall assure that the FPMR and DOE–PMR are applied to contractors.

(c) The FPMR and DOE–PMR, as appropriate, shall be used by contracting officers in the administration of contracts, and in the review, approval, or appraisal of such contractor operations.

(d) Regulations for the management of Government property in the possession of other DOE contractors are contained in the Federal Acquisition Regulations, Part 45 (48 CFR Chapter 1) and in the DOE Acquisition Regulations, Part 945 (48 CFR Chapter 9).

(e) Regulations for the management of property held by financial assistance recipients are contained in the DOE Financial Assistance Rules (10 CFR Part 600) and the Financial Assistance Procedures Manual, DOE Order 4600.1.

§ 109–1.107–50 Consultation regarding DOE–PMR.

The DOE–PMR shall be fully coordinated with all Departmental elements substantively concerned with the subject matter.

§ 109–1.108 Agency implementation and supplementation of FPMR.

(a) The DOE–PMR shall include regulations deemed necessary to understand basic and significant Departmental property management policies and procedures which implement, supplement, or deviate from the FPMR. In the absence of any DOE–PMR issuance, the basis FPMR material shall govern.

(b) The DOE–PMR shall be consistent with the policies and procedures contained in the FPMR and shall not duplicate or paraphrase the FPMR material.

(c) Implementing procedures, instructions, and guides which are necessary to clarify or to implement the DOE–PMR may be issued by Headquarters or field organizations provided that the implementing procedures, instructions and guides—

(1) Are consistent with the policies and procedures contained in this regulation as implemented and supplemented from time to time;

(2) To the extent practicable, follow the format, arrangement, and numbering system of this regulation; and

(3) Contain no material which duplicates, paraphrases, or is inconsistent with the contents of this regulation.

§ 109–1.109–50 Numbering of DOE–PMR.

(a) Where the DOE–PMR implement the FPMR, the implementing part, subpart, section or subsection of the DOE–PMR will be numbered and captioned, to the extent possible, to correspond to the applicable part, subpart, section, or subsection of the FPMR.

(b) Where the DOE–PMR supplement the FPMR, the numbers 50 and up will be assigned to the parts, subparts, sections or subsections involved.

§ 109–1.110–50 Deviation procedures.

(a) Requests for deviations from the FPMR and the DOE–PMR shall be forwarded to the Headquarters organization having functional responsibility, as follows:

(1) Part 109–35—Director, Division of Telecommunications.

(2) Part 109–40—Assistant secretary for Defense Programs.

(3) All other parts—Director of Procurement and Assistance Management.

(b) In individual cases, deviations from the FPMR and DOE–PMR may be authorized by the Headquarters organization having functional responsibility. A supporting statement for each individual deviation, which indicates briefly the nature of the deviation, the reasons for such special action, and the Headquarters approval, shall be maintained by the Headquarters organization concerned.

(c) In classes of cases, requests for deviations from the FPMR and the DOE–PMR shall be accompanied by a supporting statement. Requests shall be considered on an expedited basis and coordination with Headquarters organizations will be obtained as appropriate. Requests involving the FPMR will be considered jointly by DOE and GSA, unless, in the judgment of the Headquarters organization having functional responsibility, circumstances preclude such joint effort. In such cases, the organization having functional responsibility will approve such class deviations as determined to be necessary and notify GSA.

Subpart 109–1.50—Personal Property Management Program

§ 109–1.5000 Scope of subpart.

This subpart supplements the FPMR, states DOE personal property management policy and program objectives, and prescribes authorities and responsibilities for the conduct of an effective property management program in DOE.

§ 109–1.5001 Policy.

It is DOE policy that a program for the management of Government personal property (sometimes referred to as personal property or as property) shall be established and maintained to meet program needs economically and efficiently and in accordance with applicable Federal statutes and Federal agency regulations.

§ 109–1.5002 Property management program objectives.

The objectives of the DOE property management program are to provide—

(a) A system for effectively managing Government personal property in the custody or possession of DOE organizations and DOE contractors; and

(b) Uniform principles, policies, standards, and procedures for economical and efficient management of Government personal property that are sufficiently broad in scope and flexible

in nature to facilitate adaptation to local needs and various kinds of operations.

§ 109–1.5003 Definitions.

As used in these regulations, the following definitions apply:

(a) "Government personal property" means property of any kind or type which is Government-owned or -rented or -leased from commercial sources in the custody of DOE or its contractors except real property; records; special source materials, which includes source materials and special nuclear material, and those other materials to which the provisions of DOE Order 5630.2 "Control and Accountability of Nuclear Materials, Basic Principles" apply, such as deuterium, enriched lithium, neptunium 237 and tritium, and atomic weapons and byproduct materials as defined in Section II of the Atomic Energy Act of 1954, as amended; enriched uranium in stockpile storage; and petroleum in the Strategic Petroleum Reserve and the Naval Petroleum Reserves.

(b) "Personal property management" means the development, implementation, and administration of policies, programs and procedures for effective and economical acquisition, receipt, storage, issue, use, control, physical protection, care and maintenance, determination of requirements and maintenance of related operating records, and disposal, as appropriate, for Government personal property exclusive of the accounting records.

§ 109–1.5004 Delegation of authority.

(a) The Secretary of Energy has delegated to the Assistant Secretary, Management and Administration, on a non-exclusive basis, the authority to acquire, manage, and dispose of personal property held by the Department for official use by its employees or contractors.

(b) The Assistant Secretary, Management and Administration has delegated to the Director, Procurement and Assistance Management, the authority to acquire, manage, and dispose of personal property held by the Department for official use by its employees or contractors.

(c) The Director of Administration and Heads of field offices are delegated appropriate procurement authority by memorandum from the Director, Procurement and Assistance Management, to acquire, manage, and dispose of personal property held by the Department for official use by its employees or contractors, consistent with policies, standards, and procedures as contained in this regulation.

§ 109–1.5005 Responsibilities.

§ 109–1.5005–1 The Director of Procurement and Assistance Management.

The Director of Procurement and Assistance Management provides direction and general supervision in the development and administration of an effective and efficient personal property management system for the Department, to include:

(a) The establishment of Department-wide policies, standards, systems, regulations, and procedures in accordance with applicable laws and regulations and sound management practice; and

(b) The review, evaluation, and improvement of personal property management programs, functions, operations, and procedures in the Department.

§ 109–1.5005–2 The Departmental Property Management Officer.

The Departmental Property Management Officer shall be the Director, Property and Equipment Management Division, Headquarters. This individual is responsible for developing, promoting, monitoring, administering, coordinating, and evaluating the Department-wide personal property management program, and shall—

(a) Develop and maintain Departmental personal property policies, standards and procedures;

(b) Develop and publish Departmental regulations relating to personal property management;

(c) Represent the Department with GSA and other agencies on matters relating to personal property management;

(d) Submit Departmental personal property management reports to GSA, the Congress and other Federal agencies, as required;

(e) Provide staff assistance to Departmental organizations performing personal property management functions;

(f) Conduct review and appraisals of Departmental personal property management functions; and

(g) Prepare the Departmental aircraft and motor vehicle budget.

§ 109–1.5005–3 The Director of Administration.

The Director of Administration—

(a) Manages personal property for DOE direct operations located in the Washington, D.C. metropolitan area with the exception of the Federal Energy Regulatory Commission.

(b) Exercises responsibilities cited in § 109–1.5005–5 as they relate to functions under his/her management control; and

(c) Appoints an Organizational Property Management Officer to be responsible for his/here organization's personal property management program.

§ 109–1.5005–4 Director, Office of Procurement Operations, Procurement and Assistance Management.

The Director, Office of Procurement Operations, Procurement and Assistance Management Directorate, Headquarters, shall exercise the responsibilities of the head of a field office as set forth in these regulations with respect to the management of property held under contracts for which his/her office is responsible.

§ 109–1.5005–5 Heads of field offices.

Heads of field offices shall—

(a) Appoint an Organizational Property Management Officer who shall be responsible for the organization's personal property management program; and

(b) Establish and administer a personal property management program within the organization which will provide for—

(1) Effective management of Government personal property in the custody of DOE and its contractors, consistent with applicable laws and regulations;

(2) Application of personal property management regulations, instructions, standards, procedures, and practices as prescribed in the FPMR and DOE–PMR;

(3) Planning and scheduling of property requirements to assure that supplies and equipment are readily available to satisfy program needs while minimizing operating costs and inventory levels;

(4) Development and maintenance of complete and accurate inventory control and accountability record systems;

(5) Maximum utilization of available property for official purposes;

(6) Proper care and securing of property to include storage, handling, preservation, and preventative maintenance;

(7) Identification of property excess to the needs of the organization, and proper reutilization of this property within the Department and reporting to GSA for transfer, donation, or disposal;

(8) The development and submission of required property management reports;

(9) Assuring that DOE employees and contractors are aware that acts of theft, illegal possession, and unlawful destruction or use of Government personal property are violations

punishable under Fedral law, notwithstanding disciplinary measures taken under administrative policy;

(10) Assuring that DOE employees and contractors are aware that every user of Government personal property is responsible for its physical protection and for reporting the loss, theft, destruction or damage of property;

(11) The conducting of periodic management reviews within the activity to assure compliance with prescribed policies, regulations, standards, and procedures; and

(12) The establishment of equipment and supply subsidiary reccords and accounts to support general ledger control accounts for personal property.

§ 109–1.5005–6 Organizational Property Management Officer.

The Organizational Property Management Officer (OPMO)—

(a) Provides advice and guidance for the organization's personal property mangement program;

(b) Coordinates and conducts the activities of the organization's personal property management program;

(c) Serves as principal contact point for the organization in matters concerning personal property management; and

(d) Represents the organization, or designates a representative, to attend Department meetings concerning personal property management issues, and acts as liaison with other DOE offices or other Federal agencies in property management matters affecting their organization.

§ 109–1.5005–7 Contracting officers.

Contracting officers shall—

(a) Assure that all contracts that involve property contain the applicable DEAR property clause; and

(b) Assure that contractors' personal property management systems are reviewed, appraised, and approved as provided for in § 109–1.52.

Subpart 109–1.51—Personal Property Management Standards and Practices

§ 109–1.5100 Scope of subpart.

This subpart provides guidance on DOE standards and practices to be applied in the management of Government personal property.

§ 109–1.5101 Definition.

"Sensitive items" are those items of property, regardless of value, which are considered to be susceptible to being appropriated for personal use or which can be readily converted to cash, for example: firearms, portable photographic equipment, binoculars, portable tape recorders, portable calculators, and portable power tools.

§ 109–1.5102 Official use of property.

Property shall be used only in the performance of official work of the United States Government, except (a) in emergencies threatening loss of life or property, or (b) as otherwise authorized by law and approved by the Director of Administration and heads of field offices for their respective organizations, or by the contracting officer for contractor-held property.

§ 109–1.5103 Maximum use of property.

Property management practices shall assure that the best possible use is made of property. Supplies and equipment shall be generally limited to those items essential for carrying out the programs of DOE effectively. Adequate staff review shall be made of operating programs to coordinate and plan future supply activities and to assure against overstocking, waste, and improper use of property.

§ 109–1.5104 Loan of property.

(a) Property which would otherwise be out of service for temporary periods (and not excess) may be loaned to other DOE offices and contractors, other Federal agencies, and to others for official purposes. Such loans shall be covered by written agreements or memorandum receipts which shall include all terms of the loan (such as loan period, delivery time, method of payment of transportation, point of delivery and return, conditions of use, responsibilities of the borrower for condition of property on return, inspection requirements, etc.) that may be required to ensure proper control and protect DOE's interest. The loan period should not exceed one year, but may be renewed.

(b) Requests for loan by foreign Governments and other foreign organizations shall be submitted through the Property and Equipment Management Division (MA–422) to the Assistant Secretary for International Affairs for approval, with a copy to the cognizant Headquarters program office.

§ 109–1.5105 Borrowing of property.

(a) DOE organizations and contractors are encouraged to borrow property within DOE to further DOE programs. Property classified as "Equipment Held For Future Projects (EHFFP)" or as "In Standby" should be reviewed by those receiving availability inquiries for short-term loans (one year or less). Borrowing of Government property from other Federal agencies is also encouraged when required for short periods of time. Such transactions shall be covered by written agreements which include all the terms of the transaction.

(b) In determining whether it is practical and economical to borrow property, consideration shall be given to suitability, condition, value, extent and nature of use, extent of availability, portability, cost of transportation, and other similar factors.

§ 109–1.5106 Control of property.

§ 109–1.5106–1 Identification marking of property.

(a) All Government property, including capitalized, sensitive, and non-capital equipment shall be identified as U.S. Government property. Capitalized and sensitive property shall also be identified by numbering for control purposes. Other property susceptible to unauthorized personal use, such as hand tools, should be considered for marking as a control measure. Marking may be accompanied by any means which will produce a permanent marking and which is most adaptable to the particular item of property.

(b) To the extent practicable and economical, markings shall be removed prior to disposal outside of DOE, or additional markings may be added to indicate such disposal.

(c) Property which by its nature cannot be marked is exempted from this requirement. Such Government property in the custody of contractors should not be commingled with contractor-owned property unless it is determined by the contracting officer to be advantageous to the Government.

§ 109–1.5106–2 Segregation of property.

Ordinarily, provisions shall be made for the contractor to keep Government property segregated from contractor-owned property. Commingling of Government-owned and contractor-owned property may be allowed only when—

(a) The segregation of the property would materially hinder the progress of the work, i.e., segregation is not feasible for reasons such as small quantities, lack of space, or increased costs; and

(b) Control procedures are adequate, i.e., the Government property is specifically marked or otherwise identified as being Government property.

§ 109–1.5106–3 Physical protection of property.

Controls such as property pass systems, memorandum records, regular or intermittent gate checks, marking of tools, and perimeter fencing shall be

established as required to prevent loss, theft, or unauthorized movement of property from the premises on which such property is located.

§ 109–1.5106–4 Control of sensitive items.

(a) Controls shall be established over the acquisition, storage, issue use, and return of sensitive items of property.

(b) Items on capital equipment which are also designated as sensitive items will be controlled as sensitive items and as capital equipment.

(c) A list of sensitive items shall be maintained for property considered to require special controls before and after issue. Determination of specific sensitive items shall be a matter for management judgment at individual locations, taking into consideration the dollar value of the items to be controlled and costs of administration.

(d) Written procedures shall be established for control of sensitive items, to include:

(1) Approval of purchase requisitions or issue documents at an appropriate supervisory level prior to acquisition or issue;

(2) Establishment of administrative controls in the central receiving and warehousing department. Such controls should include extraordinary physical protection, guidance for receiving and warehousing personnel as to procedures for protection, and a current listing of sensitive items;

(3) Establishment and maintenance of appropriate property management records;

(4) Requirements for tagging and identification;

(5) Use of memorandum receipts or custody documents at time of assignment or change in custody;

(6) Establishment of custodial responsibilities describing—

(i) Need for extraordinary physical protection;

(ii) Requirement for prompt reporting of apparent loss, damage or destruction;

(iii) Requirement to return items in condition beyond economical repair to an appropriate organizational element;

(iv) Requirement for promptly reporting changes in custody or extended loans;

(v) Reminder of prohibition of use for other than official purposes, and penalties for misuse;

(vi) Requirement for effective physical and administrative control of sensitive items assigned for general use within an organizational unit as appropriate to the type of property and the circumstances; and

(vii) A clear definition of the extent of responsibility or financial accountability, depending on contractor policy.

(7) Requirement for annual physical inventory;

(8) Requirement for prompt and thorough investigation of losses;

(9) Requirement for an employee transfer or termination checkout procedure and examination and adjustment of records; and

(10) Other property management procedures which, through experience and independent audit, have demonstrated effective physical and administrative control over sensitive items.

§ 109–1.5106–5 Physical inventories.

(a) Physical inventories of property shall be conducted at all DOE and contractor locations, consistent with approved procedures and generally accepted accounting procedures.

(b) The preferred method of performing physical inventories is by the use of personnel other than the property staff or custodian of the property. Where staffing restraints or other considerations require, the inventory may be performed by the property staff or the custodian.

(c) Detailed procedures for the taking of physical inventories shall be developed for each DOE organization and contractor. The Director of Administration and heads of field offices shall approve the procedures for their respective DOE operation. The appropriate field organization staff shall review and approve contractor's procedures.

(d) The taking of a physical inventory will be observed, or follow-on audits made, by independent representatives, e.g., finance, audit, or property staffs, to the extent deemed necessary to assure that the procedures are being followed and the results are accurate. These observations or audits should be documented and the documentation should be retained in the inventory record file.

(e) Procedures that are limited to a check-off of a listing of recorded property without actual verification of the location and existence of such property do not meet the requirements of a physical inventory.

(f) The frequency of physical inventories shall be as follows:

(1) *Moveable capital equipment*—not less frequently than every two years.

(2) *Sensitive items*—not less frequently than every twelve months.

(3) *Precious metals*—not less frequently than every six months.

(g) A physical inventory shall be performed at intervals more frequently than required in § 109–1.5106–5(f) whenever experience at any given location or with any given item or items indicates that this action is necessary for effective property accounting, utilization, or control.

(h) Special inventories may be required on certain types of property or on certain items or kinds of items when circumstances arise requiring such action, such as audits or special reviews.

(i) The results of physical inventories shall be reconciled with the property records and, except for non-capital sensitive items, with the financial control accounts in accordance with Chapter VI of the DOE Accounting Practices and Procedures Handbook.

(j) Physical inventories of capital equipment and stores inventories may be conducted by the "statistical sampling" method in lieu of the normal "wall-to-wall" method. In addition, the "inventory by exception" method may be used for capital equipment physical inventories. However, the system and procedures for taking physical inventories by these methods must be fully documented and approved by the Director of Administration and by heads of field offices for their respective organizations.

§ 109–1.5107 Retirement of property.

When Government property is worn out, lost, stolen, destroyed, abandoned, or damaged beyond economical repair, it shall be listed on a retirement work order. A full explanation shall be supported by an investigation, if necessary, as to the date and circumstances surrounding loss, theft, destruction, abandonment, or damage. The retirement work order shall be reviewed by the property management staff and signed by the responsible official initiating the report and reviewed and approved by an official at least one supervisory echelon above the official initiating the report.

§ 109–1.5108 Property belonging to others.

Procedures shall be established which will provide for adequate attention to the management of property belonging to other Federal agencies in the possession or custody of DOE organizations or its contractors.

§ 109–1.5109 Employee participation.

Full advantage shall be taken of suitable methods for stimulating employee participation and cooperation in carrying out an effective and economical program of property management. Some examples of effective methods are (a) indoctrination

of new employees and others who have access to or use property, (b) the use of incentive award plans to promote interest, and (c) the use of visual aids such as posters, plant publications, outdoor signboards, and displays to keep employees informed as to progress and to remind them of their responsibilities.

§ 109–1.5110 Use of non-Government-owned property.

Non-Government-owned personal property shall not be installed in, affixed to, or otherwise made a part thereof, of any Government-owned personal or real property. This restriction does not apply to the use and installation of privately owned decorative items or memorabilia to the workplace, provided that the structure of safety of the facility is not thereby degraded.

§ 109–1.5148 Personal property management reports.

Property management reports to be submitted to the Property and Equipment Management Division (MA–422) are listed below.

Report title.	Due at DOE Headquarters	Reference	Form No.
(a) Reports required of all offices.			
(1) Utilization and Disposal of Personal Property Pursuant to Exchange/Sale Authority.	Nov. 30	FPMR 101–46.407, DOE–PMR 109–46.407.	Letter.
(2) Excess Personal Property Furnished to Non-Federal Recipients.	Nov. 15	FPMR 101–43.4701(c), DOE–PMR 109–43.4701(c).	Letter.
(3) Contractor Property Holdings	Oct. 31	DOE–PMR 109–1.5205	Letter.
(4) Precious Metals	Oct. 31	FPMR 101–42.301–1, DOE–PMR 109–42.301–1.	Letter.
(5) Agency Report of Motor Vehicle Data.	Oct. 31	FPMR 101–38.1, DOE–PMR 109–38.1	SF 82.
(6) Unused Passenger Vehicle Replacement Authorizations.	June 15	DOE–PMR 109–38.5101–5(b)	Letter.
(7) Report of Exempted Motor Vehicles.	On request	FPMR 101–38.607, DOE–PMR 109–38.607.	Letter.
(8) Annual Forecast for Acquisition of Fuel Efficient Passenger Automobiles.	Dec. 1	Executive Order 12375, DOE–PMR 109–38.1306.	Letter.
(9) Aircraft Cost and Operations	Dec. 31	DOE–PMR 109–38.5212(a)	DOE F 4450.1.
(b) Reports required from field offices not reporting through the DOE Financial Information System.			
(1) Utilization and Disposal of Excess and Surplus Personal Property.	Nov. 15	FPMR 101–43.4701(a), DOE–PMR 109–43.4701(a).	SF 121.
(2) Summary of Excess Property Received from Other Agencies.		DOE Order 2200, Chapter XI	CR 85–4.
(3) Supply Activity Report	Nov. 15	DOE–PMR 109–25.48	GSA F 1473.
(4) Direct Labor Costs of Stores Warehousing Activities.	Nov. 15	DOE Order 2200, Chapter XI	CR 85–7.
(5) Completed Plant and Equipment	Oct. 31	DOE Order 2200, Chapter XI	CR 84–32.
(6) Equipment Held for Future Projects	Oct. 31	DOE Order 2200, Chapter XI	CR 57.

Subpart 109–1.52—Contractors' Personal Property Management Program

§ 109–1.5200 Scope of subpart.

This subpart prescribes policy and responsibilities for the establishment, maintenance, review and appraisal of a contractor's program and system for the management of Government personal property.

§ 109–1.5201 Policy.

(a) Contractors shall establish, maintain, and administer a program for the effective management of Government personal property consistent with the terms of the contract and directives for the contracting officer.

(b) Contractors shall maintain their personal property management systems in writing on a current basis.

(c) Contractors shall require those subcontractors provided Government property under the prime contract to establish and maintain a system for the management of such property. Procedures for assuring effective property management shall be included in the contractor's property control system. As a minimum, a subcontractor's system for control of Government property shall provide for the following:

(1) Adequate records.

(2) Controls over acquisitions.

(3) Identification as Government property.

(4) Physical inventories.

(5) Proper care, maintenance, and protection.

(6) Reporting, redistribution, and disposal of excess and surplus property.

(7) A retirement work order procedure to account for property that is worn out, lost, stolen, destroyed, abandoned, or damaged beyond economical repair.

(8) Periodic reporting, including physical inventory results and, at least annually, the total acquisition cost of Government property in the possession of the subcontractor.

(9) An internal surveillance system including periodic reviews to ensure that property is being managed in accordance with established procedures.

§ 109–1.5202 Designation of property administrator.

The contracting officer shall designate a property administrator to be responsible for property administration. This property administrator will be delegated the authority to assist the contracting officer on all matters involving the Government-owned personal property held by the contractor. If a property administrator has not been designated, the contracting officer is the property administrator.

§ 109–1.5203 Review and approval of contractor's property management system.

(a) A contractor's property management system should be reviewed by the property administrator within one year after the execution date of the contract, and the property administrator shall approve or disapprove the system in writing. If the system is disapproved, the property administrator shall advise the contractor, in writing, of deficiencies that need to be corrected, and a time schedule established for completion of the corrective actions.

(b) The purpose of the review is to determine whether the system will adequately protect, maintain, utilize, and dispose of Government personal property in accordance with the FPMR, the DOE–PMR, and applicable DOE directives.

(c) Appropriate follow-up will be made by the property administrator to ensure that corrective actions are taken.

(d) Any change to the approved property management system made after the original review and approval should be reviewed by the property administrator at the earliest possible time. Such changes should then be approved/disapproved by the property administrator as appropriate.

§ 109–1.5204 Property management appraisals.

(a) At least every two years (with a maximum period of three years) after the execution date of the contract, the property administrator shall make an appraisal of the property management operation of the contractor. The appraisal may be based on a formal in-depth appraisal on-site or a series of formal appraisals of the functional segments of the contractor's property management system to determine if the contractor is managing the Government personal property in its custody in accordance with its previously approved

policies and procedures, the FPMR, the DOE–PMR, and applicable DOE directives. The property administrator shall bring deficiencies in the contractor's property management operation to the attention of the contractor's management for correction.

(b) Appropriate follow-up will be made by the property administrator to ensure that corrective actions are taken.

§ 109–1.5205 Reporting.

Within 30 days after the end of each fiscal year, heads of field offices shall report the following information to the Director, Property and Equipment Management Division (MN–422):

(a) Name and address of each contractor.

(b) Contract number.

(c) Date contractor's property management system was approved.

(d) Date of most current appraisal of contractor's property management system, and status of the system (satisfactory or unsatisfactory).

SUBCHAPTER C—DEFENSE MATERIALS

PART 109–14—NATIONAL DEFENSE STOCKPILE

Sec.

109–14.000 Scope of part.

Subpart 109–14.1—Transfer of Strategic and Critical Materials Excess to Agency Needs to the National Defense Stockpile

109–14.103–1–50 Exceptions to reporting.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109–14.000 Scope of part.

This part implements and supplements FPMR Part 101–14, National Defense Stockpile.

Subpart 109–14.1—Transfer of Strategic and Critical Materials Excess to Agency Needs to the National Defense Stockpile

§ 109–14.103–1–50 Exceptions to reporting.

The following materials excess to the needs of a DOE organization or contractor shall be reported to the DOE pool instead of to GSA:

(a) Precious metals, which include gold, silver, and the platinum family (See § 109–43.313–54).

(b) Lead (See § 109–43.313–57).

SUBCHAPTER E—SUPPLY AND PROCUREMENT

PART 109–25—GENERAL

Sec.

109–25.000–50 Scope of subchapter.
109–25.001–50 Scope of part.

Subpart 109–25.1—General Policies

109–25.100 Use of Government personal property and nonpersonal services.
109–25.101–1–50 Definitions.
109–25.104 Acquisition of office furniture and office machines.
109–25.109 Laboratory and research equipment.
109–25.109–1 Identification of idle equipment.
109–25.109–2 Equipment pools.
109–25.110–4 Recordkeeping responsibilities.
109–25.113 Leasing of motor vehicles.

Subpart 109–25.3—Use Standards

109–25.302 Office furniture, furnishings and equipment.
109–25.302–1 Executive type office furniture and furnishings.
109–25.302–2–50 Filing cabinets and equipment.
109–25.302–3 Electric typewriters.
109–25.302–4 Figuring machines.
109–25.302–6 Electronic office machines.
109–25.304 Additional systems and equipment for passenger motor vehicles.
109–25.304–50 Communications equipment exemption.
109–25.350 Use of furnishings and household goods in Government personnel quarters.
109–25.351 Furnishing of Government clothing and individual equipment to employees.

Subpart 109–25.4—Replacement Standards

109–25.401–50 Replacement approvals.

Subpart 109–25.48—Reports

109–25.4800 Scope of subpart.
109–25.4800–50 Applicability.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109–25.000–50 Scope of subchapter.

This subchapter implements and supplements FPMR Subchapter E, Supply and Procurement.

§ 109–25.001–50 Scope of part.

This part implements and supplements FPMR Part 101–25, General, and provides cross-references to the DOE Acquisition Regulations (DEAR) where appropriate.

Subpart 109–25.1—General Policies

§ 109–25.100 Use of Government personal property and nonpersonal services.

The Director of Administration and heads of field offices for their respective organizations shall ensure that the provisions of FPMR 101–25.100 are enforced to restrict the use of Government property/services to officially designated activities.

§ 109–25.101–1–50 Definitions.

As used in this subpart, the following definitions apply:

(a) "Equipment" consists of those items of nonexpendable personal property having an anticipated service life of one year or more regardless of use or source of funding.

(b) "Equipment pool" is a formally designated collection of equipment, generally functionally associated, which is available for loan or temporary use. The pool may be a physical collection of equipment or may be a record system which provides identification, location and availability information on equipment available for loan or temporary use.

(c) "Equipment in storage" is all equipment not in use, whether stored in formal storage areas, stored in or adjacent to work areas, held for future projects, or retained in standby or abandoned facilities.

§ 109–25.104 Acquisition of office furniture and office machines.

In making a determination as to whether requirements can be met through the utilization of already owned furniture and office machines as contemplated in FPMR § 101–25.104, reasonable efforts shall be made to determine whether such items are available from other DOE organizations and contractors within a reasonable transport distance. Such efforts shall include direct inquiries and shall not be limited to a review of available property circularized in accordance with § 109–43.311–1–50.

§ 109–25.109 Laboratory and research equipment.

(a) The provisions of FPMR 101–25.109 and this section shall apply to all types of personal property, including office furniture and office machines, in addition to laboratory and research equipment.

(b) The provisions of FPMR 101–25.109 and this section apply to all DOE field organizations and contractors, and are not limited to Federal laboratories.

§ 109–25.109–1 Identification of idle equipment.

(a) See § 109–25.109(b).

(b) As a minimum, management walk-through inspections shall be scheduled to provide for coverage of all operating and storage areas at least once every two years to identify idle and unneeded personal property. The frequency of management walk-through inspections may vary with the operation or area involved. A report of walk-throughs conducted, including participants, areas covered, findings, recommendations, and results achieved shall be submitted to the head of the laboratory or other facility involved. Equipment identified as idle and unneeded shall be redeployed, reassigned, placed in

equipment pools or declared excess, as appropriate.

(c) In accordance with FPMR § 101–25.109–1(c), members of management walk-through inspection teams should be appointed by the head of the DOE or contractor facility.

(d) Heads of field offices and contracting officers shall periodically review walk-through procedures and practices of organizations under their jurisdiction to evaluate their effectiveness. This review should include actual walk-through inspections of representative DOE or contractor facilities.

§ 109–25.109–2 Equipment pools.

(b) In accordance with FPMR § 101–25.109–2(b), equipment pools shall be established where practicable to obtain optimum utilization of equipment. The number and types of pools to be established will depend upon local circumstances. In addition to those provided in FPMR § 101–25.109–2, factors to be considered are types of equipment, number and location of potential users and distances involved.

(c) In accordance with FPMR § 101–25.109–2(c), surveys of equipment holdings should be conducted periodically to determine those items which are suitable for pooling. Criteria for placing an item in a pool should include (but not be limited to) the following: The item is suitable for use by more than one individual or group; its use is intermittent rather than full time; it has a degree of portability; and it has sufficient cost or value to merit controlling. It is anticipated that items pooled would vary from one activity to another due to local conditions, and each activity should develop its own criteria for items to be pooled. Items to be considered for pooling include (but are not limited to) certain types of measuring and recording equipment, pumps, electric motors, photographic equipment, portable tools, microscopes, portable radios, power supplies, amplifiers, business machines, radiation detection instruments, and construction and automotive equipment. Where feasible, equipment pools should be combined with existing calibration and maintenance services to foster use and control of pooled equipment.

(d) Records of usage shall be maintained to permit the evaluation of need for quantities and types of equipment in pools. Reviews of usage should be conducted periodically (at least annually) to eliminate items which are no longer required. Heads of field offices shall require DOE and contractor facilities to submit to them annually the report on the use and effectiveness of equipment pooling required by FPMR § 101–25.109–2(d).

(e) Heads of field offices and contracting officers shall require periodic independent reviews of equipment pool operations as required by FPMR § 101–25.109–2(e).

§ 109–25.110–4 Recordkeeping responsibilities.

In accordance with FPMR 101–25.110–4, heads of field offices shall establish procedures for promptly identifying and locating all tires whether in storage or in use on vehicles so that tire recall notices may be acted upon expeditiously.

§ 109–25.113 Leasing of motor vehicles.

See DEAR 908.11 and FPMR §§ 101–26.501–9 and 101–39.601 for additional guidance concerning the leasing of motor vehicles.

Subpart 109–25.3—Use Standards

§ 109–25.302 Office furniture, furnishings, and equipment.

(a) The criteria contemplated in FPMR § 101–25.302 shall be established by the Director of Administration and heads of field offices for their respective DOE operations, consistent with FPMR § 101–25.302–1 and this subpart. Office furniture, furnishings, and equipment shall be limited to that required for immediate needs, considering such factors as ordering lead time, potential emergency needs and economical ordering quantities. Requirements shall be met to the fullest extent practicable and economical from available excess or by rehabilitation or repair.

(d) Contractors should be encouraged to limit executive-type furniture and furnishings to contractor personnel who organizationally are in positions that are similar or comparable to DOE positions authorized to use executive type office furniture as provided in FPMR § 101–25.302–1, when such action will effect economy without decreasing efficiency.

§ 109–25.302–1 Executive type office furniture and furnishings.

The Director of Administration and heads of field offices for their respective organizations are authorized to make the determination contemplated by FPMR § 101–25.302–1.

§ 109–25.302–2 Filing cabinets and equipment.

In addition to the use standards prescribed in FPMR § 101–25.302–2, Departmental policies, standards, procedures, and guidelines for the files management program is contained in DOE Order 1324.3.

§ 109–25.302–3 Electric typewriters.

The Director of Administration and heads of field offices for their respective organizations shall establish policies, procedures, and standards for the use of electric typewriters as contemplated in FPMR § 101–25.302–3, and are authorized to approve exceptions to the criteria contained in that section.

§ 109–25.302–4 Figuring machines.

The Director of Administration and heads of field offices for their respective organizations shall establish standards for the use of figuring machines as contemplated in FPMR § 101–25.302–4.

§ 109–25.302–6 Electronic office machines.

The Director of Administration and heads of field offices for their respective organizations shall establish standards for the use of electronic office machines as contemplated in FPMR § 101–25.302–6.

§ 109–25.304 Additional systems and equipment for passenger motor vehicles.

(a) If an item is determined to be essential and the guidelines in FPMR § 101–25.304 cannot be met, or the required item is not shown in Federal Standard 122, requisitions, accompanied by supporting justifications, shall be submitted to the Property and Equipment Management Division (MA–422), for further coordination with the Commissioner, Federal Supply Service, General Services Administration, prior to acquisition.

(b) See FPMR § 101–26.501, "Purchase of new motor vehicles," and DEAR 908.7101–2, "Consolidated purchase of new vehicles by General Services Administration."

§ 109–25.304–50 Communications equipment exemption.

Communications equipment considered to be essential for the accomplishment of security and safety responsibilities is exempt from the requirements of § 109–25.304. Communications equipment may be acquired and installed in motor vehicles operated by DOE and its' contractors after approval by the Director of Administration and heads of field offices for their respective organizations.

§ 109–25.350 Use of furnishings and household goods in Government personnel quarters.

The Director of Administration and heads of field offices for their respective organizations have the authority to authorize the use of furnishings and household goods in Government personnel quarters.

§ 109–25.351 Furnishing of Government clothing and individual equipment to employees.

(a) Government-owned clothing and individual equipment may be furnished employees under the circumstances indicated below. Care should be exercised to avoid the acquisition and furnishing of clothing and individual equipment to be fitted to an employee who my soon be separated from service or permanently assigned to other duties. This section does not apply to provision of uniforms or uniform allowances under the Federal Employees Uniform Allowances Act of 1954, as amended.

(b) Special clothing and individual equipment for the protection of personnel from physical injury or occupational disease may be furnished employees.

(c) Articles of clothing and individual equipment may be furnished employees when the items are such that the employee could not reasonably be required to furnish them as a part of their personal clothing and equipment necessary to enable them to perform the regular duties of the position to which they are assigned or for which services were engaged.

Subpart 109–25.4—Replacement Standards

§ 109–25.401–50 Replacement approvals.

The Director of Administration and heads of field offices for their respective organizations are authorized to approve replacement of office machines, furniture, and materials handling equipment under the conditions cited in FPMR Subpart 101–25.4.

Subpart 109–25.48—Reports

§ 109–25.4800 Scope of subpart.

This subpart supplements information concerning the reporting of supply management data to GSA as contained in FPMR §§ 101–25.48 and 101–25.49.

§ 109–25.4800–50 Applicability.

The provisions of FPRM Subparts 101–25.48 and 101–25.49 and this subpart apply only to those DOE direct operations and contractors controlling Government-owned stores inventories. However, based on an agreement with GSA, the DOE Supply Activity Report is prepared at Headquarters from supply management data available in DOE's financial reports and is sent to GSA by the Property and Equipment Management Division (MA–422). Therefore, no additional reports are required from those field organizations or contractors reporting under the DOE financial reporting system. Those activities with stores operations which do not report under the DOE financial reporting system shall submit Supply Activity Reports to the Property and Equipment Management Division (MA–422) by November 15 for inclusion in the Departmental report.

PART 109–26—PROCUREMENT SOURCES AND PROGRAMS

Sec.

§ 109–26.000 Scope of part.
§ 109–26.050 Applicability.

Subpart 109–26.2—Federal Requisitioning System

§ 109–26.203 Activity address codes.

Subpart 109–26.4—Purchase of Items From Federal Supply Schedule Contracts

109–26.406–1 General.

Subpart 109–26.5—GSA Procurement Programs

§ 109–26.501 Purchase of new motor vehicles.

§ 109–26.000 Scope of part.

This part implements and supplements FPMR Part 101–26, Procurement Sources and Programs.

§ 109–26.050 Applicability.

FPMR Part 101–26 and this part are applicable to contractors to the extent that Government supply sources are made available. For DOE policy on the use of Government supply sources by contractors, see DEAR Subpart 970.51.

Subpart 109–26.2—Federal Requisitioning System

§ 109–26.203 Activity address codes.

In accordance with FPMR § 101–26.203, the Property and Equipment Management Division (MA–422) has been designated the DOE point of contact with GSA for matters concerning activity address codes. DOE organizations shall designate a point of contact who shall coordinate all matters concerning activity address codes with the DOE point of contact.

Subpart 109–26.4—Purchase of Items from Federal Supply Schedule Contracts

§ 109–26.406–1 General.

The Director of Administration and heads of field offices for their respective organizations may authorize the use of U.S. Government National Credit Cards in accordance with FPMR § 101–26.406–1. See FPMR § 101–38.12 and 109–38.12 for information on the assignment of billing address code numbers and the control of U.S. Government National Credit Cards.

Subpart 109–26.5—GSA Procurement Programs

§ 109–26.501 Purchase of new motor vehicles.

In addition to the provisions of FPMR § 101–26.501, DEAR 908.7101 contains DOE requirements concerning the purchase of new motor vehicles, and DEAR 908.11 contains the DOE requirements concerning the leasing of motor vehicles.

PART 109–27—INVENTORY MANAGEMENT

Sec.

109–27.000 Scope of part.
109–27.001–50 Definitions.

Subpart 109–27.1—Stock Replenishment

109–27.102–2 Guidelines.

Subpart 109–27.2—Management of Shelf-Life Materials

109–27.202 Applicability.

Subpart 109–27.3—Maximizing Use of Inventories

109–27.302 Applicability.

Subpart 109–27.4—Elimination of Items from Inventory

109–27.402 Applicability.

Subpart 109–27.50—Inventory Management Policies, Procedures and Guidelines

109–27.5001 Scope of subpart.
109–27.5002 Objectives.
109–27.5003 Stores inventory turnover ratio.
109–27.5004 Stock control.
109–27.5004–1 General.
109–27.5004–2 Construction inventories.
109–27.5005 Guide levels for construction inventories.
109–27.5006 Sub-stores.
109–27.5007 Shop, bench, cupboard or site stock.
109–27.5008 Stores catalogs.
109–27.5009 Physical inventories.
109–27.5009–1 Procedures.
109–27.5009–2 Inventory adjustments.
109–27.5010 Control of drug substances and potable alcohol.
109–27.5011 Containers returnable to vendors.
109–27.5012 Identification marking of metals and metal products.
109–27.5012–1 General.
109–27.5012–2 Exception.
109–27.5012–3 Federal standards applicable to marking.

Subpart 109–27.51—Management of Equipment Held for Future Projects

109–27.5100 Scope of subpart
109–27.5101 Definition.
109–27.5102 Objective.
109–27.5103 Records.
109–27.5104 Storage.
109–27.5105 Justification and review procedures.
109–27.5106 Field organization review.
109–27.5107 Utilization.

Subpart 109-27.52—Management of Spare Equipment

109-27.5200 Scope of subpart.
109-27.5201 Definition.
109-27.5202 Exclusions.
109-27.5203 Management policy.

Subpart 109-27.53—Management of Precious Metals

109-27.5300 Scope of subpart.
109-27.5301 Definition.
109-27.5302 Policy.
109-27.5303 Precious metals control officer.
109-27.5304 Practices and procedures.
109-27.5304-1 Acquisitions.
109-27.5304-2 Designation of custodians.
109-27.5304-3 Physical protection and storage.
109-27.5304-4 Perpetual inventory records.
109-27.5304-5 Physical inventories.
109-27.5304-6 Stock issue.
109-27.5304-7 Control by using organization.
109-27.5305 Management reviews and audits.
109-27.5306 Precious metals pool.
109-27.5306-1 Purpose and operation.
109-27.5306-2 Withdrawals.
109-27.5306-3 Returns.
109-27.5306-4 Withdrawals/returns forecasts.
109-27.5306-5 Assistance.
109-27.5307 Recovery of silver from used hypo solution and scrap film.

Authority: Sec. 644, Pub. L. 95-91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109-27.000 Scope of part.

This part implements and supplements FPMR Part 101-27, Inventory Management, but excludes atomic weapons or byproducts and source or special nuclear materials as defined in the Atomic Energy Act of 1954, as amended, enriched uranium in stockpile storage, and petroleum in the Strategic Petroleum Reserve and the Naval Petroleum Reserves.

§ 109-27.001-50 Definitions.

As used in this part the following definitions apply:

(a) "Construction inventories" are supplies, materials and parts held for exclusive use on construction projects.

(b) "Economic order quality (EQQ)" means the size of the order which produces a level at which the combined costs of procuring and carrying inventory are at a minimum.

(c) "Expensed inventories" are items for which the cost is charged to operations and are not under financial control.

(d) "Inventories" are stocks of stores, construction, special reactor and other special materials, supplies and parts used in support of DOE programs.

(e) "Inventory level," usually expressed in the number of months supply on hand based on anticipated usage, is the amount of supplies authorized to be on hand and due-in less any amount due-out.

(f) "Inventory management" means the effective use of methods, procedures and techniques for recording, analyzing, and adjusting inventories in accordance with established policy. The following related functions are included:

(1) Providing adequate protection against misuse, theft, and misappropriation.

(2) Providing accurate analyses of quantities to determine requirements so that only minimal obsolescence losses will be encountered, while ensuring adequate inventory levels to meet program schedules.

(3) Providing adequate and accessible storage facilities and services based upon analyses of program requirements so that a minimum and economical amount of time is required to service the program.

(g) "Other special materials" include precious metals and other rare materials having a very high monetary value in relation to volume or weight, special barrier materials, and any others that have been specifically approved by the DOE Controller.

(h) "Physical inventory" means the process of counting the quantities of items on hand and reconciling quantities counted with the quantities shown on control records.

(i) "Quantity control" means the management of inventories through control of levels, determination of requirements, and replenishment of stock.

(j) "Safety stock" is that portion of inventories under stock control carried for protection against stock depletion due to an increase in demand or when lead time is greater than anticipated.

(k) "Shop, bench, cupboard or site stock" is a collection or store of materials located at or near the point of use.

(l) "Special reactor materials" include special materials approved for research and for use in reactors but not generally available through the usual channels in sufficient quantity because of limited commercial production applications.

(m) "Standardization" is the reduction of stores inventories to the least practicable variety of sizes, shapes and materials compatible with program needs.

(n) "Stock record" is a device for collecting, storing, and providing historical data on recurring transactions for each line item of inventory. The stock record of a line item may be visible register of transactions recorded by hand or by machine for that item, or it may be the input, output, stored data, or the corresponding print-out of such data representing transactions on the item in an electronic data processing system.

(o) "Stores catalog" means a listing of stock items for use in requistioning supplies and materials.

(p) "Sub-store" is a geographically removed part of the main store's operation conducted as a subordinate element of it and subject to the same management policies and inventory controls.

Subpart 109-27.1—Stock Replenishment

§ 109-27.102-2 Guidelines.

Procedures and practices shall provide for replenishment of stock items having recurring demands to minimize costs involved. When considered more suitable, contractors may use other generally accepted approaches to EQQ.

Subpart 109-27.2—Management of Shelf-Life Materials

§ 109-27.202 Applicability.

Procedures and practices shall provide for managing shelf-life items to minimize loss and ensure maximum use prior to deterioration. When considered more suitable, contractors may use other generally accepted approaches to the management of shelf-life items.

Subpart 109-27.3—Maximizing Use of Inventories

§ 109-27.302 Applicability.

Procedures and practices shall provide for maximizing use of inventories. When considered more suitable, contractors may use other generally accepted approaches to maximizing use of inventories.

Subpart 109-27.4—Elimination of Items From Inventory

§ 109-27.402 Applicability.

Procedures and practices shall provide for eliminating from inventory items that can be obtained more economically from readily available sources on a timely basis. When considered more suitable, contractors may use other generally accepted approaches to determine which items should be retained in inventory.

Subpart 109-27.50—Inventory Management Policies, Procedures, and Guidelines

§ 109-27.5001 Scope of subpart.

This subpart supplements FPMR Part 101-27 by providing additional policies, principles and guidelines for the

economical and efficient management of inventories in support of DOE programs.

§ 109–27.5002 Objectives.

Necessary inventories shall be established and maintained at reasonable levels, consistent with program requirements. They shall be managed and controlled in the most practicable and economical manner consistent with program needs, applicable laws and regulations and the following objectives:

(a) Provide materials and supplies as needed to meet DOE requirements.

(b) Maintain reasonable inventory levels.

(c) Provide adequate safeguards for protection.

(d) Maintain adequate quantity controls for effective management over all inventories, including those not under financial controls.

(e) Assure maximum efficient utilization and avoid waste.

(f) Maintain an economical operation.

(g) Standardize inventories to the greatest extent practicable.

§ 109–27.5003 Stores inventory turnover ratio.

Comparison of investment in stores inventories to annual issues shall be made to assure that minimum inventories are maintained for the support of programs. This comparison may be expressed either as a turnover ratio (issues divided by dollar value of inventory) or in the average number of month's supply on hand. Turnover or number of month's supply is calculated only on "current-use" inventory. Performance goals, i.e., a six months investment or a turnover ratio of 2.0, shall be established for each stores using activity. However, it is recognized that extenuating operating circumstances may preclude the achievement of such objectives.

§ 109–27.5004 Stock control.

§ 109–27.5004–1 General.

Stock control shall be maintained on the basis of stock record accounts of inventories on hand, on order, received, issued, and disposed of, and supported by proper documents in evidence of these transactions. Stock record accounts shall be available for review and inspection.

§ 109–27.5004–2 Construction inventories.

Stock control from construction inventories shall be maintained by the regular checking of individual items to assure that the quantities ordered plus amounts on hand do not exceed current job requirements. To test the effectiveness of such checks, they should be supplemented with DOE reviews of inventory items on a selective basis at approximately the 25 percent, 50 percent, and 75 percent construction completion stages. Undelivered portions of purchase orders, which these checks and reviews indicate are not needed to complete the project, should be canceled.

§ 109–27.5005 Guide levels for construction inventories.

To ensure that inventories maintained for construction programs and activities are reasonable, the following standards are established as guides (variations may be used where it is established by field organizations that they will more effectively or economically assure that inventory levels are held to the amount required to complete the construction project):

(a) Ordinary construction materials and supplies readily available from commercial sources, and not available as Government excess, permit phasing of deliveries and cancellation of undelivered quantities that may prove excess to project requirements. The onhand inventory of such materials generally should not exceed a three or four months supply at the anticipated usage rates.

(b) Ordinary construction materials and supplies readily obtainable from Government excess should be acquired only in the amounts estimated to complete the construction project.

(c) Items obtainable only by special manufacture or fabrication should be limited to the estimates of requirements to complete the project as determined from project plans and specifications, except as outlined in (d) below.

(d) Inventory levels in excess of estimates to complete the project should be confined to items so unusual in character or unique to the DOE project that they are obtainable only by special manufacture and will be required for maintenance purposes or for operation of the completed plant.

§ 109–27.5006 Sub-stores.

(a) Sub-stores shall be established when necessary to expedite delivery of materials and supplies to the users, serve emergencies, provide economy in transportation, reduce shop and site stocks, and enable stores personnel to provide assistance in obtaining materials and supplies as needed.

(b) Items stored for issue in the sub-stores shall be treated as inventory items for control and reporting purposes. Stock records shall be integrated with central stock records so that the total amount on hand of any item at all locations is known.

§ 109–27.5007 Shop, bench, cupboard or site stock.

(a) Shop, bench, cupboard or site stocks are an accumulation of small inventories of fast-moving materials at the point of use. Normally, these inventories are expensed. However, when stocks of such inventories are not consumed or do not turn over in a reasonable period of time, which normally should not exceed 90 days, these items should be subject to the required physical controls and recorded in the proper inventory account.

(b) Care shall be exercised to prevent excessive accumulation of inventories at such points. As a control measure, requisitions should be screened against issue data as reflected in stock records at the supply point. Also, work orders, retirement notices, minor construction projects, maintenance programs, and research and experimental projects, involving removal and dismantling should be reviewed and screened to prevent excessive inventories at point of use. However, the most effective control at point of use may be effected by administrative action through visual examination of quantities on hand, and close supervisory control and training of persons who requisition materials and supplies.

§ 109–27.5008 Stores catalogs.

A suitable stores catalog for customer use in requisitioning stores items shall be established for each stores operation. Exceptions to this requirement are authorized where establishment of a catalog is impracticable or uneconomical because of small total value or number of items involved, or temporary need for the facility. Revisions to the catalog should be made at reasonable intervals.

§ 109–27.5009 Physical inventories.

§ 109.27–5009–1 Procedures.

The following procedures shall be established for taking physical inventory of stocks subjected to quantity controls as well as those under financial control:

(a) Completion of a physical inventory not less frequently than every twelve months.

(b) Reconciliation of inventory quantities with the stock records.

(c) Preparation of a report of the physical inventory results.

§ 109–27.5009–2 Inventory adjustments.

(a) Discrepancies between physical inventories and stock records shall be adjusted and the supporting adjustment records shall be reviewed and approved by a responsible official at least one

supervisory echelon above the supervisor in charge of the warehouse or storage facility. Items on an adjustment report which are not within reasonable tolerances for particular items shall be thoroughly investigated before approval.

(b) Such inventory adjustment reports, when properly approved, support adjustments to the stock records and debits and credits to the financial inventory accounts. Adjustment reports shall be retained on file for inspection and review.

§ 109–27.5010 Control of drug substances and potable alcohol.

(a) The term "controlled substance" means any drug or substance which has been assigned a "Bureau of Controlled Substance Code Number" pursuant to 21 CFR Part 1308–Schedule of Controlled Substances.

(b) Effective procedures and practices shall provide for the management and physical security of controlled substances and potable alcohol from receipt to the point of use. Such procedures shall, as a minimum, provide for safeguarding, proper use, adequate records, and compliance with applicable laws and regulations. Controls and records of potable alcohol shall be maintained on quantities of one quart and above.

(c) Effective procedures and practices shall provide for the management and physical security of hypodermic needles to prevent illegal use. Controls shall include supervisory approval for issue, storage in locked repositories, and the rendering of the needles useless upon disposal.

§ 109–27.5011 Containers returnable to vendors.

Containers furnished by vendors shall be adminstratively and physically controlled before and after issuance. Prompt action shall be taken to return such containers to vendors for credit after they have served their intended use.

§ 109–27.5012 Identification marking of metals and metal products.

§ 109–27.5012–1 General.

Metals and metal products shall be identification marked in accordance with applicable Federal standards. This requirement applies to direct charges as well as to items procured for store, shop or floor stock, or for use on construction projects. Additional markings not covered by the Federal standards should be used to show special properties, corrosion data or test data as required. The preferred process is for the marking to be done in the manufacturing process, but it may be applied by jobbers or other vendors when circumstances warrant.

§ 109–27.5012–2 Exception.

Exception to the marking requirement may be made when—

(a) It is necessary to procure small quantities from suppliers not equipped to do the marking;

(b) It would delay delivery of emergency orders; or

(c) Procurement is from DOE or other Federal agency excess.

§ 109–27.5012–3 Federal standards applicable to marking.

The Federal standards listed below can be obtained from the General Services Administration, Federal Supply Service (3 FRI), Washington, D.C. 20407.

(a) Federal Standard 182A(2) "Identification Marking of Nickel and Nickel Base Alloys."

(b) Federal Standard 183B "Continuous Identification Marking of Iron and Steel Products."

(c) Federal Standard 184A "Identification Marking of Aluminum, Magnesium and Titanium."

(d) Federal Standard 185 "Continuous Marking of Copper and Copper Base Alloy Mill Products."

Subpart 109–27.51—Management of Equipment Held for Future Projects

§ 109–27.5100 Scope of subpart

This subpart provides policies, principles and guidelines to be used in the management of equipment held for future projects.

§ 109–27.5101 Definition.

"Equipment held for future projects (EHFFP)" is equipment that is being retained, based on approved justifications, for a known future use, or for a potential use in planned projects. This classification excludes spare equipment retained as backup for equipment in service or equipment placed in equipment pools (classified as "In Service"), spare and other equipment constituting a part of the facilities in standby (classified as "Standby"), excess equipment, and equipment classified as "Plant and Equipment Changes in Progress".

§ 109–27.5102 Objective.

The objective of the "equipment held for future projects" program is to enable DOE offices and contractors to retain equipment not in use in current programs but which has a known or potential use in future DOE programs, while providing visibility on the types and amounts of equipment so retained through review and reporting procedures. It is intended that equipment be retained which is economically justifiable for retention, considering costs of replacement, storage, obsolescence, deterioration, or future availability, that it be made available for use by others, and that equipment no longer needed be promptly excessed.

§ 109–27.5103 Records.

Records of all EHFFP shall be maintained by the holding organization. Included shall be a listing of items with original date of classification as EHFFP, initial justifications for retaining EHFFP, rejustifications for retention, and documentation of reviews made by higher levels of management.

§ 109–27.5104 Storage.

EHFFP should be stored in warehouse space designated for that purpose. When such space can not be made available, such equipment may be stored in storage yards or other areas with due consideration to the type of property and protection required.

§ 109–27.5105 Justification and review procedures.

Procedures shall provide for the following:

(a) The original decision to classify and retain equipment as EHFFP shall be justified in writing, providing sufficient detail to support the need for retention of the equipment. This justification will cite the project for which retained, the potential use to be made of the equipment, or other reasons for retention.

(b) The validity of initial classification of equipment held for future projects shall be reviewed at a level of management one echelon above that of the individual making the initial determination.

(c) Retention of EHFFP must be rejustified annually to ensure that original justifications remain valid. These rejustifications will be supported with sufficient detail to support retention.

(d) Annual rejustifications for retention of EHFFP for longer than one year shall be reviewed at a level of management at least two levels above that of the individual making the determination to retain the equipment as held for future projects. EHFFP retained for periods longer than three years should be approved by the head of the DOE field office or his designee.

§ 109–27.5106 Field organization review.

Heads of field offices and contracting officers shall conduct periodic reviews to ensure the validity of justifications for retaining EHFFP. These reviews should

include onsite surveys of a representative sample of equipment in this classification.

§ 109–27.5107 Utilization.

It is DOE policy that, where practicable and consistent with program needs, EHFFP be considered as a source of supply to avoid or postpone acquisition. Procedures shall be established to provide for—

(a) Distribution within the holding organization of lists of EHFFP to acquisition offices (or some other central screening office) and potential users for screening against requirements prior to acquisition; and

(b) Exchange of lists of EHFFP which can be made available for loan between organizations involved in the same or similar programs.

Subpart 109–27.52—Management of Spare Equipment

§ 109–27.5200 Scope of subpart.

This subpart provides policy guidance to be used in the management of spare equipment.

§ 109–27.5201 Definition.

"Spare equipment" is equipment held as replacement spares for equipment in current use in DOE programs.

§ 109–27.5202 Exclusions.

The following categories of equipment will not be considered spare equipment:

(a) Equipment installed for emergency backup, e.g., an emergency power facility, or an electric motor or a pump, any of which is in place and electrically connected.

(b) Equipment-like items properly classified as stores inventory.

§ 109–27.5203 Management policy.

(a) Procedures shall require records of spare equipment and purpose for retention, cross-referenced to location in facility and engineering drawing number.

(b) Reviews shall be made based on technical evaluations of the continued need for the equipment. Frequency of review should be biennial. In addition, individual item levels shall be reviewed when spare equipment is installed for use, the basic equipment is removed from service, or the process supported is changed.

(c) Procedures shall be established to provide that unneeded spare equipment be identified and reported as excess.

Subpart 109–27.53—Management of Precious Metals

§ 109–27.5300 Scope of subpart.

This subpart provides policies, principles, and guidelines to be used in the management of DOE-owned precious metals by DOE organizations and contractors.

§ 109–27.5301 Definition.

"Precious metals" means uncommon and highly valuable metals characterized by their superior resistance to corrosion and oxidation. Included are gold, silver, and the platinum group metals—platinum, palladium, rhodium, iridium, ruthenium and osmium.

§ 109–27.5302 Policy.

DOE organizations and contractors shall establish effective procedures and practices for the administrative and physical control of precious metals in accordance with the provisions of this subpart.

§ 109–27.5303 Precious metals control officer.

Each DOE organization and contractor holding precious metals shall designate a responsible individual as Precious Metals Control Officer. This individual shall be the organization's primary point of contact concerning precious metals control and management, and shall be responsible for the following:

(a) Assuring that the organization's precious metals activities are conducted in accordance with the requirements of this subpart and Chapter IV of the DOE Accounting Practices and Procedures Handbook.

(b) Maintenance of an accurate list of the names of precious metals custodians.

(c) Providing instructions and training to precious metals custodians and/or users as necessary to assure compliance with regulatory responsibilities.

(d) Insuring that physical inventories are performed as required by, and in accordance with, these regulations.

(e) Witnessing physical inventories.

(f) Performance of periodic unannounced inspections of custodian's precious metals inventory and records.

(g) Conduct of an annual review of precious metals holdings to determine excess quantities.

(h) Preparation and submission of the annual forecast of anticipated withdrawals from, and returns to, to DOE precious metals pool.

(i) Conduct of a program for the recovery of silver from used hypo solution and scrap film in accordance with FPMR §§ 101–42.3 and 109–42.3.

(j) Preparation and submission of the annual report on recovery of silver from used hypo solution and scrap film as required by § 109–42.301–1.

(k) Developing and issuing current authorization lists of persons authorized by management to withdraw precious metals for stockrooms.

§ 109–27.5304 Practices and procedures.

§ 109–27.5304–1 Acquisitions.

DOE organizations and contractors shall contact the DOE Precious Metals Pool Manager to determine the availability of precious metals prior to acquisition on the open market.

§ 109–27.5304–2 Designation of custodians.

Responsible individuals shall be designated as precious metals custodians. Custodians shall be responsible for proper control and safeguarding of the precious metals when issued for use.

§ 109–27.5304–3 Physical protection and storage.

Precious metals shall be afforded exceptional physical protection from time of receipt until disposition. Precious matals not in use shall be stored in a noncombustible combination locked repository with access limited to the custodian and an alternate. When there is a change in custodian or alternate having access to the repository, the combination shall be changed immediately.

§ 109–27.5304–4 Perpetual inventory records.

Perpetual inventory records shall be maintained as specified in Chapter V of the DOE Accounting Practices and Procedures Handbook.

§ 109–27.5304–5 Physical inventories.

(a) Physical inventories shall be conducted semiannually by custodians, and witnessed by the Precious Metals Control Officer or his designee.

(b) Precious metals not in use shall be inspected and weighed on calibrated scales. The inventoried weight and form shall be recorded on the physical inventory sheets by class of metal. Metals in use in an experimental process, or which are contaminated and therefore cannot be weighed, shall be listed on the physical inventory sheet as observed and/or not observed as applicable.

(c) Any obviously idle or damaged metals should be recorded during the physical inventory. Justification for further retention of idle materials shall

be required from the custodian or disposed of in accordance with established procedures.

(d) The dollar value of physical inventory results shall be reconciled with the financial records. All adjustments shall be supported by appropriate adjustment reports, and approved by a responsible official.

§ 109-27.5304-6 Stock issue.

Metals in stock are metals held in a central location and later issued to individuals when authorized requests are received. The following control procedures shall be followed for such metals:

(a) Stocks shall be held to a minimum consistent with effective and economical support to programs.

(b) The name and organizations number of each individual authorized to withdrawn precious metals, and the type and kind of metal, shall be prominently maintained in the stockroom. This authorization shall be issued by the Precious Metals Control Officer or his designee and updated semiannually. Issue of metals will be made only to authorized persons.

(c) Accurate records of all movements (receipts, issues, returns, and disposals) shall be developed by, and maintained in, the stockroom.

(d) Receipts for metal issues and returns to stock shall be provided to users. Such receipts, signed by the authorized requesting individual and the stockroom clerk, shall list the requesting organization, type and form of metal, quantity, and date of transaction.

§ 109-27.5304-7 Control by using organization.

(a) After receipt, the using organization shall provide the necessary controls for the precious metal. Materials shall be stored in a locked repository at all times except for small quantities at the actual point of use.

(b) Each using organization shall maintain a log showing the individual user, type and form of metal, and the time, place, and purpose of each use. The log shall be kept in a locked repository when not in use.

(c) The logs and secured locked storage facilities are subject to review by the Precious Metals Control Officer and other audit or review staffs as required.

(d) Cognizant Department Managers are responsible for assuring that minimum quantities of precious metals are withdrawn consistent with work requirements and that quantities excess to requirements are promptly returned to the stockroom.

(e) Employee termination and transfer procedures shall include clearance for precious metals possession.

§ 109-27.5305 Management reviews and audits.

(a) Unannounced inspections of custodian's precious metals inventory and records may be conducted between scheduled inventories.

(b) DOE organizations and contractors holding precious metals shall annually review the quantity of precious metals on hand to determine if this quantity is in excess of programmatic requirements. Precious metals which are not needed for current or foreseeable requirements shall be promptly reported to the DOE Precious Metals Pool. The results of this annual review are to be documented and entered into the precious metals inventory records.

§ 109-27.5306 Precious metals pool.

§ 109-27.5306-1 Purpose and operation.

The purpose of the precious metals pool is to recycle DOE-owned precious metals within the Department at the minimum cost to participants. The pool is operated by a private firm under a contract with the Oak Ridge Operations Office. Current information regarding the contractor's name, address, and telephone number and processing charges can be obtained by request through the Chief, Property Management Branch, Oak Ridge Operations Office.

§ 109-27.5306-2 Withdrawals.

Pure metal, parts, fabricated products, catalysts, or solutions, are generally available and the DOE pool contractor can provide assistance in supplying such requirements. Metals can be shipped to any facility to fulfill fabrication requirements.

§ 109-27.5306-3 Returns.

The pool is entirely dependent on metal returns; therefore, metal inventories should be maintained on an as-needed basis, and any excess metals should be returned to the pool for recycling. With the exception of silver, this includes precious metals in any form, including shapes, scrap, or radioactively contaminated. Only high grade nonradioactively contaminated silver should be included. Procedures have been developed by the precious metals pool contractor for metal returns, including storing, packaging, shipping, and security.

§ 109-27.5306-4 Withdrawals/returns forecasts.

The precious metals pool contractor will request annually from each DOE field organization its long-range forecast of anticipated withdrawals from the pool and returns to the pool.

§ 109-27.5306-5 Assistance.

DOE organizations or contractors may obtain specific information relative to the operation of the precious metals pool by contracting the Oak Ridge Operations Office as indicated in § 109-27.5306-1.

§ 109-27.5307 Recovery of silver from used hypo solution and scrap film.

The requirements for the recovery of silver from used hypo solution and scrap film are contained in § 109-42.302.

PART 109-28—STORAGE AND DISTRIBUTION

Sec.
109-28.000 Scope of part.
109-28.001-50 Policy.
109-28.001-51 Storage guidelines.

Subpart 109-28.3—Self Service Stores

109-28.308-3 Limitations on use.
109-28.308-6 Safeguards.

Authority: Sec. 644, Pub. L. 95-91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109-28.000 Scope of part.

This part implements and supplements FPMR Part 101-28, Storage and Distribution.

§ 109-28.001-50 Policy.

Storage and warehouse services shall be—

(a) Established for the receipt, storage, issue, safekeeping and protection of Government-owned property when advantageous to the Government;

(b) Provided in the most economical and efficient manner through the use of Government-owned facilities, and where necessary available commercial facilities, consistent with program requirements; and

(c) Operated in accordance with generally accepted industrial management practices and principles.

§ 109-28.001-51 Storage guidelines.

(a) Adequate storage facilities shall be provided to ensure the proper safeguarding of all Government property.

(1) Indoor storage areas should be arranged to obtain proper stock protection and maximum utilization of space within established floor load capacities.

(2) Storage yards for items not requiring covered protection shall be protected by locked fenced enclosures to the extent necessary to protect the Government's interest.

(3) Storage areas shall be prominently posted to clearly indicate that the

property stored therein is U.S. Government property. Entrance to such areas should be restricted to authorized personnel only.

(b) The following general storage principles shall be observed in the planning for the storage of Government personal property.

(1) Efficient storage demands the maximum utilization of space with a minimum amount of labor. Where practicable, labor should be conserved by use of modern materials handling equipment and storage aids which permit stacking by unit loads rather than by individual container units.

(2) Fast-moving items should be stored in convenient locations from which they can be issued with minimum handling. Stocks of individual items or classes of items should be segregated to facilitate handling, issuing, and inventorying.

(3) Property should be stored according to the kind of protection required. All items must be protected from fire and theft. Certain items require protection from dampness, heat, freezing, or extreme temperature changes. Others must be stored away from light and odors, protected from vermin infestation, or, because of their hazardous characteristics, stored separate from other stocks. These factors, as well as maximum protection of property against all causes of deterioration or destruction, must be considered in selecting proper storage locations.

(4) Orderly arrangement is essential to efficient operation of storehouses. All items should be so arranged that nomenclature and quantity may be readily determined.

(5) Stock rotation is based on the general storage principle of "first in, first out." Many items, such as perishables, food stuffs, medicines, paints, and chemicals, are subject to deterioration or infestation which require that the older stock be issued first.

Subpart 109–28.3—Self Service Stores

§ 109–28.308–3 Limitations on use.

The Director of Administration and heads of field offices for their respective organizations shall establish internal controls for the use of GSA shopping plates in accordance with FPMR § 101–28.308–3.

§ 109–28.308–6 Safeguards.

The Director of Administration and heads of field offices for their respective organizations shall establish internal controls for safeguarding of GSA shopping plates in accordance with FPMR § 101–28.308–6.

PART 109–30—FEDERAL CATALOG SYSTEM

Sec.
109–30.000 Scope of part.
109–30.000–50 Applicability.

Subpart 109–30.5—Maintenance of the Federal Catalog System

109–30.503 Maintenance actions required.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109–30.000 Scope of part.

This part supplements FPMR Part 101–30, Federal Catalog System.

§ 109–30.000–50 Applicability.

The provisions in FPMR Part 101–30 and this part do not apply to contractors.

Subpart 109–30.5—Maintenance of the Federal Catalog System

§ 109–30.503 Maintenance actions required.

(b) Standard Form 1303 shall be sent directly to GSA for processing. Inquiries concerning policy should be directed to the Property and Equipment Management Division (MA–422).

SUBCHAPTER F—ADP AND TELECOMMUNICATIONS

PART 109–36—ADP MANAGEMENT

Sec.
109–36.000 Scope of part.

Subpart 109–36.3—Reutilization of Automatic Data Processing Equipment and Supplies

109–36.300–50 Scope of subpart.
109–36.302–50 Reassignment of ADPE within DOE.
109–36.303–1 Designation of agency ADPE point of contract.
109–36.303–3–50 Reporting excess or exchange/sale ADPE within DOE.
109–36.304 Availability list.
109–36.306 Requests for transfer of excess ADPE or exchange/sale ADPE.

Subpart 109–36.47—Reports

109–36.4700 Scope of subpart.
109–36.4702 Reporting excess or exchange/sale ADPE.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109–36.000 Scope of part.

This part implements and supplements FPMR Part 101–36 as it relates to utilization and disposal of excess automatic data processing equipment (ADPE).

Subpart 109–36.3—Reutilization of Automatic Data Processing Equipment and Supplies

§ 109–36.300–50 Scope of subpart.

This subpart implements and supplements FPMR Part 101–36.3. Policies and procedures relating to acquisition, reassignment, or retention of excess ADPE are contained in policies and procedures established by the Office of the Director of Administration.

§ 109–36.302–50 Reassignment of ADPE within DOE.

(a) Transfers within DOE of excess ADPE having a current market price equal to or greater than that specified for major items as defined in the DOE Program Budget Structure are made pursuant to the requirement for proposals submitted in accordance with instructions from the Office of the Director of Administration.

(b) Transfers within DOE of excess ADPE with a current market price of less than that specified for major items shall be approved by the head of the field office and the head of the Headquarters organization having ADPE responsibility for the equipment. However, when more than one request is received, the field office head shall notify the requestors that acquisition proposals prepared in accordance with instructions from the Office of the Director of Administration shall be forwarded to the field organization for review. After receipt of all proposals, the field office head shall—

(1) Approve the request for transfer which is judged to be in the best interest of DOE; or

(2) Where this judgement cannot be made locally, forward the proposals to the Director of Administration for action in a manner similar to proposals for equipment having a current market price equal to or greater than that specified for major items.

§ 109–36.303–1 Designation of agency ADPE point of contact.

The Director of Administration shall designate the DOE point of contact to carry out the responsibilities contained in FPMR § 101–36.303–1.

§ 109–36.303–3–50 Reporting excess or exchange/sale ADPE within DOE.

(a) All ADPE, either Government-owned or—leased, which is no longer needed or is scheduled for replacement, shall be made available for utilization within DOE as soon as plans for the release of such equipment are known.

(b)(1) Government-owned ADPE shall be reported for utilization screening

within DOE on Standard Form (SF) 120, Report of Excess Personal Property. The SF 120 shall contain the information required in FPMR 101–36.4702 and, for internal screening purposes, a release date (date of availability). If the release date is not firm, a tentative release date should be given, which would be subject to change until the actual release date is established.

(2) The SF 120 shall be submitted to the Property and Equipment Management Division (MA–422) for inclusion in the Reportable Excess Automated Property System (REAPS) in accordance with § 109–43.311–1–50.

(3) ADPE shall not be reported to GSA as excess until this screening has been accomplished and it has been established that there are no DOE claimants. Concurrent screening within DOE and GSA is not authorized. A minimum of 45 days should be allowed for screening ADPE prior to reporting it to GSA. In those instances where the release date can be determined sufficiently in advance, additional screening time should be allowed to permit maximum time for processing of requests to acquire excess ADPE.

(c) The procedures prescribed in § 109–36.303–350(b) shall be followed for leased ADPE. However, when time does not permit sequential DOE and GSA circularization, excess leased ADPE may be circularized concurrently in DOE and GSA to assure earned credits are not lost to the Government. The SF 120 should clearly indicate concurrent screening by DOE and GSA. Where time does not permit assurance that earned credits are not lost to the Government, announcement of availability of excess leased ADPE may be circularized within DOE by teletype (TWX). The TWX should be sent to all DOE field offices with a request to further distribute to applicable contractors, and copies should be sent to the Office of ADP Management (MA–24) and to the Property and Equipment Management Division (MA–422) at Headquarters.

§ 109–36.304 Availability list.

The Director of Administration shall develop and maintain distribution patterns for availability lists of excess and exchange/sale ADPE as contemplated in FPMR § 101–36.304.

§ 109–36.306 Requests for transfer of excess ADPE or exchange/sale ADPE.

The Director of Administration, heads of field offices, the Administrator, energy Information Administration and contracting officers are authorized to sign Standard Form (SF) 122, Transfer Order Excess Personal Property, after appropriate approvals, involving requests for transfer of excess or exchange/sale ADPE, as required by FPMR § 101–36.306(a).

Subpart 109–36.47—Reports

§ 109–36.4700 Scope of subpart.

This subpart implements and supplements FPMR Subpart 101–36.47 as it relates to reporting excess or exchange/sale ADPE to GSA.

§ 109–36.4702 Reporting excess or exchange/sale ADPE.

Excess Government-owned or-leased ADPE and exchange/sale ADPE shall be reported to GSA on Standard Form (SF) 120, Report of Excess Personal Property, in accordance with the requirements of FPMR § 101–36.4702. No provision is made in FPMR § 101–36.4702 for the use of a TWX as a substitute for the SF 120 in reporting excess ADPE to GSA. When a TWX is used to report excess leased ADPE to GSA, it shall be followed up with an SF 120 to GSA, providing appropriate cross-reference information.

SUBCHAPTER G—TRANSPORTATION AND MOTOR VEHICLES

PART 109–38—MOTOR EQUIPMENT MANAGEMENT

Sec.

109–38.000 Scope of part.
109–38.000–50 Policy.

Subpart 109–38.0—Definition of Terms

109–38.001 Definitions.

Subpart 109–38.1—Reporting Motor Vehicle Data

109–38.100–1–50 Reporting DOE motor vehicle data.
109–38.102–2–50 Reporting DOE domestic and foreign vehicles.

Subpart 109–38.2—Registration and Inspection

109–38.202–50 Registration in foreign countries.
109–38.202–51 Shipment to foreign countries.

Subpart 109–38.3—Official U.S. Government Tags

109–38.302 Records.
109–38.303 Procurement.
109–38.305–50 Security.
109–38.305–51 Lost or stolen license tags.

Subpart 109–38.4—Official Legend and Agency Identification

109–38.404 Procurement of decalcomanias.
109–38.404–50 Security of decals.

Subpart 109–38.6—Exemptions From Use of Official U.S. Government Tags and Other Identification

109–38.602 Unlimited exemptions.
109–38.602–50 Additional Department of Energy exemptions.
109–38.605 Additional exemptions.
109–38.606 Approval of tag requests for exempted vehicles in the District of Columbia.
109–38.607 Report of exempted motor vehicles.

Subpart 109–38.7—Transfer of Title to Government-Owned Motor Vehicles

109–38.701 Methods of transfer.
109–38.701–50 Delegation of authority to sign Standard Forms 97 and 97A.

Subpart 109–38.9—Motor Vehicle Replacement Standards

109–38.900–50 Policy.
109–38.907 Fleets.
109–38.908 Exception.
109–38.908–50 Prompt disposal of replaced passenger vehicles.

Subpart 109–38.10—Scheduled Maintenance of Motor Vehicles

109–38.1003–50 DOE guidelines.

Subpart 109–38.12—Preparation and Control of Standard Form 149, U.S. Government National Credit Card

109–38.1200 General.
109–38.1201 Billing Code.
109–38.1202 Administrative control of credit cards.
109–38.1202–50 Additional control of credit cards.

Subpart 109–38.13—Energy Conservation in Motor Vehicle Management

109–38.1304 Mandatory provisions affecting the acquisition and use of all motor vehicles.
109–38.1304–50 Selection of type of motor vehicles.
109–38.1305 Mandatory provisions affecting the acquisition, use, and replacement of passenger automobiles.
109–38.1306 Acquisition of fuel-efficient passenger automobiles.
109–38.1306–50 Certification of fuel-efficient passenger automobile acquisitions.
109–38.1307 Acquisition of fuel-efficient light trucks.
109–38.1350 Conservation of motor vehicle fuels.

Subpart 109–38.50—Utilization of Motor Vehicles

109–38.5000 General.
109–38.5001 Utilization controls and practices.
109–38.5002 Use objectives for motor vehicles.
109–38.5003 Application of use goals.

Subpart 109–38.51—Acquisition of Motor Vehicles

109–38.5100 General requirements.
109–38.5101 Authority required for acquisition or hire of passenger motor vehicles.
109–38.5102 Passenger motor vehicle allocations.
109–38.5103 Acquisition.

Subpart 109–38.52—Aircraft

109–38.5200 Scope of subpart.
109–38.5201 Definitions.
109–38.5202 General.

109–38.5203 Aircraft safety.
109–38.5204 Pilot responsibility and authority.
109–38.5205 Authority required for the acquisition, hire, or borrowing of aircraft.
109–38.5205–1 Statute.
109–38.5206 Aircraft authorization.
109–38.5207 Management responsibility.
109–38.5208 Registration and identification.
109–38.5209 Airworthiness.
109–38.5210 Maintenance.
109–38.5211 Operation.
109–38.5212 Records.
109–38.5213 Reports.

Subpart 109–38.53—Watercraft

109–38.5300 Scope of subpart.
109–38.5301 Definitions.
109–38.5302 General.
109–38.5303 Watercraft safety.
109–38.5304 Watercraft operations.
109–38.5305 Watercraft identification and numbers.
109–38.5306 Display of flags and seal.

Subpart 109–38.54—Official Use of Motor Vehicles and Aircraft

109–38.5400 Scope of subpart.
109–38.5401 Statutory requirement.
109–38.5402 Policy.
109–38.5403 Official purposes.
109–38.5404 Approval of authorizations.
109–38.5405 Duration of authorizations.
109–38.5406 Use of a motor vehicle to drive to residence at start of official travel.
109–38.5407 Use of Government-owned or Government-furnished motor vehicle in travel status.
109–38.5408 Use of Government-owned or -leased bus systems.
109–38.5409 Use of Government motor vehicles in emergencies.
109–38.5410 Use of motor vehicles by the Postal Service.
109–38.5411 Instructions to motor vehicle operators.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§109–38.000 Scope of part.

This part implements and supplements FPMR Part 101–38 concerning the management of motor equipment, vehicles, aircraft and watercraft.

§109–38.000–50 Policy.

Necessary motor equipment, vehicles, aircraft and watercraft shall be provided, maintained and utilized in support of DOE programs in the most practical and economical manner consistent with program requirements, safety considerations, fuel economy and applicable laws and regulations.

Subpart 109–38.0—Definition of Terms

§109–38.001 Definitions.

As used in this Part the following definitions apply:

(a) "Motor equipment" means any item of equipment which is self-propelled or drawn by mechanical power, including motor vehicles, motorcycles and scooters, construction and maintenance equipment, materials handling equipment, aircraft and watercraft.

(b) "Motor vehicle" means any equipment, self-propelled or drawn by mechanical power, designed to be operated principally on the highways in the transportation of property or passengers. This includes both motorcycles and motor scooters.

(c) A "replacement off-set" is an authorization to one DOE field organization to acquire a new passenger motor vehicle to replace an old passenger motor vehicle which has become excess to another DOE field organization. The transaction does not require the physical transfer of the excess vehicle, but is limited to a documentary transfer.

(d) "Special purpose vehicles" have limited but essential missions. They are not generally used to carry passengers, freight or other materials. Trucks with permanently mounted equipment, (such as fire trucks, special tank trucks, wreckers and trucks with compressors or generators in fixed mounting on the body), may be classified as special purpose trucks. Vehicles other than sedans and station wagons which are to be used only during a defined or specified contingency, such as evacuation or other similar emergency, may also be classified as special purpose vehicles. For reporting purposes within DOE, motorcycles and motor scooters will also be reported as special purpose vehicles.

(e) "Experimental vehicles" are those acquired solely for testing and research purposes or otherwise designated for experimental purposes. Such vehicles are to be the object of testing and research as differentiated from those used as vehicular support to testing and research. Experimental vehicles are not to be used for passenger carrying services, and they are not subject to statutory price limitations or to authorization limitations.

Subpart 109–38.1—Reporting Motor Vehicle Data

§109–38.1001–50 Reporting DOE motor vehicle data.

(a) Organizations operating DOE-owned and/or commercially term leased (60 continuous days or more) motor vehicles shall provide one copy of the following reports to the Property and Equipment Management Division (MA–422) by October 31 of each year.

(1) DOE Report of Motor Vehicle Data.

(2) DOE Report of Truck Data.

(b) Copies of the report forms may be obtained by contacting the Property and Equipement Division.

§109–38.102–2–50 Reporting DOE domestic and foreign vehicles.

Separate forms shall be prepared for vehicles located: (a) In the United States, including territories and possessions, and (b) in a foreign country.

Subpart 109–38.2—Registration and Inspection

§109–38.202–50 Registration in foreign countries.

Motor vehicles used in foreign countries are to be registered and carry license tags in accordance with the existing motor vehicle regulations of the country concerned.

§ 109–38.202–51 Shipment to foreign countries.

(a) When motor vehicles are being shipped for use in a foreign country, the desk officer or individual handling the affairs pertaining to the country in the Department of State shall be contacted before shipment is made for information concerning the licensing and shipping of the vehicle

(b) The person responsible for, and expected to use, a motor vehicle in a foreign country shall make inquiry at the United States Embassy, Legation, or Consulate concerning the regulations that apply to registration, licensing, and operation of motor vehicles and shall be guided accordingly.

Subpart 109–38.3—Official U.S. Government Tags

§ 109–38.302 Records.

(a) The Property and Equipment Management Division (MA–422) assigns "blocks" of U.S. Government license tag numbers to DOE organizations and maintains a current record of such assignments. Additional "blocks" will be assigned upon request.

(b) Each Departmental organization shall maintain a current record of individual assignments of license tags to the motor vehicles under its jurisdiction as required by FPMR § 101–38.302.

§109–38.303 Procurement.

The procedures for acquiring official Government license tags by DOE organizations are covered in DEAR 908.7101–7.

§ 109–38.305–50 Security.

Unissued license tags shall be stored in a locked drawer, cabinet or storage area with restricted access to prevent possible fraud or misuse.

§ 109–38.305–51 Lost or stolen license tags.

Fleet managers, upon receipt of information on lost or stolen Government license tags, should promptly report the loss to the local DOE security office and local law enforcement authorities. Lost or stolen Interagency Motor Pool Vehicle license tags should be reported to the applicable General Services Administration motor pool manager. District of Columbia or state license tags which are lost or stolen should be reported to the District of Columbia, Department of Transportation, or the appropriate state agency.

Subpart 109–38.4—Official Legend and Agency Identification

§ 109–38.404 Procurement of decalcomanias.

The official legend and agency identification for DOE shall be of elastomeric pigmented film type decalcomania which are currently available in black (DOE From 1530.1) and white (DOE Form 1530.2). These forms shall be requisitioned from the Logistics Management Division (MA–235) using DOE Form 4250.2, "Requisition for Supplies, Equipment or Services", a local supply request form or a memorandum.

§ 109–38.404–50 Security of decals.

Unissued decals shall be stored in a locker drawer, cabinet or storage area with restricted access to prevent possible fraud or misused.

Subpart 109–38.6—Exemptions From Use of Official U.S. Government Tags and Other Identification

§ 109–38.602 Unlimited exemptions.

(e) Exemptions from the requirement for the display of Federal license tags and other official identification may be approved by heads of field offices and the Director of Administration for motor vehicles under their cognizance which are used in the conduct of security operations or in the enforcement of security regulations of DOE.

§ 109–38.602–50 Additional Department of Energy exemptions.

The requirements for the display of Federal license tags and other identification do not apply to motor vehicles used in foreign countries, Trust Territories, or the Pacific Test Areas (see FPMR §§ 101–38.202 and 109–38.202–50).

§ 109–38.605 Additional exemptions.

(a) Requests made pursuant to FPMR § 101–38.605 for exemption from the requirement for displaying U.S. Government tags and other identification on motor vehicles which are not within the criteria in FPMR § 101–38.602 shall be submitted through normal administrative channels to the Property and Equipment Management Division (MA–422). Each such request shall describe the vehicle for which exemption is sought, the nature of the work on which it is used, and include a certification to the effect that conspicuous identification would interfere with such use.

(b) The Property and Equipment Management Division (MA–422) shall be notified promptly when the need for a previously authorized exemption no longer exists.

(c) Copies of certifications and cancellation notices required to be furnished to GSA pursuant to FPMR § 101–38.605 will be transmitted to GSA by the Property and Equipment Management Division.

§ 109–38.606 Approval of tag requests for exempted vehicles in the District of Columbia.

The Director of Administration is designated as the DOE liaison representative to approve requests for regular District of Columbia license tags for Headquarters motor vehicles exempted from carrying U.S. Government license tags and other official identification, and furnishes annually to the District of Columbia Department of Motor Vehicles the name and specimen signature of each representative authorized to approve such requests.

§ 109–38.607 Report of exempted motor vehicles.

The Director of Administration and heads of field offices for their respective organizations shall maintain records of motor vehicles exempted from displaying Federal license tags and other identification which will permit the submission of reports by the Property and Equipment Management Division upon request of GSA in accordance with FPMR § 101–38.607. The records shall contain a listing by type of each exempted vehicle operated during the previous fiscal year, giving the information for each vehicle on hand at the beginning of the year and each of those newly authorized during the year, including—

(a) By whom exemption was authorized, by name and title of authorizing official (including any authorization by Headquarters and GSA);

(b) Date exemption was authorized;

(c) Justification for exemptions and limitations on uses of the exempted vehicle;

(d) Date of discontinuance for any exemption discontinued during the year; and

(e) Probable duration of exemption for vehicles continuing in use.

Subpart 109–38.7—Transfer of Title to Government-Owned Motor Vehicles

§ 109–38.701 Methods of transfer.

(c) The certificates and copies of Certificate of Release of a Motor Vehicle (SF's 97 and 97A) shall be numbered consecutively by each DOE field and Headquarters organization disposing of motor vehicles.

§ 109–38.701–50 Delegation of authority to sign Standard Forms 97 and 97A.

(a) Heads of DOE field offices and the Director of Administration may delegate the authority to sign SF's 97 and 97A to responsible DOE personnel under their jurisdiction. The name of the officer delegated to sign will be typed on the certificate in addition to the signature in ink.

(b) All DOE field and Headquarters organizations shall establish proper controls to prevent blank copies of SF's 97 and 97A from being obtained by unauthorized persons.

Subpart 109–38.9—Motor Vehicle Replacement Standards

§ 109–38.900–50 Policy.

It is the policy of DOE to continue in service motor vehicles which meet prescribed replacement standards, but which are in usable and workable condition, provided that—

(a) A continued need exists for the vehicle;

(b) The vehicle can be operated safely and dependably without excessive repair and maintenance costs. Normally, when any single repair job exceeds 25 percent of the estimated current market value of a vehicle, consideration should be given to replacement in lieu of repair and retention;

(c) Repair parts are readily obtainable; and

(d) Retention will not substantially reduce the exchange/sale value of the vehicle.

§ 109–38.907 Fleets.

The replacement limitations cited in FPMR § 101–38.907 are applicable to each of DOE's field organizations and may not be exceeded.

§ 109–38.908 Exception.

Motor vehicles may be replaced without regard to the replacement standards in FPMR § 101–38.9 only after certification by the appropriate head of the field or Headquarters organization that a vehicle is beyond economical repair due to accident damage or wear caused by abnormal operating conditions.

§ 109–38.908–50 Prompt disposal of replaced passenger vehicles.

Because of the limitation on the total number of passenger vehicles which DOE may own, replaced passenger vehicles shall be removed from service and disposed of prior to or as soon as practicable after delivery of the replacement equipment to avoid concurrent operation of both vehicles. Because of disposal problems, there may be occasions where quick disposal of the old equipment may not be feasible or advantageous to the Government, e.g., it may be determined that there is an insufficient number for economical sale, or that sale would bring substantially better prices at a later date because of seasonal effects on sale prices. Under such circumstances, temporary retention of the replaced passenger vehicle may be justified. However, such retention may not be used as justification for concurrent operation of the new and replaced vehicles.

Subpart 109–38.10—Scheduled Maintenance of Motor Vehicles

§ 109–38.1003–50 DOE guidelines.

(a) Whenever practicable, existing Government service facilities shall be consolidated, or commercial services shall be utilized, to reduce to a minimum the maintenance facilities and equipment, supplies, parts, stocks and overhead costs.

(b) Maintenance also shall be geared to a planned replacement program. Individual vehicle maintenance record files shall be kept and made readily available to appropriate maintenance personnel to provide historical records of past repairs, as a control against unnecessary repairs and excessive maintenance, and as an aid in determining the most economical time for replacement.

(c) One-time maintenance and repair limitations shall be established by heads of field offices. To exceed repair limitations, approval from heads of field offices is required, particularly as the time of replacement approaches.

(d) Adequate maintenance schedules shall be provided to accomplish the following objectives in the most economical manner:

(1) To maintain equipment in safe and economical operating condition.

(2) To prevent equipment failures resulting in program delays and excessive downtime.

(3) To prevent premature wear and deterioration.

(4) To prevent undue depreciation.

(5) To conserve materials and manpower.

(e) Warranties.

(1) Special attention shall be devoted to the warranty on each motor vehicle to ensure that maximum benefits are realized. A system should be established to assure that defective materials and workmanship on vehicles under warranty are corrected under the terms of the warranty to avoid maintenance and repair of such vehicles at Government expense.

(2) When motor vehicles are maintained in Government shops in isolated locations that are distant from franchised dealer shops, or when it is not practical to return the vehicles to a dealer, billback agreement shall be sought from manufacturers to permit warranty work to be performed in Government shops on a reimbursable basis.

Subpart 109–38.12—Preparation and Control of Standard Form 149, U.S. Government National Credit Card

§ 109–38.1200 General.

FPMR § 101–26.406 authorizes the use of Standard Form 149, U.S. Government National Credit Card for Federal agencies for obtaining service station deliveries and services. The use of the SF–149 by each field organization or by Headquarters is optional. When a field organization elects to use the form, it shall be used on a field organization basis.

§ 109–38.1201 Billing Code.

DOE organizations shall request the assignment of billing address code numbers from the Property and Equipment Management Division (MA–422). Following the assignment, DOE organizations shall submit orders for issuance of national credit cards in accordance with FPMR § 101–26.406–5 and the current Federal Supply Schedule FSC Group 75, Part VII. The billing code consists of the following:

(a)(1) The first three digits of the 10–digit billing code embossed on national credit cards in use by DOE will always be 000.

(2) The fourth digit may be used by DOE organizations and contractors to designate the vehicle class or provide additional billing code numerals. If not used for either of these purposes, zero will be used.

(3) The fifth and sixth digits will be "89", the agency code assigned to DOE.

(4) The seventh, eighth, and ninth digits indicate the billing address code number.

§ 109–38.1202 Administrative control of credit cards.

(a) The head of each organization using credit cards shall be responsible for establishing procedures to provide for the administrative control of credit cards in accordance with the guidelines set forth in FPMR Part § 101–38.1202.

§ 109–38.1202–50 Additional control of credit cards.

(a) All vehicle operators should be provided with appropriate instructions regarding the use and protection of credit cards against theft and misuse.

(b) In the event an SF–149 is lost or stolen, reasonable precautions shall be taken to minimize the opportunity of purchases being made by unauthorized persons. In addition to the written notification required in FPMR § 101–38.1202(b)(1), the paying office shall be promptly notified of the loss or theft and to be on the alert for any unauthorized bills.

Subpart 109–38.13—Energy Conservation in Motor Vehicle Management

§ 109–38.1304 Mandatory provisions affecting the acquisition and use of all motor vehicles.

(c) The use of motor vehicles for official purposes within DOE is governed by the provisions of DOE Subpart 109–38.54.

(d) All requirements for term rentals or leases of sedans, station wagons or light trucks under 8,500 pounds gross vehicle weight shall be submitted to the Property and Equipment Management Division (MA–422) in accordance with §§ 109–38.1306–50, 109–38.1307 and DEAR 908.1170.

§ 109–38.1304–50 Selection of type of motor vehicles.

(a) All vehicles acquired for use, whether by buy, hire, lease, forfeiture or transfer from another agency, shall be limited to the minimum body and engine size, and to only that operational equipment (if any) necessary to fulfill programmatic needs.

(b) The least expensive unit overall should be used, considering both acquisition and operating costs for units to be bought, and rental rates for rented or leased units.

(c) Dual-purpose vehicles capable of hauling both personnel and light cargo shall be used whenever appropriate to avoid the need for two vehicles when one can serve both purposes. However, truck-type or van vehicles shall not be acquired for passenger use merely to avoid limitations on the number of passenger vehicles which may be acquired.

(d) Motor scooters and motorcycles in place of higher cost motor vehicles can be used advantageously for certain applications within plant areas, such as mail and messenger service and small parts and tool delivery. Their advantage, however, should be weighed carefully from the standpoint of overall economy (comparison with cost for other types of motor vehicles) and increased safety hazards, particularly when mingled with other motor vehicle traffic.

(e) Electric vehicles may be used advantageously for certain applications. The use of these vehicles is encouraged wherever it is feasible to use them to further the goal of fuel conservation.

§ 109–38.1305 Mandatory provisions affecting the acquisition, use, and replacement of passenger automobiles.

In accordance with FPMR § 101–38.1305, all requests to acquire passenger automobiles larger than class 1A, 1B or II shall be forwarded with justifications through normal administrative channels to the Property and Equipment Management Division (MA–422) for certification to GSA.

§ 109–38.1306 Acquisition of fuel-efficient passenger automobiles.

(a) Organizations conducting motor vehicle operations shall forward annually (on or before December 1) to the Property and Equipment Management Division (MA–422) a plan for acquisition of passenger motor vehicles for the next fiscal year. This plan shall conform to the fuel efficiency standards for motor vehicles for the applicable fiscal year, as established by Executive Order 12375 and as implemented by GSA and current DOE directives. Additional guidance for the preparation of the plan will be issued by the Property and Equipment Management Division (MA–422) as required. This organization shall also review each submission for conformance with established fuel efficiency standards and shall develop and forward to GSA the Departmental consolidated annual motor vehicle acquisition forecast.

§ 109–38.1306–50 Certification of fuel-efficient passenger automobile acquisitions.

(a) Requisitions for the buying of passenger motor vehicles shall be forwarded to the Property and Equipment Management Division (MA–422) for review, certification and submission to GSA.

(b) Proposals/ requests for commercially leased passenger automobiles, for a period of 60 continuous days or more, shall be forwarded to the Property and Equipment Management Division (MA–422) for review and certification prior to entering into an agreement to lease to insure compliance with Executive Order 12375 as implemented by GSA.

§ 109–38.1307 Acquisition of fuel-efficient light trucks.

In accordance with FPMR § 101–38.1307 and Executive Order 12375, the requirements of §§ 109–38.1306 and 109–38.1306–50 also apply to the acquisition of any truck under 8,000 pounds gross vehicle weight and covered by Federal Standards 292 and 307.

§ 109–38.1350 Conservation of motor vehicle fuels.

In furtherance of energy conservation objectives, each organization within DOE shall establish programs which will ensure achievement of the reduced motor vehicle fuel consumption objectives. The following actions shall be adopted to achieve the conservation goals of reduced motor vehicle fuel consumption:

(a) Do not idle engine for long periods of time.

(b) Reduce motor vehicle travel to the maximum extent practicable without jeopardizing essential business.

(c) Use the smallest vehicle that is feasible for the job.

(d) Maintain tire pressure to tire manufacturer's recommendations. Check pressure at least once each week.

(e) Give wide publicity on proper driving techniques as prescribed by GSA to conserve fuels and require that all drivers diligently follow them.

(f) Limit speed to the National Speed Limit.

(g) Ensure proper maintenance and servicing procedures, such as tuneups, in accordance with the manufacturer's latest specifications.

Subpart 109–38.50—Utilization of Motor Vehicles

§ 109–38.5000 General.

It is DOE policy to keep the number of motor vehicles at the minimum needed to satisfy program requirements. To assure attainment of this goal, continuing attention shall be given to developing and implementing controls and practices which will help achieve the most practical and economical utilization of vehicles.

§ 109–38.5001 Utilization controls and practices.

Controls and practices to be used by DOE organizations and contractors for achieving maximum economical utilization of motor vehicles shall include, but not be limited to—

(a) The maximum use of equipment pooling arrangements, taxicabs, shuttle buses, or other common service arrangements;

(b) The minimum, practicable assignment of equipment to individuals, groups or specific organizational components with periodic documented reviews of such assignments to determine if underutilization exists and whether reassignment is necessary;

(c) Frequent review of vehicle utilization statistics by appropriate levels of management, with prompt reassignment and/or disposal action performed as required;

(d) The careful selection of equipment types to permit the maximum appropriate use of multi-purpose equipment;

(e) The rotation of equipment between high and low mileage assignments where practicable to maintain the fleet in the best overall replacement age and mileage balance and operating economy; and

(f) The maintenance of individual equipment use records, such as trip tickets or vehicle logs, showing sufficiently detailed information to evaluate appropriateness of assignment and adequacy of use being made. If one-time use is involved, such as assignments from motor pools, the individual's trip records must, as a minimum, identify the vehicle and show the name of the operator, dates, destination, time of departure and return, and mileage.

§ 109–38.5002 Use objectives for motor vehicles.

The following use goals are established for DOE as average objectives:

(a) Sedans and station wagons—3,000 miles per quarter or 12,000 miles per year.

(b) Light trucks and general purpose vehicles, one ton and under (less than 12,500 GVW)—10,000 miles per year.

(c) Medium trucks and general purpose vehicles, 1½ ton through 2½ ton (12,500 to 16,999 GVW)—7,500 miles per year.

(d) Heavy trucks and general purpose vehicles, three ton and over (17,000 GVW and over)—7,500 miles per year.

(e) Truck tractors—10,000 miles per year.

(f) All-wheel-drive vehicles—7,500 miles per year.

(g) Other motor vehicles—No average use goals for other trucks, ambulances, buses, and special purpose vehicles are established. The use of such equipment shall be reviewed and necessary action taken to ensure that the equipment is fully utilized or declared excess to the Department's needs.

§ 109–38.5003 Application of use goals.

Individual motor vehicle utilization cannot always be measured or evaluated strictly on the basis of miles operated or against any Department-wide mileage standard. Other measures of use will need to be considered. Accordingly, as an aid in achieving maximum feasible utilization, local use objectives which represent practical units of measurement for vehicle utilization and for planning and evaluating future vehicle requirements must be established. Such objectives should generally be initiated by the organization involved and reviewed and adjusted as appropriate, but not less often than annually. The objectives will take into consideration past performance, future requirements and special operating conditions, and should be consistent with the justifications used to obtain vehicles authorizations. Both Department-wide and local use objectives should be applied in such a manner that their application does not stimulate vehicle use for the purpose of meeting the objective. The ultimate standard against vehicle use must be measured is that the minimum number of vehicles will be retained to satisfy program requirements.

Subpart 109–38.51—Acquisition of Motor Vehicles

§ 109–38.5100 General requirements.

The acquisition of motor vehicles shall be limited to the minimum number needed to adequately serve program requirements and satisfy the intent of Congress. Any additions to the fleet must be fully justified and the justification shall include substantiation that the intent of 109–38.000–50 and 109–38.50 are satisfied.

§ 109–38.5101 Authority required for acquisition or hire of passenger motor vehicles.

(a) In accordance with 31 U.S.C. 1343, authority for the buying, leasing, or hire of passenger motor vehicles is contained in the annual appropriation act for DOE.

(b) The acquisition of passenger motor vehicles by transfer from another Government agency shall be considered as an addition to the DOE passenger motor fleet.

(c) Passenger motor vehicles may not be bought or acquired by transfer or loan unless they are—

(1) Specifically authorized by the Director of Procurement and Assistance Management, pursuant to the appropriation concerned or other law;

(2) Acquired from excess for upgrading or replacement purposes and an equal number of replaced vehicles are reported for disposal as excess within 30 days; or

(3) For temporary emergency needs not in excess of three months in lieu of commercial rentals.

(4) For temporary emergency needs over three months and approved by the Director of Procurement and Assistance Management.

§ 109–38.5102 Passenger motor vehicle allocations.

(a) To assure that DOE acquisitions do not exceed the number of passenger motor vehicles authorized to be acquired in any fiscal year, the Director of Procurement and Assistance Management shall allocate to and inform the field organizations of the number of passenger motor vehicles which may be acquired each fiscal year. These allocations and the statutory cost limitations shall not be exceeded.

(b) In order that unused allocations to acquire passenger motor vehicles may be reassigned within the Department, the organizations concerned shall notify the Property and Equipment Management Division (MA–422) when allocations will not be used. Such notification shall be submitted as soon as possible but not later than June 15 of each year.

(c) Passenger motor vehicles acquired from excess to meet temporary emergency needs for longer than three months shall be charged against the number authorized for purchase unless otherwise approved by the Director of Procurement and Assistance Management (See Comp. Gen. Decision. B–154282 dated October 15, 1966).

(d) In order that passenger vehicles no longer needed by one field organization may be used by another, either by actual transfer for continued use or as replacement off-sets, they shall be reported to the Property and Equipment Management Division (MA–422) prior to any disposal action so that such use can be properly coordinated within DOE.

§ 109–38.5103 Acquisition.

(a) Policies and procedures for the procurement of new motor vehicles, including provisions for the acquisition of additional systems, and equipment for sedans and station wagons, are set forth in FPMR 101–25.304 and 101–26.5 and DEAR 908.7101.

(b) Policies and procedures for the leasing of motor vehicles are set forth in FPMR § 101–39.601 and DEAR 908.11. The Director of Administration and heads of field offices for their respective organizations are responsible for certifying that leased passenger vehicles larger than type II (compact) are essential to the mission of the organization concerned.

Subpart 109–38.52—Aircraft

§ 109–38.5200 Scope of subpart.

This subpart establishes basic policies and procedures that apply to the management of aircraft and aircraft services, excluding aircraft owned and operated by other Federal activities for DOE.

§ 109–38.5201 Definitions.

As used in this subpart the following definitions apply:

(a) "Aircraft" means a device that is used or intended to be used for flight in the air, including: heavier than air, and lighter than air and ultra-light aircraft, gliders, helicopters, rigid and nonrigid airships, and balloons.

(b) "Chartered aircraft" are aircraft rented or hired on an intermittent basis, with or without the services of a pilot or other operating aircrew members.

(c) "Leased aircraft" are aircraft obtained on a contractual basis, for a stipulated time interval, as distinguished from intermittent charter or short-term rental.

(d) "Military aircraft" are aircraft on loan from the Department of Defense (DOD).

(e) "Pilot" is an individual possessing the required FAA credentials and meeting the qualification requirements and other criteria as required by the employing organization.

(f) "Part-time pilot" is one who is employed specifically to operate aircraft on a "when-needed" basis.

§ 109–38.5202 General.

Department-wide policies, standards, guidelines and procedures for management of aircraft and aviation services, necessary staff assistance, and general liaison with other Federal agencies are provided by the Director of Procurement and Assistance Management. Heads of field offices

must ensure that management, review, approval and accounting procedures and systems are implemented to comply with the requirements of OMB Circular A–126, "Improving the Management and Use of Government Aircraft."

§ 109–38.5203 Aircraft safety.

(a) Policy development and general overview of aircraft safety in Departmental operations is exercised by the Assistant Secretary for Policy, Safety and Environment.

(b) Aviation operations and aircraft safety standards, criteria and procedures for DOE aviation operations are established by the Assistant Secretary for Policy, Safety and Environment. Heads of field offices may establish higher safety standards, criteria and procedures when they have determined that it is necessary to assure the safety of specific operations under their jurisdiction.

§ 109–38.5204 Pilot responsibility and authority.

(a) It shall be the responsibility of the pilot to be aware of, and conform to, Federal Aviation Regulations and other requirements of the Federal Aviation Administration (FFA), Department policies and field organization directives, and the regulations and directives of other applicable authority, including those relating to use for official purposes only.

(b) The pilot is responsible for ensuring that all necessary maintenance, repairs and FAA inspections are accomplished and for determining that the aircraft is airworthy.

(c) The pilot is at all times responsible for the safe operation of his aircraft and for the safety of his crew and passengers. Insofar as the loading of the aircraft, weather, mechanical, and other safety conditions are concerned, the pilot shall have final authority for determining whether a particular flight shall be continued or terminated and how it shall be made.

§ 109–38.5205 Authority required for the acquisition, hire, or borrowing of aircraft.

§ 109–38.5205–1 Statute.

(a) In accordance with 31 USC 1343(d), authority for the buying, leasing, or hire of aircraft is contained in the annual appropriation act for DOE.

(b) The acquisition of aircraft by transfer from another Government agency shall be considered as an addition to the DOE aircraft fleet.

(c) Aircraft may not be bought, leased, or acquired by transfer or loan unless they are—

(1) Specifically authorized by the Director of Procurement and Assistance Management, pursuant to the appropriations concerned or other laws (except for temporary rentals or loans of 30 days or less);

(2) Temporary rental or loans (30 days or less) approved by the head of the field office; or

(3) Acquired from Government excess for upgrading or replacement purposes, provided: (i) That such acquisition is without reimbursement, (ii) that the aircraft can be certified as airworthy without extensive or costly modification, and (iii) that an equal number of aircraft is reported for disposal as excess within 30 days after delivery of the replacement aircraft.

§ 109–38.5206 Aircraft authorization.

(a) To assure that acquisitions do not exceed the number of aircraft authorized to be acquired in any fiscal year, the Director of Procurement and Assistance Management shall inform DOE field organizations each fiscal year of the number of aircraft which may be acquired. These authorizations shall not be exceeded.

(b) The acquisition of specific aircraft by type shall be coordinated with the Office of Operational Safety (PE–242) to assure that the selected aircraft type can perform the mission requirements safely and meet all applicable safety standards.

§ 109–38.5207 Management responsibility.

The head of each field organization having an aircraft operation shall establish procedures to ensure—

(a) That the acquisition of aircraft, including military aircraft, is centrally controlled to ensure that authorizations are not exceeded;

(b) Because of the statutory limitations on the number of aircraft which DOE may acquire, replaced aircraft must be removed from service and disposed of prior to or as soon as practicable after delivery of the replacement equipment to avoid concurrent operation of both aircraft.

(c) That each aircraft is equipped with the appropriate avionics and accessories required by its FAA type certification or military department's operators manual for the type of flight intended. Life jackets shall be provided and readily available for all occupants of aircraft or extended overwater flights as defined in Federal Aviation Regulation 1.1. Aircraft on flights into isolated areas shall be equipped with emergency rations and appropriate survival gear;

(d) Conformance with FAA requirements for the registration, certification, maintenance, and operation of aircraft, engines, and component equipment;

(e) Selection of qualified pilots and crew members and the maintenance of pilot and crew competence commensurate with job requirements;

(f) Establishment of dispatching and tracking procedures or other controls that will assure knowledge of aircraft location when operating in areas where flight plan service is not available;

(g) Overall safe, efficient, and economical operation, maintenance, utilization, and replacement of aircraft;

(h) That pooling is used as necessary to obtain maximum utilization;

(i) That contract or charter pilots are duly certified to meet all requirements and regulations established by the FAA for the particular aircraft;

(j) That chartered, leased, or rented aircraft are operated and maintained in compliance with all rules, regulations, and minimum standards of the FAA;

(k) That any charter, rental or hire of aircraft and operators shall meet the requirements of 14 CFR 135; and

(l) That DOE-owned, -leased, and borrowed aircraft are used for official purposes only and that all flight and operational personnel, including the pilots, are aware of the provisions of § 109–38.54.

§ 109–38.5208 Registration and identification.

(a) Department-owned aircraft shall be registered with the FAA. The certificate of registration shall be displayed in the aircraft in accordance with FAA requirements. A similar requirement shall be included in any arrangement for the charter, rent, hire, loan or lease of aircraft.

(b) All aircraft shall display markings as required by the Federal Aviation Regulations for registered aircraft of the United States.

§ 109–38.5209 Airworthiness.

With the exception of public use aircraft being operated under special regulations of the FAA, all aircraft shall be required to have a currently effective FAA Airworthiness Certificate appropriate to the proposed usage. This certificate shall be displayed in the aircraft. Exceptions to this requirement are: (a) Uncertified aircraft may be ferried with minimum crew when there is a written determination by the head of the field office or his designee that the aircraft is safe for flight, and (b) aircraft obtained by transfer from the Department of Defense or the U.S. Coast Guard may be ferried incident to such transfer when the aircraft has been released as airworthy for flight.

§ 109-38.5210 Maintenance.

As a minimum, all aircraft, aircraft engines, propellers, accessories, and equipment shall be maintained and serviced in accordance with FAA requirements for air carrier and non-air carrier aircraft, as appropriate, and the instructions of the manufacturer. All repairs and alterations shall be performed and approved in accordance with applicable FAA or military standards and requirements. Preventive maintenance inspections shall be made of the airframe, engine, and accessory equipment in conformance with the equipment manufacturer's recommendations and FAA or military requirements, as applicable.

§ 109-38.5211 Operation.

(a) Flight operations must comply with the Federal Aviation Regulations, and responsibility for such compliance rests with the pilot of the aircraft (§ 109-38.5204). Any special problem requiring deviation from the regulations shall be submitted through normal administrative channels to the Assistant Secretary for Policy, Safety and Environment for review and possible referral to the FAA for an appropriate waiver. Such a waiver is required for all fixed-wing aircraft engaged in low-level flying, and any change of conditions shall be reported to the responsible FAA District Office.

(b) Flight plans are required for all flights over isolated areas, and are also required for flights under visual flight rules (VFR) conditions except where the flight is of a local nature. Where normal flight plan channels are not available, the procedures as stated in § 109-38.5207(f) or other controls shall be followed that will assure current knowledge by responsible DOE or DOE contractor personnel of the aircraft's operating plan and of its arrival at destination.

(c) Aircraft, engines, and equipment shall be operated within the operating limits prescribed by the manufacturer.

(d) Adequate preflight and in-flight check lists shall be provided to, and used by, all pilots. A visual preflight inspection shall be made by the pilot before each takeoff, and any deficiency which might affect the safety of the flight shall be corrected before takeoff.

(e) All flights shall be planned and conducted so that the aircraft will arrive over its destination with a fuel reserve sufficient to reach a planned alternate destination. Flights conducted under FAA Instrument Flight Rules shall be required to conform to FAA fuel-time minimum requirements, or better.

§ 109-38.5212 Records.

As a minimum, flight, aircraft, and engine logs shall be maintained in accordance with FAA requirements, and records of operations, maintenance, and costs shall be maintained as required for management budgetary and reporting purposes. Heads of field offices shall establish requirements for other records needed.

§ 109-38.5213 Reports.

(a) Organizations operating aircraft shall complete a DOE Form 4450.1, Aircraft Cost and Operations Report, for each DOE-owned, -leased, (over 30 days) or borrowed aircraft operated during the fiscal year. The completed forms shall be submitted to the Property and Equipment Management Division (MA-422) by December 31 of each year, or upon receipt or disposal of individual aircraft.

(b) Reports shall be submitted as required by the Federal Aviation Administration, the National Transportation Safety Board, the General Services Administration, and the Assistant Secretary for Policy, Safety and Environment. Heads of field offices shall establish the requirements for other reports that may be needed for management or other purposes.

(c) All accidents involving aircraft shall be reported promptly to the National Transportation Safety Board, the Federal Aviation Administration as required, the head of the field organization concerned and the Assistant Secretary for Policy, Safety and Environment.

Subpart 109-38.53—Watercraft

§ 109-38.5300 Scope of subpart.

This subpart establishes basic policies and procedures that apply to the management of all watercraft operated by DOE organizations and contractors. The policies and procedures set forth herein are minimal, and the head of each Departmental organization operating watercraft shall issue such supplemental instructions as may be needed to ensure the effective and efficient management of watercraft.

§ 109-38.5301 Definitions.

As used in this subpart the following definitions apply:

(a) "Watercraft" means any vessel used to transport persons or material on water.

(b) "Qualified Operator" means any person who has exhibited skill in handling watercraft, knowledge of "Rules of the Road," and other basic watercraft knowledge necessary for safe and efficient operation.

(c) "Rules of the Road" means laws which govern the operation of watercraft on: (1) Great Lakes, (2) western rivers, (3) Inland, and (4) International Waters.

§ 109-38.5302 General.

Departmental-wide policies, standards, guidelines and procedures for management of watercraft are established by the Director of Procurement and Assistance Management.

§ 109-38.5303 Watercraft safety.

Policy development and general overview of watercraft safety in Departmental operations is exercised by the Assistant Secretary for Policy, Safety and Environment.

§ 109-38.5304 Watercraft operations.

(a) No person may operate a watercraft on a waterway until skill of operation, knowledge of rules of the road, and basic watercraft knowledge have been exhibited to the head of the field office. The U.S. Coast Guard Auxiliary (USCG), American Red Cross and U.S. Power Squadrons teach public courses in some locations which are applicable to small boat operations (non-commercial watercraft up to 65' overall length).

(b) Before a watercraft is put underway, the operator shall check the vessel to ensure that the necessary equipment, including personal flotation devices and lights, as required by laws applicable to the area of operation, are present, properly stowed and in proper working order. Optional equipment recommended by USCG or other competent authority shall also be included when determined to be necessary by the responsible field office.

(c) Operators shall comply with all applicable Federal, state and local laws pertaining to the operation of watercraft. Where no state boating law exists, the requirements of the Federal Boating Act of 1958, as amended, shall apply.

(d) Operators shall not use watercraft or carry passengers except in the performance of official Departmental assignments.

§ 109-38.5305 Watercraft identification and numbers.

(a) Watercraft in the custody of DOE or DOE contractors shall display identifying numbers, whether issued by the U.S. Coast Guard, state or local field office. The numbers will be in addition to Departmental property control or other identification. Numbers shall be in block form affixed to the bow section, on both sides. Numbers and/or letters shall read from left to right in

contrasting color to background not less than three (3) inches in height. When a watercraft is not registered by either the U.S. Coast Guard or state, the field organization shall assign and alpha-numeric designation, which will reflect Departmental and field office issue. Example—DOE–4560–SR. (Note: Some states specify the arrangement of numbers and letters which shall be used by Federal small boats home posted in the state's waters. Compliance with such a requirement is appropriate.)

(b) DOE is not required to have DOE-owned watercraft inspected and registered by the U.S. Coast Guard, but these services may be provided upon request.

§ 109–38.5306 Display of flags and seal.

Watercraft with overall length of twenty (20) feet or more, except barges, shall display the U.S. Ensign (National Flag). The display of the Departmental flag is optional. Location and times of display of flags shall be in accordance with accepted practice. A facsimile of the Departmental seal may also be displayed. When the seal is used it shall be placed on the superstructure in a prominent place and a size appropriate to the superstructure; except that if there is no superstructure, the seal shall be placed above the water line in the midship section of watercraft.

Subpart 109–38.54—Official Use of Motor Vehicles and Aircraft

§ 109–38.5400 Scope of subpart.

This subpart supplements FPMR Part 101–38, implements the provisions of statutes concerning the use of Government-owned, -rented or -leased motor vehicles and aircraft for official purposes and prescribes policies and procedures governing the use of such vehicles and aircraft acquired for official purposes.

§ 109–38.5401 Statutory requirement.

(a) 31 U.S.C. 1344(a) provides that, unless otherwise specifically provided, no appropriation available for any department shall be expended for the maintenance, operation, and repair of any Government-owned passenger motor vehicle or aircraft not used exclusively for official purposes. Official purposes shall not normally include the transportation of officers and employees between their domiciles and places of employment, except in cases of medical officers on outpatient medical service, and where officers and employees are performing field work which makes such transportation necessary and which has been approved by the head of the department concerned.

(b) In accordance with 31 U.S.C. 1349(b), any officer or employee of the Government who willfully uses or authorizes the use of any Government-owned motor vehicle or aircraft or any motor vehicle or aircraft leased by the Government, for other than official purposes, shall be suspended from duty by the head of the department concerned, without compensation, for not less than one month and shall be suspended for a longer period or summarily removed from office if circumstances warrant.

(c) Under the provisions of 18 U.S.C. 641, any person who knowlingly misuses any Government property (which includes Government motor vehicles) is subject to criminal prosecution and, upon conviction, to fines up to $10,000 and/or imprisonment for up to 10 years.

(d) In addition to the potential administrative sanctions and criminal prosecution cited above, 31 U.S.C. 1344 is interpreted to preclude reimbursement to Government contractors for the maintenance, operation or repair of Government-owned, -rented, or -leased passenger motor vehicles or aircraft which are used by contractor personnel for other than official purposes.

§ 109–38.5402 Policy.

All Government-owned, -rented or -leased motor vehicles and aircraft operated by DOE and its contractors shall be utilized for official purposes only, and officers, employees and contractors of the Department shall not use or authroize others to use any Government-owned, -rented or -leased motor vehicle or aircraft for other than official purposes. It should be understood that use of Government-owned, -rented or -leased motor vehicles between an employee's domicile and place of employment when adequately justified may be authorized only as an exceptional action but not as a routine occurance.

§ 109–38.5403 Official purposes.

(a) The term "official purposes" means those purposes required to carry out authorized programs, including program work carried out under contracts made pursuant to authority vested in the Department. "Official purpose" largely is a matter of administrative discretion and determination based on the particular facts of the case and the Government interest in the proposed use of the Government motor vehicle. It is the responsibility of the person authorizing or approving the use to examine the circumstances surrounding such use and assure that the facts sufficiently justify a conclusion of "official purpose."

(b) The term "field work" as used in 31 U.S.C. 1344a quoted above refers to the nature of the work performance; it is not restricted to "field service" as distinguished from "Headquarters service."

§ 109.38.5404 Approval of authorizations.

(a) The Director of Administration and heads of field offices for their respective organizations may approve the use of a Government-owned, -rented, or -leased motor vehicle between a DOE employee's domicile and place of employment. This authority may be redelegated but not below the chief administrative officer level.

(b) Heads of field offices and contracting officers shall require:

(1) Contracting officer approval for all contractor authorizations over 10 days;

(2) That contractors prescribe and issue, subject to approval by the head of the field organization or contracting officer, such local written guidelines regarding the official use of motor vehicles or aircraft and the penalties for unauthorized use as may be necessary and appropriate for particular operating situations; and

(3) That the use of Government-owned, -rented, or -leased motor vehicles or aircraft by contractor employees for transportation between places of employment and domiciles, including storage at or near such domiciles, is justified in accordance with § 109–38.5403, and that such justifications, administrative determinations, and authorizations for such use and storage by contractor employees are documented and approved at appropriate supervisory levels within the contractor's organization and by the contracting officer when required by § 109–38.5404(b)(1).

(c) The approving official shall determine whether the official duties of the employees justify a conclusion of official purpose in accordance with § 109–38.5403. All approvals and supporting documentation shall be in writing and retained for three calendar years.

§ 109–38.5405 Duration of authorizations.

An authorization to use a motor vehicle for transportation between a domicile and place of employment shall be limited to the period of actual need or 60 days, whichever is less. Requests for renewals of such authorizations shall be subject to the same justification and document retention procedures as original requests, and must also indicate what attempts were made during the

original period to eliminate the necessity for such use.

§ 109–38.5406 Use of a motor vehicle to drive to residence at start of official travel.

The use of a Government motor vehicle by an officer or employee to drive to his/her residence when it is in the interest of the Government that the employee start on official travel in the vehicle from that point, rather than from his/her place of business, is not regarded as prohibited by 31 USC 1344(a), (25. Comp. Gen. 844) or by Departmental policy.

§ 109–38.5407 Use of Government-owned or Government-furnished motor vehicles in travel status.

The use of Government-owned or Government-furnished motor vehicles by Government employees while in travel is governed by the Federal Travel Regulations (FTR 1–2.6a) and Chapter III–3 of DOE Order 1500.2 (DOE Travel Policy and Procedures Manual).

§ 109–38.5408 Use of Government-owned or-leased bus systems.

The provisions of this subpart do not affect passenger use of Government-owned or -leased bus systems (regardless of type of vehicle used in such system) established under the provisions of section 161e of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2201e).

§ 109–38.5409 Use of Government motor vehicles in emergencies.

In limiting the use of Government motor vehicles to official purposes, it is not intended to preclude their use in emergencies threatening loss of life or property (see § 109–1.5102). Such use shall be documented.

§ 109–38.5410 Use of motor vehicles by the Postal Service.

(a) Section 411 of the Postal Reorganization Act provides that executive agencies are authorized to furnish property and services to the Postal Service under such terms and conditions, including reimbursability, as the Postal Service and the agency concerned deem appropriate. Executive Order 11672 establishes a requirement for reimbursement at fair market value of such property or at a rate based on appropriate commercial charges for comparable property , as agreed to by the agency head and the Postmaster General, unless the Director of the Office of Management and Budget finds that a different basis of valuation is more equitable or better serves the public interest.

(b) Pursuant to the authority in 39 U.S.C 411, motor vehicles may be made available to the Postal Service for temporary use. The rental rate to be charged shall be the same as is charged by the General Services Administration for similar motor vehicles available from the interagency motor pool serving the geographical area involved, with appropriate allowances for any fuel and oil furnished by the Postal Service.

§ 109–38.5411 Instructions to motor vehicle operators.

Procedures shall be established to inform motor vehicle operators concerning—

(a) The statutory requirement that motor vehicles shall be used only for official purposes;

(b) Personal responsibility for safe driving and operation of motor vehicles, and for compliance with Federal, State, and local laws and regulations, and all accident reporting requirements;

(c) Protection for DOE employees under the Federal Tort Claims Act (28 U.S.C. 2671) when acting within the scope of their employment;

(d) The penalties for unauthorized use of motor vehicles;

(e) The prohibition against picking up strangers or hitchhikers, and the transportation of non-official passengers:

(f) The proper care, control and use of credit cards; and

(g) Any other duties and responsibilities assigned to motor vehicle operators with regard to use, care, operation, and maintenance of motor vehicles.

PART 109–39—INTERAGENCY MOTOR VEHICLE POOLS

Sec.

109–39.000 Scope of part.

Subpart 109–39.3—Motor Vehicle Exemptions

109–39.302 Unlimited exemptions.
109–39.303 Limited exemptions.

Subpart 109–39.4—Establishment, Modification, and Discontinuance of Motor Pools

109–39.404–3 Problems involving service or cost.
109–39.404–4 Agency requests to withdraw participation.

Subpart 109–39.6—Official Use of Government Motor Vehicles and Related Motor Pool Services

109–39.602–1 Government vehicles.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109–39.000 Scope of part.

This part implements and supplements FPMR Part 101–39 concerning the establishment and operation of interagency motor vehicle pools and systems.

Subpart 109–39.3—Motor Vehicle Exemptions

§ 109–39.302 Unlimited exemptions.

In those instances where it is determined that an unlimited exemption from inclusion of a vehicle in a motor pool system is warranted under the criteria set forth in FPMR § 101–39.302, full particulars shall be forwarded to the Property and Equipment Management Division (MA–422) for consideration and possible referral to the Administrator of General Services.

§ 109–39.303 Limited exemptions.

The procedure established in § 101–39.202 shall be followed in seeking limited exemptions under the criteria set forth in FPMR § 101–39.303.

Subpart 109–39.4—Establishment, Modification, and Discontinuance of Motor Pools

§ 109–39.404–3 Problems involving service or cost.

To resolve problems involving motor pool service or cost, the affected field or Headquarters organization shall bring the matter to the attention of the chief of the motor pool providing the vehicles. In the event a satisfactory solution does not result, full particulars shall be forwarded to the Property and Equipment Management Division (MA–422) for consideration and possible referral to the Administrator of General Services.

§ 109–39.404–4 Agency requests to withdraw participation.

Should circumstances arise at a given interagency motor pool location which tend to justify discontinuance or curtailment of participation by a DOE organization, as contemplated in FPMR § 101–39.404–4, the participating organization should forward complete details to the Property and Equipment Management Division (MA–422) for consideration and possible referral to the Administrator of General Services.

Subpart 101–39.6—Official Use of Government Motor Vehicles and Related Motor Pool Services

§ 109–39.602–1 Government vehicles.

(a) Subpart 109–38.54, Official Use of Motor Vehicles and Aircraft, prescribes DOE policies and procedures governing the official use of Government motor vehicles.

SUBCHAPTER H—UTILIZATION AND DISPOSAL

PART 109–42—PROPERTY REHABILITATION SERVICES AND FACILITIES

Sec.
109–42.000 Scope of part.
109–42.000–50 Applicability.

Subpart 109–42.3—Recovery of Precious Metals and Strategic and Critical Materials

109–42.301 General.
109–42.301–1 Guidelines for conducting agency surveys and reporting to GSA.
109–42.302 Recovery of silver from used hypo solution and scrap film.
109–42.350 Excess precious metals.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109–42.000 Scope of part.

This part implements and supplements FPMR Part 101–42, Property Rehabilitation Services and Facilities.

§ 109–42.000–50 Applicability.

The provisions of FPMR 101–42 and this part apply to contractors which generate used hypo solution, scrap film, other precious metals scrap and other recoverable scrap materials.

Subpart 109–42.3—Recovery of Precious Metals and Strategic and Critical Materials

§ 109–42.301 General.

The Director of Administration and heads of field offices for their respective organizations are responsible for establishing a program for the recovery of precious metals and strategic and critical materials in accordance with FPMR 101–42.3 and this subpart.

§ 109–42.301–1 Guidelines for conducting agency surveys and reporting to GSA.

Each DOE organization and contractor generating silver or other precious metals shall prepare the report on precious metals recovery in accordance with FPMR § 101–42.301–1, except that the reports shall be prepared on an annual basis for the fiscal year. Negative reports are required. Contractors shall submit reports to the DOE contracting office for review and approval. DOE organizations shall submit reports, including contractor reports, to the Property and Equipment Management Division (MA–422) not later than 30 days after the end of the fiscal year.

§ 109–42.302 Recovery of silver from used hypo solution and scrap film.

The Director of Administration and heads of field offices for their respective organizations are responsible for the establishment and maintenance of a program for silver recovery from used hypo solution and scrap film in accordance with FPMR § 101–42.302.

§ 109–42.350 Excess precious metals.

See § 109–43.313–54 for procedures for reporting excess precious metals to the DOE precious metals pool for recovery and subsequent redistribution within DOE.

PART 109–43—UTILIZATION OF PERSONAL PROPERTY

Sec.
109–43.000 Scope of part.
109–43.000–50 Applicability.
109–43.001–14 Personal property.

Subpart 109–43.1—General Provisions

109–43.101 Surveys.
109–43.102 Reassignment of property within executive agencies.
109–43.103 Agency utilization officials.

Subpart 109–43.3—Utilization of Excess

109–43.301–50 Policy.
109–43.302–50 Utilization and disposal by contractors.
109–43.303–1 Acquisition of mercury.
109–43.308 Property not required to be reported.
109–43.311–1–50 DOE utilization screening.
109–43.311–1–51 Procedures for effecting transfers within DOE.
109–43.311–5 Property at installations due to be discontinued.
109–43.312 Exceptions to reporting.
109–43.313–2 Printing, binding, and blankbook equipment and supplies.
109–43.313–50 Radioactively and chemically contaminated property.
109–43.313–51 Automatic data processing equipment.
109–43.313–52 Classified property.
109–43.313–53 Naval gun mounts.
109–43.313–54 Precious metals.
109–43.313–55 Shielding material.
109–43.313–56 Property in which the Government has an interest.
109–43.313–57 Lead.
109–43.315–5 Procedure for effecting transfers.
109–43.317–1 Cost of care and handling.
109–43.317–2 Proceeds.
109–43.319 Use of excess property on cost-reimbursement type contracts.
109–43.321 Certification of non-Federal agency screeners

Subpart 109–43.5—Utilization of Foreign Excess Personal Property.

109–43.503 Holding agency responsibilities.
109–43.504–50 Disposition of property not selected for return to the United States.

Subpart 109–43.47—Reports

109–43.4701 Performance reports.

Subpart 109–43.51—Utilization of Personal Property Held for Facilities in Standby

109–43.5100 Scope of subpart.
109–43.5101 Definition.
109–43.5102 Policy.
109–43.5103 Reviews to determine need for retaining items.
109–43.5104 Utilization of property in facilities in standby status.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109–43.000 Scope of part.

This part implements and supplements FPMR Part 101–43, Utilization of Personal Property.

§ 109–43.000–50 Applicability.

The provisions of FPMR Part 101–43 and this part are applicable to contractors unless otherwise provided herein.

§ 109–43.001–14 Personal property.

For the purposes of this part personal property means property of any kind or type except real and related personal property; records; special source materials, which includes source materials and special nuclear material, and those other materials to which the provisions of DOE Order 5630.2 "Control and Accountability of Nuclear Materials, Basic Principles" apply, such as deuterium, enriched lithium, neptunium 237 and tritium, and atomic weapons and byproduct materials as defined in Section 11 of the Atomic Energy Act of 1954, as amended; enriched uranium in stockpile storage; and petroleum in the Strategic Petroleum Reserve and the Naval Petroleum Reserves.

Subpart 109–43.1—General Provisions

§ 109–43.101 Surveys.

The Director of Administration and heads of field offices are responsible for continuously surveying property under their control to assure efficient use and shall promptly identify and report excess property available for use elsewhere. See 109–25.109–1 for DOE policy on the conduct of management walk-through inspection tours to identify idle and unneeded equipment.

§ 109–43.102 Reassignment of property within executive agencies.

See Chapter XI of the DOE Accounting Practices and Procedures Handbook for preparation of the feeder reports upon which the consolidated DOE report of internal property reassignments is based.

§ 109–43.103 Agency utilization officials.

The Director, Property and Equipment Management Division, Headquarters, is designated as the DOE National Utilization Officer.

Subpart 109–43.3—Utilization of Excess

§ 109–43.301–50 Policy.

It is the policy of DOE to consider excess property as the first source of supply. In no case, however, will excess property be acquired unless a present or foreseeable program need exists for the property. In carrying out this policy, the objective of which is to obtain maximum effective and economical utilization of property already owned by the Federal Government, consideration should be given to such factors as—

(a) Nature and cost of any repairs required to restore excess equipment to a safe, dependable, and economical operating condition;

(b) Duration of the job on which the equipment will be used;

(c) Economic feasibility of ownership vs. loan or rental of the equipment. Frequency of use, particularly where the equipment will be needed only infrequently, is one of the factors which must be considered in determining the most economical method of acquisition; and

(d) Handling and transportation costs involved in acquisition of excess property.

§ 109–43.302–50 Utilization and disposal by contractors.

Heads of field officers may authorize contractors to perform the functions pertaining to utilization and disposal of excess property, provided such activities are in accordance with written policies and procedures which they have approved as being consistent with this part and those contained in FPMR Part 101–45 and Part 109–45.

§ 109–43.303–1 Acquisition of mercury.

Requests for 76 pound flasks of mercury, for use by DOE or its contractors, shall be forwarded to the Director, Supply Division, Oak Ridge Operations Office, Oak Ridge, Tennessee.

§ 109–43.306 Property not required to be reported.

To the extent practicable and economical, notification of availability of nonreportable excess property (See FPMR § 101–43.312) shall be made on an informal basis to other DOE installations in the area known to use such property. If no requirement is established within a reasonable time, usually not more than 30 days after the availability of the property is announced, the property will be considered excess to the needs of the DOE and made available to GSA as provided for in FPMR Part 101–43.306.

§ 109–43.311–1–50 DOE utilization screening.

(a) Prior to reporting excess personal property to GSA as required by FPMR § 101–43.311–1, reportable property, as identified in FPMR § 101–43.4801, shall be reported to the Property and Equipment Management Division (MA–422) through the DOE Reportable Excess Automated Property System (REAPS) for completion of the 30-day DOE screening period. Information regarding REAPS reporting and screening procedures are provided in instructions and directives issued by MA–422.

(b) In exceptional cases where time does not permit formal DOE utilization screening through REAPS, notification of the availability of excess property may be made by telegram, teletype or telephone, with due consideration to the additional costs involved.

(c) Concurrent utilization screening within DOE and to other Federal agencies generally shall not be permitted.

(d) If, after DOE circularization, reportable property is desired by another Federal agency, it may be transferred as provided in FPMR § 101–43.315–5(a).

§ 109–43.311–1–51 Procedures for effecting transfers within DOE.

In accordance with instructions provided for the operation of the REAPS program, transfers between DOE organizations and contractors shall be effected by completion of an SF–122, Transfer Order Excess Personal Property. Except for those contractors authorized by the DOE contracting office to executed transfer orders, transfers to DOE contractors must be approved by the cognizant DOE contracting officer for the contractors receiving the property.

§ 109–43.311–5 Property at installations due to be discontinued.

(a) In closing out installations or any activities where it is important that upon completion of the work the personnel be released and activities ended as quickly as possible in order to avoid large expenditures, arrangements may be made for expediting the utilization and disposal of excess inventories and other excess property.

(b) Personal and real property staffs of DOE field organizations shall work with appropriate GSA regional offices to develop a utilization and disposal program which takes into consideration all the factors involved, is expedited to the maximum degree, and is mutually satisfactory and in the best overall interest of the Government. When closeout involves an activity which is not located geographically in a DOE installation, information concerning the situation shall be given to the appropriate regional administrator of GSA, as early as possible, by letter (copy to the Property and Equipment Management Division (MA–422)). The information should include the types of property available and indicate that the activity is to be discontinued, the scheduled date for the removal of personnel from the location, and the last dates when the property will be needed. The following guidelines are furnished for possible use, although variations may be used as long as agreement is reached with GSA and there is no conflict with DOE requirements except as noted in (1) below:

(1) If a proposed expedited program provides for deviation from the DOE policy or procedural requirements, approval of the Director of Procurement and Assistance Management shall be obtained.

(2) Approval of the proposed program by the appropriate GSA regional office, when deviation from existing GSA regulations is involved, will be sufficient to validate the program. A copy of the approved program should be forwarded for information to the Property and Equipment Management Division (MA–422).

(3) In developing an expedited disposal program, property shall be determined to be excess to DOE before it is reported to GSA. Concurrent circularization of lists of DOE excess property within DOE and to other Federal agencies generally is not permitted.

(4) Summary catalog listings of certain categories of excess property, such as property in classes 48, 51, 55, 56, etc., showing estimated release dates, might be furnished GSA with good utilization results. Excess property in such classes as 23, 24, 32, 34 and 38 shall normally be listed by individual item with sufficient description for ready identification.

(5) In order to obtain maximum utilization of the property by other Federal agencies, the disposal program shall provide that the field organization will furnish assistance to GSA, upon request, to arrange for invitational inspections by Federal agency representatives.

(6) Upon request, DOE can provide assistance to GSA in its circularization of reportable items to other Federal agencies or in locating potential users within the government.

(7) Care should be exercised to be sure that orders from other Federal agencies for excess property are processed through GSA, as may be

required by the GSA regional office concerned.

(8) Although it may be possible to arrange for expediting donations for educational, public health, or civil defense purposes, adequate time must be allowed for the screening of all donable property.

(9) Provisions should be made for accelerated release by GSA of excess property for disposal as surplus, particularly where there is little or no potential use by other Federal Agencies.

(10) Methods should be developed whereby last minute requests for surplus property, cataloged for an auction sale or listed in a sealed bid invitation and inspected by prospective bidders, can be kept to a minimum.

§ 109–43.312 Exceptions to reporting.

In addition to the categories of nonreportable property identified in FPMR § 101–43.312 (a) through (g), the following property, when determined excess to a DOE installation, is not reportable and shall not be formally circularized within DOE or reported to GSA—

(h) Asphalt products in less than carload (LCL) quantities (roofing tile, paving materials);

(i) Cement and fabricated cement products in LCL quantities (concrete block, pumic block, cinder block, pipe and fittings);

(j) Fabricated clay products in LCL quantities (brick, tile, pipe and fittings);

(k) Fuels in LCL quantities (gasoline, diesel fuels, coal, coke and kerosene);

(l) Special purpose or site fabricated shelving, cabinets, shop tables, etc., of limited adaptability or with high cost of disassembly or transportation;

(m) Uncrated window glass; and

(n) Equipment, parts, accessories, jigs and components, which are of special design, composition, or manufacture and which are intended for use only by specific DOE installations, such as spare parts for equipment used in atomic processes.

§ 109–43.313–2 Printing, binding, and blankbook equipment and supplies.

DOE organizations shall report excess printing, binding and blankbook equipment to the Office of Administrative Services, Headquarters, for processing in accordance with the Joint Committee on Printing Regulations.

§ 109–43.313–50 Radioactively and chemically contaminated property.

Radioactively and chemically contaminated property should be handled in accordance with § 109–45.50.

§ 109–43.313–51 Automatic data processing equipment.

Automatic data processing equipment should be handled in accordance with FPMR §§ 101–36.3 and 109–36.3.

§ 109–43.313–52 Classified property.

Classified personal property which is excess to DOE needs shall be stripped of all characteristics which cause it to be classified, or otherwise rendered unclassified prior to disposal, in accordance with instructions of the head of the field organization concerned. Declassification shall be accomplished in a manner which will preserve, so far as practicable, any civilian utility or commercial value of the property.

§ 109–43.313–53 Naval gun mounts.

When a naval gun mount obtained from the Naval Sea Systems Command, Department of the Navy, becomes excess, it may be listed, circularized, and transferred within DOE in the same manner as other excess property. However, when a naval gun mount is determined to be excess to DOE, it shall be reported to the Department of the Navy, Naval Sea Systems Command, Washington, D.C. 20360, and shall be disposed of in accordance with instructions of that Department.

§ 109–43.313–54 Precious metals.

All precious metals which become excess to current or foreseeable requirements shall be reported to the Oak Ridge Operations Office. With the exception of silver, this includes precious metals in any form, including shapes, scrap or radioactively contaminated. Only high grade nonradioactively contaminated silver should be reported, i.e., silver-bearing photo solutions, scrap film, or other low grade silver scrap should not be reported. (See § 109–27.53)

§ 109–43.313–55 Shielding material.

All excess movable shielding material of any type will be circularized within DOE using normal excessing procedures. However, prior to disposal outside DOE, the Property and Equipment Management Division (MA–422) shall be advised concerning the types and quantities which remain available.

§ 109–43.313–56 Property in which the Government has an interest.

Personal property in which the Government has an interest means: (a) Government-owned property which is available for exchange or sale, and (b) property leased with an option to purchase. Such property shall be circularized within DOE in accordance with § 109–43.311–1–50 for possible utilization whenever it is practicable to do so, considering the contract terms, cost in relation to remaining useful life, location of item, purchase option time remaining, etc.

§ 109–43.313–57 Lead.

Excess lead and lead bearing scrap, such as batteries, with the exception of radioactively contaminated lead, should be reported to the Idaho Operations Office for reclaiming and subsequent redistribution within DOE from the DOE lead bank. Only quantities of 40,000 pounds or more should be reported. The Idaho Operations Office will furnish shipping instructions upon request.

§ 109–43.315–5 Procedure for effecting transfers.

In accordance with a DOE agreement with GSA, execution of transfer orders by a DOE official is not required in those cases where heads of field offices have authorized contractors to perform this function, and GSA has been notified of such authorization. GSA regional offices will furnish the cognizant DOE field organization a copy of each transfer ordered received from contractors. This copy of the transfer order will be reviewed by the cognizant DOE field organization to determine if the contractor has been authorized to submit orders for excess property. If the contractor submitting the transfer order to the GSA regional office has not been authorized in writing to submit such orders, GSA will not honor such requests unless they are subsequently executed by an appropriate DOE official.

§ 109–43.317–1 Cost of care and handling.

DOE field organizations and contractors shall comply with the provisions of Chapter III of the DOE Accounting Practices and Procedures Handbook as they relate to billings for direct costs incurred in the transfer of excess property.

§ 109–43.317–2 Proceeds.

For DOE procedures on the handling of proceeds from transfer of excess property to another Government agency with reimbursement, see Chapter III of the DOE Accounting Practices and Procedures Handbook.

§ 109–43.319 Use of excess property on cost-reimbursement type contracts.

(b) It is DOE policy for contractors to use Government excess personal property to the maximum extent possible to reduce contract costs. However, the determination required in FPMR § 101–43.319(b) does not apply to such contracts and the acquisitions of

Government excess personal property by these contractors are not subject to the annual reporting requirements of FPMR § 101–43.4701(c). The procedures prescribed in § 109–43.315–5 for execution of transfer orders apply.

§ 109–43.321 Certification of non-Federal agency screeners.

Contracting officers shall maintain a record of the number of certified non-Federal agency screeners operating under their authority and shall immediately notify the appropriate GSA regional office of any changes in screening arrangements.

Subpart 109–43.5—Utilization of Foreign Excess Personal Property

§ 109–43.503 Holding agency responsibilities.

(a) Property which remains excess after utilization screening within the general foreign geographical area where the property is located should be reported by the accountable field office or Headquarters program organization to the Property and Equipment Management Division (MA–422) for consideration for return to the U.S. for further utilization within DOE, by other Government agencies, or for donation, based on such factors as cost, residual value, usefulness in ongoing or future programs, condition, and cost of transportation.

§ 109–43.504–50 Disposition of property not selected for return to the United States.

Property not selected for return to the United States for utilization within DOE or the Government or for donation in accordance with FPMR § 101–44.7 shall be disposed of in accordance with 109–45.5105.

Subpart 109–43.47—Reports

§ 109–43.4701 Performance reports.

(a) The DOE report of the utilization of domestic excess personal property as required in FPMR § 101–43.4701(a) is submitted to GSA by the Property and Equipment Management Division (MA–422). DOE field organizations and contractors reporting under the DOE financial reporting system should furnish this information to the Office of Controller in accordance with Chapter III of the DOE Accounting Practices and Procedures Handbook. Those activities which do not report under the DOE financial reporting system shall submit an SF 121 directly to MA–422 by November 15.

(c) The report required in FPMR § 101–43.4701(c) shall be submitted to the Property and Equipment Management Division (MA–422) within 45 days after the close of each fiscal year, in the format illustrated below. This reporting requirement does not apply to excess property acquired by management and operating contractors.

Name and address of recipient	Recipient's status	Original cost of property	Federal supply classification group

Subpart 109–43.51—Utilization of Personal Property Held for Facilities in Standby

§ 109–43.5100 Scope of subpart.

This subpart supplements FPMR Part 101–43 by providing policies and procedures for the economic and efficient utilization of personal property associated with facilities placed in standby status.

§ 109–43.5101 Definition.

"Facility in standby" is a significant segment of plant and equipment, such as a complete plant or section of a plant, which is neither "in service" or declared "excess".

§ 109–43.5102 Policy.

Procedures and practices shall assure economical and efficient utilization of property associated with facilities placed in standby status as provided for in this subpart.

§ 109–43.5103 Reviews to determine need for retaining items.

Procedures and practices shall require an initial review at the time the plant is placed in standby to determine which items can be made available for use elsewhere within the established startup criteria, periodic reviews (no less than biennially) to determine need for continued retention of property, and special reviews when a change in startup time is made or when circumstances warrant. Such procedures should recognize that: (a) Generally, equipment, spares, stores items, and materials peculiar to a plant should be retained for possible future operation of the plant, (b) where practicable, common-use stores should be removed and used elsewhere, and (c) uninstalled equipment and other personal property not required should be utilized elsewhere onsite or be disposed of as excess.

§ 109–43.5104 Utilization of property in facilities in standby status.

(a) Procedures and practices shall require that property comprising the plant in standby, to the extent consistent with program requirements reflected by the startup criteria, be considered as a source of supply prior to procurement. Such procedures should provide for: (1) Furnishing potential users and procurement officers or some other responsible screening office with listings of equipment and other significant property holdings available for loan or transfer, and (2) removal and use elsewhere of installed equipment which can be replaced or returned within the established startup criteria.

(b) In addition to the above procedures, DOE organizations and contractors should encourage informal contacts between their technical staffs and those engaged in similar work at other DOE locations for the purpose of ascertaining the availability of Government property to meet their program requirements.

PART 109–44—DONATION OF PERSONAL PROPERTY

Sec.

109–44.000 Scope of part.

Subpart 109–44.7—Donations of Property to Public Bodies

109–44.701 Findings justifying donation to public bodies

Subpart 109–44.47—Reports

109–44.4701 Reports.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109–44.000 Scope of part.

This part implements and supplements FPMR Part 101–44, Donation of Personal Property. For donation of surplus personal property in foreign areas, see § 109–45.51.

Subpart 109–44.7—Donations of Property to Public Bodies

§ 109–44.701 Findings justifying donation to public bodies.

The Director of Administration and heads of field offices for their respective organizations shall appoint officials to make findings and reviews as required in FPMR § 101–44.7.

Subpart 109–44.47—Reports

§ 109–44.4701 Reports.

The report of the donation of surplus personal property is furnished to GSA in combination with the report of the utilization of domestic excess personal property required in FPMR § 101–43.4701. See § 109–43.4701 for DOE reporting requirements.

PART 109–45—SALE, ABANDONMENT, OR DESTRUCTION OF PERSONAL PROPERTY

Sec.
109–45.000 Scope of part.

Subpart 109–45.1—General

109–45.101–50 Applicability.
109–45.103–1 Responsibilities of the General Services Administration.
109–45.103–2 Responsibilities of holding agencies.
109–45.105–3 Exemptions.

Subpart 109–45.3—Sale of Personal Property

109–45.301–50 Sales by DOE contractors.
109–45.302–50 Sales to DOE and contractor employees.
109–45.303–50 Contractor reporting of property for sale.
109–45.304–2–50 Negotiated sales and negotiated sales at fixed prices.
109–45.304–6 Reviewing authority.
109–45.304–50 Processing bids and award of contract.
109–45.304–51 Documentation.
109–45.307 Proceeds from sales.
109–45.309–50 Unserviceable property (salvage and scrap).
109–45.310 Antitrust laws.
109–45.316 Report on identical bids.

Subpart 109–45.5—Abandonment or Destruction of Surplus Property

109–45.501–1 General.
109–45.502–1 Reviewing authority.

Subpart 109–45.47—Reports

109–45.4701 Performance reports.

Subpart 109–45.50—Excess and Surplus Radioactively and Chemically Contaminated Personal Property

109–45.5001 Scope of subpart.
109–45.5002 Policy.
109–45.5003 Responsibilities.
109–45.5003–1 Development of criteria for utilization and disposal outside DOE.
109–45.5003–2 Approval of requests for utilization and disposal outside DOE.
109–45.5004 Procedures.
109–45.5004–1 Suspect personal property.
109–45.5004–2 Handled as uncontaminated equipment.

Subpart 109–45.51—Disposal of Excess Personal Property in Foreign Areas

109–45.5100 Scope of subpart.
109–45.5101 Authority.
109–45.5102 General.
109–45.5103 Definitions.
109–45.5104 Responsibilities.
109–45.5104–1 Director of Procurement and Assistance Management.
109–45.5104–2 Heads of offices in foreign areas.
109–45.5105 Disposal.
109–45.5105–1 General.
109–45.5105–2 Methods of disposal.
109–45.5106 Reports.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109–45.000 Scope of part.

This part implements and supplements FPMR 101–45, Sale, Abandonment, or Destruction of Personal Property, but does not apply to (a) properties which are sold or otherwise disposed of pursuant to special statutes, or (b) disposal of personal property in foreign areas (see § 101–45.51).

Subpart 109–45.1—General

§ 109–45.101–50 Applicability.

The provisions of FPMR 101–45 and this part are applicable to contractors authorized to dispose of surplus personal property.

§ 109–45.103–1 Responsibilities of the General Services Administration.

GSA regional offices are responsible for the conduct of sales of surplus and replacement property in the custody of DOE direct operations, except that DOE will continue to sell replacement property where trade-in offers are also involved in the transaction.

§ 109–45.103–2 Responsibilities of holding agencies.

See §§ 109–45.105–3 and 109–45.3 for policy and procedures governing the sale of personal property by DOE contractors.

§ 109–45.105–3 Exemptions.

The General Services Administration, by letter dated May 28, 1965, authorized DOE contractors to sell contractor inventory, including replacement property. This exemption is for sales of contractor inventory only. All surplus property in the custody of DOE direct operations (except replacement property where trade-in offers are involved) will be reported to GSA in accordance with FPMR § 101–45.303.

Subpart 109–45.3—Sale of Personal Property

§ 109–45.301–50 Sales by DOE contractors.

Sales of surplus contractor inventory will be made by DOE contractors when heads of field offices determine that it is in the best interests of the Government to do so.

§ 109–45.302–50 Sales to DOE and contractor employees.

(a) Employees of DOE and DOE contractors shall be afforded the same opportunity to acquire Government-owned property as is afforded the general public, provided the employees warrant in writing prior to award that they have not either directly or indirectly—

(1) Participated in the determination to dispose of the property;

(2) Participated in the preparation of the property for sale;

(3) Participated in determining the method of sale; or

(4) Obtained information not otherwise available to the general public regarding usage, condition, quality, or value of the property.

(b) Special clothing and other articles of personal equipment acquired for the exclusive use of and fitted to an individual employee, when not otherwise usable by, and in all respects excess to the needs of, the holding organization, may be sold to DOE or contractor employees at the best price obtainable in the event of termination of their employment or their permanent assignment to duties not requiring such clothing or equipment.

§ 109–45.303–50 Contractor reporting of property for sale.

GSA normally initiates sales action from the items remaining as surplus after utilization and donation screening. In order to assure no misunderstanding at GSA regional offices as to who is to perform the sale function for contractor inventory, each Standard Form 120 report forwarded to GSA shall bear a capitalized notation in a prominent place reading either "To BE SOLD BY GSA" or "NOT TO BE SOLD BY GSA" as appropriate.

§ 109–45.304–2–50 Negotiated sales and negotiated sales at fixed prices.

(a) Negotiated sales, including purchases or retentions at less than cost by the contractor, may be made when the contracting officer determines and documents that the use of this method of sale is essential to expeditious contract closeout, or is otherwise justified on the basis of circumstances enumerated below, provided that the Government's interests are adequately protected. Negotiated sales, including purchases or retentions at less than cost by the contractor, shall be at prices which are fair and reasonable and if the property was offered for competitive sale. Specific conditions justifying negotiated sales are when—

(1) No acceptable bids have been received as a result of competitive bidding under a suitably advertised sale;

(2) Property is of such small value that the proceeds to be derived would not warrant the expense of a formal competitive sale;

(3) The disposal will be to States, territories, possessions, political subdivisions thereof, or tax-supported agencies therein, and the estimated fair

market value of the property and other satisfactory terms of disposal are obtained;

(4) The specialized nature and limited use potential of the property would create negligible bidder interest;

(5) Removal of the property would result in a significant reduction in value, or the accrual of disproportionate expense in handling; or

(6) It can be clearly established that such action is in the best interests of the Government.

(b) Negotiated sales at fixed prices. When determined to be in the best interests of the Government, heads of field offices may authorize fixed-price sale of contractor inventory by DOE contractors provided (1) the reasonable recovery value of the property to be sold to any one purchaser at any one time does not exceed $1000, (2) adequate procedures for publicizing such sales have been established, (3) the sales prices are not less than could reasonably be expected if competitive bid sales were employed and the prices have been approved by a reviewing authority designated by the heads of field offices, and (4) the warranty prescribed in § 109–45.302–50(a) is obtained when sales are made to employees.

§ 109–45.304–6 Reviewing authority.

The reviewing authority required under FPMR § 101–45.304–6 may consist of one or more persons designated by the head of the field office who will be responsible for providing an adequate and independent review of proposed sales for the purpose of determining whether—

(a) The method of sale is in accordance with established policies and procedures; and

(b) Proceeds constitute a reasonable return for the property sold.

§ 109–45.304–50 Processing bids and award of contract.

The procedures established in Federal Acquisition Regulation 14.4 and DEAR 914.4 shall be made applicable to execution, receipt, safeguarding, opening, abstracting, and evaluation of bids and awarding contracts, except that in evaluating bids and awarding contracts, disposal under conditions most advantageous to the Government based on high bids received shall be the determining factor. For mistakes in bids, see FPMR 101–45.6.

§ 109–45.304–51 Documentation.

Files pertaining to sales shall contain copies of all documents necessary to provide a complete record of the transaction and as a minimum shall include the following:

(a) A copy of request for proposals if written proposals are employed.

(b) A list of prospective bidders contacted.

(c) An abstract of proposals received, whether oral or written.

(d) Copies of written proposals or confirming proposals received, including Standard Forms 119 (see FPMR § 101–45.313–9) which have been received from prospective bidders, together with other relevant information.

(e) A notation concerning basis for determination that proceeds constitute a reasonable return for property sold.

(f) Full and adequate justification for not advertising for competitive bids when the fair market value of property sold in this manner in any one case exceeds $1,000.

(g) A notation concerning any award made to other than the high bidder.

(h) The approval of reviewing authority when required.

(i) A copy of notice of award.

(j) All related correspondence.

(k) In the case of auction or spot bid sales, the following additional information should be included:

(1) A list of items or lots sold indicating book cost and sales price for each item or lot sold.

(2) A copy of advertising literature distributed to prospective bidders.

(3) A summary listing of advertising by means of newspapers, radio, television, public posting, etc.

(4) The names of prospective bidders who attended sale if list was made.

(5) A copy of any pertinent contract for auctioneering services and related documents or appropriate reference to files containing such documents.

(6) A record of deposits and payments made or appropriate reference to files containing such records.

§ 109–45.307 Proceeds from sales.

DOE installations shall comply with the provisions of Chapter IV of the DOE Accounting Practices and Procedures Handbook.

§ 109–45.309–50 Unserviceable property (salvage and scrap).

(a) A continuous cleanup program shall be maintained at all DOE installations to locate, efficiently handle, and promptly dispose of unserviceable property (salvage and scrap). Property inventories and construction, wrecking, dismantling and other projects which might produce scrap, should be regularly reviewed, particularly for metals and other items which offer potential as marketable materials and for economic returns to the Government. (See FPMR Part 101–42 and Part 109–42 for recovery of precious metals and reporting requirements.)

(b) Scrap metals shall be segregated to the maximum economical extent consistent with good industrial practice.

(c) Scrap metal which is contaminated with radioactive material and/or chemically hazardous materials shall be segregated and appropriately marked at the source as to type and degree of contamination and shall be controlled and disposed of in accordance with application regulations. (See Subpart 109–45.50).

§ 109–45.310 Antitrust laws.

Selling organizations shall submit to the Office of the General Counsel, with a copy of the Director of Procurement and Assistance Management, the report on proposed sales of surplus personal property with an acquisition cost of $3,000,000 or more, or a patent, process, technique, or invention, regardless of cost. Information to be included is contained in FPMR § 101–45.310.

§ 109–45.316 Report on identical bids.

Selling organizations shall forward the report on identical bids required by FPMR § 101–45.316 to the Office of the General Counsel, with a copy of the Director of Procurement and Assistance Management.

Subpart 109–45.5—Abandonment or Destruction of Surplus Property

§ 109–45.501–1 General.

(a) The finding required by FPMR § 101–45.501–1(a) that property has no commercial value or the estimated cost of its continued care and handling would exceed the estimated proceeds from its sale shall be in writing and shall be made by an official designated by the head of the field office concerned.

§ 109–45.501–2 Reviewing authority.

The head of the field office concerned with the reviewing authority for approval to abandon or destroy property with an acquisition cost of more than $1,000.

Subpart 109–45.47—Reports

§ 109–45.4701 Performance reports.

The report of the sale or other disposition of surplus personal property is furnished to GSA in combination with the report of the utilization of domestic excess personal property required in FPMR § 101–43.4701. See § 109–43.4701 for DOE reporting requirements.

Subpart 109–45.50–Excess and Surplus Radioactively and Chemically Contaminated Personal Property

§ 109–45.5001 Scope of subpart.

This subpart sets forth policies and procedures for the utilization and disposal outside of DOE of excess and surplus personal property which has been radioactively or chemically contaminated.

§ 109–45.5002 Policy.

When the holding organization determines it is appropriate to dispose of contaminated personal property, such contaminated personal property shall be disposed of by DOE in accordance with appropriate Federal regulations governing radiation/chemical exposure to the public and contamination in the environment. In special cases where Federal regulations do not exist or apply, appropriate national consensus standards shall be used.

§ 109–45.5003 Responsibilities.

§ 109–45.5003–1 Development of criteria for utilization and disposal outside DOE.

The Assistant Secretary for Policy, Safety and Environment (PE–241) has responsibility for the development of criteria for utilization and disposal of excess and surplus radioactively and chemically contaminated personal property outside of DOE.

§ 109–45.5003–2 Approval of requests for utilization and disposal outside DOE.

Requests for utilization and disposal outside DOE shall be forwarded to the Director of Procurement and Assistance Management for approval and coordination with PE–241.

§ 109–45.5004 Procedures.

§ 109–45.5004–1 Suspect personal property.

(a) Each excess item of personal property (including scrap), having a history of use in an area where exposure to radioactively or chemically contaminated materials may occur, shall be considered suspect and shall be monitored using appropriate instruments and techniques by qualified personnel of the DOE office or contractor generating the excess.

(b) Prior to utilization or disposal outside DOE, with due consideration to the economic factors involved, every effort shall be made to reduce the level of contamination of items of excess or surplus property to the lowest practicable level.

(c) If contamination is suspect and the property is of such size, construction, or location as to make the contamination inaccessible for the purpose of measurement, such property shall not be utilized or disposed of outside DOE through normal channels.

§ 109–45.5004–2 Handled as uncontamination equipment.

If monitoring of suspect equipment indicates that the contamination does not exceed applicable standards, it may be utilized and disposed of in the same manner as uncontaminated equipment, provided the guidance in § 109–45.5004–1(b) has been considered. However, recipients shall be advised where levels of radioactive contamination require specific controls for shipment as provided in Department of Transportation Regulations for shipment of radioactive materials (49 VFR Parts 171–179, inclusive). In addition, when any contaminated equipment is circularized within DOE, reported to GSA, or otherwise disposed of, the kind and degree of contamination must be plainly indicated on all pertinent documents.

Subpart 109–45.51—Disposal of Excess Personal Property in Foreign Areas

§ 109–45.5100 Scope of subpart.

This subpart sets forth policies and procedures governing the disposal of DOE-owned foreign excess and surplus personal property.

§ 109–45.5101 Authority.

The policies and procedures contained in this subpart are issued pursuant to the provisions of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 471). Title IV of that Act entitled "Foreign Excess Property" provides that, except where commitments exist under previous agreements, all excess property located in foreign areas shall be disposed of by the owning agency, and directs that the head of such agency conform to the foreign policy of the United States in making such disposals.

§ 109–45.5102 General.

Disposal of Government-owned property in the custody of DOE organizations or its contractors in foreign areas shall be made in an efficient and economical manner, and in conformance with the foreign policy of the United States.

§ 109–45.5103 Definitions.

As used in this subpart, the following definitions apply:

(a) "Foreign" means outside the United States, Puerto Rico, American Samoa, Guam, the Trust Territory of the Pacific Islands, and the Virgin Islands.

(b) "Foreign service post" means the local diplomatic or consular post in the area where the excess property is located.

§ 109–45.5104 Responsibilities.

§ 109–45.5104–1 Director of Procurement and Assistance Management.

The Director of Procurement and Assistance Management develops and interprets policies, principles, and general procedures for the disposal of excess property in foreign areas.

§ 109–45.5104–2 Heads of offices in foreign areas.

Heads of DOE foreign offices—

(a) Are authorized to handle foreign excess disposal matters in accordance with Title IV, "Foreign Excess Property" of the Federal Property and Administrative Services Act of 1949, as amended and this subpart;

(b) Shall refer to the Property and Equipment Management Division (MA–422), any requests for advice or approval of the State Department on proposed disposals of excess property in foreign areas for review, coordination and handling through appropriate channels; and

(c) Shall approve the exchange or lease of foreign excess property when in their opinion such action is clearly in the best interest of the Government as provided in § 109–45.5105–2(b).

§ 109–45.5105 Disposal.

§ 109–45.5105–1 General.

(a) Foreign excess property which is not required for transfer within DOE or to other U.S. Government agencies shall be considered surplus and may be disposed of by transfer, sale, exchange, or lease, for cash, credit, or other property and upon such other terms and conditions as may be deemed proper. Such property may also be donated, abandoned, or destroyed under the conditions specified in § 109–45.5105–2(c). Most foreign governments have indicated to the State Department that they wish to be consulted before U.S. Government property is disposed of in their countries (except in the case of transfers to other U.S. Government agencies). Matters concerning customs duties and taxes, or similar charges, may require prior agreement with the foreign government involved. The State Department shall be contacted in regard to these problems. Whenever advice or approval of the State Department is required by this subpart, it may be obtained either through the foreign service post in the foreign area involved or from the State Department in

Washington, D.C. If the problem is to be presented to the State Department in Washington, D.C., it shall be referred through appropriate administrative channels to the Director of Procurement and Assistance Management, for review, coordination and handling.

(b) Foreign excess property which is not transferred for use may be transferred to other U.S. Government agencies for disposal. This procedure may often prove advantageous, particularly when only small amounts of property are involved or when personnel of the other agencies are generally engaged in disposal activities.

§ 109–45.5105–2 Methods of disposal.

(a) Sales of foreign excess shall be conducted in accordance with the following guidelines:

(1) Generally, all sales of surplus foreign excess property shall be conducted under the competitive bid process unless it is advantageous and more practicable to the Government not to do so. When competitive bids are not solicited, reasonable inquiry of prospective purchasers shall be made in order that sales may be made on terms most advantageous to the U.S. Government.

(2) In no event shall any property be sold in foreign areas without a condition which states that its importation into the United States is forbidden unless the U.S. Secretary of Agriculture (in the case of any agricultural commodity, food, or cotton or woolen goods), or the U.S. Secretary of Commerce (in the case of any other property), determines or has determined that the importation of such property would relieve domestic shortages or otherwise be beneficial to the economy of the United States.

(3) Sales documents shall provide that the purchaser must pay any import duties or taxes levied against property sold in the country involved and further provide that the amount of this duty or tax shall not be included as a part of the price paid the U.S. Government for the property. In the event the levy is placed upon the seller by law, the buyer will be required to pay all such duties or taxes and furnish the seller copies of his receipt prior to the release of the property to him. However, if the foreign government involved will not accept payment from the buyer, the seller will collect the duties or taxes and turn the amounts collected over to the foreign government. Accounting for the amounts collected shall be coordinated with the disbursing officer of the nearest United States foreign service post. The property shall not be released to the purchaser until the disposal officer is satisfied that there is no responsibility for payment by the United States (as contrasted to collection by the United States) of taxes, duties, excises, etc.

(4) Certain categories of property, including small arms and machine guns; artillary and projectiles; ammunition, bombs, torpedoes, rockets and guided missiles; fire control equipment and range finders; tanks and ordnance vehicles; chemical and biological agents, propellents and explosives; vessels of war and special naval equipment; aircraft and all components, parts and accessories for aircraft; military electronic equipment; aerial cameras, military photo-interpretation, stereoscopic plotting and photogrammetry equipment; and all material not enumerated which is classified from the standpoint of military security (United States Munitions List, 22 CFR 121.01), are subject to restrictions as to disposal. Advance approval must be obtained from the State Department for the sale of all such articles. Therefore, prior to the sale of any of the articles enumerated in the U.S. Munitions List, the foreign service post in the area shall be consulted.

(5) Prior to the sale of property which had a total acquisition cost of $250,000 or more, plans for such sale shall be reported to the Property and Equipment Management Division (MA–422) in ample time to allow considerations of possible foreign policy aspects and advice thereon from the State Department. (See § 109–45.5106(a)). All proposed sales, regardless of the total acquisition cost of the property involved, which the head of the DOE foreign office believes might have a significant effect on the economic or political situation in a particular area, shall be discussed with the foreign service post.

(b) While there is authority for exchange or lease of foreign surplus property, such authority shall be exercised only when such action is clearly in the best interests of the U.S. Government. Disposals by exchange are subject to the same requirements as disposals by sale under § 109–45.5105–2(a).

(c) Foreign excess or surplus property (including waste, salvage, and scrap) may be donated, abandoned, or destroyed provided (1) the property has no commercial value, or the estimated cost of its care and handling would exceed the estimated proceeds from its sale, and (2) a written finding to that effect is made and approved by the head of the DOE foreign office. No property shall be abandoned or destroyed if donation is feasible. Donations under these conditions may be made to any agency of the U.S. Government, or to educational, public health or charitable nonprofit organizations of governments. Foreign excess property may also be abandoned or destroyed when such action is required by military necessity, safety, or considerations of health or security. A written statement explaining the basis for disposal by this means and approval by the head of the DOE foreign office is required. Property shall not be abandoned or destroyed in a manner which is detrimental or dangerous to public health and safety, or which will cause infringement on the rights of other persons.

§ 109–45.5106 Reports.

(a) Proposed sales of foreign excess property having an acquisition cost of $250,000 or more reported to the Property and Equipment Management Division (MA–422) should present all pertinent data, including the following:

(1) The description of property to be sold, including—

(i) Identification of property (description should be in terms understandable to persons not expert in technical nomenclature); property covered by the Munitions List and regulations pertaining thereto (as published in 22 CFR 121.01) should be clearly indicated;

(ii) Quantity;

(iii) Condition; and

(iv) Acquisition cost.

(2) The proposed method of sale (i.e., bid, negotiated sale, etc.).

(3) Any currency to be received and payment provisions (i.e., U.S. dollars, foreign currency, or credit, including terms of proposed agreement).

(4) Any restrictions on use of property to be sold (such as retransfer of property, disposal as scrap, demilitarization, etc.).

(5) Any special terms.

(6) The categories of prospective purchasers (e.g., host country, other foreign countries, special qualifications, etc.).

(7) How taxes, excises, duties, etc. will be handled.

(b) Instructions for reporting foreign excess utilization and disposal transactions are contained in Chapter III of the DOE Accounting Practices and Procedures Handbook.

PART 109–46—UTILIZATION AND DISPOSAL OF PERSONAL PROPERTY PURSUANT TO EXCHANGE/SALE AUTHORITY

Sec.

109–46.000 Scope of part.
109–46.000–50 Applicability.

Subpart 109–46.4—Disposal

109–46.406 Records.
109–46.407 Records.

Authority: Sec. 644, Pub. L. 95–91, Stat. 599 (42 U.S.C. 7254).

§ 109–46.000 Scope of part.

This part implements and supplements FPMR Part 101–46.

§ 109–46.000–50 Applicability.

Except as set forth below, the requirements of FPMR Part 101–46 and this part are not applicable to DOE contractors. Contractors shall comply with the following requirements:

FRMR § 101–46.201
FPMR § 101–46.202(a)
FPMR § 101–46.202(d) (1), (4), (5), (6), (7), and (10)
FPMR § 101–46.202(e)
FPMR § 101–46.401
DOE–PMR § 109–46.406

Subpart 109–46.4—Disposal

§ 109–46.406 Records.

Contractor shall prepare and maintain such records as will show full compliance with the applicable provisions of FPMR Part 101–46.

§ 109–46.407 Reports.

The report of exchange/sale transactions required by FPMR § 101–46.407 shall be submitted through normal administrative channels to the Property and Equipment Management Division (MA–422) within 60 days after the close of the fiscal year. Negative reports are required.

PART 109–48—UTILIZATION, DONATION, OR DISPOSAL OF ABANDONED AND FORFEITED PERSONAL PROPERTY

Sec.
109–48.000 Scope of part.
109–48.001–50 Applicability.

Subpart 109–48.1—Utilization of Abandoned and Forfeited Personal Property

109–48.101–6 Transfer to other Federal agencies.
109–48.102–4 Proceeds.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109–48.000 Scope of part.

This part implements and supplements FPMR Part 101–48, Utilization, Donation, or Disposal of Abandoned and Forfeited Personal Property.

§ 109–48.001–50 Applicability.

The provisions of FPMR 101–48 and this part are applicable to contractor operations where the abandoned or forfeited personal property is found on premises owned or leased by the Government.

Subpart 109–48.1—Utilization of Abandoned and Forfeited Personal Property

§ 109–48.101–6 Transfer to other Federal agencies.

(d) Transfer orders covering requests for transfers of forfeited or voluntarily abandoned distilled spirits, wine and malt beverages for medicinal, scientific or mechanical purposes shall be forwarded through normal administrative channels for signature by the Property and Equipment Management Division (MA–422) and for subsequent forwarding to GSA for release.

§ 109–48.102–4 Proceeds.

After retention of any monies received from disposal of abandoned or forfeited property for the three-year period specified in FPMR § 101–48.102–4 with no claim being filed, such monies shall be deposited as provided in Chapter IV of the DOE Accounting Practices and Procedures Handbook.

PART 109–50—PROGRAMMATIC DISPOSAL OF DOE PROPERTY

Sec.
190–50.000 Scope of part.
190–50.001 Applicability.

Subpart 109–50.1—General

190–50.101 Authority.

Subpart 109–50.3—Used Energy-Related Laboratory Equipment Grant Program

190–50.300 Scope of part.
190–50.301 Applicability.
190–50.302 General.
190–50.303 Authority.
190–50.304 Definitions.
190–50.305 Responsibilities and authorities.
190–50.305–1 Director of Procurement and Assistance Management.
190–50.305–2 Director, Office of Field Operations Management, Office of Energy Research.
190–50.305–3 Heads of field offices.
190–50.305–4 Contracting officers.
190–50.305–5 Excess used energy-related laboratory equipment holding organizations.
190–50.305–6 Screening locations.
190–50.306 Types of equipment which may be granted.
190–50.307 Types of equipment which may not be granted.
190–50.308 Procedure.
190–50.309 Reports.
190–50.310 Screening locations.

Subpart 109–50.4—Programmatic Disposal to Contractor of DOE Property in a Mixed Facility

190–50.400 Scope of subpart.
190–50.401 Definitions.
190–50.402 Responsibilities and authorities.
190–50.402–1 Director of Procurement and Assistance Management.
190–50.402–2 Heads of Headquarters program organizations.
190–50.402–3 Heads of field offices and contracting officers.
190–50.403 Programmatic disposal of DOE property in mixed facilities.
190–50.403–1 Submission of proposals.
190–50.403–2 Need to establish DOE program benefit.
190–50.404 Notification.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109–50.000 Scope of part.

This part provides guidance on the authorities, policies, and procedures for the disposal of DOE property for programmatic purposes.

§ 109–50.001 Applicability.

The provisions of this Part 109–50 apply to direct DOE operations, but do not apply to contractors unless specifically provided in the appropriate subpart.

Subpart 109–50.1—General

§ 109–50.101 Authority.

Programmatic disposals of DOE property generally are made under the authority and subject to the provisions of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2011), the Energy Reorganization Act of 1974 (42 U.S.C. 5801), the Department of Energy Organization Act (42 U.S.C. 7101), and other special laws which provide authority for DOE program activities.

§ 109–50.300 Scope of subpart.

This subpart provides guidance on the granting of used, energy-related laboratory equipment to universities and colleges and other nonprofit educational institutions of higher learning in the United States for use in energy-oriented educational programs.

§ 109–50.301 Applicability.

This subpart is applicable to direct operations and to contractors.

§ 109–50.302 General.

DOE, to encourage research in the field of energy, awards grants of used energy-related laboratory equipment to eligible institutions for use in energy-oriented educational programs. Under the Used Energy-Related Laboratory Equipment Grant Program, grants of used energy-related equipment excess to the requirements of DOE offices and contractors may be made to eligible institutions prior to reporting the equipment to GSA for utilization.

§ 109–50.303 Authority.

The used Energy-Related Laboratory Equipment Grant Program is conducted under the authority of Article 31 of the Atomic Energy Act of 1954, as amended, section 103, paragraph 10, of the Energy Reorganization Act of 1974, and Title III of the Department of Energy Organization Act.

§ 109–50.304 Definitions.

As used in this subpart the following definitions apply:

(a) "Book value" means acquisition cost less depreciation.

(b) "Eligible institution" means any nonprofit educational institution of higher learning, such as universities, colleges, junior colleges, hospitals, and technical institutes or museums located in the United States and interested in establishing or upgrading energy-oriented educational programs.

(c) "Energy-oriented education program" means one that deals partially or entirely in energy or energy-related topics.

(d) "DOE Financial Assistance Rules" (10 CFR Part 600) is the Department of Energy directive which establishes a uniform administrative system for application, awards, and administration of assistance awards, including grants and cooperative agreements.

§ 109–50.305 Responsibilities and authorities.

§ 109–50.305–1 Director of Procurement and Assistance Management.

The Director of Procurement and Assistance Management establishes policies and procedures for the award and administration of grants.

§ 109–50.305–2 Director, Office of Field Operations Management, Office of Energy Research.

The Director, Office of Field Operations Management, Office of Energy Research—

(a) Has program responsibility for the Used Energy-Related Laboratory Equipment Grant Program;

(b) Issues general instructions and information on the program to institutions;

(c) Reviews and, where appropriate, approves requests from institutions for used equipment where the book value of an item of equipment exceeds $100,000 or where the cumulative book value of used equipment grants to any one institution exceeds $100,000; and

(d) Issues annual summary reports of equipment granted under this program to field and Headquarters organizations. Advises when grants to individual institutions approach the $100,000 book value coumulative limit.

§ 109–50.305–3 Heads of field offices.

Heads of field offices shall establish procedures for review and evaluation of equipment grant proposals in accordance with this subpart.

§ 109.50.305–4 Contracting officers.

Contracting Officers—

(a) Award energy-related laboratory equipment grants under this program in accordance with the DOE Financial Assistance Rules and program instructions issued by the Director, Office of Energy Research and this subpart;

(b) Forward a copy of each approved and accepted grant to the Office of Energy Research; and

(c) Forward to the Office of Field Operations Management, Office of Energy Research, for approval prior to award of grant, requests from institutions for used equipment where the book value of the equipment exceeds $100,000 or where the cumulative book value of grants to an institution exceeds $100,000.

§ 109–50.305–5 Excess used energy-related laboratory equipment holding organizations.

Each DOE and contractor organization holding excess used energy-related laboratory equipment shall forward copies of excess reports (SF–120) to screening locations cited in § 109–50.310 after DOE screening through the REAPS program (See § 109–43.311–150).

§ 109–50.305–6 Screening locations.

Organizations designated in § 109–50.310 shall retain current files of reports of excess used energy-related laboratory equipment for review by eligible institutions.

§ 109–50.306 Types of equipment which may be granted.

Examples of types of equipment which may be granted under the Used Energy-Related Laboratory Equipment Grant Program are listed below. These examples are merely illustrative and not inclusive.

—Radiation detectors, monitors, scalers, and counters
—Nuclear reactors and accelerators
—Neutron howitzers and generators
—Critical and subcritical assemblies
—Bubble and cloud chambers
—Dosimerters, survey meters, radiometers, and spectroscopes
—Radiation shields and reactor associate components
—Mass spectrometers, infrared spectrometers, and ultraviolet spectrometers
—Gas and liquid chromatographs
—Ammeters, voltmeters, electrometers
—Linear and pulse-height analyzers
—Power supplies
—Catalyst test units
—Distillation columns
—Temperature and pressure recorders
—Ion control gauges
—Gas tracers and analyzers
—Solar collectors and heliometers

§ 109–50.307 Types of equipment which may not be granted.

Types of equipment which will not be granted include.

(a) Any equipment determined to be required by DOE direct operations or DOE contractors;

(b) General supplies, such as Bunsen burners, hoods and work benches; furniture; office equipment, such as typewriters, adding machines, and duplicating machines; drafting and office supplies; refrigerators; tools; presses, lathes, furnaces, hydraulic and mechanical jacks, cranes and hoists; and computing equipment; or

(c) Any equipment which has been obtained as excess from another Federal agency.

§ 109–50.308 Procedure.

(a) After completion of DOE utilization screening, copies of excess reports (SF 120) of used energy-related laboratory equipment will be forwarded by each holding organization to the sites listed in § 109.50.310 for use by eligible institutions in reviewing and earmarking specific equipment. These reports will be separately prepared and identified with the caption "Used Energy-Related Laboratory Equipment."

(b) The following periods have been established during which time equipment will remain available to this program prior to reporting it to the General Services Administration for utilization by other Federal agencies:

(1) Sixty days from the date DOE utilization screening is completed and the report is issued to screening locations, to permit suitable time for eligible institutions to review and earmark the desired equipment.

(2) An additional sixty days after the equipment is earmarked to permit the eligible institutions to prepare and submit an equipment proposal request and to provide time for field organizations to review and evaluate the proposal and take appropriate action.

(c) Upon approval of the proposal, the issuance of the grant instrument and acceptance by the institution are deemed to constitute transfer of title.

(d) A Standard Form 120, accompanied by a copy of the completed grant, shall be used to drop accountability of the granted equipment from the financial records.

(e) The cost of care and handling of property incident to the grant shall be charged to the receiving institution. Such costs may consist of packing, crating, shipping and insurance, and are limited to actual costs. In addition, where appropriate, the cost of any repair and/or modification to any equipment shall be borne by the recipient institution.

§ 109–50.309 Reports.

(a) In addition to the copy of the awarded grant required to be forwarded in accordance with § 109–50.305–4(b), each awarded grant shall be reported in the Procurement Assistance Data System.

(b) Heads of field offices shall include grants made under this program in the annual report of property transferred to non-Federal recipients, as required by FPMR § 101–43.4701(c).

§ 109–50.310 Screening locations.

The locations shown on the following pages shall retain current files of SF–120s, reports of excess used energy-related laboratory equipment, for review by eligible institutions. After completion of DOE utilization screening through REAPS, DOE activities shall forward copies of SF 120s covering used energy-related laboratory equipment to these locations.

Subpart 109–50.4—Programmatic Disposal to Contractor of DOE Property in a Mixed Facility

§ 109–50.400 Scope of subpart.

This subpart contains guidance to be followed when it is proposed to sell or otherwise transfer DOE personal property located in a mixed facility to the contractor who is the operator of that facility.

§ 109–50.401 Definitions.

As used in this subpart, the following definitions apply:

(a) "DOE property" is the DOE-owned personal property in a mixed facility.

(b) "Contractor" is the operator is the operator of the mixed facility.

(c) "Mixed facility" is a partly DOE-owned and partly contractor-owned facility. For purposes of this subpart, however, this definition does not apply to such a facility operated by an educational or other nonprofit institution under a basic research contract with DOE.

§ 109–50.402 Responsibilities and authorities.

§ 109–50.402–1 Director of Procurement and Assistance Management.

The Director of Procurement and Assistance Management is authorized to approve proposals for the programmatic disposal of DOE personal property in a mixed facility to the contractor operating that facility.

§ 109–50.402–2 Heads of Headquarters program organizations.

Heads of Headquarters program organizations shall review and forward to the Property and Equipment Management Division (MA–422) for approval, proposals for programmatic disposal of DOE personal property in a mixed facility to the contractor operating that facility.

§ 109–50.402–3 Heads of field offices and contracting officers.

Heads of field offices and contracting officers shall submit proposals involving programmatic disposals of DOE property in mixed facilities through appropriate administrative channels to the cognizant Headquarters program organization for review and forwarding for approval.

§ 109–50.403 Programmatic disposal of DOE property in mixed facilities.

§ 109–50.403–1 Submission of proposals.

Proposals involving programmatic disposals for DOE personal property in mixed facilities to contractors operating the facility shall be forwarded through the appropriate program organization to the Property and Equipment Management Division (MA–422) for review and processing for approval. Each such request for review and approval shall include all information necessary for a proper evaluation of the

proposal. The proposal shall include, as a minimum—

(a) The purpose of the mixed facility;

(b) The character, condition and present use of the DOE property involved, as well as its acquisition cost, accumulated depreciation, and net book value;

(c) The programmatic benefits which would acrue to DOE from the disposal to the contractor (including the considerations which become important if the disposal is not made);

(d) The appraised value of the DOE property (preferably by independent appraisers); and

(e) The proposed terms and conditions of disposal (covering for example, (1) price, (2) priority to be given work for DOE requiring the use of the transferred property, and including the basis for any proposed charge to DOE for amortizing the cost of plant and equipment items, (3) recapture of the property if DOE foresees a possible future urgent need, and (4) delivery of the property, whether "as is-where is," etc.).

§ 109–50.403–2 Need to establish DOE program benefit.

When approval for a proposed programmatic disposal of DOE personal property in a mixed facility is being sought, it must be established that the disposal will benefit a DOE program. For example, approval might be contingent on a showing that—

(a) The entry of the contractor as a private concern into the energy program is important and significant from a programmatic standpoint; and

(b) The sale of property to the contractor will remove obstacles which otherwise discourage his entry into the field.

§ 109–50.404 Notification.

The Under Secretary will be advised prior to any disposal which is considered sensitive.

SUBCHAPTER I—INDUSTRIAL PLANT EQUIPMENT

PART 109–51—LOANS OF INDUSTRIAL PLANT EQUIPMENT FROM THE DEFENSE INDUSTRIAL PLANT EQUIPMENT CENTER

Sec.

109–51.000 Scope of part.
109–51.001 Policy.
109–51.002 Memorandum of Agreement.
109–51.003 General provisions.
109–51.004 DIPEC Handbook.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109–51.000 Scope of part.

This part prescribes the policy and conditions for loans of industrial plant equipment (IPE) from the Department of Defense General Reserve under the management of the Defense Industrial Plant Equipment Center (DIPEC) and makes reference to the DOE DIPEC Handbook which prescribes procedures for arranging loans of IPE from DIPEC.

§ 109–51.001 Policy.

Since loan of DIPEC equipment is at no cost, except for packing, crating, handling, and transportation charges, DOE field organizations and contractors are encouraged to use DIPEC as a source of industrial plant equipment in lieu of purchasing such equipment.

§ 109–51.002 Memorandum of Agreement.

An agreement between DOE and the Defense Logistics Agency establishes the policies, procedures and conditions by which DOE may obtain loans of IPE from DIPEC. (Exhibit A of the DIPEC Handbook).

§ 109–51.003 General provisions.

(a) DOE field organizations and contractors may requisition IPE on a loan basis for periods up to five years. The IPE loan period may be extended on mutual agreement between DIPEC and the DOE field office involved.

(b) DOE has a 30-day period to accept or reject IPE placed on hold by DIPEC.

(c) DOE field organizations or contractors will pay costs of transportation, dismantling, crating and handling of IPE from and to DOD.

(d) On completion of the loan period, the DOE field organization or contractor shall return the DIPEC–IPE in the same condition as received except for fair wear and tear.

(e) DOE is required under terms of the agreement to decontaminate IPE prior to return or replace the equipment with an equivalent item.

§ 109–51.004 DIPEC Handbook.

The DIPEC Handbook is available through field organizations or by request to the Property and Equipment Management Division (MA–422). The Handbook cites the procedures for arranging loan of IPE, illustrates the forms used and provides a bibliography of DIPEC publications which list the available IPE by type of equipment and by DIPEC control numbers.

SUBCHAPTER K—GOVERNMENT PROPERTY IN THE POSSESSION OF OFF-SITE CONTRACTORS

PART 109–60—MANAGEMENT OF GOVERNMENT PROPERTY IN THE POSSESSION OF OFF-SITE CONTRACTORS

Sec.

109–60.000 Scope and applicability of part.
109–60.001 Definitions.

Subpart 109–60.1—Contractor's Responsibility

109–60.100 General.
109–60.101 Assumption of responsibility.
109–60.102 Contractor's liability.
109–60.103 Segregation of Government property.
109–60.104 Physical protection of property.
109–60.105 Control of sensitive items of property.
109–60.106 Disposition.
109–60.107 Relief from responsibility.

Subpart 109–60.2—Records and Financial Reports

109–60.200 General.
109–60.201 Unit Cost.
109–60.202 Records of plant and capital equipment.
109–60.203 Records of material maintained in stores.
109–60.204 Records of material issued upon receipt.
109–60.205 Financial property control reports.
109–60.206 DOE plant and equipment asset types.

Subpart 109.60–3—Identification

109.60.300 General

Subpart 109–60.4—Physical Inventories

109–60.400 General.
109–60.401 Frequency.
109–60.402 Reporting results of inventories.
109–60.403 Records of inventories.
109–60.404 Inventories upon termination or completion.

Subpart 109.3–60.5—Care and Maintenance

109–60.500 General.
109–60.501 Contractor's maintenance program.

Subpart 109.3–60.6—Utilization, Disposal, and Retirement

109–60.600 General.
109–60.601 Maximum use of property.
109–60.602 Disposal.
109–60.603 Retirement of property.

Subpart 109.3–60.7—Motor Vehicle and Aircraft Management

109–60.700 Scope of subpart.
109–60.701 Definition.
109–60.702 Policy.
109–60.703 Classification of motor vehicles.
109–60.704 Acquisition of motor vehicles.
109–60.705 Identification of motor vehicles.
109–60.706 Use of the GSA Interagency Motor Pool System.
109–60.707 Official use of motor vehicles.
109–60.708 Maintenance.
109–60.709 Disposition of motor vehicles.
109–60.710 Required motor vehicle reports.
109–60.711 Aircraft.

Subpart 109–60.8–109–60.46—[Reserved]

Subpart 109–60.47—Reports

109–60.4700 Required reports.

Authority: Sec. 644, Pub. L. 95–91, 91 Stat. 599 (42 U.S.C. 7254).

§ 109–60.000 Scope and applicability of part.

This part sets forth the minimum requirements to be observed by off-site contractors in establishing and maintaining control over Government property provided pursuant to a contract with DOE. This part does not apply to transportation contracts, grants, cooperative agreements, contracts with state and local governments, and to operating and on-site service contractors. To the extent of any inconsistency between this part and the terms of the contract under which the Government property is provided, the terms of the contract shall govern.

§ 109–60.001 Definitions.

As used in this part the following definitions apply:

(a) "Accessory item" means an item that facilitates or enhances the operation of capitalized equipment but which is not essential for its operation, such as remote control devices.

(b) "Auxiliary item" means an item without which the basic unit of equipment cannot operate, such as motors for pump and machine tools.

(c) "Capital equipment" means personal property items having a unit acquisition cost of generally $500,00 or more and an anticipated service life in excess of one (1) year, regardless of types of funding, are not properly chargeable to buildings or utilities, and having the potential for maintaining their integrity as capital items, i.e., not expendable due to use.

(d) "Government personal property" means all property provided at Goverment expense for performance of the contract, regardless of the method by which it is provided, including rented or leased equipment, except real property, records of the Federal Government, nuclear and special source materials, and atomic weapons and by-product materials.

(1) "Government-furnished property" means property in the possession of or directly acquired by the Government and subsequently made available to the contractor for use in performance of the contract.

(2) "Contractor-acquired Government property" means property acquired or otherwise provided by the contractor for performance of a contract and to which the Government has title or the right to take title under the contract terms.

(e) "Materials" means property which may be incorporated into or attached to an end item to be delivered under a contract or which may be consumed or expended in normal use in the performance of a contract. It includes, but is not limited to, raw and processed material, parts, components, assemblies, or supplies.

(f) "Property administrator" means an authorized representative of the contracting officer assigned to administer the contract requirements and obligations relative to Government property. If an authorized representative has not been designated as the property administrator, the contracting officer is the property administrator.

(g) "Plant and equipment" means land, land rights, depletable resources, improvements to land, buildings and structures, utilities, and capital equipment having an anticipated service life of 1 year or more, the individual units of which satisfy the monetary and other criteria for capital charges and which therefore justify the maintenance of continuing plant and equipment records.

(h) "salvage" means that property which has some value in excess of its basic material content but which is in such condition that it has no reasonable prospect of use for any purpose as a unit and its repair or rehabilitation for use is clearly impracticable.

(i) "Scrap" means property that has no value except for the recoverable value of its basic material content.

(j) "Sensitive items" means those items of property which are susceptible to being appropriated for personal use or which can be readily converted to cash. Examples are firearms, photographic equipment, binoculars, tape recorders, calculators, and power tools.

(k) "Special test equipment" means either single or multipurpose integrated test units engineered, designed, fabricated, or modified to accomplish special purpose testing in the performance of a contract. It consists of items or assemblies of equipment that are interconnected and interdependent so as to become a new functional entity for special testing purposes. It does not include material, special tooling, facilities (except foundations and similar improvements necessary for the installation of special test equipment), and equipment items used for general testing purposes.

(l) "Special tooling" means jigs, dies, fixtures, molds, patterns, taps, gauges, other equipment and manufacturing aids, all components of these items, and replacement of these items, which are of such a specialized nature that without substantial modification or alteration their use is limited to the development or production of particular supplies or parts thereof or the performance of particular services. It does not include material, special test equipment, facilities (except foundations and similar improvements necessary for the installation of special tooling), general or specical machine tools, or similar capital items.

Subpart 109–60.1—Contractor's Responsibility

§ 109–60.100 General.

(a) The contractor is directly responsible and accountable for all Government property in its possession or control in accordance with the provisions of the contract, including property provided under such contract which may be in the possession or control of a subcontractor. The contractor shall establish and maintain a system, in accordance with the provisions of this part, to control, protect, preserve and maintain all Government property. It the contractor is expected to acquire and be accountable for, or does acquire Government personal property with an acquisition value of $500,000 or more, the contractor's property management system shall be in writing. Contractors holding Government personal property with an acquisition value of less than $500,000 may, at the discretion of the contracting officer, be required to have their property management system in writing. The requirement for written systems may be waived in writing by the contracting officer where the contracting officer determines that maintenance of a written system is unnecessary. The system shall be reviewed and if satisfactory, approved in writing by the contracting officer.

(b) The contractor shall maintain and make available such records as are required by Subpart 109–60.2 and shall account for all Government property until relieved of that responsibility. Liability for loss, damage, or improper use of property in a given instance will depend upon all the circumstances surrounding the particular case and will be determined in accordance with the provisions of the contract. The contractor shall furnish all data necessary to substantiate any request for discharge from responsibility.

(c) The contractor shall require subcontractors provided Government property under the prime contract to comply with the provisions of this part. Procedures for assuring subcontractor compliance shall be included in the contractor's property control system.

(d) If any portion of the contractor's property control system is found to be inadequate upon review by the property administrator, necessary corrective action will be accomplished by the contractor prior to approval of the

system. When agreement as to adequacy of control or corrective action cannot be reached between the contractor and the property administrator, the matter will be referred to the contracting officer.

(e) The property records and the premises where any Government property is located shall be accessible to the property administrator or other authorized representative during contract performance, at contract completion or termination, or at all reasonable times. The contractor's property control system is subject to audit by the Government as often as circumstances warrant during the contract's performance, at its completion or termination, or at any time thereafter while the contractor is required to retain the contract records. All these records, including related correspondence, shall be made available to the auditors.

§ 109–60.101 Assumption of responsibility.

(a) The contractor becomes responsible for Government-furnished property upon its delivery into the contractor's custody or control. For contractor-acquired Government property, the contractor assumes responsibility in accordance with the property provisions of the contract.

(b) All Government-furnished property shall be inspected and checked promptly at the of time receipt. Any visible or other external evidence of damage or error in quantity should be noted on the waybill with the signature of the carrier's agent. As soon as possible, the contractor shall send the contracting officer a full report of the damage or quantity error, including extent, apparent cause, and the estimated cost of repairs. The contracting officer will advise the contractor of the action to be taken.

(c) It is the contractor's responsibility to inspect, at the time of receipt, all property not furnished by the government that is acquired in the performance of the contract, and to take any necessary action with the vendor and/or carrier if there should be any damage or error in quantity.

(d) Procedures shall be established to protect any warranty rights which accrue to the Government with the acquisition of Government property.

§ 109–60.102 Contractor's liability.

(a) Subject to the terms of the contract, the contractor may be liable for shortage, loss, damage, or destruction of Government property or when there is evidence of improper or unreasonable use or consumption of Government property.

(b) The contractor shall report promptly to the property administrator any shortage, loss, damage, or destruction of Government property in its possession or control, or in the possession or control of any subcontractor, together with all the facts and circumstances of the case.

(c) Any loss that may be due to theft shall be reported by the contractor immediately to the local police and/or Federal Bureau of Investigation and the property administrator.

§ 109–60.103 Segregation of Government property.

Ordinarily, provisions shall be made by the contractor to keep Government property segregated from contractor-owned property. Commingling of Government and contractor-owned property may be allowed only when the segregation of the property would materially hinder the progress of the work, (e.g., segregation is not feasible for reasons such as quantities, lack of space, or costs caused by additional handling), and where control procedures are adequate, i.e., the Government property is identified as being Government property. Commingling must be approved in advance by the property administrator, In case of research and development contracts with educational institutions, commingling is authorized without the requirement for advance approval unless physical segregation is otherwise required by the contracting officer.

§ 109–60.104 Physical protection of property.

(a) Controls such as property pass systems, memorandum records, marking of tools, regular or intermittent gate checks and perimeter fencing shall be implemented, recognizing the value of the property, to prevent loss, theft, or unauthorized movement of Government property from the premises on which such property is located.

(b) Classified Government property will be handled in accordance with instructions of the contracting officer.

§ 109–60.105 Control of sensitive items of property.

(a) The contractor shall assure that effective procedures and practices are established for the administrative and physical control of sensitive property items before and after issuance. Each contractor shall prepare a list of the types of property considered to be sensitive. This list, together with control procedures, shall be provided to the property administrator for review and approval.

(b) At a minimum, controls on sensitive property shall include property records, memorandum receipts, bin or tool check systems, or combinations thereof. Procedures shall provide for physical inventories at least once each year, and methods for adjustment of inventory levels due to losses, thefts and damage. More frequent inventories of sensitive property may be necessary where the value of the property, degree of security achieved, or loss experience indicates greater controls are required in order to protect the Government's interest. Such procedures and practices shall be subject to review and approval by the property administrator.

§ 109–60.106 Disposition.

The contractor is responsible for disposing of Government property as provided for in the contract or as directed by the contracting officer. The contractor shall promptly advise the property administrator of any Government property that becomes excess to requirements for contract performance and to take such action for its disposition as directed.

§ 109–60.107 Relief from responsibility.

Subject to instructions of the contracting officer and the terms of the contract, the contractor may be relieved of responsibility for Government property when the property is—

(a) Consumed or expended in contract performance—to the extent the contracting officer has determined that its consumption or expenditure was for proper purposes and in reasonable quantity for performance of the contract;

(b) Removed from contractor's possession—when removed as directed by the property administrator or contracting officer;

(c) Lost, damaged or destroyed (including property consumed or expended in excess of reasonable requirements, and non-severable Government-owned property which has been connected to contractor-owned property for the performance of the contract and cannot be removed without destroying its serviceability)—when the contracting officer has determined the contractor's liability, if any; the Government has been reimbursed to the extent required by the contracting officer's determination; and, property disposition has been made of any property rendered unserviceable by damage; or

(d) Retained by the contractor, with approval of the contracting officer, and

for which the Government has received adequate consideration.

Subpart 109–60.2—Records and Financial Reports

§ 109–60.200 General.

(a) The contractor shall establish and maintain adequate property control records, either manual or mechanized and consistent with the requirements of this subpart, for all Government property provided under a contract, including property provided under such contract as may be in the possession of control of a subcontractor. Unless otherwise directed by the contracting officer, records of Government property established and maintained by the contractor under the terms of the contract shall be designated and utilized as the official contract records. Duplicate records shall not be furnished to nor be maintained by the Government.

(b) If a contractor has multiple contracts with DOE, separate property records for each contract should be maintained. However, if approved by the contracting officer, a consolidated property record may be maintained if it provides the pertinent information set forth in this subpart and the property is identified to the applicable contract.

(c) Property records of the type established for components acquired separately shall be used for serviceable components removed from items of Government property as a result of modification.

(d) The contractor's property control system shall contain a system or technique to locate any item of Government property with reasonable promptness.

§ 109–60.201 Unit cost.

(a) The unit cost of each item of Government property shall consist of the acquisition cost and the cost of any additional components, and shall be contained in the contractor's property control system. Unless the contractor's quantitative inventory record contains unit cost, the supplementary records containing this information must be identified and recognized as a part of the official property records. For Government-furnished property, copies of documents needed for record purposes, including pricing, will be furnished to the contractor.

(b) For property record purposes, original transportation and installation costs are to be considered as part of the acquisition cost of an item. Subsequent costs incurred in transporting and/or installing transferred or relocated property should not be added to the original acquisition cost.

§ 109–60.201 Records of plant and capital equipment.

(a) For each item of plant and capital equipment (as defined in § 109–60.001), the contractor shall maintain an individual item record containing, at a minimum the—

(1) Contract number;
(2) Asset type (Ref. § 109–60.206);
(3) Nomenclature or description of item;
(4) U.S. Government identification tag number;
(5) Manufacturer's name;
(6) Manufacturer's model number;
(7) Serial number;
(8) Acquisition document reference and date;
(9) Location; and
(10) Unit cost (including transportation and installation).

(b) Accessory and auxiliary items that are attached to, part of, or acquired for use with a specific item of capital equipment shall be recorded on the record of the associated item of capital equipment. Useable accessory and auxiliary items that are removed from items of Government equipment shall also be separately recorded, and the cost of the basic item reduced proportionally.

§ 109–60.203 Records of material maintained in stores.

Records of Government-owned material maintained by the contractor in stores, and held under inventory control, shall contain the—

(a) Contract number;
(b) Nomenclature or description of item;
(c) Quantity received;
(d) Quantity issued;
(e) Balance on hand;
(f) Posting reference and date of transaction;
(g) Unit price;
(h) Location; and
(i) Disposition.

§ 109–60.204 Records of material issued upon receipt.

(a) The property administrator may authorize the contractor to maintain, in lieu of stock records, a file of appropriately cross-referenced documents evidencing receipt, issue, and use of Government-provided materials that is issued for immediate consumption and not entered in the inventory records as a matter of sound business practice.

(b) With respect to non-profit organizations, where material is issued directly upon receipt, Government invoices, contractor's purchase documents, or other evidence of acquisition and issue will be accepted as adequate property records for material furnished to or acquired by the contractor and issued directly so to be considered consumed under the contract.

§ 109–60.205 Financial property control reports.

The contractor shall prepare a semi-annual report, as of March 31 and September 30 of each year, for each contract and subcontract thereunder showing the dollar amount and the number of line items of plant and capital equipment, by DOE asset type (see § 109–60.206), acquired or disposed or during the period. The report will show, at a minimum, the beginning balance, acquisition, disposition, and ending balance. The report format and the DOE office to which the report will be furnished will be as direced by the property administrator. The reports are due not later than 45 days after the end of the reporting period.

§ 109–60.206 DOE plant and equipment asset types.

401 Land
410 Land Rights
430 Minerals
440 Timber
460 Site Preparation, Grading and Landscaping
470 Roads, Walks, and Paved Areas
480 Fences and Guard Towers
490 Other Improvements to Land
501 Buildings
550 Other Structures
610 Communications Systems
615 Electric Generation, Transmission and Distribution Systems
620 Fire Alarm Systems
625 Gas Production, Transmission and Distribution Systems
630 Irrigation Systems
635 Railroad Systems
640 Sewerage Systems
645 Steam Generation and Distribution Systems
650 Water Supply, Pumping, Treatment and Distribution Systems
655 Nuclear Steam and Electric Generation and Transmission Systems
660 SPR Crude Oil Piping System
665 NPR Crude Oil Extraction and Distribution System
710 Heavy Mobile Equipment
715 Hospital and Medical Equipment
720 Laboratory Equipment
725 Motor Vehicles and Aircraft
730 Office Furniture and Equipment
735 Process Equipment
740 Railroad Rolling Stock
745 Reactors and Accelerators
750 Security and Protection Equipment
755 Shop Equipment
760 Reserve Construction Equipment Pool
770 Automatic Data Processing Equipment

799 Miscellaneous Equipment
800 Improvements to Property of Others
900 Unclassified Plant and Equipment

Subpart 109-60.3—Identification

§ 109-60.300 General.

(a) The contractor shall identify, mark, and record all capital and sensitive items of equipment promptly upon receipt, except leased or rented equipment, and shall maintain this identification as long as such property remains in the custody, possession, or control of the contractor. Property identification numbers will be recorded on all applicable receiving, shipping, and disposal documents, and any other documents pertaining to the property control system where practicable. Marking and numbering shall be accomplished by etching, stamping, painting, attaching metal or plastic tags or decalcomanias. Each item shall be marked "Property of the U.S. Government, Department of Energy." Information on property numbers will be furnished by the property administrator. If practicable, such markings shall be removed or obliterated from the property involved, if and when Government ownership is relinquished. Leased or rented equipment shall be identified in such manner as will not damage the property. Property which by its nature or size cannot be marked shall not be commingled with contractor-owned property unless approved by the property administrator. When items are not susceptible to marking, they shall be subject to other specific control measures, such as custodial receipts.

(b) Where special tooling or special test equipment is utilized under a contract or subcontract, it shall be identified as required by the contracting officer.

Subpart 109-60.4—Physical Inventories

§ 109-60.400 General.

The contractor shall periodically physically inventory Government property in its possession or control and shall require such inventories of property held by subcontractors. The physical inventory shall be consistent with approved contractor procedures and generally accepted accounting principles. Procedures that are limited solely to a check-off of a listing of recorded property do not meet the requirements of a physical inventory. Personnel who perform the physical inventory shall not be the same individuals who maintain the property records or have custody of the property unless the contractor's operation is too small to do otherwise.

§ 109-60.401 Frequency.

Physical inventories of permanently affixed plant (such as fencing, buildings, other structures, utilities and systems) are to be taken not less frequently than every 10 years. Inventories of movable capital equipment are to be taken not less frequently than every 2 years. Inventories of sensitive items (capital and non-capital) shall be taken not less frequenlty than annually. Substantial quantities of materials (stores) held under inventory control shall be inventoried annually. Small quantities of material representing bench stock need not be inventoried.

§ 109-60.402 Reporting results of inventories.

The contractor shall, at a minimum, submit to the property administrator a listing of all discrepancies disclosed by a physical inventory, and a signed statement that the physical inventory was completed on a certain date and that the official property records were found to be in agreement with the physical inventory, except for the discrepancies reported. As a minimum, the discrepancy listing shall contain the property number, nomenclature, and unit cost. The listing and signed statement shall be furnished with a minimum of delay after completion of the physical inventory, but no later than 60 days after its completion.

§ 109-60.403 Records of inventories.

Appropriate inventory records and reports shall be maintained and will serve as a basis for (a) effecting maximum utilization of available property, (b) prompt identification and reporting of excess property, (c) effective physical protection of property, and (d) the preparation of special and recurring reports. Full use will be made of accounting records and reports to avoid duplication.

§ 109-60.404 Inventories upon termination or completion.

(a) Immediately upon termination or completion of a contract, the contractor shall submit an inventory report adequate for determining appropriate disposal of all Government property applicable to the terminated or completed contract. Further, this report shall include an inventory report of all Government property in a subcontractor's possession or control which is also applicable to the terminated or completed contract. This inventory report will be submitted to the property administrator for verification and disposition action.

(b) Exception. The requirement for physical inventory of Government property at the completion of a contract may be waived by the contracting officer when the property is authorized for use on a follow-on contract, provided that—

(1) Past experience has established the adequacy of property controls; and

(2) A statement is provided by the contractor indicating that transfer of record balances has been made in lieu of preparing a formal inventory list and the contractor accepts responsibility and accountability for those balances under the terms of the follow-on contract.

Subpart 109-60.5—Care and Maintenance

§ 109-60.500 General.

The contractor shall be responsible for the proper care and maintenance of Government property in its possession or control from the time of receipt until properly relieved of responsibility. The removal of Government property to storage, or its contemplated transfer, does not relieve the contractor of these responsibilities.

§ 109-60.501 Contractor's maintenance program.

The contractor's maintenance program shall be consistent with sound economic industrial practice, the manufacturer's recommendation, and the terms of the contract, and shall include the following:

(a) Preventive maintenance. Preventive maintenance is generally performed on a regularly scheduled basis in order to detect and correct unfavorable conditions or defects before they result in breakdowns and to maximize the useful life of the equipment. An effective preventive maintenance program shall consist of, but not be limited to—

(1) Inspection of equipment at periodic intevals to detect maladjustment, wear, or impending breakdown;

(2) Regular lubrication of bearings and moving parts in accordance with a lubrication plan;

(3) Adjustments for wear, repair, or replacement of worn or damaged parts and the elimination of causes of deterioration;

(4) Removal of sludge, chips, and cutting oils from equipment which will not be used for a period of time;

(5) Taking necessary precautions to prevent deterioration from contamination and corrosion; and

(6) Proper storage and preservation of accessories and special tools furnished with an item of equipment but not regularly used with it.

(b) Major repairs or rehabilitation. The maintenance program of the contractor shall provide for the disclosure and reporting to the property administrator of the need for major repairs, replacement, and other rehabilitation work on Government property in its possession or control.

(c) Records of maintenance. The contractor shall keep records sufficient to disclose the maintenance and repair performed and associated cost.

Subpart 109–60.6—Utilization, Disposal, and Retirement

§ 109–60.600 General.

It is DOE's policy that all property furnished under a contract shall be utilized to the fullest extent possible. The contractor's procedures shall be adequate to assure that Government property will be utilized only for those purposes authorized in the contract, and that the contracting officer's approval is obtained prior to noncontract use.

§ 109–60.601 Maximum use of property.

Property and supply management practices shall assure that the maximum and best possible use is made of property. Materials and equipment shall be limited to those items essential for effective execution of work performed under the contract.

§ 109–60.602 Disposal.

Unless otherwise authorized, contractors having property determined to be excess shall contact the property administrator for instruction as to the proper method of disposal. Property shall not be disposed of without prior approval of the contracting officer.

§ 109–60.603 Retirement of property.

When capital equipment is worn out, lost, stolen, destroyed, abandoned or damaged beyond economical repair, it shall be listed on a retirement work order. A full explanation shall be made, supported by an investigation, if necessary, as to the date and circumstances surrounding loss, theft, destruction, or damage. The retirement work order shall be signed by the responsible contractor administrative official initiating the report and reviewed and approved by an official at least one supervisory echelon above the official initiating the report, and the property administrator. Detailed information concerning the retention and/or submission of retirement work orders will be furnished by the property administrator.

Subpart 109–60.7—Motor Vehicle and Aircraft Management

§ 109–60.700 Scope of subpart.

This subpart prescribes basic policies and procedures for the management of Government-owned motor vehicles and aircraft in the possession of off-site contractors.

§ 109–60.701 Definition.

"Government-furnished motor vehicles" are DOE-owned vehicles, vehicles leased from the General Services Administration Interagency Motor Pool System (GSA–IMPS), and vehicles leased from commercial sources.

§ 109–60.702 Policy.

(a) Government-furnished motor vehicles and aircraft shall be provided to or acquired by off-site contractors when considered essential for the performance of the contract work and when approved by the contracting officer.

(b) Government-owned motor vehicles and aircraft shall be maintained and utilized by contractors in the most practical and economical manner consistent with DOE program requirements, safety considerations, fuel economy, and applicable laws and regulations.

(c) DOE–PMR Parts 109–38 and 109–39 (41 CFR Chapter 109) contain the requirements for management DOE-owned motor vehicles and aircraft. DOE contracting officers shall apply the applicable provisions contained therein in their management of contractor motor vehicle and aircraft operations.

(d) Contractors shall conform fully to the average fuel economy standards established by law and these regulations in the selection of Government-furnished motor vehicles.

(e) Contractors shall maintain and operate motor vehicles in such a manner as to foster reduced fuel consumption.

(f) Normally, motor vehicles will not be furnished to fixed-price contractors.

(g) Prior approval of GSA must be obtained before—

(1) Fixed-price contractors can use the GSA–IMPS; and

(2) DOE-owned motor vehicles can be furnished to any contractor in an area served by a GSA–IMPS.

§ 109–60.703 Classification of motor vehicles.

Because of differences in controls or limitations on possession and use, Government vehicles are classified as follows:

(a) *Passenger vehicles.*

(1) Sedans and station wagons (small, subcompact, compact, mid-size, and large).

(2) Ambulances.

(3) Buses.

(b) *Trucks.*

(1) Light, less than 8,500 GVWR (Gross Vehicle Weight Rating).

(i) 4 x 2.

(ii) 4 x 4.

(2) Light, 8,500 to 12,499 GVWR.

(i) 4 x 2.

(ii) 4 x 4.

(3) Medium, 12,500 to 23,999 GVWR.

(4) Heavy, 24,000 GVWR or more.

(c) *Special purpose vehicles.*

(1) Fire trucks.

(2) Construction vehicles.

(3) Other vehicles equipped for special purposes.

§ 109–60.704 Acquisition of motor vehicles.

(a) GSA has the responsibility for procurement of motor vehicles for Government agencies.

(b) Contractors shall submit motor vehicle requirements to the contracting officer for approval.

(c) The acquisition of passenger vehicles is limited to small, subcompact, and compact vehicles which meet Government fuel economy standards.

(d) The DOE Procurement and Assistance Management Directorate, Headquarters, (MA–422), shall certify all requisitions for the following:

(1) The acquisition of small, subcompact, and compact passenger vehicles.

(2) The lease (60 continuous days or more) of light trucks less than 8,500 GVWR.

(e) Purchase requisitions for acquisition of passenger vehicles by purchase or lease must be processed in accordance with 41 CFR 109–38.1306.

(f) Purchase requisitions for other motor vehicles may be submitted to GSA as directed by the contracting officer.

(g) Contractors shall thoroughly examine motor vehicles acquired under a GSA contract for defects. Any defect shall be reported promptly to GSA, and repairs shall be made under terms of the warranty.

§ 109–60.705 Identification of motor vehicles.

(a) Except as indicated in § 109–60.705(b), DOE-owned motor vehicles will have Government license tags and the following identification, which will be furnished and displayed as specified by the property administrator:

For Official Use Only
U.S. Government

Department of Energy

(b) Security vehicles may be exempted from the above requirements by the contracting officer. All other exemptions require approval by the DOE Director of Procurement and Assistance Management Directorate.

§ 109–60.706 Use of the GSA Interagency Motor Pool System.

Where authorized by the contracting officer, contractors may use the services of the GSA–IMPS.

§ 109–60.707 Official use of motor vehicles.

Government-owned vehicles are to be used for "Official Use Only." Contracting officers may approve home-to-work or work-to-home transportation on a one-time exceptional basis. Home-to-work or work-to-home transportation on a continuing basis requires approval of the head of the cognizant DOE field office. Records of such approval will be kept on file.

§ 109–60.708 Maintenance.

Contractors shall maintain Government-owned vehicles according to a systematic written procedure and in accordance with manufacturer's specifications and the terms of the warranty. The GSA publication "Guide for the Preventive Maintenance of Motor Vehicles" provides guidance for the maintenance of Government-owned vehicles.

§ 109–60.709 Disposition of motor vehicles.

(a) The contractor shall dispose of DOE-owned motor vehicles as directed by the contracting officer.

(b) DOE-owned motor vehicles may be disposed of as exchange/sale items when directed by the contracting officer; however, a designated DOE official must excecute the Title Transfer forms.

§ 109–60.710 Required motor vehicle reports.

Contractors shall submit the following annual fiscal year-end reports of Government-furnished motor vehicles to the contracting officer. Information on preparation and submission of the reports will be furnished by the property administrator.

(a) Agency Report of Motor Vehicle Data (Standard Form 82).

(b) Special Purpose Vehicle Report.

(c) Age and Mileage Analysis.

§ 109–60.711 Aircraft.

(a) Acquisition of aircraft requires statutory authority. Contracting officers may authorize a lease, rental, hire, or loan of an aircraft if the period is less than 30 days. If longer than 30 days, approval must be obtained from the DOE Director of Procurement and Assistance Management.

(b) Aircraft shall be used for official purposes only.

Subpart 109–60.8–109–60.46—[Reserved]

Subpart 109–60.47—Reports

§ 109–60.4700 Required reports.

Following is a summary listing of those property reports required to be submitted by the contractor, along with the frequency of the reports and the subpart which describes the report:

(a) Loss, damage, or destruction of Government property (On occurrence) § 109–60.102(b).

(b) Loss due to theft (On occurrence) § 109–60.102(c).

(c) Financial property control reports (Semi-annual) § 109–60.205.

(d) Physical inventories of permanently affixed plant (Not less frequently than every 10 years) § 109–60.402.

(e) Physical inventories of capital equipment (Not less frequently than biennial) § 109–60.402.

(f) Physical inventories of sensitive items (Not less frequently than annual) § 109–60.402.

(g) Termination inventories (Termination or completion) § 109–60.404.

(h) Motor vehicle reports (Annual) § 109–60.710.

Part III

Department of Labor

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

Modifications and Supersedeas Decisions to General Wage Determination Decisions

Modifications and supersedeas decisions to general wage determination decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the modifications and supersedeas decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of part 1 of subtitle A of title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing general wage determination decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and supersedeas decisions are effective from their date of publication in the **Federal Register** without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Office of Government Contract Wage Standards, Division of Government Contract Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rulemaking procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Determination Decision.

Modifications to General Wage Determination Decisions

The numbers of the decisions being modified and their dates of publication in the **Federal Register** are listed with each State.

Colorado: CO83–5113	July 15, 1983.
Idaho: ID82–5128	Nov. 26, 1982.
Indiana: IN83–2073	Sept. 9, 1983.
Kentucky: KY84–1003	Jan. 9, 1984.
Michigan: MI83–2020	Mar. 18, 1983.
Minnesota:	
MN83–2058	July 29, 1983.
MN83–2059	Do.
New York: NY80–3054	Sept. 5, 1980.
North Dakota:	
ND84–5006	Mar. 16, 1984.
ND81–5131	July 6, 1981
Utah: UT83–5120	Sept. 30, 1983.
Washington: WA83–5110	June 3, 1983.
Wisconsin: WI83–2041	May 13, 1983.

Supersedeas Decisions to General Wage Determination Decisions

The numbers of the decisions being superseded and their dates of publication in the **Federal Register** are listed with each State. Supersedeas decision numbers are in parentheses following the numbers of the decisions being superseded.

California: CA83–5126 (CA84–5001)	Dec. 9, 1983.
Kentucky: KY82–1060 (KY84–1010)	Oct. 8, 1982.
Massachusetts: MA83–3049 (MA84–3008)	Nov. 18, 1983.
Minnesota: MN81–2065 (MA84–5010)	Dec. 11, 1981.

Cancellation of General Wage Determination Decision

The General Wage Decision listed below is cancelled. Agencies with construction projects pending to which the cancelled decision would have been applicable should utilize the Project Determination procedure by submitting Form SF–308. See Regulations Part 1 (29 CFR), § 1.5. Contracts for which bids have been opened shall not be affected by this notice. Also, consistent with 29 CFR 1.7(b)(2), the incorporation of the cancelled decision in contract specifications, the opening of bids for which is within (10) days of this notice, need not be affected.

MN83–2060, Blue Earth, Faribault, Freeborn, Mower, and Olmsted Counties, Minnesota—Building and Residential Construction.

Signed at Washington, D.C. this 23rd day of March 1984.

James L. Valin,

Assistant Administrator.

Group 38	18.89	4.29

WELDERS - receive rate prescribed for craft performing operation to which welding is incidental

FOOTNOTES:

a. Employer contributes 8% of basic hourly rate for over 5 years' service, and 6% of basic hourly rate for 6 months' to 5 years' service as Vacation Pay Credit. Six Paid Holidays: New Year's Day; Memorial Day; Independence Day; Labor Day; Thanksgiving Day; Christmas Day

b. Employer contributes $.32 per hour to Holiday Fund plus $.21 per hour to Vacation Fund for the first year of employment; 1 year but less than 5 years $.42 per hour to Vacation Fund; 5 years but less than 10 years $.60 per hour to Vacation Fund; over 10 years $.80 per hour to Vacation Fund

AREA DESCRIPTIONS

BRICKLAYERS; STONEMASONS:
Area 1: Del Norte, Humboldt, Lake, Marin, Mendocino, Napa, San Francisco, San Mateo, Siskiyou, Solano, Sonoma, and Trinity Cos.
Area 2: Alameda and Contra Costa Counties
Area 3: Fresno, Kings, Madera, Mariposa, and Merced Counties
Area 4: Butte, Colusa, El Dorado, Glenn, Lassen, Modoc, Nevada, Placer, Plumas, Sacramento, Shasta, Sierra, Sutter, Tehama, Yolo, and Yuba Counties
Area 5: Monterey and Santa Cruz Counties
Area 6: San Benito and Santa Clara Counties
Area 7: Alpine, Amador, Calaveras, San Joaquin, Stanislaus, and Tuolumne Counties
Area 8: Tulare County

BRICK TENDERS:
Area 1: Amador, El Dorado, Nevada, Placer, Sacramento, and Yolo Cos.
Area 2: San Francisco and San Mateo Counties
Area 3: Fresno, Kings, Madera, and Tulare Counties
Area 4: Remaining Counties
Area 5: Marin County
Area 6: Alameda and Contra Costa Counties
Area 7: Santa Cruz County
Area 8: San Benito and Santa Clara Counties
Area 9: (Residential construction of 2 stories or less) Monterey and Napa Counties

CARPENTERS:
Area 1: Alameda, Contra Costa, Marin, Napa, San Benito, San Francisco, San Mateo, Santa Clara, Solano and Sonoma Counties
Area 2: Alpine, Amador, Butte, Calaveras, Colusa, Del Norte, El Dorado, Fresno, Glenn, Humboldt, Kings, Lake, Lassen, Madera, Mariposa, Mendocino, Merced, Modoc, Nevada, Placer, Plumas, Sacramento, San Joaquin, Shasta, Sierra, Siskiyou, Stanislaus, Sutter, Tehama, Trinity, Tulare, Tuolumne, Yolo, and Yuba Counties
Area 3: (Residential) Calaveras, Mariposa, and Merced Counties
Area 4: Monterey and Santa Clara Counties
Area 5: (Residential) Del Norte and Humboldt Counties

AREA DESCRIPTIONS (Cont'd)

DRYWALL INSTALLERS/LATHERS:
Residential:
Area 1: Calaveras, Mariposa, Merced, and Tuolumne Counties

ELECTRICIANS:
Area 1: Alameda County
Area 2: Amador, Colusa, Sacramento, Sutter, Yolo, and Yuba Counties; Alpine, El Dorado, Nevada, Placer, and Sierra Counties (those portions west of the Sierra Mountain Watershed)
Area 3: Alpine, El Dorado, Nevada, Placer, and Sierra Counties (those portions east of the Main Watershed Divide)
Area 4: Butte and Glenn Counties; Lassen County (excluding the Sierra Army Depot (Herlong); Modoc, Plumas, Shasta, Siskiyou, Tehama and Trinity Counties
Area 5: Calaveras and San Joaquin Counties
Area 6: Contra Costa County
Area 7: Del Norte and Humboldt Counties
Area 8: Fresno, Kings, Madera, and Tulare Counties
Area 9: Lake, Marin, Mendocino, and Sonoma Counties
Area 10: Mariposa, Merced, Stanislaus, and Tuolumne Counties
Area 11: Monterey, San Benito, and Santa Cruz Counties
Area 12: Napa and Solano Counties
Area 13: Santa Clara County
Area 14: San Francisco County
Area 15: San Mateo County
Area 16: Sierra Army Depot (Herlong) In Lassen Counties

GLAZIERS:
Area 1: Alameda, Contra Costa, Monterey, Napa, San Benito, Santa Clara, and Santa Cruz Counties
Area 2: Alpine, Amador, Butte, Calaveras, Colusa, El Dorado, Glenn, Lassen, Modoc, Nevada, Placer, Plumas, Sacramento, San Joaquin, Shasta, Sierra, Siskiyou, Solano, Stanislaus, Sutter, Tehama, Tuolumne, Yolo, and Yuba Counties
Area 3: (Residential) Sutter and Yuba Counties
Area 4: (Residential) Amador, Calaveras, El Dorado, Nevada, Placer, Sacramento, San Joaquin, Solano, Tuolumne, and Yolo Counties
Area 5: Fresno, Madera, Mariposa, Merced, Kings, and Tulare Counties
Area 6: Del Norte and Humboldt Counties
Area 7: Lake, Marin, Mendocino, San Francisco, San Mateo, and Sonoma Counties

LINE CONSTRUCTION:
Area 1: Contra Costa County
Area 2: Del Norte, Modoc, and Siskiyou Counties:
Group 1: Cable Splicer, Leadman Pole Sprayer
Group 2: Lineman, Pole Sprayer, Heavy Line Equipment Man, Certified Lindman Welder
*Group 3: Tree Trimmer
Group 4: Line Equipment Man
Group 5: Head Groundman, Powderman, Jackhammer Man
*Group 6: Head Groundman (Chipper)
Group 7: Groundman
*Groups 3 and 6 receive BASE RATE (ZONE 1) ONLY (no Zone Differential)

AREA DESCRIPTIONS (Cont'd)

LINE CONSTRUCTION: (Cont'd)
Area 2: (Cont'd)
Zone Definitions: Zone 1: 0 to 3 miles radius from the geographical center of Alturos and Yreka, California
Zone 2: 3 to 20 miles radius
Zone 3: 20 to 35 miles radius
Zone 4: 35 to 50 miles radius
Zone 5: Over 50 miles radius
BASE RATE (ZONE 1) is paid when working out of employer's Permanent Shop
Area 3: Fresno, Kings, Madera, and Tulare Counties
Area 4: Calaveras and San Joaquin Counties
Area 5: Mariposa, Merced, Stanislaus, and Tuolumne Counties
Area 6: Monterey, San Benito, and Santa Cruz Counties
Area 7: Napa and Solano Counties
Area 8: Butte, Glenn, Lassen, Plumas, Shasta, Tehama, and Trinity Cos.
Area 9: Alameda County
Area 10: Amador, Colusa, Sacramento, Sutter, Yolo, and Yuba Counties; Alpine, El Dorado, Nevada, Placer, and Sierra Counties (those portions west of the Main Sierra Mountain Watershed)
Area 11: San Mateo County
Area 12: Humboldt County
Area 13: San Francisco County
Area 14: Santa Clara County
Area 15: Lake, Marin, Mendocino, and Sonoma Counties

MARBLE FINISHERS:
Area 1: Alameda, Alpine, Amedor, Butte, Calaveras, Colusa, Contra Costa, Del Norte, El Dorado, Glenn, Humboldt, Lake, Lassen, Marin, Mendocino, Modoc, Monterey, Napa, Nevada, Placer, Plumas, Sacramento, San Joaquin, San Mateo, Santa Clara, Santa Cruz, Shasta, Sierra, Siskiyou, Solano, Sonoma, Sutter, Tehama, Trinity, Yolo and Uba Counties, and the City and County of San Francisco, San Benito County

PAINTERS:
Area 1: Alpine, Amador, Calaveras, and San Joaquin Counties
Area 2: Fresno, Kings, Madera, and Tulare Counties
Area 3: Mariposa, Merced, Stanislaus, and Tuolumne Counties
Area 4: San Benito, San Mateo, and Santa Clara Counties
Area 5: Monterey and Santa Cruz Counties
Area 6: Lassen County (that portion that lies eastward of Highway #395, northward to and including Honey Lake); Lake Tahoe Area
Area 7: Lake, Marin, Mendocino, San Francisco, and Sonoma Counties
Area 8: Butte, Colusa, and Glenn Counties; Lassen County (excluding the extreme SE corner); Modoc, Plumas, Shasta, Siskiyou, Sutter, Tehama, Trinity, and Yuba Counties
Area 9: Alameda, Contra Costa, El Dorado, Napa, Nevada, Placer, Sacramento, Sierra, Solano, and Yolo Counties (excluding portions of Counties in the Lake Tahoe Area)
Area 10: Del Norte and Humboldt Counties

12578 Federal Register / Vol. 49, No. 63 / Friday, March 30, 1984 / Notices

UMI 1984 MR 30 ISS 63 VOL 49

AREA DESCRIPTIONS (Cont'd)

PARKING LOT STRIPING WORK and/or HIGHWAY MARKERS:
Area 1: Fresno, Kings, and Tulare Counties
Area 2: Remaining Counties

PLASTERERS:
Area 1: Alameda and Contra Costa Counties
Area 2: San Francisco and San Mateo Counties
Area 3: Alpine, Amador, Butte, Calaveras, Colusa, El Dorado, Glenn, Lassen, Modoc, Nevada, Placer, Plumas, Sacramento, San Joaquin, Shasta, Sierra, Siskiyou, Sutter, Tehama, Trinity, Yolo and Yuba Cos.
Area 4: Del Norte, Humboldt, Lake, Marin, Mendocino, Napa, Solano, and Sonoma Counties
Area 5: San Benito, Santa Clara, and Santa Cruz Counties
Area 6: Fresno, Kings, Madera, and Tulare Counties
Area 7: Monterey County
Area 8: Mariposa, Merced, Stanislaus, and Tuolumne Counties

PLASTERERS' TENDERS:
Area 1: Alameda and Contra Costa Counties
Area 2: Fresno, Kings, Madera, and Tulare Counties
Area 3: San Francisco and San Mateo Counties
Area 4: Alpine, Amador, El Dorado, Nevada, Placer, Sacramento, Sierra and Yolo Counties
Area 5: Calaveras and San Joaquin Counties
Area 6: Marin County
Area 7: Monterey County
Area 8: San Benito, Santa Clara and Santa Cruz Counties
Area 9: Solano County
Area 10: Napa County

PLUMBERS:
Area 1: Alameda County
Area 2: Contra Costa County

PLUMBERS; STEAMFITTERS:
Area 1: Amador County (northern half); El Dorodo, Nevada, Sacramento, and Yolo Counties (excluding Lake Tahoe Area), Sierra County
Area 2: Lake Tahoe Area
Area 3: Marin, Mendocino, San Francisco, and Sonoma Counties
Area 4: Alpine County; Amador County (southern portion); Butte, Calaveras, Colusa, Fresno, Glenn, Kings, Lassen, Madera, Mariposa, Merced, Modoc, Monterey, Plumas, San Joaquin, Santa Cruz, Shasta, Sierra, Siskiyou, Stanislaus, Sutter, Tehama, Trinity, Tulare, Tuolumne, and Yuba Counties
Area 5: Lake, Napa, and Solano Counties
Area 6: Del Norte and Humboldt Counties
Area 7: San Benito and Santa Clara Counties
Area 8: San Mateo County

ROOFERS:
Area 1: Alameda and Contra Costa Counties
Area 2: Alpine, Calaveras, Mariposa, Merced, San Joaquin, Stanislaus, and Tuolumne Counties

AREA DESCRIPTIONS (Cont'd)

ROOFERS: (Cont'd)
Area 3: Butte, Colusa, El Dorado, Glenn, Lassen, Modoc, Placer, Plumas, Shasta, Sierra, Siskiyou, Sutter, Tehama, Trinity, and Yuba Counties
Area 4: Fresno, Kings, Madera, and Tulare Counties
Area 5: Lake, Marin, Mendocino, Napa, Solano, and Sonoma Counties
Area 6: Del Norte and Humboldt Counties
Area 7: Monterey and Santa Cruz Counties
Area 8: San Francisco and San Mateo Counties
Area 9: Amador, Sacramento, and Yolo Counties
Area 10: San Benito and Santa Clara Counties

SHEET METAL WORKERS:
Area 1: Alameda and Contra Costa Counties
Area 2: Alpine, Calaveras, and San Joaquin Counties
Area 3: Amador, Butte, Colusa, El Dorado, Glenn, Modoc, Plumas, Sacramento, Shasta, Sierra, Siskiyou, Sutter, Tehama, Yolo, and Yuba Counties
Area 4: Mariposa, Merced, Stanislaus, and Tuolumne Counties
Area 5: Monterey and San Benito Counties
Area 6: Del Norte, Humboldt, and Trinity Counties
Area 7: San Mateo County
Area 8: Fresno, Kings, Madera, and Tulare Counties
Area 9: San Francisco County
Area 10: Marin, Mendocino, Sonoma, and Lake Counties
Area 11: Santa Cruz Counties
Area 12: Santa Clara County
Area 13: Napa and Solano Counties

SOFT FLOOR LAYERS:
Area 1: Alpine, Amador, Butte, Calaveras, Colusa, El Dorado, Glenn, and Lassen Counties (excluding Honey Lake Area); Merced County (east of San Joaquin River); Plumas, Sacramento, San Joaquin, Shasta, Stanislaus, Sutter, Tehama, Trinity, Tuolumne, Yolo, and Yuba Counties; El Dorado, Nevada, Placer, and Sierra Counties (those portions excluding Lake Tahoe Area)
Area 2: Honey Lake Area and Lake Tahoe Area
Area 3: Alameda, Contra Costa, Lake, Marin, Mendocino, Merced, Monterey, Napa, San Benito, San Francisco, San Mateo, Santa Clara, Santa Cruz, Solano, and Sonoma Counties
Area 4: Del Norte and Humboldt Counties

SPRINKLER FITTERS:
Area 1: Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, and Sonoma Counties
Area 2: Remaining Counties

STEAMFITTERS:
Area 1: Alameda and Contra Costa Counties

AREA DESCRIPTIONS (Cont'd)

TERRAZZO WORKERS:
Area 1: Alameda, Contra Costa, Del Norte, Humboldt, Lake, Marin, Mendocino, Napa, San Francisco, San Mateo, Siskiyou, Solano, Sonoma, and Trinity Counties
Area 2: Butte, Colusa, El Dorado, Glenn, Lassen, Modoc, Nevada, Placer, Plumas, Sacramento, Shasta, Sierra, Sutter, Tehama, Yolo, and Yuba Counties
Area 3: San Benito and Santa Clara Counties

TILE SETTERS:
Area 1: Alameda, Butte, Colusa, Contra Costa, Del Norte, El Dorado, Glenn, Humboldt, Lake, Lassen, Marin, Mendocino, Modoc, Napa, Nevada, Placer, Plumas, Sacramento, San Benito, San Francisco, San Mateo, Santa Clara, Shasta, Sierra, Siskiyou, Solano, Sonoma, Sutter, Tehama, Trinity, Yolo, and Yuba Counties
Area 2: Alpine, Amador, Calaveras, San Joaquin, Stanislaus, and Tuolumne Counties

TERRAZZO WORKERS and TILE SETTERS:
Area 1: Fresno, Kings, Madera, Mariposa, Merced, and Tulare Counties
Area 2: Monterey and Santa Cruz Counties

TERRAZZO FINISHERS:
Area 1: Alameda, Alpine, Amador, Butte, Calaveras, Contra Costa, Del Norte, El Dorado, Glenn, Humboldt, Lake, Lassen, Marin, Mendocino, Modoc, Monterey, Napa, Nevada, Placer, Plumas, Sacramento, San Joaquin, San Mateo, Santa Clara, Santa Cruz, Shasta, Sierra, Siskiyou, Solano, Sonoma, Sutter, Tehama, Trinity, Yolo and Yuba Counties, and the City and County of San Francisco, San Benito County

TILE FINISHERS:
Area 1: Alameda, Alpine, Amador, Butte, Calaveras, Colusa, Contra Costa, Del Norte, El Dorado, Glenn, Humboldt, Lake, Lassen, Marin, Mendocino, Modoc, Monterey, Napa, Nevada, Placer, Plumas, Sacramento, San Benito, San Joaquin, San Mateo, Santa Clara, Santa Cruz, Shasta, Sierra, Siskiyou, Solano, Sonoma, Sutter, Tehama, Trinity, Yolo and Yuba Counties, and the City and County of San Francisco

LABORERS

Area 1: Alameda, Contra Costa, Marin, San Francisco, San Mateo, and Santa Clara Counties
Area 2: Remaining Counties

Group 1: Asphalt Ironers and Rakers; Asphalt Spreader Boxes (all types); Barko, Wacker and similar type Tampers; Buggymobile; Chainsaw, Faller, Logloader and Bucker; Compactors of all types; Concrete and Magnesite Mixer, 1/2 yd. and under; Concrete Pan Work; Concrete Saw; Concrete Sander; Cribber and/or Shoring; Cut Granite Curb Setter; Form Raisers; Slip Forms; Green Cutters, Headerboardmen, Hubsetters, Aligners; Jackhammer Operators; Jacking of Pipe over 12 inches; Jackson and similar type Compactors; Kettlemen, Potmen and Men applying asphalt, lay-kold, creosote, lime, caustic and similar type materials; Lagging, Sheeting, Whaling, Bracing, Trenchjacking, hand-guided Lagging Hammer; Magnesite, Epoxyresin, Fiberglass, Mastic Workers (wet or dry); Perma Curbs; Precast-manhole Setters; Cast-in-place Manhole Form Setters; Pressure Pipe Tester; Pavement Breakers and Spaders, including Tool Grinder; Pipelayers, Caulkers, Banders, Pipewrappers, Conduit Layers, Plastic Pipelayers; Post Hole Diggers, air, gas, and electric; Power Broom Sweepers; Power Tampers of all types (except as shown in Group 2); Ram Set Gun and Stud Gun; Riprap-stonepaver and Rock-slinger, including placing of sacked concrete and/or sand (wet or dry); Rotary Scarifier, Multiple Head Concrete Chipper; Davis Trencher, 300 or similar type (and all small Trenchers); Roto and Ditch Witch; Roto-tiller; Sandblasters, Potmen, Gunman, Nozzleman; Signalling and Rigging; Tank Cleaners; Tree Climbers; Vibra-screed, Bull Float in connection with Laborers' work; Vibrators; Dri-pak-it Machine; High Pressure Blow Pipe (1½" or over, 100 lbs. pressure and over); Hydro Seeder and similar type; Laser Beam in connection with Laborers' work

Group 1(a): Joy Drill Model TWM-2A; Gardener-Denver Model DH143 and similar type drills; Track Drillers; Jack Leg Drillers; Diamond Drillers; Wagon Drillers; Mechanical Drillers, all types regardless of type or method of power; Multiple Unit Drills; Blasters and Powdermen; all work of loading, placing and blasting of all power and explosives of whatever type regardless of method used for such loading and placing; High Scalers (including drilling of same); Tree Topper; Bit Grinder

Group 1(b): Sewer Cleaners receive an additional $4.00 per day, $5.00 per day on recently active large diameter sewers or sewer manholes

Group 1(c): Burning and Welding in connection with Laborers' work

Group 1(d): Repair Trackmen and Road Buds (cut and cover work of subway after the temporary cover has been placed)

Group 1(e): Laborers on general construction work on or in Bell Hole Footings and Shaft

Group 1(f): Wire Winding Machine In Connection with Guniting or Shotcrete - Aligner

12800 Federal Register / Vol. 49, No. 63 / Friday, March 30, 1984 / Notices

UMI 1984 30 MR 63 ISS 49 VOL

LABORERS - AREAS 1 and 2 (Cont'd)

Group 2: Asphalt Shovelers; Cement Dumpers and handling dry cement or gypsum; Choke-setter and Digger (clearing work); Concrete Bucket Dumper and Chuteman; Concrete Chipping and Grinding; Concrete Laborers (wet or dry); Chuck Tender; High Pressure Nozzleman, Adductors; Grout-crew; Hydraulic Monitor (over 100 lbs. pressure); Loading and unloading, carrying and hauling of all rods and materials for use in reinforcing concrete construction; Pittsburgh Chipper and similar type Brush Shredders; Sloper; Singlefoot, hand held, Pneumatic Tamper; All pneumatic, air, gas and electric tools not listed in Groups 1 through 1(f); Jacking of Pipe under 12 inches

Group 3: All Cleanup work of debris, grounds and buildings including but not limited to street cleaners; Cleaning and washing windows; Construction Laborers including Bridge and General Laborers; Dumpman; Load Spotter; Fire Watcher; Street Cleaners; Gardeners, Horicultural and Landscape Laborers; Jetting; Limbers; Brush Loaders; Pilers, Maintenance Landscape Laborers on new construction; Maintenance, Repair Trackmen and Road beds; Streetcar and Railroad Construction Track Laborers; Temporary air and water lines, Victaulic or similar; Tool Room Attendent; Fence Erectors; Guardrail Erectors; Pavement Markers (button setters)

Group 4: Brick Cleaners; Lumber Cleaners

GUNNITE

Group 1: Nozzleman (including Gunman, Potman); Rodmen, Groundman

Group 2: Reboundman

Group 3: General Laborers

TUNNEL and SHAFT WORK

Group 1: Diamond Driller; Groundman; Gunite and Shotcrete Nozzlemen; Rodmen; Shaft Work and Raise (below actual or excavated ground level)

LABORERS - AREAS 1 and 2 (Cont'd)

TUNNEL and SHAFT WORK (Cont'd)

Group 2: Bit Grinder; Blaster; Drillers, Powderman-heading; Cherry Pickerman - where car is lifted; Concrete Finisher in Tunnel; Concrete Screed Man; Grout Pumpman and Potman; Gunite and Shotcrete Gunmen and Potmen; Headermen; High Pressure Nozzleman; Miners - Tunnel, including Top and Bottom Man on Shaft and Raise Work; Nipper Nozzleman on slick line; Sandblaster-Potman (work assignment interchangeable); Steel Form Raisers and Setters; Timberman, Retimberman - wood or steel or substitute materials therefore; Tugger

Group 3: Cabletender; Chucktender; Powderman - Primer House; Vibratormen, Pavement Breakers

Group 4: Bull Gang - Muckers, Trackmen; Concrete Crew - includes rodding and spreading; Dumpmen (any method); Grout Crew Reboundmen; Swamper

WRECKING WORK

Group 1: Skilled Wrecker (removing and salvaging of sash, windows, doors, plumbing and electric fixtures)

Group 2: Semi-skilled Wrecker (salvaging of other building materials)

Group 3: General Laborer (Includes all cleanup work, loading lumber, loading and burning of debris)

HOUSEMOVING

Group 1: Skilled Housemover

POWER EQUIPMENT OPERATORS
AREAS I and II

Group 1: Assistants to Engineers (Brakeman; Fireman; Heavy Duty Repairman Tender; Oiler; Deckhand; Signalman; Switchman; Tar Pot Fireman); Partsman (heavy duty repair shop parts room)

Group 2: Compressor Operator; Concrete Mixer (up to and including 1 yd.); Conveyor Belt Operator (tunnel); Fireman Hot Plant; Hydraulic Monitor; Mechanical Conveyor (handling building materials); Mixer Box Operator (concrete plant); Pump Operator; Spreader Boxman (with screeds); Tar Pot Fireman (power agitated)

POWER EQUIPMENT OPERATORS (Cont'd)
AREAS I and II (Cont'd)

Group 3: Box Operator (bunker); Helicopter Radioman (Signalman); Motorman; Locomotive (30 tons or under); Oiler; Ross Carrier (construction job site); Rotomist Operator; Screedman (except asphaltic concrete paving); Self-propelled, automatically applied concrete curing machine (on streets, highways, airports and canals); Trenching Machine (maximum digging capacity 5 ft. depth); Tugger Hoist, single drum; Truck Crane Oiler; Boiler Tender

Group 4: Ballast Jack Tamper; Ballast Regulation; Ballast Tamper Multipurpose; Boxman (asphalt plant); Elevator Operator (inside); Fork Lift or Lumber Stacker (construction job site); Line Master; Material Hoist (1 drum); Shuttlecar; Tie Spacer; Towermobile

Group 5: Compressor Operator (over 2); Concrete Mixers (over 1 yd.); Concrete Pumps of Pumpcrete Guns; Generators; Grouting Machine; Pressweld (air operated); Pumps (over 1); Welding Machines (powered other than by electricity)

Group 6: BLH Lima Road Pactor or similar; Boom Truck or Dual Purpose A-Frame Truck; Concrete Batch Plants (wet or dry); Concrete Saws (self-propelled unit) on streets, highways, airports and canals; Drilling and Boring Machinery, vertical and horizontal (not to apply to Waterliners, Wagon Drills or Jackhammers); Gradesetter, Grade Checker (mechanical or otherwise); Highline Cableway Signalman; Locomotives (steam of over 30 tons); Maginnis Internal Full Slab Vibrator (on airports, highways, canals and warehouses); Mechanical Finishers (concrete) (Clary, Johnson, Bidwell Bridge Deck or similar types); Mechanical Burm, Curb and/or Curb and Gutter Machine, concrete or asphalt; Portable Crusher; Post Driver (M-1500 and similar); Power Jumbo Operator (setting slip forms, etc. in tunnels); Roller (except asphalt); Screedman (Barber-Greene and similar) (asphaltic concrete paving); Self-propelled Compactor (single engine); Self-propelled Pipeline Wrapping Machine, Perault, CRC, or similar types; Slip Forms Pumps (lifting device for concrete forms); Small Rubber Tired Tractor; Surface Heater; Self-propelled Power Sweeper; Self-propelled Tape Machine; Auger-type drilling equipment, up to and including 30 ft. depth digging capacity M.R.C.

Group 7: Concrete Conveyor or Concrete Pump, Truck or equipment mounted (boom length to apply); Concrete Conveyor, building site; Deck Engineers; Dual Drum Mixer; Fuller Kenyon Pump and similar types; Gantry Rider (or similar); Hydra-hammer (or similar); Material Hoist (2 or more drums); Mechanical Finishers or Spreader Machine (asphalt, Barber-Greene and similar); Mine or Shaft Hoist; Mixermobile; Pavement Breaker with or without Compressor Combination; Pipe Bending Machine (pipelines only); Pipe Cleaning Machine (tractor propelled and supported); Pipe Wrapping Machine (tractor propelled and supported); Refrigeration Plant; Roller Operator (finish asphalt); Self-propelled boom type lifting device (center mount) (10 tons or less M.R.C.); Self-propelled Elevating Grader Plane; Slusher Operator; Small Tractor (with boom); Soil Tester; Truck type Loader; Welding Machines (gasoline or diesel)

POWER EQUIPMENT OPERATORS (Cont'd)
AREAS I and II (Cont'd)

Group 8: Armor-Coater (or similar); Asphalt Plant Engineer; Cast-in-place Pipe Laying Machine; Combination Slusher and Motor Operator; Concrete Batch Plant (multiple units); Dozer; Heading Shield Operator; Heavy Duty Repairman and/or Welder; Ken Seal Machine (or similar); Kolman Loader; Loader (up to 2 yds.); Mechanical Trench Shield; Portable Crushing and Screening Plants; Push Cat; Rubber Tired Earth-moving Equipment (up to and including 45 cu. yds. "struck" M.R.C) (Euclids, T-Pulls, DW-10, 20, 21, and similar); Rubber Tired Dozer; Self-propelled Compactor with Dozer; Sheepfoot; Timber Skidder (rubber tired or similar equipment); Tractor drawn Scraper; Tractor; Trenching Machine; Tri-batch Paver; Tunnel Mole Boring Machine; Welder; Woods-mixer (and other similar Pugmill equipment)

Group 9: Canal Finger Drain Digger; Chicago Boom; Combination Mixer and Compressor (Gunite); Combination Slurry Mixer and/or Cleaner; Highline Cableway (5 tons and under); Lull Hi-lift or similar (20 ft. or over); Mucking Machine (rubber tired, rail or track type); Tractor (with boom) (D-6 or larger and similar)

Group 10: Boom-type Backfilling Machine; Bridge Crane; Cary-lift (or similar); Chemical Grouting Machine, truck mounted; Combination Backhoe and Loader (up to and including 1/2 cu. yd. M.R.C.); Derrick (2 operators required when swing engine remote from Hoist); Derrick Barges (except excavation work); Do-mor Loader; Adams Elegrader; Elevating Grader; Heavy Duty Rotary Drill Rig (including Caisson Foundation work and Euclid Loader and similar type; Robbins type drills; Koehring Skooper (or similar); Lift Slab Machine (Vagtborg and similar types); Loader (2 yds. up to and including 4 yds.); Locomotive, 100 tons (single or multiple units); Multiple Engine Earthmoving Machine (Euclids, Dozers, etc.)(no tandem Scraper); Pre-stress Wire Wrapping Machine; Reservoir-debris Tug (self-propelled floating); Rubber-tired Scraper, Self-loading (paddle wheels, etc.); Shuttle Car (reclaim station); Single engine Scraper over 45 yds.; Soil Stabilizer (P & H or equal); Sub-grader (Gurtler or other automatic type); Tractor, Compressor Drill Combination; Track Laying type Earth Moving Machine (single engine with Tandem Scrapers); Train Loading Station; Trenching Machine, multi-engine with sloping attachment, Jeffco or similar; Vacuum Cooling Plant; Whirley Crane (up to and including 25 tons)

Group 10-A: Backhoe (Hydrdulic)(up to and including 1 cu. yd. M.R.C.); Backhoe (cable)(up to and including 1 cu. yd. M.R.C.); Combination Backhoe and Loader (over 3/4 cu. yd. M.R.C.); Continuous Flight Tie Back Auger (Crane attached/separate controls); Cranes not over 25 tons, Hammerhead and Gantry; Gradalls (up to and including 1 cu. yd.); Power Blade Operator (single engine); Power Shovels, Clamshells, Draglines (up to and including 1 cu. yd. M.R.C.)(Long Boom Pay); Rubber-tired Scraper, self-loading (Paddle Wheel, twin engine); Self-propelled Boom-type lifting device (center mount)(over 10 tons up to and including 25 tons); CMI Dual Lane Auto Grader SP-30 or similar

12882 Federal Register / Vol. 49, No. 63 / Friday, March 30, 1984 / Notices

UMI 30 MR 63 ISS 49 VOL 1984

POWER EQUIPMENT OPERATORS (Cont'd)
AREAS I and II (Cont'd)

Group 11: Automatic Concrete Slip-form Paver (Gradesetter, Screedman); Automatic Railroad Car Dumper; Canal Trimmer with ditching attachments; Cary Lift, Campbell or similar, Continuous Flight Tie Back Auger (Crane attached, single controls); Cranes (over 25 tons up to and including 125 tons); Drott Travelift 650-A-1 or similar (45 ton or over); Euclid Loader when controlled from the Pullcat; Highline Cableway (over 5 tons); Loader (over 4 cu. yds., up to and including 12 cu. yds.); Miller Formless M-900 Slope Paver or similar (Grade Setter required); Multiple Engine Scraper (when used as Push Pull); Power Blade Operator (multi-engine); Power Shovels, Clamshells, Draglines, Backhoes, Gradalls (over 1 cu. yd. and up to and including 7 cu. yds. M.R.C., Long Boom Pay); Rubber-tired Earthmoving Machines (multiple propulsion power units and two or more Scrapers) (up to and including 75 cu. yds. Struck M.R.C.); Self-propelled Compactor Boom-type lifting device (center mount) (over 25 tons M.R.C.); Single engine Rubber-tired Earthmoving Machines (with Tandem Scrapers); Slip-form Paver (concrete or asphalt) (Screedman required); Tandem Cats; Tower Cranes Mobile (including rail mounted); Trencher (pulling attached shield); Tower Cranes, Universal Liebher and similar types (in the erection, dismantling and moving of equipment); Wheel Excavator (up to and including 750 cu. yds. per hour); Whirley Crane (over 25 tons); Multi-earthmoving Equipment (up to and including 75 cu. yds. "struck" M.R.C.); Truck mounted Hydraulic Crane when remote control equipped (over 10 tons up to and including 25 tons)

Group 11-A: Band Wagons (in conjunction with wheel excavator); Cranes (over 125 tons); Loader (over 12 cu. yds., up to and including 13 cu. yds.); Power Shovels, Clamshells, Backhoes, Gradalls, and Draglines (over 7 cu. yds. M.R.C.); Rubber-tired Multi-purpose Earth Moving Machines (2 units over 75 cu. yds. "struck" M.R.C.); Wheel Excavator (over 750 cu. yds. per hour)

Group 11-B: Loader (over 18 yards)

Group 11-C: Operator of Helicopter (when used in erection work); Remote controlled Earthmoving equipment

POWER EQUIPMENT OPERATORS (Cont'd)

DREDGING

AREA DEFINTIONS FOR SCHEDULES I and II

Four Centers designated: City Halls of Oakland, San Francisco, Sacramento and Stockton, California
Area 1: Up to 20 road miles from said Centers
Area 2: More than 20 road miles to and including 30 road miles from said Centers
Area 3: Outside of 30 road miles from said Centers
Area 4: An area extending 25 road miles from shoreline of Lake Tahoe

SCHEDULE I
CLAMSHELL and DIPPER DREDGING (New Construction)

Group 1: Bargeman; Deckhand; Fireman; Oiler

Group 2: Deck Engineers; Deck Mate

Group 3: Welder; Mechanic Welder; Watch Engineer

Group 4: Clamshell Operator (up to and including 7 cu. yds. M.R.C.) (Long Boom Pay)

Group 4A: Clamshell Operator (over 7 cu. yds. M.R.C.) (Long Boom Pay)

SCHEDULE II
HYDRAULIC SUCTION DREDGING and all other CLAMSHELL and DIPPER DREDGING

Group A-1: Bargeman; Deckhand; Leveehand; Fireman; Oiler

Group A-2: Winchman (Stern Winch on Dredge); Deck Engineer

Group A-3: Watch Engineer; Welder; Welder Mechanic; Deckmate; Booster Pump Operator (Mud Cat)

Group A-4: Leverman; Clamshell Operator

PILEDRIVING

Group 1: Assistant to Engineer (Fireman, Oiler, Deckhand)

Group 1A: Compressor Operator

Group 1B: Assistant to Engineer (Truck Crane Oiler)

Group 2A: Tugger Hoist Operator (hoisting material only)

Group 2B: Forklift Operator

POWER EQUIPMENT OPERATORS (Cont'd)
PILEDRIVING (Cont'd)

Group 2C: Compressor Operator (over 2); Generators; Pumps (over 4); Welding Machines (powered by other than electricity)

Group 2D: A-Frames

Group 3: Deck Engineer (Deck Engineer Operator required when deck engine is used); Self-propelled Boom-type lifting device (center mount) (10 ton capacity or less M.R.C.)

Group 3A: Heavy Duty Repairman and/or Welder

Group 4: Operating Engineer in lieu of Assistant to Engineer tending boiler or compressor attached to Crane Piledriver; Operator of Piledriving Rigs, Skid or Floating and Derrick Barges (Assistant to Engineer required); Operator of diesel or gasoline power Crane Piledriver (without boiler) up to and including 1 cu. yd. rating (Assistant to Engineer required); Self-propelled Boom-type lifting device (center mount) (over 10 tons up to and including 25 tons); Truck Crane Operator (up to and including 25 tons) (hoisting material only) (Assistant to Engineer required)

Group 5: Operator of diesel or gasoline powered Crane Piledriver (with boiler) over 1 cu. yd. rating (Assistant to Engineer required); Operator of Crane (with steam, flash boiler, pump or compressor attached) (Group 4 Engineer required); Operator of steam powered Crawler or Universal type Driver (Raymond or similar) (Assistant to Engineer required) Truck Crane Operator (over 25 tons) (Hoisting material or performing Piledriving work) (Assistant to Engineer required); Self-propelled Boom-type lifting device (center mount) (over 25 tons) (Assistant to Engineer required)

Group 6: Cranes (over 125 tons) (Assistant to Engineer required)

STEEL ERECTION

Group 1: Assistant to Engineer (Oiler)

Group 2: Compressor Operator, Generator, gasoline or diesel driven (100 K.W. or over) (structural steel or tank construction only)

Group 3: Compressors, Generators and/or Welding Machines or combination (2 to 6) (Over 6 additional Engineers required) (structural steel or tank erection only)

Group 4: Heavy Duty Repairman, Tractor Operator

Group 4A: Combination Heavy Duty Repairman and/or Welder

POWER EQUIPMENT OPERATORS (Cont'd)
STEEL ERECTION (Cont'd)

Group 5: Boom Truck or Dual Purpose A-Frame Truck; Boom Cat; Chicago Boom; Crawler Cranes and Truck Cranes (15 tons M.R.C. or less) (Assistant to Engineer required); Self-propelled Boom type lifting device (center mount) (10 ton capacity or less M.R.C.); Single drum Hoist; Tugger Hoist

Group 6: Cary Lift, Campbell or similar; Crawler Cranes and Truck Cranes (over 15 tons M.R.C.) (Assistant to Engineer required); Derricks (2 Operators when swing engine remote from hoist); Gantry Rider (or similar equipment); Highline Cableway (Signalman required); Self-propelled Boom-type lifting device (center mount) (over 10 tons up to and including 25 tons); Tower Cranes Mobile including rail mounted (Assistant to Engineer required); Tower Cranes, Universal Liebher and similar types (in the erection, dismantling and moving of equipment there shall be an additional Operating Engineer)

Group 7: Self-propelled Boom-type lifting device (center mount) (over 25 tons) (Assistant to Engineer required)

Group 8: Cranes (over 125 tons) (Assistant to Engineer required)

Group 9: Helicopter Operator

TRUCK DRIVERS

Group 1: Bulk Cement Spreader (w/wo Auger, under 4 yds. water level); Bus or Manhaul Driver; Concrete Pump Machine; Concrete Pump Truck (when Flat Rack Truck is used appropriate Flat Rack rate shall apply); Dump (under 4 yds. water level); Dumpcrete Truck (under 4 yds. water level); Dumpster (under 4 yds. water level); Escort or Pilot Car Driver; Nipper Truck (when Flat Rack Truck is used appropriate Flat Rack rate shall apply); Pickups; Skids (Debris Box, under 4 yds. water level); Team Drivers; Trucks (Dry Pre-Batch Concrete Mix, under 4 yds. water level); Warehousemen

Group 2: Teamster Oiler and/or Greaser and/or Service Man

Group 3: Bulk Cement Spreader (w/wo Auger, 4 yd. and under 6 yds. water level); Dump (4 yds. and under 6 yds. water level); Dumpcrete (4 yds. and under 6 yds. water level); Dumpster (4 yds. and under 6 yds. water level); Skids (Debris Box, 4 yds. and under 6 yds. water level); Single Unit Flat Rack (2 axle unit); Industrial Lift Truck (mechanical Tailgate); Trucks (Dry Pre-batch Concrete Mix, 4 yds. and under 6 yds. water level)

Group 4: Jetting Truck and Water Truck (under 2,500 gallons)

Group 5: Road Oil Trucks or Boot Man

12984 Federal Register / Vol. 49, No. 63 / Friday, March 30, 1984 / Notices

UMI 1984 30 MR 63 ISS 49 VOL

TRUCK DRIVERS (Cont'd)

Group 6: Lift Jitneys, Fork Lift

Group 7: Transit Mix, Agitator (under 6 yds.)

Group 8: Fuel and/or Grease Truck Driver or Fuelman

Group 9: Vacuum Truck, under 3,500 gallons

Group 10: Scissor Truck; Single unit Flat Rack (2 axle unit); Industrial Lift Truck (mechanical tailgate); Small rubber tired tractor (when used within Teamsters' jurisdiction)

Group 11: Jetting Truck and Water Trucks, 2,500 gallons and under 4,000 gallons

Group 12: Combination Winch Truck with Hoist; Transit Mix Agitator (6 yds. and under 8 yds.)

Group 13: Vacuum Truck, 3,500 gallons and under 5,500 gallons

Group 14: Rubber-tired Muck Car (not self-loaded)

Group 15: Bulk Cement Spreader (w/wo Auger, 6 yds. and under 8 yds. water level); Dump (6 yds. and under 8 yds. water level); Dumpcrete (6 yds. and under 8 yds. water level); Dumpster (6 yds. and under 8 yds. water level); Skids (Debris Box, 6 yds. and under 8 yds. water level); Trucks (Dry Pre-batch Concrete Mix, 6 yds. and under 8 yds. water level)

Group 16: A-Frame, Winch Truck; Buggymobile; Jetting and Water Truck (4,000 gallons and under 5,000 gallons); Rubber tired Jumbo

Group 17: Heavy Duty Transport (high bed)

Group 18: Ross Hyster and similar Straddle Carrier

Group 19: Transit Mix Agitator (8 yds. through 10 yds.)

Group 20: Vacuum Truck (5,500 gallons and under 7,500 gallons)

Group 21: Jetting Truck and Water Truck (5,000 gallons and under 7,000 gallons)

Group 22: Combination Bootman and Road Oiler

Group 23: Transit Mix Agitator (over 10 yds. through 12 yds.)

Group 24: Bulk Cement Spreader (w/wo Auger, 8 yds. and including 12 yds. water level); Dump (8 yds. and including 12 yds. water level); Dumpcrete (8 yds. and including 12 yds. water level); Self-propelled Street Sweeper with self-contained refuse bin; Skids (Debris Box, 8 yds. and including 12 yds. water level); Snow Go and/or Snow Plow; Truck (Dry Pre-batch Concrete Mix, 8 yds. and including 12 yds. water level)

TRUCK DRIVERS (Cont'd)

Group 25: Heavy Duty Transport (Gooseneck Lowbed)

Group 26: Transit Mix Agitator (over 12 yds. through 17 yds.)

Group 27: Ammonia Nitrate Distributor Driver and Mixer; Bulk Cement Spreader (w/wo Auger, over 12 yds. and including 18 yds. water level); Dump (over 12 yds., and including 18 yds. water level); Dumpcrete over 12 yds. and including 18 yds. water level); Dumpster (over 12 yds. and including 18 yds. water level); Truck (Dry Pre-batch Concrete Mix, over 12 yds. and including 18 yds. water level)

Group 28: Double Gooseneck (7 or more axles); Heavy Duty Transport Tiller Man

Group 29: P.B. or similar type self-loading Truck

Group 30: Transit Mix Agitator (over 14 yds. through 16 yds.)

Group 31: Bulk Cement Spreader (w/wo Auger, over 18 yds. and including 24 yds. water level); Combination Dump and Dump Trailer; Dump (over 18 yds. and including 24 yds. water level); Dumpcrete (over 18 yds. and including 24 yds. water level); Dumpster (over 18 yds. and including 24 yds. water level); Skid (Debris Box, over 18 yds. and including 24 yds. water level); Transit Mix Agitator (over 12 yds. through 16 yds.); Trucks (Dry Pre-batch Concrete Mix, over 18 yds. and including 24 yds. water level)

Group 32: Bulk Cement Spreader (w/wo Auger, over 24 yds. and including 35 yds. water level); Dump (over 24 yds. and including 35 yds. water level); Dumpcrete (over 24 yds. and including 35 yds. water level); Dumpster (over 24 yds. and including 35 yds. water level); DW 10's, 20's, 21's and other similar Cat type, Terra Cobra, LeTournapulls, Tournarocker, Euclid and similar type equipment when pulling Fuel and/or Grease Tank Trailers or other misc. Trailers; Skids (Debris Box, over 24 yds. and including 35 yds. water level); Trucks (Dry Pre-batch Concrete Mix, over 24 yds. and including 35 yds water level)

Group 33: Truck Repairman

Group 34: Bulk Cement Spreader (w/wo Auger, over 35 yds. and including 50 yds. water level); Dump (over 35 yds. and including 40 yds. water level); Dumpcrete (over 35 yds. and including 50 yds. water level); Dumpster (over 35 yds. and including 50 yds. water level); Skids (Debris Box, over 35 yds. and including 50 yds. water level); Trucks (Dry Pre-batch Concrete Mix, over 35 yds. and including 50 yds. water level)

Group 35: DW 10's 20's, 21's and other similar Cat type, Terra Cobra, LeTournapulls, Tournarocker, Euclid and similar type equipment when pulling Aqua/Pak or Water Tank Trailers

UMI 1984 MR 30 ISS 63 49 VOL

TRUCK DRIVERS (Cont'd)

Group 36: Bulk Cement Spreader (w/wo Auger, over 50 yds. and under 65 yds. water level); Dump (over 50 yds. and under 65 yds. water level); Dumpcrete (over 50 yds. and under 65 yds. water level); Dumpster (over 50 yds. and under 65 yds. water level); Helicopter Pilot (when transporting men or materials); Skids (Debris Box, over 50 yds. and under 65 yds. water level); Trucks (Dry Pre-batch Concrete Mix, over 50 yds. and under 65 yds. water level)

Group 37: Bulk Cement Spreader (w/wo Auger, over 65 yds. and including 80 yds. water level); Dump (65 yds. and including 80 yds. water level); Dumpcrete (over 65 yds. and including 80 yds. water level); Dumpster (over 65 yds. and including 80 yds. water level); Skids (Debris Box, 65 yds. and including 80 yds. water level); Trucks (Dry Pre-batch Concrete Mix, 65 yds. and including 80 yds. water level)

Group 38: Bulk Cement Spreader (w/wo Auger, over 80 yds. and including 95 yds. water level); Dump (over 80 yds. and including 95 yds. water level); Dumpcrete (over 80 yds. and including 95 yds. water level); Dumpster (over 80 yds. and including 95 yds. water level); Skids (Debris Box, over 80 yds. and including 95 yds. water level); Trucks (Dry Pre-batch Concrete Mix, over 80 yds. and including 95 yds. water level)

AREA DESCRIPTIONS
FOR
POWER EQUIPMENT OPERATORS
AREAS I and II

**AREA I: All areas included in the description defined below which is based upon Township and Range Lines of AREAS I and II.

Commencing in the Pacific Ocean on the extension of the Southerly line of Township 19S.
Thence Easterly along the Southerly line to Township 19S, crossing the Mt. Diablo Meridian to the S.W. corner of Township 19S, range 6E, Mt. Diablo Base Line and Meridian,
Thence Southerly to the S.W. corner of township 20S, range 6E,
Thence Easterly to the S.W. corner of township 20S, range 13E,
Thense Southerly to the S.W. corner of township 21S, range 13E,
Thence Easterly to the S.W. corner of township 21S, range 17E,
Thence Southerly to the S.W. corner of township 22S, range 17E,
Thence Easterly to the S.E. corner of township 22S, range 17E,
Thence Southerly to the S.W. corner of township 23S, range 18E,
Thence Easterly to the S.E. corner of township 23S, range 18E,
Thence Southerly to the S.W. corner of township 24S, range 19E, falling on the Southerly Line of Kings County, thence Easterly along the Southerly Boundary of Kings County and the Southerly Boundary of Tulare County, to the S.E. corner of township 24S, range 29E,

AREA DESCRIPTIONS (Cont'd)
FOR
POWER EQUIPMENT OPERATORS
AREAS I and II

Thence Northerly to the N.E. corner of township 21S, range 29E,
Thence Westerly to the N.W. corner of township 21S, range 29E,
Thence Northerly to the N.E. corner of township 13S, range 28E,
Thence Westerly to the N.W. corner of township 13S, range 28E,
Thence Northerly to the N.E. corner of township 11S, range 27E,
Thence Westerly to the N.W. corner of township 11S, range 27E,
Thence Northerly to the N.E. corner of towhship 10S, range 26E,

Thence Southerly to the S.W. corner of township 11N, range 12W,
Thence Easterly to the S.E. corner of township 11N, range 12W,
Thence Southerly along the Eastern Line to range 12W, to the Pacific Ocean excluding that portion of Northern California within Santa Clara County included within the following line:
Commencing at the N.W. corner of township 6S, range 3E, Mt. Diablo Baseline and Meridian:
Thence in a Southerly direction to the S.W. corner of township 7S, range 3E,
Thence in a Easterly direction to the S.E. corner of township 7S, range 4E,
Thence in a Northerly direction to the N.E. corner of township 6S, range 4E,

AREA DESCRIPTIONS (Cont'd)
for
POWER EQUIPMENT OPERATORS
AREAS I and II

Thence in a Westerly direction to the N.W. corner of township 6S, range 3E, to the point of beginning which portion is a part of Area 2.

AREA 1: also includes that portion of Northern California within the following lines:
Commencing in the Pacific Ocean on a extension of the Southerly line to township 2N, Humboldt Baseline and Meridian:
Thence Easterly along the Southerly line to Township 2N, to the S.W. corner of Township 2N, range 1W,
Thence Southerly to the S.W. corner of township 1N, range 1W,
Thence Easterly along the Humboldt Baseline to the N.W. corner of township 1N, range 2E,
Thence Southerly to the S.W. corner of township 2S, range 2E,
Thence Easterly to the S.E. corner of township 2S, range 2E,
Thence Southerly to the S.W. corner of township 4S, range 3E,
Thence Easterly to the S.E. corner of township 4S, range 3E,
Thence Northerly to the N.E. corner of township 2S, range 3E,
Thence Westerly to the N.W. corner of township 2S, range 3E,
Thence Northerly crossing the Humboldt Baseline to the S.W. corner of township 1N, range 3E,
Thence Easterly along the Humboldt Baseline to the S.E. corner of township 1N, range 3E,
Thence Northerly to the N.E. corner of township 9N, range 3E,
Thence Westerly to the N.W. corner of township 9N, range 2E,
Thence Northerly to the N.E. corner of township 10N, range 1E,
Thence Westerly along the Northerly line to township 10N, into the Pacific Ocean.

AREA I: also includes that portion of Northern California included within the following lines:
Commencing at the Northerly boundary of the State of California at the N.W. corner of township 48N, range 7W, Mt. Diablo Baseline and Meridian:
Thence Southerly to the S.W. corner of township 44N, range 7W,
Thence Easterly to the S.E. corner of township 44N, range 7W,
Thence Southerly to the S.W. corner of township 43N, range 6W,
Thence Easterly to the S.E. corner of township 43N, range 5W,
Thence Northerly to the N.E. corner of township 48N, range 5W, on the Northerly boundary of the State of California,
Thence Westerly along the Northerly boundary of the State of California to the point of beginning.

AREA II: All areas not included within AREA I as defined.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a)(1)(ii))

STATE: KENTUCKY

COUNTY: FORT CAMPBELL (CHRISTIAN COUNTY, KY. & MONTGOMERY CO., TN

DECISION NUMBER: KY84-1010

DATE: DATE OF PUBLICATION

Supersedes Decision Number KY82-1010, dated October 8, 1982 in 47 FR 44668

DESCRIPTION OF WORK: BUILDING CONSTRUCTION PROJECTS (does not include single family homes and apartments up to and including four (4) stories).

	Basic Hourly Rates	Fringe Benefits
ASBESTOS WORKERS	$16.15	2.81
BOILERMAKERS	18.05	3.175
BRICKLAYERS, STONE MASONS, MARBLE MASONS, TILE SETTERS, TERRAZZO WORKERS, CEMENT MASONS & PLASTERERS	13.75	1.75
CARPENTERS, LATHERS, & SOFT FLOOR LAYERS	14.00	2.13
ELECTRICIANS:

CLASS D	9.56	1.65
ROOFERS	10.60	1.46
SHEET METAL WORKERS	16.03	1.14
SPRINKLER FITTERS:		
Kentucky Portion	16.47	3.23
Tennessee Portion	14.57	3.23
WELDERS: Receive rate prescribed for craft performing operation to which welding is incidental.		

CLASSIFICATION DEFINITIONS - LABORERS:

Group 1 - General Laborers, Wrecking Labor on buildings, Clearing right-of-way & building site, Carpenter Tender, Truck Spotter & Dumper, Axe & Cross Cut Saw Filer, Concrete Pudler & Form Stripper.

Group 2 - All power driven tools, Hod Carrier, Mason Tender, Finisher Tender, Mortar Mixer, Jackhammer, Vibrator, Wagon Drill, Core Drill, Test Drill, Well Drill Concrete Pump Machine, Tunnel Boring Machine, Men in tunnel and crib ditch work, Signal Men, Riprap Rock Setter & Handler, Asphalt Raker, Tamper & Smoother, Pipe Layer, Grout Pump Men, Chain Saw, Pipe Clearing, Doping & Wrapping, Swamper & Straight Cable Hooking, Cement Gun, Grade Checker Machine Excavating, Batch Plant Semlm Man, Sand Hog Free Air, Sand Hog Compressed Air, Cutting Torch Man on salvage work, Road Form Setter, Brick Slinger, Hand Spiker, Power Buggy, Handling of creosote material, Sandblaster, Curing of concrete & apply hardener, Air & Gas Tamper, Concrete Saw, Power Post Hole Digger & Green Cut Man on concrete work.

Group 3 - Powderman, Blaster.

CLASSIFICATION DEFINITIONS - POWER EQUIPMENT OPERATORS (KENTUCKY PORTION)

Class A - Auto Patrol, Batcher Plant, Bituminous Paver, Cable Way, Central Compressor Plant, Clamshell, Concrete Mixer (21 cu. ft. or over), Concrete Pump, Crane, Crusher Plant, Derrick, Derrick Boat, Ditching & Trenching Machine, Dragline, Dredge Operator, Dredge Engineer, Elevating Grader & all types of Loaders, Hoe type Machine, Hoist (1-drum when used for stack or chimney construction or repair), Hoisting Engine (2-drums or more), Locomotive, Motor Scraper, Carry-all Scoop, Bulldozer, Heavy Duty Welder, Mechanic, Orangepeel Bucket, Pile Driver, Power Blade, Motor Grader, Roller (bituminous), Scarifier, Shovel, Tractor Shovel, Truck Crane, Winch Truck, Push Dozer, High Lift, Fork Lift (regardless of lift height & except when used for masonry construction), All types of Boom Cats, Core Drill, Hopto, Tow or Push Boat, A-Frame Winch Truck, Concrete Paver, Gradeall, Hoist, Hyster, Pumpcrete, Ross Carrier, Boom, Tail Boom, Rotary Drill, Hydro Hammer, Mucking Machine, Rock Spreader attached to equipment, Scoopmobile, KeCal Loader, Tower Cranes (French, German & other types), Hydro Crane, Backfiller, Curries, Sub-Grader.

Class B - All Air Compressors (over 900 CFM), Bituminous Mixer, Joint Sealing Machine, Concrete Mixer (under 21 cu. ft.) Form Grader, Roller (rock), Tractor (50 HP & over), Bull Float, Finish Machine, Outboard Motor Boat, Flexplane, Fireman, Boom type Tamping Machine, Truck Crane Oiler, Greaser on grease facilities servicing heavy equipment, Switchman or Brakeman, Mechanic Helper, Whirley Oiler, Self-Propelled Compactor, Tractair & Road Widening Trencher, Farm Tractor with attachments (except Backhoe, High Lift & End Loader), Elevator (when used to hoist building materials), Hoisting Engine (1-drum or buck hoist), Fork Lift (when used for for masonry construction), Well Points Grout Pump, Throttle-Valve Man, Tugger, Electric Vibrator Compactor.

Class C - Bituminous Distributor, Cement Gun, Conveyor, Mud Jack, Paving Joint Machine, Roller (earth), Tamping Machine, Tractors (under 50 HP), Vibrator, Oiler, Concrete Saw, Burlap & Curing Machine, Hydro-Seeder, Power Form Handling Equipment, Deckhand Steersman, Hydraulic Post Driver, Drill Helper,

12888 Federal Register / Vol. 49, No. 63 / Friday, March 30, 1984 / Notices

CLASSIFICATION DEFINITIONS - POWER EQUIPMENT OPERATORS (TENNESSEE PORTION)

Class A - Shovel, backhoe, dragline, crane, derrick, gentry, grademll, winches with boom, motor patrol, trenching machine (18" or over), pile driver, tug boat operator, mechanic, fork lift, central mixing plant, locomotive engineer, straddle carrier, core drill, tower crane, hydrocrane, Austin Western & all similar type crane, drilling of piling (all types), tugger, hoist (2-drums or more), earth freezing equipment, sideboom, dredge operator & engineer, hopto, pump crete, mucking machine, cableway, finishing machine, central compressor, derrick boat, concrete pump, welders, helicopters, de-waterting system (all types), sweeper, bulldozer, pan, pull, scraper, traxcavator, front end loader, concrete planing machine

Class B - Trenching machine (18" or smaller), tandem roller, paver, mixer mobile, backfiller, blade grader, dinkey operator, elevating grader, winch operated from truck & tractor without boom, distributor bituminous surface, hoist (1-drum), mixer, grout pump, motor boat, switchman, brake man, elevator earth compactor.

Class C - Locomotive fireman on boiler, air compressor (satimnary), earth drill, smale operator, motor crane driver & oiler, pump (4" & larger), oiler on gantrey, greaser, drill helper.

Class D - Air compressor, mechanic helper, firemen (low pressure pump under 4"), oiler, welding machine operator, deckhand.

*SCOPE OF WORK

ELECTRICIANS - KENTUCKY PORTION

Commercial - consists of alterations, renovations and new construction on the following structures:

1) Elementary, middle & high schools, 2) churches, 3) restaurants, 4) warehouses (limited to 50,000 sq. ft. or less, 5) free standing small commercial buildings - A) service station, B) convenience stores, C) launderettes, D) one & two story motels

Industrial - All other building construction

FOOTNOTES:

a. Seven Paid Holidays: New Year's Day; Memorial Day; Independence Day; Labor Day; Thanksgiving Day; Friday after Thanksgiving Day; Christmas Day; Vacation Pay Credit: Employer contributies 8% of the basic hourly rate of employees with 5 years or more of service, or 6% for employees with 6 months to 5 years.

b. Six Paid Holidays: New Year's Day; Memorial Day; Independence Day; Labor Day; Thanksgiving Day; Christmas Day.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29 CFR, 5.5 (a)(1)(ii)).

SUPERSEDEAS DECISION

STATE: Massachusetts COUNTY: Worcester
DECISION NUMBER: MA84-3008 DATE: Date of Publication
Supersedes Decision Number MA83-3049 dated November 18, 1983, in 48 FR 52559.
DESCRIPTION OF WORK: Building construction Projects (including Residential Projects) Heavy and Highway construction Projects

	Basic Hourly Rates	Fringe Benefits
ASBESTOS WORKERS	18.23	2.67+ a
BOILERMAKERS	18.16	3.441
BRICKLAYERS; CEMENT MASONS; PLASTERERS; and STONEMASONS:

WELDERS: Receive rate for craft to which welding is incidental

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independance Day;
D-Labor Day; E-Thanksgiving Day; F-Christmas Day

FOOTNOTES:
a. Paid Holiday: Day before Christmas, providing the employee works the three days prior to the holiday
b. Employer contributes 8% of basic hourly rate for 5 years or more of service or 6% of basic hourly rate for 6 months to 5 years of service as vacation pay credit
c. Paid Holidays: A through F and the Friday after Thanksgiving
d. Paid Holidays: A through F and Bunker Hill Day, provided the employee has worked 10 days prior to the holiday
e. Paid Holidays: A through F, Washington's Birthday and Veterans Day
f. Paid Holidays: A through F, Washington's Birthday, Columbus Day and Veterans Day
g. Paid Holidays: A through F, Washington's Birthday, Patriots Day, Columbus Day and Veterans Day
h. Paid Vacation: 4 months to 1 year - half (1/2) day's pay per month; 1-5 years - 1 week; 5-10 years - 2 weeks; 10 years or more - 3 weeks. Employee must have received pay for 120 days during last year of employment

AREA DESCRIPTIONS

BRICKLAYERS; CEMENT MASONS; PLASTERERS; and STONEMASONS:
Area 1: Warren Township
Area 2: Hopedale, Milford, and Southboro Townships
Area 3: Ashburnham, Athol, Fitchburg, Gardner, Harvard, Hubbardston, Lancaster, Leominster, Lunenburg, Petersham, Phillipston, Princeton, Royalston, Sterling, Templeton, Westminister and Winchendon Townships
Area 4: Remainder of County

CARPENTERS, LATHERS, and SOFT FLOOR LAYERS:
Area 1: Hardwick, Warren, and West Brookfield Townships
Area 2: Remainder of County

ELECTRICIANS:
Area 1: Warren, and West Warren Townships
Area 2: Ashburnham, Athol, Bolton, Fitchburg, Gardner, Harvard, Hubbardston, Lancaster, Leominster, Lunenburg, Phillipston, Westminister, and Winchendon Townships
Area 3: Remainder of County

GLAZIERS:
Area 1: Warren, and West Warren Townships
Area 2: Remainder of County

AREA DESCRIPTIONS (Cont'd)

MARBLE, TILE, and TERRAZZO WORKERS:
Area 1: Ashburnham, Fitchburg, Harvard, Lancaster, Leominster, Lunenburg, Princeton, Sterling, and Westminister Townships

PAINTERS:
Area 1: Warren and West Warren Townships
Area 2: Hopedale, Mendon, Milford, Southboro, Upton, and Westboro Townships
Area 3: Remainder of County

PLUMBERS and PIPEFITTERS:
Area 1: Hopedale and Southboro
Area 2: Ashburnham, Athol, Bolton, Fitchburg, Gardner, Harvard, Hubbardston, Lancaster, Leominster, Lunenburg, Petersham, Phillipston, Royalston, Templeton, Westminister, and Windendon Townships
Area 3: Remainder of County

SHEET METAL WORKERS:
Area 1: Harvard and Lancaster Townships
Area 2: Remainder of County

POWER EQUIPMENT OPERATORS:
Area 1: Royalston, Phillipston, Athol, Petersham, Hardwick, New Braintree, Brookfield, East Brookfield, North Brookfield, Oakham, Barre, Templeton, Winchendon, Strubridge, West Brookfield, and Warren Townships
Area 2: Remainder of County

LABORERS CLASSIFICATONS
BUILDING CONSTRUCTION

Group 1: Laborers, Carpenters Tenders

Group 2: Jackhammer Operator; Pavement Breakers; Asphalt Rakers; Carbide Core Drilling Machine; Chain Saw Operator; Pipelayer; Barco Type Jumping Tampers; Laser Beam; Concrete Pump; Mason Tenders; Motorized Mixers; Ride-on Motorized Buggy; Fence and Beam Rail Erectors

Group 3: Air Track; Block Pavers; Rammers; Curb Setter

Group 4: Blasters, Powdermen

Group 5: Pre-cast Floor and Roof Plank Erectors

WRECKING CONSTRUCTION

Group 1: Yardmen Laborers

Group 2: Yardmen Burners; Sawyers

Group 3: Wrecking Laborers

Group 4: Adzeman

LABORERS CLASSIFICATIONS (Cont'd)

WRECKING CONSTRUCTION (Cont'd)

Group 5: Burners; Jackhammers

Group 6: Asbestos Removers; Small Front Loaders on Tracks and Bobcat Operators

HEAVY and HIGHWAY CONSTRUCTION

Group 1: Laborers; Carpenter Tenders; Cement Finisher Tenders

Group 2: Asphalt Rakers; Fence and Guard Rail Erector; Laser Beam Operator; Mason Tender; Pipelayer; Pneumatic Drill Operator; Pneumatic Tool Operator, Wagon Drill Operator

Group 3: Air Track Operator; Block Pavers; Hammer; Curb Setters

Group 4: Blasters, Powdermen

Tunnel, Caisson and Cylinder Work in Compressed Air:

Group 5-A: Powder Watchmen; Top Man on Iron Bolt; Change House Attendant

Group 5-B: Brakeman; Trackman; Groutman; Laborer; Outside Lock Tender; Lock Tender; Guage Tenders

Group 5-C: Motormen

Group 5-D: Blaster

Group 5-E: Mucking Machine Operator

Free Air Operation - Shield Driven and Liner Plate Tunnel in Free Air:

Group 6-A: Miners; Miner Welder; Conveyor Operator; Motorman; Mucking Machine Operator; Nozzle Men; Grout Men; Shaft and Tunnel Steel and Rodmen; Shield and Erector Arm Operators

Group 6-B: Brakemen, Trackmen

Cleaning Concrete and Caulking Tunnel (both new and existing):

Group 6-C: Concrete Workers; Strippers and Form Movers (wood and steel)

Rock Shaft, Concrete Lining of Same and Tunnel in Free Air:

Group 6-H: Change House Attendants

Group 6-F: Laborers; Topside

Group 6-G: Brakeman; Trackman; Tunnel Laborers; Shaft Laborees

Group 6-H: Miner, Cage Tender; Bellman

LABORERS CLASSIFICATIONS (Cont'd)

OPEN AIR CAISSONS, UNDERPINNING And TEST BORING INDUSTRIES:

Includes installation and performance of caissons of all types, underpinning, soil test borings, core borings, diamond drill soundings, wash borings, auger borings, shot drilling, grouting (cement, chemical, etc.), installation of earth and rock anchors, tiebacks, ground water observation wells and monitoring wells, installation of instrumentation, drilling and installation of horizontal drains, lagging (carrying of bands and setting bands in place), installation and extraction of grout pipes, pit work, hand excavation and labor required in piledriving and related work, welding of caissons not driven by pile driving equipment, pouring of concrete piles and caissons of all types, cutting-off concrete piles and clean-up:

Air Air Caisson, Underpinning Work and Boring Crew:

Group 1-A: Laborers; Top Man

Group 1-B: Bottom Man

Test Boring:

Group 2-A: Laborers

Group 2-B: Driller

POWER EQUIPMENT OPERATORS CLASSIFICATIONS
AREA 1

BUILDING CONSTRUCTION

Group 1: Shovels; Cranes (including all Tower, Climbing and Bridge Cranes, as used in Building Construction); Hydraulic Cranes, 10 ton capacity or over; Draglines; Derricks; Elevators with Chicago Boom; Backhoes; Gradalls; Elevating Graders; Pile Driving Rigs; Concrete Road Pavers; all three Drum Hoisting and Trenching Machines; Belt-type Loaders; Front End Loaders, 5½ yds. or over; Dual Drum Paver; Automatic Grader (i.e. C.M.I.); Combination Backhoe/Loader, 3/4 yd. or over; Jet Engine Dryer; Tree Shredder; Post Hole Digger; Post Hole Hammer; Post Extractor; Truck-mounted Concrete Pump with Boom; Roto-mill

Group 2: Rotary Drill (with mounted Compressor); Compressor House (3 to 6 Compressors); Rock and Earth Boring Machines (excluding McCarthy and similar Drills); Graders; Front End Loaders, 4 yds. to 5½ yds.; two Drum Hoists; High Fork Lifts with capacity of 15 ft. and over; Scraper, 21 yds. and over (struck load); Sonic Hammer Console; Road Planer; Cal Tracks; Ballast Regulators; Rail Anchor Machines; Switch Tampers

POWER EQUIPMENT OPERATORS CLASSIFICATIONS (Cont'd)
AREA 1 (Cont'd)

BUILDING CONSTRUCTION (Cont'd)

Group 3: Combination Backhoe/Loader, up to 3/4 yd. Hoe; Bulldozers; Push Cats; Scrapers, up to 21 yds. (struck load) (self-propelled or tractor drawn); Tireman; Front End Loaders, up to 4 yds.; Asphalt Paver; Well Drillers; Mechanics; Welder; Pumpcrete Machines; Concrete Pumps and similar type Pumps; Engineer or Fireman on High Pressure Boiler (on job); Self-loading Batch Plant; Well Point Operators (including installing); Electric Pumps used in Well Point System; Pumps, 12 inches and over (total discharge); Compressor, one or two 900 cu. ft. and over; Engineers in charge of Powered Grease Truck; all Automatic Elevators (permanent or temporary)(operated manually or remote control) (not to be confused with elevators operating from conventional hoist, 1, 2, or 3 drum); Grout Pumps; Boom Truck; Hydraulic Cranes, under 10 ton

Group 3-A: Asphalt Rollers; Self-powered Rollers and Compactors; Tractor without blade drawing Sheepsfoot Roller; Rubber Tire Roller; Vibratory Roller, or other type of Compactors including Machines for pulverizing and aerating Soil

Group 4: Single Drum Hoist; Power Pavement Breakers; Concrete Pavement Finishing Machines; Two Bag Mixers with Skip; McCarthy and similar Drills; Batch Plants (not self-loading); Bulk Cement Plants; Self-propelled Material Spreaders; A-Frame Trucks; Fork Lifts, up to 15 ft.; 3 or more 10 KW Light Plants; 30 KW or more Generators

Group 5: Compressors (one or two)(315 cu. ft. to 900 cu. ft.); Pumps, 4 inches to 12 inches (total discharge)

Group 6: Compressors, up to 315 cu. ft.; Small Mixers; Pumps, up to 4 inches; Power Heaters, except when 3 or more Heaters are used on one job, classification 4 rate shall be paid; Welding Machines, except when 3 or more Welding Machines are used on one job, classification 4 rate will be paid; Conveyors; Oiler; Helpers on Grease Trucks with hand greasing equipment

Group 7: Truck Crane Crews

Group 8: Oiler

Group 9: Master Mechanic

Group 10: Boom lengths over 184 ft. including Jib

Group 11: Boom lengths over 225 ft., including Jib

POWER EQUIPMENT OPERATORS CLASSIFICATIONS (Cont'd)
AREA 1 (Cont'd)

HEAVY and HIGHWAY CONSTRUCTION

Group 1: Shovels; Crawler and Truck Cranes; Derricks; Backhoes; Trenching Machines; Elevator Graders; Belt-type Loaders; Gradalls; Pile Drivers; Concrete Pavers, On-site Processing Plant (Engineer in charge); Dragline; Clamshell; Cableways; Shaft Hoists; Mucking Machines; Front End Loader, 5½ yds. and over Tower Cranes; Self-propelled Hydraulic Cranes, 10 tons and over; Dual Pavers; Automatic Grader, Excavator (C.M.I. or equal); Scrapers towing Pan or Wagon; Tandem Dozers or Push Cats (2 units in Tandem); Welder using Semi-automatic Welding Machine; Shotcrete Machine; Tunnel Boring Machine; Combination Back Hoe/Loader, 3/4 yd. Hoe or over; Jet Engine Dryer; Tree Shredder; Post Hole Digger; Post Hole Hammer; Post Extractor; Truck mounted Concrete Pumps with boom; Roto-mill

Group 2: Rotary Drill, with mounted Compressor; Compressor House, 3 to 6 Compressors; Rock and Earth Boring Machines, excluding McCarthy and similar Drills; Grader; Front End Loaders, 4 yds. to 5½ yds.; Scraper, 21 yds. and over (struck load); Forklifts, 7 ft. lift and over or 3 ton capacity and over; Sonic Hammer Console; Road Planer; Cal Tracks; Ballast Regulators; Rail Anchor Machines; Switch Tampers

Group 3: Bulldozer; Push Cats; Scrapers, up to 21 yds., struck load, self-propelled or Tractor Drawn; Self-powered Asphalt Paver; Front End Loaders, up to 4 yds.; Mechanics, Welders; Well Driller; Pumpcrete Machine; Engineer or Fireman on High Pressure Boiler (on job); Self-loading Batch Plant (on job); Well Point Operators; Electric Pumps used in Well Point System; Tireman; Pumps, 16 in. or over total discharge; Compressors (1 or 2) 900 cu. ft. and over; Powered Grease Truck; Tunnel Locomotives and Dinkeys; Grout Pumps; Hydraulic Jacks (jacking pipe, slip forms, etc.); Boom Truck, self-propelled Hydraulic Cranes, up to 10 ton; Combination Backhoe Hoe/Loader, up to 3/4 yd. Hoe

Group 3A: Asphalt Rollers; Self-powered Rollers and Compactors; Tractor without blade drawing Sheeps Foot Roller; Rubber Tire Roller; Vibratory Roller or other type of Compactors including Machines for pulverizing and aerating soil

Group 4: Hoists; Conveyors; Power Pavement Breaker; Self-propelled Material Spreader; Self-powered Concrete Finishing Machine; Two bag Mixer with Skip; McCarthy and similar Drills; Batch Plant (not self-loading); Bulk Cement Plant; 3 or more 10 KW Light Plants; 30 KW or more Generators

Group 5: Compressor, 315 cu. ft. to 900 cu. ft., 1 or 2; Pumps, 4" to 16" total discharge

POWER EQUIPMENT OPERATORS CLASSIFICATIONS (Cont'd)
AREA 1 - HEAVY and HIGHWAY CONSTRUCTION (Cont'd)

Group 6: Compressor, up to 315 cu. ft.; Small Mixers with Skip; Oiler; Pumps up to 4"; Grease Truck; Helper on powered Grease Trucks; Power Heaters; Welding Machines, when 3 or more Welding Machines are used, Classification 4 rate shall be paid; A-Frame Trucks; Forklifts, up to 7 ft. Lift and up to 3 ton capacity; Hydro Boom; Power Safety Boat

Group 7: Truck Crane Crews

Group 8: Oiler

Group 9: Master Mechanic

Group 10: Boom Lengths over 184 feet, including Jib

Group 11: Boom Lenghts over 225 feet, including Jib

AREA 2

BUILDING CONSTRUCTION

Group 1: Cranes; Shovels; Truck Cranes; Cherry Pickers; Dragline; Trench Hoes; Backhoes; Three Drum Machines; Derricks; Pile Drivers; Elevator Towers; Hoists; Gradalls; Shovel Dozers; Front End Loaders; Fork Lifts; Augers; Boring Machines; Rotary Drills; Post Hole Hammers; Post Hole Diggers; Pumpcrete Machines; Asphalt Plant, on site; Concrete Batching and/or Mixing Plant, on site; Crusher Plant, on site; Paving Concrete Mixers; Timber Jacks

Group 2: Sonic or Vibratory Hammers; Graders; Tandem Scrapers; Concrete Pumps; Bulldozers; Tractors; York Rakers; Mulching Machines; Portable Steam Boiler; Portable Steam Generators; Rollers; Spreaders; Tampers (self-propelled or tractor drawn); Asphalt Pavers; Mechanics Maintenance; Paving Screed Machines; Stationary Steam Boilers; Paving Concrete Finishing Machines; Cal track; Ballast Regulators; Switch Tampers; Rail Anchor Machinery; Tire Trucks (when operated by the employer on the job site)

Group 3: Pumps, 1-3 grouped; Compressors; Welding Machines, 1-3 grouped; Generators; Concrete Vibrators; Lighting Plants; Heaters (power driven, 1-5); Well-point Systems, operating and installing; Syphones/Pulsometers; Concrete Mixers; Valves controlling Permanent Plant, air or steam; Conveyors; Jackson type Tampers; Single Diaphragm Pump; Lighting Plants

Group 4: Assistant Engineers (Fireman)

Group 5: Assistant Engineers (other than Truck Cranes and Gradalls)

Group 6: Assistant Engineers (on Truck Cranes and Gradalls)

POWER EQUIPMENT OPERATORS CLASSIFICATIONS (Cont'd)
AREA 2 (Cont'd)

HEAVY and HIGHWAY CONSTRUCTION

Group 1: Power Shovels; Cranes; Truck Cranes; Derricks; Pile Drivers; Trenching Machines; Mechaniclal Hoist Pavement Breakers; Cement Concrete Pavers; Draglines; Hoisting Engines; Three Drum Machines; Pumpcrete Machines; Uka Loaders; Shovel Dozers; Front End Loaders; Mulching Machines; Shaft Hoists; Steam Engine; Backhoe; Gradalls; Cable Ways Fork Lifts; Cherry Pickers; Boring Machines; Rotary Drills; Post Hole Hammer; Post Hole Diggers; Asphalt Plant on job site, Concrete Batching and/or Mixing Plant on job site; Crusher Plant on job site; Paving Concrete Mixers; Timber Jacks

Group 2: Sonic or Vibratory Hammers; Graders; Scrapers; Tandem Scrapers; Bulldozer; Tractors; Mechanic Maintenance; York Rakes; Mulching Machines Paving Screed Machines; Stationary Steam Boilers; Paving Concrete Finishing Machines; Grout Pumps; Potable Steam Boilers; Portable Steam Generators; Rollers; Spreaders; Asphalt Pavers; Locomotives or Machines used in place thereof; Tampers, self-propulled or tractor drawn; Cal Tracks; Ballast Regulators; Rail Anchor Machines; Switch Tampers

Group 3: Pump, 1-3 grouped; Compressors; Welding Machine, 1-3 grouped; Generators; Lighting Plants; Heaters, power driven, 1-5; Syphons/Pulsometers; Concrete Mixers; Valves controlling Permanent Plant, air or steam; Conveyors; Wellpoint System, operating and installing

Group 4: Assistant Engineers (Fireman)

Group 5: Assistant Engineers (other than Truck Cranes and Gradalls)

Group 6: Assistant Engineers (on Truck Cranes and Gradalls)

MARINE CONSTRUCTION

Group 1: Shovels; Cranes; Truck Cranes; Cherry Pickers; Derricks; Pile Drivers two or more Drum Machines; Lighterns; Derrick Boats; Trenching; Mechanic Hoists; Pavement Breakers; Cement Concrete Pavers; Draglines; Hoisting Engines; Pumpcrete Machines; Elevating Graders; Shovels; Dozers; Front End Loaders; Backhoe; Gradalls; Cable Way; Boring Machines; Rotary Drills; Post Hole Hammer; Post Hole Diggers; Fork Lifts; Timber Jacks; Asphalt Plant (on site); Concrete Batching and/or Mixing Plant (on site); Crusher Plant (on site); Paving Concrete Mixers

Group 2: Portable Steam Boilers; Portable Steam Generators; Sonic or Vibratory Hammer; Graders; Scrapers; Tandem Scrapers; Concrete Pumps; Bulldozers; Tractors; York Rakers; Mulching Machines; Rollers; Spreader; Tamper, self-propelled or tractor drawn; Asphalt Pavers; Concrete Mixers with side Loaders; Mechanics, maintenance; Cal Track; Ballast Regulator; Switch Tampers; Rail Anchor Machines; Tire Trucks

49 CFR Part 1300

[Docket No. RM83-78-000; Order No. 367]

Transfer of Oil Pipeline Regulations

Issued: March 23, 1984.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is transferring oil pipeline regulations to Title 18 of the Code of Federal Regulation (CFR), which title concerns areas under Commission jurisdiction, from Title 49 of the CFR, which deals primarily with the work of the Interstate Commerce Commission (ICC). These regulations are currently published in Title 49 of the CFR because oil pipelines came under the jurisdiction of the ICC before the 1977 Department of Energy Organization Act transferred jurisdiction to the Commission. This transfer will avoid confusion since the ICC intends to revise the regulations in 49 CFR in the near future.

EFFECTIVE DATE: July 2, 1984.

FOR FURTHER INFORMATION CONTACT: Joseph Hartsoe, Office of the General Counsel, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, (202) 357-8033.

SUPPLEMENTARY INFORMATION:

I. Background

Jurisdiction over oil pipelines, as related to the establishment of rates or charges for the transportation of oil by pipeline and to the establishment of valuations for oil pipelines, was transferred in 1977 from the Interstate Commerce Commission (ICC) to the Federal Energy Regulatory Commission (Commission) under sections 306 and 402(b) of the Department of Energy Organization Act (DOE Act), 42 U.S.C. 7155 and 7172(b) (Supp. V 1981), and Executive Order No. 12,009, 3 CFR Part 142 (1978). Section 705(a) of the DOE Act further provides that regulations relating to functions transferred to the Commission shall continue in effect until modified by the Commission. 42 U.S.C. 7295(a) (Supp. V 1981). When the DOE Act became effective, the regulations relating to the Commission's jurisdiction over oil pipelines were in Title 49 of the Code of Federal Regulations (CFR).

Soon after the effective date of the DOE Act, the Commission also announced that regulations in Title 49 of the CFR that relate to the Commission's jurisdiction over oil pipelines would remain in effect until modified.[1] Effective January 28, 1981, the Commission transferred most of these ICC regulations from 49 CFR to 18 CFR.[2] However, regulations related to various oil pipeline filings and applications in Parts 1002, 1010, 1300, 1301, 1305, 1330, and 1331 of Title 49 were not transferred at that time. On July 7, 1983, the ICC announced that it intends to remove most or all of these regulations from 49 CFR on or before February 1, 1984.[3]

To avoid a confusing hiatus with respect to these regulations and to effect the most efficient and least costly relocation of these regulations, the Commission by this rule is transferring those Parts into Title 18 of the CFR. This action is being coordinated with the ICC.[4]

II. Amendments to Title 18

The rulemaking will transfer to 18 CFR the regulations in Parts 1002, 1010, 1300, 1301, 1305, 1330 and 1331 of 49 CFR that are applicable to the Commission's oil pipeline jurisdiction.[5] Part 1002 covers the fees charged by the Commission for services rendered to oil pipeline companies. Part 1010 covers competitive bids under section 10 of the Clayton Antitrust Act. Parts 1300, 1301, and 1305 cover the construction, posting, and filing of pipeline tariffs and related documents. Part 1330 governs the filing of quotations for government shipments at reduced rates. Part 1331 addresses applications under section 5a of Interstate Commerce Act for authority to establish and control agreements between or among carriers.

The transfer of these Parts will add to 18 CFR basically the same regulatory text that existed at the time the DOE Act took effect in 1977 and that still remains in effect today. The rule, however, makes minor editorial modifications that are necessary because of the transfer. For example, the rule revises the cross-references to sections that are being redesignated when transferred to 18 CFR. However, no substantive changes are intended by these revisions.

This rulemaking completes the Commission's previously stated goal of publishing the regulations related to its jurisdiction over oil pipelines in 18 CFR. This effort generally will have three positive impacts on the regulated pipelines, the public, and the Commission itself. First, the regulations applicable to the Commission's oil pipeline jurisdiction will continue to be printed in the CFR without the hiatus that would otherwise result from the ICC's actions. Second, the transfer will eliminate any confusion caused by the ICC's post-1977 amendments to Part 1300 that may appear to affect the regulations applicable to oil pipelines, but which as a legal matter under section 705(a) of the DOE Act do not actually do so. Third, the transfer will benefit the public, the oil pipelines, and the Commission by combining the Commission's regulations into one Title, 18 CFR.

III. Paperwork Reduction Act Statement and Effective Date

The Paperwork Reduction Act (PRA), 44 U.S.C. 3501-3520 (Supp. V 1981), and the Office of Management and Budget's (OMB) regulations, 5 CFR Part 1320 (1984), require that OMB approve certain information collection requirements or revisions thereof imposed by agency rule. Therefore, all information collection revisions in this rule are being submitted to OMB for its approval.

Interested persons can obtain information on these information collection provisions by contacting the Office of the General Counsel, Rulemaking and Legislative Analysis Division, Federal Energy Regulatory Commission, RC-421, 825 North Capitol Street, NE., Washington, D.C. 20426 (Attention: Joseph Hartsoe (202) 357-8033). Comments relating to the burden imposed by the proposed information collection provisions may be sent to the Officer of Information and Regulatory Affairs of OMB (Attention: Desk Office for the Federal Energy Regulatory Commission).

---

[1] Interim Regulations for the Operations of the Federal Energy Regulatory Commission, "Order Providing for the Continuation of Functions Vested in, or Delegated to, the Federal Energy Regulatory Commission," 42 FR 55450 (October 17, 1977) (Docket No. RM78-1-000, Order No. 1).

[2] Final Rule, "Redesignation of Oil Pipeline Regulations," 46 FR 9043 (Jan. 28, 1981) (Docket No. RM81-6-000, Order No. 119).

[3] 48 FR 31265 (July 7, 1982).

[4] The Interstate Commerce Commission is publishing a final rule contemporaneously with this order that redesignates regulations from Title 49 of the CFR to Title 18 of the CFR.

[5] The word "transfer" as used in this docket does not mean that the ICC is entirely eliminating every one of these regulations from 49 CFR. Rather, the ICC may retain parts of the regulations insofar as they affect companies that are still subject to the ICC's regulatory jurisdiction. As a result, even though the term "transfer" is used to most accurately portray the technical form of this rule, there are instances when the Commission will as a practical matter be duplicating some regulations that will also be retained by the ICC.

This final rule concerns solely matters of agency practice and procedure because it transfers existing regulations from 49 CFR to 18 CFR and editorially revises these rules to ensure clarity of scope. These changes will aid oil pipelines subject to the Commission's jurisdiction in locating, understanding, and meeting the applicable procedural requirements. The Commission, therefore, finds pursuant to section 553(b) of the Administrative Procedure Act (APA), 5 U.S.C. 553(b), that prior notice and opportunity for public comment are unnecessary.

The ICC has decided to remove Part 1300 from 49 CFR effective July 2, 1984. In addition, information collection revisions of this rule are being submitted to OMB for clearance. Therefore, this rule will become effective on July 2, 1984. If the necessary OMB approvals and control numbers have not been received by that effective date, the Commission will issue a notice temporarily suspending the effective date.

List of Subjects

49 CFR Part 1300

Oil pipelines, Tariffs.

18 CFR Parts 341, 342, 343, 344, and 345

Oil pipelines, Tariffs.

18 CFR Part 346

Oil pipeline fees.

18 CFR Part 347

Oil pipeline, Transportation.

In consideration of the foregoing. Part 1300 of Title 49, Chapter X and Parts 341, 342, 343, 344, 345, 346, and 347 of Title 18, Chapter I, Code of Federal Regulations, are amended as set forth below.

By the Commission.

Lois D. Cashell,

Acting Secretary.

I. Part 1300 of 49 CFR Chapter X is removed from Title 49 and transferred to 18 CFR Chapter I and redesignated as Part 341; the sections are redesignated accordingly; and the Part title and section heading for § 341.57 are revised to read as follows:

PART 341—OIL PIPELINE TARIFFS: PIPELINE COMPANIES SUBJECT TO SECTION 6 OF THE INTERSTATE COMMERCE ACT AND CARRIERS JOINTLY THEREWITH

* * * * *

341.57 Newly constructed pipelines.

* * * * *

II. The authority citation for 18 CFR Part 341 is revised to read as follows:

Authority: Department of Energy Organization Act, 42 U.S.C. 7101–7352 (Supp. V 1981); Interstate Commerce Act, 49 U.S.C. 1–27 (1976); E.O. 12009, 3 CFR Part 142 (1978).

III. 18 CFR Part 341 is amended as follows:

a. By changing all references to "Interstae Commerce Commission" throughout Part 341 to read "Federal Energy Regulatory Commission";

b. By changing all references to "Interstate Commerce Commission, Washington, D.C. 20423" throughout Part 341 to read "Federal Energy Regulatory Commission, Washington, D.C. 20426";

c. By changing all references to "ICC" or "I.C.C." throughout Part 341 to read "FERC";

d. By removing the "NOTE:" and "CROSS REFERENCE" that precede § 341.0;

e. By revising § 341.0(a)(1) to read as follows:

§ 341.0 General provisions; definitions.

(a) *General application; conformation to rules; reissue.* (1) This part contains regulations issued by the Interstate Commerce Commission under the Interstate Commerce Act, as amended and transferred to the Federal Energy Regulatory Commission under authority of section 705(a) of the Department of Energy Organization Act, as amended, to govern the construction and filing of tariffs of pipeline companies filing under the Interstate Commerce Act. The regulations in this Part shall also govern the construction and filing of tariffs naming through routes and joint rates over the lines of common carriers by pipeline subject to the Interstate Commerce Act, on the one hand, and vessel-operating common carriers by water engaged in the foreign commerce of the United States, as defined in the Shipping Act, 1916, on the other hand, for the transportation of oil between any place in the United States and any place in a foreign country. See § 341.67.

* * * * *

§ 341.1 [Amended]

f. In § 341.1(a), by removing the words "size 8 by 11 inches" and inserting, in their place, the words "size 8½ by 11 inches";

g. In § 341.3, by removing paragraph (f)(3) and by revising paragraphs (b), (f)(1), (f)(2) and (h) to read as follows:

§ 341.3 Content of title page.

* * * * *

(b) On the upper right-hand corner, the FERC identification, in which each carrier or agent numbers each new issue consecutively. (All tariffs filed after January 1, 1985 must use a FERC identification number.) The type shall be bold-face and of not less than 12 point. Immediately under this number, in smaller type, shall be shown the FERC number of each tariff or the number of each supplement cancelled thereby. If the number of cancelled publications is so large as to render it impracticable to thus enter them on the title page, they must be shown immediately following the table of contents, provided specific reference thereto is entered on the title page directly under the FERC number.

* * * * *

(f)(1) Reference by name and FERC number to the rules tariff, if any, governing the tariff. The following form modified as required shall be used.

Governed, except as otherwise provided herein, by rules and regulations shown in FERC No. ——, supplements thereto or successive issues thereof.

(2) A tariff is not governed by a rules tariff, except when and to the extent stated on or in the tariff.

* * * * *

(h) On every tariff or supplement in which all the rates, rules, or regulations are made effective on less than 30 days' notice under authority of the Commission, notation that it is issued on ——— days' notice under authority of ——— (here show the authority).

* * * * *

h. In § 341.3(d), by removing the words "class or" and "or both"; and by removing the words "all-rail, rail-motor, all water, or rail-water rates" and inserting, in their place, the words "all-pipeline or intermodal pipeline rates";

i. By amending § 341.4 as follows:

1. In paragraph (c)(1), by removing the words "coal "Coal" " and inserting, in their place, the words "petroleum, "Petroleum" "; and removing the words " "Coal, anthracite," "Coal, bituminous," " and inserting, in their place, the words " "Petroleum, crude," "Petroleum Products, butane,";"

2. In paragraph (c)(3), by removing the words "or a combined class and commodity tariff";

3. In paragraph (d), the title is revised to read "*Index of origins and destinations.*"; and in paragraph (d)(1) by removing from the second sentence the words "station numbers" and inserting, in their place, the word "points";

4. In paragraph (d)(2), by removing the word "railroad" and inserting, in its place, the word "pipeline"; and by removing the words "as provided in § 1300.15";

5. In paragraph (d)(6), by removing the words "or when the points in a tariff are

arranged by States as authorized in paragraph (j) of this section";

6. By removing paragraphs (f), (h)(4)(i), (h)(4)(ii), and (k)(2)(iii) in their entirety; by adding a new paragraph (e), and by revising paragraphs (h)(2), (h)(4), (h)(8), (i)(1), (i)(7), and (k)(2)(ii) to read as follows:

§ 341.4 Content of tariffs.

* * * * *

(e) *Public holding out.* (1) Tariffs must contain only rates, charges, and related provisions that cover services in strict conformity with each carrier's public holding out. No provision may be published in tariffs, supplements, or revised pages which results in restricting service to less than the carrier's full obligation to the public to provide and furnish transportation or which exceeds such carrier's lawful public holding out.

(2) Unless each tariff filed on and after the effective date hereof contains a certification by the carrier filing the same that, with respect to all of the services described therein (except those services being published for the first time), it is in fact (i) fully offering and, when requested, impartially providing all of its obligated services, and (ii) fully observing all requirements of law and the regulations prescribed by the Commission, the tariff or supplement will be rejected until such time as certification thereof is made. Such service includes service on c.o.d., freight-collect, and order-notify shipments, including such services on shipments transported under combinations of rates.

* * * * *

(h) *Rules governing the tariffs.*

* * * * *

(2) Each rule or regulation should be given a separate number; portions which can be understandingly read without recourse to the whole may be published in separate paragraphs, and such paragraphs be given subnumbers or letters.

* * * * *

(4) Where it is not desirable or practicable * * * except as follows: The following tariffs will not be counted in applying the provisions of this section: Tariffs containing exclusively rules, regulations, and/or charges applying to the special services covered by § 341.10(a); tariffs containing rules and regulations governing the transportation of explosive materials and other dangerous substances.

* * * * *

(8) Tariffs which contain rates for the transportation of explosive materials and other dangerous substances must also contain the hazardous material regulations of the Department of Transportation governing the transportation thereof, must bear specific reference to the FERC number of the publication which contains such rules and regulations. When the latter plan is adopted, the tariff referred to shall contain no matter other than the regulations promulgated by the Department of Transportation.

* * * * *

(i) *Rates.* (1) An explicit statement of the rates, in cents or in dollars and cents, per 100 pounds, per ton, per gallon, per barrel, or other unit, together with the names or designation of the places from and to which they apply, all arranged in a simple and systematic manner. Complicated plans or ambiguous terms must not be used.

* * * * *

(7) Minimum volumes governing the application of commodity rates must be specifically stated in immediate conjunction with such rates or shown in such manner as will avoid an extensive search therefor, except as provided in paragraph (i)(5) of this section.

* * * * *

(k) *Routing.*

* * * * *

(2) When in a tariff. * * *

* * * * *

(ii) Where complete through routes are shown in connection with joint rates (either in the rate tariff or in a routing guide or guides to which it is subject), such rates may be made subject to the separate routing guides of any of the carriers parties thereto for internal routing over their respective lines.

7. In paragraph (h)(3), by removing the words "§§ 1300.7(c)," and inserting, in their place, "§";

8. In paragraph (i)(8), by removing the word "articles" throughout the paragraph and inserting, in its place, the word "products"; and by removing the words "Iron and steel articles" and inserting, in their place, the words "Petroleum products"; and by removing the words "weight (or weights)" throughout the paragraph and inserting, in their place, the words "volume (or volumes)";

9. In paragraph (i)(9), by removing the words "article or articles" throughout the subparagraph and inserting, in their place, the words "product or products";

10. In paragraph (i)(10), by removing the words "or a combined class and commodity tariff" in the first sentence; by removing the words "class or" in the fourth sentence; and by removing the word "Staves," in the third sentence and inserting, in its place, the word "Butane,";

11. In paragraph (k)(1), by removing the word "lines" throughout the subparagraph and inserting, in its place, the word "pipeline";

12. In paragraph (k)(3), by removing from the first sentence the word "railroad" and inserting, in its place, the word "pipeline"; by removing the second paragraph in paragraph (k)(3) in its entirety;

13. In paragraph (k)(5), by removing from the example the words "pronounced traffic congestion" and inserting, in their place, the words "capacity shortage"; by removing from the example the word "wreck,"; and by removing from the example the word "lines" and inserting, in its place, the word "pipelines";

14. In paragraph (m)(3), the symbol and words "* to denote prepay stations or points" are removed in their entireties.

15. By removing paragraphs (d)(4) and (d)(5) in their entirety and redesignating paragraph (d)(6) as (d)(4);

16. By removing paragraphs (i)(4), (i)(5), (i)(6) and (i)(11) in their entirety and redesignating paragraphs (i)(7) through (i)(10) as paragraphs (i)(4) through (i)(7);

17. By removing paragraph (j) in its entirety and inserting, in its place, "(j) [Reserved].";

j. In § 341.5, by removing from the last sentence the word "traffic" throughout the sentence and inserting, in its place, the word "movements";

§ 341.6 [Amended]

k. By amending § 341.6 as follows:

1. In paragraph (a), by removing the parenthetical "(including tariffs of classification exceptions, but not classifications)";

2. In paragraph (b), by removing the comma and words "including tariffs of classification exceptions, but not classifications," following the words "other tariffs";

3. In paragraph (c), by removing from the parenthetical the words "Iron and Steel Articles" and inserting, in their place, the words "petroleum products"; and by removing from the last sentence the word "weights" and inserting, in its place, the word "volumes";

4. In paragraph (f), by removing from the first sentence the work "articles" and inserting, in its place, the word "products";

l. By amending § 341.7 as follows:

1. In paragraph (a), by removing the word "weight" throughout the paragraph

and inserting, in its place, the word "volume";

2. By removing the designation "(1)" from paragraph (a)(1) and by removing paragraph (a)(2) in its entirety;

3. By revising paragraph (b)(4) to read as follows:

§ 341.7 Alternating rates.

* * * * *

(b) *Alternative use of rates in sectional tariffs.*

* * * * *

(4) Each commodity tariff arranged in alternating sections shall also contain a section hereinafter referred to as the non-alternating section. That section shall contain only commodity rates which in all instances result in charges lower than would result from the application of the commodity rates in any other section. If the tariff contains only commodity rates, the non-alternating section shall be section 1. The title page of the non-alternating section shall contain either of the two following notations, as appropriate:

When rates are published in this section on a given shipment, such rates will apply to the exclusion of the rates in any other section.

or

When rates are published in this section on a given shipment, such rates will apply to the exclusion of the rates in any other section.

* * * * *

4. In paragraph (b)(6)(i), by removing the words "that class rates in one section may alternate with class rates in only one other section, and";

5. By removing paragraph (c) in its entirety;

§ 341.8 [Amended]

m. By amending § 341.8 as follows:

1. In paragraph (a)(2), by removing the last sentence of the paragraph;

2. In paragraph (e), by removing the words "or "Class rates will apply.";

n. By amending § 341.9 as follows:

1. By revising paragraphs (d)(3), (e)(11), (h), (i)(5), and (i)(6) to read as follows:

§ 341.9 Amendments and supplements.

* * * * *

(d) *Effective date: reissued matter.*

* * * * *

(3) Matter brought forward without change from a tariff which has not been in effect 30 days, also matter brought forward without change from one supplement to another, must be designated "Reissued" in distinctive type and must show the original effective date and the number of the supplement or tariff from which it is reissued; or must be uniformly indicated by the letter T in a square when reissued from another tariff or from a supplement to another tariff and by numerals commencing with 1 in squares when reissued from a prior supplement to the same tariff, printed in distinctive type and shown in a conspicuous manner, and the explanation thereof must be made in the tariff or supplement in which the symbols are used. Examples: "1 Reissued from FERC No. ——— or (supplement No. ——— to FERC No. ———), effective (date upon which item became effective in former tariff or supplement to another tariff ———, 19—)"; "1 Reissued from Supplement No. 1, effective ———, 19—", and so on numerically, the figures of the symbols always representing the number of the supplement to the same tariff from which the reissued item is brought forward. If items in a tariff or supplement are made effective on dates other than the general effective date shown on the title page, reissue of such items may be indicated in later publications by showing a letter suffix or other symbol in connection with, and as a part of, the letter T or the numerals in squares as authorized in this paragraph. When the reissued item became effective in a supplement to another tariff, the FERC number of that tariff must also be given.

(e) * * *

* * * * *

(11) Changes shall be indicated as required by § 341.2(a). Items which have been in effect 30 days or more need not be shown as reissued items on revised pages but may be republished as effective on 30 days' notice. Items which have not been in effect 30 days when brought forward on revised page must be shown as reissued in the manner prescribed in paragraph (d) of this section.

* * * * *

(h) *Supplement to tariff filed not yet effective.* (1) If a tariff is filed on statutory notice cancelling another tariff and after such filing a supplement to the tariff to be so cancelled should be issued effective prior to the general effective date of such new tariff, rates in such supplement could not continue in effect for the 30 days required by law because the cancellation of the former tariff also cancels supplements to it. In such a case, and confined to additions or to changes in rates or provisions which were brought forward in the new tariff without change, the provisions of paragraph (e) of this section need not be observed as to the old tariff, and a supplement making the same changes in or additions to both tariffs may be issued as supplements both to the tariff in effect and to the tariff which will effect cancellation, and be given both FERC numbers. In other words, such issue must be a supplement both to the old and the new tariffs and copies must be posted and filed accordingly. Only one such supplement may be in effect at any time.

(2) Rates or provisions which have been established in an old tariff and reproduced or reissued in a new tariff may be changed upon lawful notice by supplement to the new tariff, effective not earlier than the general effective date of the new tariff, by showing in the following manner in connection with the changed rates or provisions that the rates or provisions changed thereby have been in effect 30 days or more, in the former issue. Example: "Item 40–A cancels item 40. Item 40 effective ———, brought forward without change from Item No. ——— of FERC No. ——— (former issue)." New rates or provisions which do not change rates or provisions in either the old or new tariff may be established upon lawful notice by supplement to the new tariff, effective not earlier than the general effective date of the new tariff, by showing in the following manner, in connection with the new rates or provisions that the rates or provisions previously applicable have been in effect 30 days or more in a former issue, Example: "Addition. Changes commodity rates which became effective ——— in FERC No. ———." Unless the provisions of this paragraph are complied with no supplement to a tariff that is on file and not yet effective may be made effective within 30 days from the effective date of the tariff without special permission.

This section does not waive the requirements of §§ 341.14 and 341.54.

* * * * *

(i) *Complete adoption notice.*

* * * * *

(5) Tariffs issued by other carriers or agents in which the pipeline absorbed, taken over, * * *

(6) A similar adoption notice must immediately be filed by a receiver when he assumes possession and control of a carrier's lines. The adoption notice bears a FERC number and it must be consecutively numbered in the FERC series of the adopted carrier. When the receivership is terminated, the carrier taking over the properties shall file an adoption notice and shall also file supplements as hereinabove prescribed if a change in the name of the carrier has been made.

* * * * *

2. In paragraph (i)(1), by removing from the example the words "classifications," and "freight"; and by removing from the example the word "traffic" and inserting, in its place, the word "movements";

3. In paragraph (j)(1), by removing from the text of the example the word "classifications,"; and by removing the word "traffic" and inserting, in its place, the word "movement";

4. In paragraph (j)(6), by removing from the first sentence the word "line" and inserting, in its place, the word "pipeline";

5. In paragraph (k)(16), by removing the words "rule 9(k) of Tariff Circular No. 20" throughout the paragraph and inserting, in its place, the words "18 CFR 341.9(k)";

6. In paragraph (m), by removing the words "rule 9(m) of Tariff Circular No. 20" and inserting, in their place, the words "18 CFR 341.9(m)";

o. By amending § 341.10 as follows:

1. In paragraph (a), by removing the words "feeding, and grazing," and inserting, in their place, the words "odorization, coloration, filtration, loading and unloading, gathering, terminalling, in-line transfers, storage, batching, blending, commingling, etc.,"; and by removing the words "switching, floating,", "and drayage", and "icing, refrigeration,"; and by removing from the last sentence the words "traffic moving under less-than-carload or" and inserting, in their place, the words "volume moving under";

2. By amending paragraph (c) as follows:

A. In the title, by removing the words "switching, drayage, or";

B. In the first sentence, by removing the words "switching, drayage, or other transfer service"; and inserting, in their place, the words "transfer services";

C. In the second sentence, by removing the words "switching services" and inserting, in their place, the words "transfer services"; by removing the words "switching service" throughout the sentence and inserting, in their place, the words "transfer service"; and by removing the words "switching road" and inserting, in their place, the words "transferring line";

D. In the example at the end of the paragraph, by removing the words "switching, drayage, or other";

3. By amending paragraph (d) as follows:

A. By revising the title to read "(d) *Transfer charges.*";

B. By changing all references to "switching" throughout the paragraph to read "transfer";

C. In subparagraph (1), by removing the words "stations, warehouses, team, or industrial tracks, or other" and removing the words "within the switching limits, or must otherwise" and inserting, in their place, the words "or must";

D. In subparagraph (2)(ii), by removing the words "coal and coke" and inserting, in their place, the words "gasoline and diesel";

4. In paragraph (e), by changing all references to "switching" throughout the paragraph including the title to read "transfer";

5. By amending paragraph (f) as follows:

A. By revising the title to read "(f) *Transfer charges absorbed.*"

B. In the first sentence, by removing the words "for switching" and inserting, in their place, the words "for transfer"; by removing the words "such switching" and inserting, in their place, the words "such transferring"; and by removing the words "switching carrier" and inserting, in their place, the words "transferring carrier";

C. In the second sentence, by removing the words "switching charges" and inserting, in their place, the words "transfer charges";

D. In the third sentence, by removing the words "switching carrier" and inserting, in their place, the words "transferring carrier";

6. By revising paragraph (g)(1) to read as follows:

§ 341.10 Terminal and special services: Distance and mileage rates.

* * * * *

(g) *Distance rates may be used when no other rates provided.* (1) A carrier or an agent acting for two or more carriers may file tariffs containing distance or mileage commodity rates. Except as otherwise provided in §§ 341.7 and 341.27, distance or mileage commodity rates may be used only when no specific through commodity rates from and to the same points are provided. Except as otherwise provided in §§ 341.7 and 341.27, distance or mileage commodity rates will apply.

* * * * *

7. In paragraph (g)(6), by removing the words "notations for class or commodity or both class and commodity rates, as the case may be," and inserting, in their place, the words "notation for commodity rates,";

8. By removing paragraphs (g)(3) and (g)(5) and redesignating paragraph (g)(4) as (g)(3) and paragraphs (g)(6) and (g)(7) as paragraphs (g)(4) and (g)(5), respectively;

9. In paragraph (h), by changing throughout the paragraph all references to "station" to read "point"; all references to "stations" to read "points"; all references to "carload traffic" to read "volumes"; and all references to "railroad" to read "pipeline";

10. By removing paragraphs (i) and (j) in their entireties;

§ 341.11 [Amended]

p. By amending § 341.11 as follows:

1. In paragraph (a), by removing from the second sentence the word "all-rail" and inserting, in its place, the word "all-pipeline"; by removing from the fifth sentence the words "class and commodity tariffs, class tariffs"; by removing from the fifth sentence the words "billing books, classifications, exception sheets, switching tariffs," and inserting, in their place, the words "rules and regulations, loading/unloading, transfers,"; by removing from the seventh sentence the words " "Lumber, hardwood, Lumber, yellow pine" ", and inserting, in their place, the words " "Petroleum, crude, Petroleum, product" "; by removing from the eighth sentence, the words "class and commodity tariffs, and class tariffs,"; by removing from the ninth sentence the words "tariff publishing bureaus," throughout the sentence; and by removing from the ninth sentence the words "and classes";

2. In paragraph (b), by removing the words "Tariffs covering only specific circus movements and"; by removing the words "division sheets," in the third sentence;

3. By removing the "**Note**" at the end of the paragraph in its entirety;

q. By amending § 341.12 as follows:

1. By changing all references to "all-rail" to read "all-pipeline"; and

2. By revising the introductory text and paragraphs (a) and (e) to read as follows:

§ 341.12 Restoration and discontinuance of water service.

Tariffs containing pipeline-and-water rates applicable via routes upon which it is necessary to close navigation during a portion of each year, must provide for the restoration and discontinuance of service over such routes in the manner prescribed in paragraphs (a) to (e) of this section.

(a) *Notation on title page.* The following notation shall appear either (1) on the title page of the pipeline tariff, (2)

* * *

* * * * *

(e) *Tariffs may be reissued.* Tariffs containing pipeline-and-water rates may be reissued or amended at any time in the regular manner, but tariffs containing the clause prescribed by

paragraph (b) of this section which are made effective subsequent to the date of actual discontinuance of service must contain a statement that service was discontinued on ——— as per supplement No. ——— to FERC No. ——— (former tariff) and that supplement announcing discontinuance of service for that season will not be filed.

* * * * *

§ 341.13 [Amended]

r. In § 341.13, paragraph (c) is amended by removing the word "stations" and inserting, in its place, the word "offices";

s. By amending § 341.14 as follows:

1. By revising paragraphs (a) and (g) to read as follows:

§ 341.14 Statutory notice; additional procedure in filing tariffs.

(a) *Period of notice.* The act requires that all changes in rates, or in rules that affect rates, shall be filed with the Commission at least 30 days before the date upon which they are to become effective unless otherwise authorized by the Commission. Manifestly it is impossible for the Commission to check the items in tariffs to determine whether or not statutory notice has been given. Therefore, except as otherwise authorized by the Commission, 30 days' notice to the public and to the Commission must be given as to every tariff publication filed with the Commission, regardless of whether or not changes are effected thereby. (See §§ 341.3(h), 341.9(d)).

* * * * *

(g) *Explanation of missing numbers required.* Tariffs bearing FERC numbers and supplements are required to be numbered consecutively. If, for any reason, this is not done, the tariff or supplement which is not numbered in sequence with the publication last filed must be accompanied by a memorandum explaining why consecutive numbers were not used.

* * * * *

2. In paragraph (f)(4), by removing the word "classifications,"; and by removing the word "statutory" and inserting, in its place, the words "thirty days";

3. In paragraph (h), by removing the word "classification,";

§ 341.15 [Amended]

t. By removing § 341.15 in its entirety and inserting, in its place, the following "§ 341.15 [Reserved].";

§ 341.16 [Amended]

u. By removing § 341.16 in its entirety and inserting, in its place, the following "341.16 [Reserved]."

§ 341.18 [Amended]

v. In § 341.18, paragraphs (b)(2), (c)(2) and (f)(2) are amended by removing the word "freight" from the examples;

§ 341.19 [Amended]

w. In § 341.19, paragraph (a) is amended by removing the word "freight" throughout the paragraph; and paragraph (c) is amended by removing the words "small or";

§ 341.20 [Amended]

x. In § 341.20, paragraph (b) is amended by removing the words "8 x 10½ inches" and inserting, in their place, the words "8½ x 11 inches";

§ 341.25 [Amended]

y. By amending § 341.25 as follows:

1. In paragraph (a), by removing the words "traffic officer" and inserting, in their place, the word "Officer";

2. In paragraph (c), all references to "rail-motor" throughout the paragraph (including the title) are changed to read "intermodal pipelines" and all references to "Rail-Motor" throughout the paragraph are changed to read "Intermodal Pipelines";

§ 341.27 [Amended]

z. By amending § 341.27 as follows:

1. In the introductory text, by removing the words "class or" and removing the parenthetical "(except for account of irregular-route motor carriers)";

2. In paragraph (b)(1), by removing the words "3, and 4" and inserting, in their place, the words "and 3"; and by removing **"Note 3"** in its entirety and redesignating **"Note 4"** as **"Note 3"**;

3. In paragraph (b)(2), by removing the words "3, and 4" and inserting, in their place, the words "and 3" and by removing **"Note 3"** in its entirety and redesignating **"Note 4"** as **"Note 3"**;

4. By removing paragraph (c) in its entirety;

5. In paragraph (d), by changing all references to "class (or commodity)" to read "commodity"; and all references to "classes (or commodities)" to read "commodities"; and by removing the word "stations" and inserting, in its place, the word "offices";

6. By redesignating paragraphs (d) through (f) as paragraphs (c) through (e), respectively;

aa. By adding a § 341.28 to read as follows:

§ 341.28 Tariff notations in connection with fourth section orders.

(a) *When relief from long-and-short haul provision is granted.* (1) When the Commission has issued an order granting to a carrier authority to depart from the provisions of the amended fourth section of the act and to charge higher rates for shorter than for longer distances over the same line or route, the title page of each tariff or supplement issued and filed under such authority must bear the following notation:

> This tariff (or supplement) contains rates that are higher for shorter than longer distances over the same route. Such departure from the terms of the amended fourth section of the Interstate Commerce Act is permitted by authority of Federal Energy Regulatory Commission fourth section order (or orders), as indicated in individual items herein.

(2) In connection with the item or items containing the rates as to which such authority has been granted, specific authority has been granted, specific reference to the Commission's fourth section order number and date must be given, except that in instances where all of the rates in the tariff or supplement are covered by one fourth section order references to the number and date thereof may be shown on the title page. When a general fourth section order is referred to, the particular section thereof granting such authority must be shown in addition to the order number.

(b) *When relief from aggregate of intermediate provision is granted.* (1) When the Commission has issued an order granting to a carrier authority to depart from the provisions of the amended fourth section of the Act and to charge rates higher than the aggregate of the intermediate rates subject to the act, the title page of each tariff or supplement issued and filed under such authority must bear the following notation:

> This tariff (or supplement), contains rates that exceed the aggregates of the intermediate rates subject to the Interstate Commerce Act. Such departure from the terms of the amended fourth section of the Act is permitted by authority of Federal Energy Regulatory Commission Fourth section order (or orders), as indicated in individual items herein.

(2) In connection with the item or items containing the rates as to which such authority has been granted, specific reference to the Commission's fourth section order number and date must be given, except that in instances where all of the rates in the tariff or supplement are covered by one fourth section order, reference to the number and date thereof may be shown on the title page. When a general fourth section order is referred to, the particular section thereof granting such authority

must be shown in addition to the order number.

(c) *When relief is denied.* When the Commission has denied authority to carriers to continue existing departures from the provisions of the amended fourth section of the act, but has not prescribed specific rates in lieu of those existing, and it becomes necessary for carriers to publish and file rates in full conformity with the provisions of that section, the rates so filed have not been approved by the Commission. Tariffs or supplements in which they are published should not indicate that they are prescribed by, or are in compliance with an order of the Commission. If desired, however, a clause reading substantially as follows may be shown:

Issued to bring rates into conformity with the provisions of the fourth section of the Interstate Commerce Act following the issuance by the Federal Energy Regulatory Commission of its fourth section order No.—— of ——— (date), denying carrier's application.

(d) *Fourth section not waived.* Nothing in this section may be construed as waiving any of the provisions of the amended fourth section of the Interstate Commerce Act.

§ 341.291 [Amended]

bb. By amending § 341.29 as follows:

1. In paragraph (a), by removing the words "8 by 10½ inches" and inserting, in their place, the words "8½ by 11 inches"; and by removing the words "GENERAL FREIGHT DEPARTMENT" from the example test;

2. In paragraph (b), by removing the sentence "Separate letters must be used for freight and passenger schedules.";

cc. IN § 341.30(b), by removing the comma and words "and publications reproducing service orders" following the words "announcing adoptions" in the last sentence;

§ 341.31 [Amended]

dd. By removing § 341.31 in its entirety and inserting, in its place, the following "§ 341.31 [Reserved].";

§ 341.51 [Amended]

ee. By amending § 341.51 as follows:

1. By removing paragraph (b) in its entirety;

2. In the last sentence of paragraph (c), by removing the word "articles" and inserting, in its place, the word "volumes"; by removing the word "returning" and inserting, in its place, the word "redeeming"; and by removing the words "have become shopworn or have gotten into a state of disrepair through use" and insert, in their place, the word "have been altered";

3. In paragraph (d), by removing from the last sentence the word "property" and inserting, in its place, the word "product";

4. By redesignating paragraphs (c) and (d) as paragraphs (b) and (c), respectively;

§ 341.53 [Amended]

ff. In § 341.53, by removing the words "Not infrequently" and inserting, in their place, the words "On occasion";

gg. By adding a new § 341.54 to read as follows:

§ 341.54 Changes in rates.

Section 6(3) of the act, as amended, provides that:

No change shall be made in the rates, fares, and charges or joint rates, fares, and charges which have been filed and published by any common carrier in compliance with the requirements of this section, except after 30 days' notice to the Commission and to the public published as aforesaid, which shall plainly state the changes proposed to be made in the schedule then in force and the time when the changed rates, fares, or charges will go into effect; and the proposed changes shall be shown by printing new schedules, or shall be plainly indicated upon the schedules in force at the time and kept open to public inspection.

(a) *Effectiveness; notice of change.* This provision plainly refers to rates which have already become effective, and also applies the term "proposed changes" to rates which have not become effective. It follows that after notice of a change in rates has been published and filed the new rates must be allowed to go into effect, and cannot be changed, withdrawn, or canceled for at least 30 days after the date when the rates have become effective except as otherwise specifically authorized by rule, decision, or order of the Commission. A tariff may provide that it will expire with a date specified therein and which is at least 30 days subsequent to the date upon which it becomes effective, or a tariff may contain a notation that certain rates therein stated will expire with a date specified which is at least 30 days subsequent to the date upon which such rates become effective, and this will be legal notice of the cancellation or withdrawal of such tariff or of such rates. A provision in a tariff or supplement that the same or any part thereof will expire with a given date is not a guaranty that the tariff, or supplement, or such part thereof, will remain effective until and including that date. Such provision must be understood to mean that the tariff, or supplement, or specified part thereof, will expire with the date named unless sooner canceled, changed, or extended in lawful way. (See § 341.3(g).)

(b) *Commission may allow exception.* Carriers must comply fully with the requirements of the law respecting the publication, filing, and taking effect of proposed rates, unless upon application and for good cause shown, the Commission, in the exercise of authority conferred upon it, shall allow rates to be changed or withdrawn upon less than 30 days' notice, or by formal order otherwise modify such requirements. No rule decision, or order of the Commission is authority to change rates or issue tariffs on less than statutory notice unless so specifically provided in the rule, decision, or order. (See § 341.14(f).)

§ 341.55 [Amended]

hh. In § 341.55, the "NOTE" is amended by removing from the first sentence the words "or gateway" and the words "or via a different gateway,";

ii. By adding a new § 341.56 to read as follows:

§ 341.56 Reduction of rate to equal the aggregate of the intermediate rates.

(a) Section 4 of the act, as amended, prohibits the charging of any greater compensation as a through rate than the aggregate of the intermediate rates that are subject to the act. The Commission has frequently held that through rates which are in excess of the sum of the intermediate rates between the same points via the same route are prima facie unreasonable. The Commission has no authority to change or fix a rate except after full hearing. It is believed to be proper for the Commission to say that if called upon to formally pass upon a case of this nature it would be its policy to consider a rate which is higher than the aggregate of the intermediate rates between the same points via the same route as prima facie unreasonable and that the burden of proof would be upon the carrier to defend such unreasonable rate.

(b) Where a rate is in effect by a given route from point of origin to destination which is higher than the aggregate of intermediate rates from and to the same points, by the same or another route, such higher rate may, on not less than 1 day's notice to the public and the Commission, be reduced to the actual aggregate of such intermediate rates. Such reduced rate must be published in a supplement to or a reissue of the tariff in which the rate so reduced appears. Any tariff or supplement containing a rate reduced under authority of this section must bear on its title page, or in connection with such item, the notation

"Issued on 1 day's notice under authority of 18 CFR 341.56. The rate (or rates) hereby reduced appears in ——— Tariff, FERC ———, item (or page) ———, and the factors to and from ——— (here insert point or points on which combination makes) used in making the new rate (or rates) are found in ———, Tariff, FERC No. ———, item (or page) ———, and ——— Tariff, FERC No. ———, item (or page) ———."

(c)(1) In order to facilitate the publication of rates which will be in accord with the aggregate of intermediates provision of the fourth section of the act the following rule may be incorporated in tariffs:

Carriers have endeavored to publish herein rates which do not exceed the aggregate of the intermediate rates between points between which there is an actual movement of traffic, but if there should be in this tariff any rate which is in excess of the aggregate of intermediates, or if through subsequent change in an intermediate factor any rate in this tariff becomes higher than the aggregate of intermediates in violation of the provisions of the fourth section of the Act, carriers will reduce such rates to the aggregate of the intermediate rates on 1 day's notice under authority of 18 CFR 341.56. On any commodity between points between which there is a movement or a prospective movement of that commodity. The publication of such reduced rate will be made within 30 days after such unlawful rate comes to carrier's notice.

Carriers, parties to this tariff, whose rate over the route of movement is higher than the aggregate of the intermediates over that route, further agree that on any shipment on which the higher rate named in this tariff for that route has been charged, application will be made promptly to the Federal Energy Regulatory Commission for authority to award reparation on the basis of the aggregate of intermediates in effect on date of shipment. (See note.)

Note.—Carriers or shippers who discover combinations which result in lower charges than the rates named herein, should promptly report such cases to the publishing agent of his tariff, showing the through rate and the item or page where it is found together with the separate factors which make up the combination, giving tariff reference by item or page, where possible, for each.

(2) In placing this rule in tariffs carriers must strictly adhere to the wording of the rule as no modification thereof will be permitted.

(3) The failure to publish and file reduced rates as provided in this part, within 30 days from the date that said rates are brought to the attention of the carriers parties thereto, or any of them, or their agents, will be considered by the Commission as sufficient ground for the issuance of an order prohibiting its use in connection with such carrier or carriers. A promise to publish certain rates, when published in a tariff, becomes the rule of the carriers parties to the tariff and therefore when a carrier or agent has been called upon to reduce rates under authority of the above rule it will not be necessary for such carrier or agent to secure any additional authority from the carriers parties to the tariff for the publication of the reduced rates and any delay on that account may cause carriers, to incur the penalties provided for violations of the fourth and sixth sections of the act in addition to losing the right to use the rule in tariffs.

jj. By amending § 341.57 as follows:

1. By revising the title to read "*Newly constructed pipelines*".

2. In paragraph (a), the first sentence is revised to read as follows:

§ 341.57 Newly constructed pipelines.

* * * * *

(a) * * * Charges applicable at, and rates, charges, rules or regulations applicable from, to, or via points on newly constructed pipelines including loops, branches and extensions of existing pipelines may be established in the first instance on not less than 10 days' notice.

* * * * *

3. In paragraph (b), by removing the word "classifications," throughout the paragraph; by removing from the example the words "rule 57, Tariff Circular 20" and inserting, in their place, the words "18 CFR 341.57"; and by removing from the example the words "stations on railroads (or pipeline or reached by water carrier, as case may be)." and inserting, in their place, the words "points on pipeline";

4. In paragraph (c), by removing the word "classifications," throughout the paragraph; by removing from the example the words "rule 57, Tariff Circular 20," and inserting, in their place, the words "18 CFR 341.57"; and removing the words "stations on railroads (or pipeline or reached by water carrier, as case may be)." and inserting, in their place, the words, "points on pipeline."; and removing the word "stations" and inserting, in its place, the word "points";

5. By revising paragraph (d) to read as follows:

* * * * *

(d) *Rates established may not be reduced by similar rates.* When a commodity rate has been established from, to, via, or between points on a newly constructed line, a different commodity rate from, to, via, or between the same points may not be established at a later date under authority of this section; but commodity rates may be established under authority of this section within the 60-day period prescribed herein. Interested carriers and publishing agents should be notified as much in advance of the opening of a newly constructed line as is possible in order that rates may be established which will give carriers and shippers fullest possible use of such newly constructed lines.

* * * * *

6. By removing paragraph (e) in its entirety;

§ 341.58 [Amended]

kk. By amending § 341.58 as follows:

1. In the title and paragraph (a), by changing the reference to "Section 10762" to read "Section 6";

2. In paragraph (a), by removing the words "less than statutory notice" and inserting, in their place, the words "a notice of less than 30 days";

3. In the first sentence of paragraph (c), by adding the words "sixth section" following the word "file" and removing the word "statutory" and inserting, in its place, the words "30 days' ";

4. In the last sentence of paragraph (c), by removing the number "10762" and by inserting the word "sixth" preceding the word "section";

5. In the second sentence of paragraph (d), by removing the number "10762" and by inserting the word "sixth" preceding the word "section";

6. By amending title of paragraph (e) to read:

(e) *Applications, form and number.* 7. By further amending paragraph (e) as follows:

A. By removing the word "in duplicate" in the first sentence and inserting, in its place, the word "with fourteen copies in conformance with Rule 2004 of Commission's Rules of Practice and Procedure.";

B. By removing the words "8 by 10½ inches" and inserting, in their place, the words "8½ by 11 inches";

C. In the first sentence under the words "Form of Application", by revising the number "10762" to read "6";

D. By removing from the example the word "articles" and inserting, in its place, the word "commodities"; and

E. By removing from the example the parenthetical "(state whether class, commodity or combination)";

11. By removing § 341.60 in its entirety and inserting, in its place, the following "§ 341.60 [Reserved].";

§ 341.63 [Amended]

mm. By removing § 341.63 in its entirety and inserting, in its place, the following "§ 341.63 [Reserved].";

§ 341.66 [Removed]

nn. By removing § 341.66 in its entirety and inserting, in its place, the following "§ 341.66 [Reserved].";

oo. By amending § 341.67 as follows:

(1) By revising paragraph (b)(1) to read as follows:

§ 341.67 Export and import traffic—ocean carriers.

* * * * *

(b) *Through routes and joint rates.* (1) A common carrier by pipeline subject to the Interstate Commerce Act (hereinafter referred to in this section as the domestic carrier), may establish a through route and joint rate with a vessel-operating common carrier by water engaged in the foreign commerce of the United States (hereinafter referred to in this section as the ocean carrier) as defined in the Shipping Act, 1916, for the transportation of property between any place in the United States and any place in a foreign country. Every tariff naming such a through route and joint rate shall be filed with this Commission. The tariff may be filed in the name of the ocean carrier, a conference of ocean carriers, the domestic carrier or the duly appointed tariff publishing agent of such carriers.

* * * * *

2. In paragraph (b)(2), by removing the words and parenthetical "Parts 1300 and 1305 (regulations in both parts included in Tariff Circular No. 20)" and inserting, in their place, the words "Parts 341 and 343"; by removing from the fourth sentence the words "and/or loaded containers"; by removing the sentence "If the tariff provides containerload rates, such rates must be made subject to a specified minimum weight or minimum measure per container, or a specified minimum charge per shipment per container, and a maximum weight per container."; by removing from the last sentence the words "freight is" and inserting, in their place, the words "volumes are"; and by removing from the last sentence the words "packed (loaded) or unpacked (unloaded) into or from the containers" and insert, in their place, the words "loaded or unloaded into or from the facilities";

(3) In paragraph (b)(5), by inserting in the third sentence the parenthetical "(such as tariffs (containing joint pipeline-ocean rates)" preceding the words "in which the domestic carrier desires";

4. By removing the "**Cross Reference**" at the end of the section and inserting, in its place, the following:

Cross Reference: For regulations governing the posting of tariffs of common carriers by pipeline see Part 343.";

pp. By removing the following sections or paragraphs in their entirety: §§ 341.2(a)(4); 341.9(n); 341.13(f); 341.32; 341.33; 341.34; 341.300, 341.310, 341.311, 341.312, 341.313, 341.314 and 341.315;

qq. By changing the following references throughout Part 341:

Docket No." throughout Part 341 are changed to read "Docket No. IS"; all references to "Tariff Circular No. 20" throughout Part 341 are changed to read "this part"; all references to "station" throughout Part 341 are changed to read "point"; and all references to "stations" throughout Part 341 are changed to read "points".

IV. Part 342 is added to 18 CFR Chapter I to read as follows:

PART 342—LONG-AND-SHORT-HAUL AND AGGREGATE-OF-INTERMEDIATE RATES—PIPELINES

Sec.

342.11 [Reserved]
342.21 Disposition of fractions.
342.31 [Reserved]
342.61 Relief for departures in rates on transit shipments.
342.65 Filing schedules simultaneously with applications.
342.75 Applications, preparation and filing, conformity with rules.
342.76 [Reserved]
342.77 Long-and-short-haul and aggregate of intermediate applications separate.
342.78 Number of copies, form, general specifications and requirements, signatures, and verification.
342.79 Matters to be shown in the application.
342.80 Additional information required.
342.81 Additional matters to be shown.
342.82 Miscellaneous provisions.
342.83 Acceptance of applications.
342.84 Applications for relief previously denied.
342.85 Changes and additions.

Authority: Department of Energy Organization Act, 42 U.S.C. 7101–7352 (Supp. V 1981), Interstate Commerce Act, 49 U.S.C. 1–27 (1976); E.O. 12009. 3 CFR Part 142 (1978).

§ 342.11 [Reserved]

§ 342.21 Disposition of fractions.

(a) Applying the rule de minimis, all carriers are hereby authorized, in the making up of through rates on the aggregate of the intermediate rates, to disregard fractions of a cent less than .5 retaining the half cent in the rate when it is even .5, and making the rate in even cents when the fraction is more than .5.

(b) Tariffs need contain no reference to this order. The Commission does not hereby approve any rates that may be filed under this authority, all such rates being subject to complaint, investigation, and correction if in conflict with any other provision of the act.

§ 342.31 [Reserved]

§ 342.61 Relief for departures in rates on transit shipments.

In those instances in which fourth-section orders have been or may be entered granting carriers relief from the provisions of section 4 of the act to

maintain lower rates for the transportation of like kind of property for longer than for shorter distances the same relief shall also apply when the said rates, with or without the addition of lawfully established charges to cover the cost of transit, are applied on transit shipments. This section shall not be construed as authorizing fourth-section departures which might result from the establishment of transit privileges at some points and not at other points on the route of movement, nor as approving any transit arrangements that may be established under this permission, all such arrangements being subject to complaint, investigation, and correction if in conflict with any other provision of the act.

§ 342.65 Filing schedules simultaneously with applications.

(a) Section 4(1) of the Interstate Commerce Act (49 U.S.C. 4(1)) has been amended by the Transportation Act of 1940, now effective, so as to eliminate the so-called equidistant clause and to provide:

> That tariffs proposing rates subject to the provisions of this paragraph may be filed when application is made to the Commission under the provisions hereof, and in the event such application is approved, the Commission shall permit such tariffs to become effective upon one day's notice.

(b) Heretofore, the practice of carriers has been to file applications for, and to obtain, fourth-section relief of either a temporary or continuing character before publishing and filing rates which would without relief contravene the fourth section. The new proviso is construed as intended to shorten the period intervening between carrier's determination to publish rates and their effective date so that if relief is granted, the time now intervening between the filing of the application and its granting will be eliminated, but is not intended to set aside the 30 days' notice requirement of section 6 or to abridge the rights of interested persons to seek suspension under section 15(7). To facilitate administration of the new proviso and at the same time to avoid interference with other sections of the act, the following procedure has been adopted:

(1) Insofar as possible, fourth section applications filed under the proviso will be acted upon before the effective date of the tariffs.

(2) In cases where it is found possible to pass upon applications before the effective date of the tariffs, if relief is granted, such relief will be made effective not with issuance of the order but on the same date as the effective date of the tariffs.

(3) In cases where action upon the application has not been taken prior to the effective date of the schedules, or where the relief sought has been denied in whole or in part, the present intention is to suspend the tariffs in order to avoid the unauthorized fourth-section departures which otherwise would result.

(4) Where rates were suspended solely because of failure to act upon the fourth-section application and where the necessary relief is subsequently granted, the present intention is promptly to vacate the order of suspension, the vacating order to be effective with issuance.

(c) Pending modification of the Commission's Rules of Practice, carriers that file applications for relief from the provisions of section 4 with respect to rates or charges included in schedules filed concurrently with such applications, should include in the applications a complete statement of the tariffs and supplements containing such rates or charges in substantially the following form:

> The rates (charges) as to which relief is prayed herein have been published and filed to become effective ——— (date) in ——— (name of agent or carriers). Tariff, FERC ——— (No.) (supplement number to tariff should be shown if published therein).

(d) Tariffs and supplements filed under the above provision should show on the title page thereof a statement that they contain rates or charges, as the case may be, that contravene the long-and-short-haul (or aggregate-of-intermediates) provision of section 4, and should give specific reference to an item or page of the tariff or supplement on which shall be prominently displayed a complete and specific list of items and pages on which such rates are found, with specific number and date reference to the application for relief with respect to such rates or charges.

(e) When appropriate fourth section relief has been granted before the effective date of tariffs or supplements, and such tariffs or supplements become effective, number reference to the order granting such relief need be given only when the next supplement or reissue is filed.

(f) Many outstanding orders granting relief from the long-and-short-haul provision of section 4 contain conditions designed to give effect to the equidistant clause. The present intention is not to eliminate such conditions in the absence of petitions for reopening of proceedings in which such orders were entered as it is believed that in some cases retention of such conditions may be warranted notwithstanding the repeal of the equidistant clause and in others some substitute limitation may be necessary.

> Note.—See previous notice in this matter, 5 FR 3758, Sept. 25, 1940.

§ 342.75 Applications, preparation and filing, conformity with rules.

Any common carrier subject to the Act may apply to this Commission, under section 4(1) of the Act, for such authorization as it is empowered to grant thereunder. Such application must conform to the requirements hereinafter provided.

§ 342.76 [Reserved]

§ 342.77 Long-and-short-haul and aggregate of intermediate applications separate.

Separate applications shall be filed for relief from the long-and-short-haul provision, and for relief from the aggregate-of-intermediates provision of section 4 of the act.

§ 342.78 Number of copies, form, general specifications and requirements, signatures, and verification.

(a) Applications shall be substantially in the form shown below, and five copies of each, including all exhibits and maps must be furnished.

Form of Application for Relief Under Section 4(1) of the Act

Fourth Section Application

Commission's No. ——

Carrier's No. ——

The ——— Company, by ———, its ——— (Official title), hereby petitions the Federal Energy Regulatory Commission (FERC) for authority to establish rates or charges hereinafter set forth without observing the long-and-short-haul (or aggregate-of-intermediates) provision of section 4(1) of the Interstate Commerce Act. (If rates, etc., are to apply over the lines of more than one carrier, the application should show that it is made for and on behalf of all such carriers, naming them, or if made for or on behalf of all carriers parties to a particular tariff, reference may be made by FERC No. to such tariff for the names of such carriers.)

I. (State fully the rates, charges, etc., which it is desired to establish, with complete reference to the tariffs in which published and the effective date thereof, the routes over and the commodities upon which they are to apply, and name, or descriptions of the points of origin and destination. See Note A following.)

II. (State fully names or description of intermediate points at which it is desired to maintain higher rates etc., and rates etc., at such points or a sufficient number of such points to illustrate the situation, including the first and last higher-rated and the highest-rated intermediate points. Distances between all points shown should be included in this statement. In applications for relief from the aggregate-of-intermediates provision, set

forth typical examples of the higher through rates or charges, and the intermediate rates or charges that in the aggregate are less than the through rates etc. See Note A, following. Also show FERC Nos. of tariffs, and supplements thereto, containing the rates and distances stated.)

III. This application is based upon the following facts which present all of the circumstances and conditions relied upon by your applicant in justification of the relief herein prayed: (Make a complete and accurate statement as to the necessity for the proposed changes, and all of the circumstances and conditions relied upon as justifying the relief prayed. See Note A, following.)

IV. (Give specific reference to any proceeding pending before or determined by the Commission, by docket number, and report citation, if any, which may have any bearing upon, or be in any way related to the rates, etc., sought to be established or maintained. If none, state that fact.)

———— Company (Corporate title of applicant)
By (Personal signature of officer)————
Title of officer ————

Note A.—When more convenient this information may be given in an exhibit or exhibits, and here referred to: "As stated in exhibit —— attached to and made a part hereof." Information required under each numbered section, as above, should be shown in a separate exhibit.

Exhibits should conform to the following requirements:

Generally. Exhibits of a documentary character may have a maximum width of 22 inches by 12½ inches in height. Whenever practicable the sheets of each exhibit and the lines of each sheet should be numbered. If the exhibit consists of five or more sheets, the first sheet or title-page should be confined to a brief statement of what the exhibit purports to show, with reference by sheet and line to illustrative or typical examples contained therein. The exhibit should bear an identifying number, letter, or short title which will readily distinguish it from other exhibits offered. It is desirable that, whenever practicable, rate comparisons and other evidence should be condensed into tables. Exhibits should not be argumentative, should be limited to statements of fact, and be relevant and material to the issue.

Reference to tariff authority, routes, and distances. All exhibits showing rates, charges, or other tariff or schedule provision must, by appropriate Federal Energy Regulatory Commission number reference, indicate the tariff or schedule authority therefor, and if distances are shown must also show the authority therefor and, by lines, highways, or waterways, and junction points, the routes over which the distances are computed; except that the routes over which the distances are computed need not be shown when such distances are specifically published in a tariff or schedule lawfully on file with the Commission, or definitely ascertainable from a tariff or schedule on file with the Commission showing rates prescribed by the Commission and based on short-lined distances, or short highway distances, provided the exhibit makes specific reference to such tariff or schedule as provided by this rule.

(b) Applications shall be on opaque, unglazed, durable paper not exceeding 8½ by 11 inches. To permit the binding in covers of uniform size, margins of at least 1½ and 1 inch, respectively, shall be allowed on the left and right margins. Binding shall be on the left margin. Reproduction may be by printing, multilithing, mimeographing, or any other process, provided the copies are clear and permanently legible. Whiteline blue prints which cannot be reproduced by photography are not desirable. If directly typewritten, or if in facsimile reproduction of typewriting, the impression must be on one side of the paper and must be double spaced, except that long quotations shall be single spaced and indented. If printed, nothing less than 10-point type shall be used, except that 8-point type may be used in footnotes.

(c) The original copy of the application must be over the personal signature of an executive officer, a responsible traffic officer, or a duly authorized attorney or agent, specifying his title, and sworn to before a notary public or other officer authorized by law to administer oaths. Verification shall be in the manner shown below:

Verification

State of ——— ss:
County of ———
——— (Name of affiant), being duly sworn, deposes and says: That he is the ——— (title of affiant) of the ——— (Name of applicant); that he is authorized by said applicant to sign and file with the Federal Energy Regulatory Commission this application and exhibits attached hereto, and to verify the facts and statements contained in said application and exhibits; that he has carefully examined all of such statements contained in said application and exhibits; and that the same are true and correct to the best of his knowledge, information, and belief.

Subscribed and sworn to before me, a ——— in and for the State and County above, this ——— day of ———, 19—.

(SEAL) My commission expires ———.

§ 342.79 Matters to be shown in the application.

(a) The information required in this section and in §§ 342.80 and 342.81, and 342.82, according to the grounds upon which relief is sought, shall be shown in the application when Commission action is desired on the presentation made therein, without hearing. When a hearing is desired and applicants propose to justify at the hearing the relief desired, the information specified in this section shall be included in the application, and the information required in §§ 342.80, 342.81 and 342.82 may, instead, be introduced at the hearing. It should be understood, however, that where the information included in the application does not fully justify the relief sought, or for other good cause, the application may be assigned for hearing at the Commission's discretion. The application shall show:

(b) The names of the carrier or carriers for, or on behalf of which it is made, or, if made on behalf of all carriers parties to a particular tariff, the application may refer to such tariff by the Federal Energy Regulatory Commission number (hereinafter abbreviated FERC No.).

(c) The FERC No. of all tariffs in which rates or charges referred to in the application or exhibits are published.

(d) The rates or charges proposed to be established; the basis or bases therefor; the commodities on which they are to apply; the points of origin and destination; and the routes between such points over which the rates or charges will apply. (Direct routes only with respect to applications for long-and-short-haul relief). When relief is desired from or to "related" points or "group" points, the points or groups shall be indicated in the map hereafter required to be furnished, or defined by reference to tariff publications providing the grouping.

(e) If long-and-short-haul relief is sought, the intermediate points at which it is proposed to maintain rates or charges higher than those proposed from or to more distant points and the rates or charges at such points. If relief from the aggregate-of-intermediate provision of section 4 is sought, the intermediate rates or charges that, in the aggregate, are less than the through rates or charges.

(f) A complete and accurate statement of the grounds relied upon as justification for the relief prayed.

(g) Applications for relief from the provisions of section 4 with respect to rates or charges included in schedules filed before the necessary relief has been obtained shall include in the opening or second paragraph a complete statement of the tariffs and supplements containing such rates or charges in substantially the following form:

The rates (charges) as to which relief is prayed herein have been published and filed to become effective——— (Date) in —— (Name of agent or carriers) tariff FERC —— (Number). (Supplement number should be shown if published in a supplement).

§ 342.80 Additional information required.

(a) *Long-and-short-haul relief.* Applications should show:

(1) That, where proposed rates are depressed to meet competition, the competitive rates they are being established to meet are not within the control of applicant carriers, and any other facts tending to show that such rates should not be observed as maxima at intermediate points.

(2) That the lower rates for longer than for shorter hauls over the same line or route are reasonably compensatory.

The following information is considered pertinent in a showing as to the reasonably compensatory nature of rates:

(i) Statement of ton-mile and per barrel-mile earnings under the competitive rates. When a general adjustment is involved covering rates between numerous competitive points and applicable or to be applied by numerous routes, it will be sufficient, ordinarily, to give representative examples of rates throughout the territory yielding the lowest earnings for the longest and shortest hauls involved.

(ii) Statement of ton-mile and barrel-mile expenses of petitioning carriers on the traffic involved, or other evidence showing that the proposed rates will be reasonably compensatory.

(3) A statement of rates at representative intermediate points at which rates exceed or would exceed the rates at more distant points under the proposed adjustment, including rates at the first and last higher-rated intermediate points and the distances from and to such intermediate points. This information need not be shown where the rates at the more distant points are constructed on the basis of a mileage scale and the rates at the intermediate points reflect the same mileage scale.

(4) That the higher rates for the shorter than for the longer hauls over the same line or route are reasonable. (The usual facts tending to show the reasonableness of rates should be presented).

(5) Whether there is a complaint pending as to the reasonableness of the rates at the intermediate points on the applicant line or route.

(6) In the event the rates proposed to be superseded by subsequent revisions are maintained under the authority of outstanding fourth-section orders, reference to such orders shall be furnished.

(7) Where the proposed adjustment is in any way related to a prior adjustment as to which relief has been authorized, that is, the addition of origins, destinations, commodities, etc., or involves rates for the return movement of commodities as to which relief for initial hauls has been authorized, reference to orders authorizing such relief shall be furnished.

(b) *Aggregate-of-intermediates relief.* Applications should show:

(1) The origins and destinations from and to which it is proposed to continue, or to establish and maintain through rates or charges which exceed the aggregate-of-intermediate rates or charges, together with the intermediate rates or charges that, in the aggregate, are less than the through rates or charges.

(2) That the intermediate rates or charges which, in the aggregate, are lower than the through rates or charges, are depressed by competitive conditions that do not affect the through rates, or charges; and the same information with respect to the conditions alleged as affecting the intermediate rates as that required in applications for long-and-short-haul relief with respect to similar conditions when alleged as grounds for maintaining lower rates for longer than for shorter distances.

(3) That the through rates or charges that would exceed the aggregate-of-intermediate rates or charges are reasonable. (The usual facts tending to show the reasonableness of rates should be presented).

§ 342.81 Additional matters to be shown.

(a) *Applications based on water competitions.* (1) The name of the competing water line or lines actually in operation between the water points and whether said water line or lines, in the transportation of the traffic involved, are subject to the Interstate Commerce Act.

(2) A detailed statement of the charges over the water line or lines, including marine insurance, wharfage, handling, shrinkage, and all other applicable incidental charges. Where such charges are named in tariffs on file with the Interstate Commerce Commission, reference should be made to such tariffs by ICC number.

(3) Whether facilities for loading into and unloading from barges or ships are available.

(4) The minimum tender that may be made to the water carrier or carriers, and whether shippers and receivers are equipped to handle such amounts.

(5) If the season of navigation is restricted, and, if so, that available storage will permit the handling by water of receivers' needs during the season of navigation.

(6) The cost of installation, maintenance, etc., of loading, unloading, and storage facilities which must be constructed or installed before water transportation is feasible.

(7) Evidence supporting water costs and accessorial charges which are not published in tariffs on file with the Interstate Commerce Commission.

(8) Certification that a copy of the application has been served upon the competing water line or lines named in paragraph (a)(1) hereof. The service and certification shall conform with the requirements of § 385.203 of this chapter.

(b) *Applications based on motor carrier competition.* The charges over the competing motor line or lines, including all incidental charges, and if interstate common contract carrier or carriers, reference to the applicable tariffs by ICC numbers.

(c) *Applications based on market competition.* (1) The names of the producing or receiving points whose competition is to be met.

(2) The short line or route and distances, or the class rate distances if the latter are normally used for rate making purposes, from the various producing points to the common market and tariff authority for the distances.

(3) The rates from the competitive producing points with reference by ICC No. to the tariffs naming the rates and whether they conform to the provisions of section 4 of the act. If relief has been granted or application is pending as to such rates, give reference to the ICC No. of the application or order.

(4) Whether similar competition is to be met at intermediate points.

(d) *Applications based on weak financial condition or high operating costs of the applicant line.* Financial statistics and operating conditions.

§ 342.82 Miscellaneous provisions.

(a) In addition to the above, applications should show any other conditions or circumstances relied upon as constituting a special case within the meaning of section 4(1) of the Act.

(b) Applications should contain a map, made a part thereof, showing the relative location of lines or routes, the competitive points, and representative intermediate points at which higher rates are to be charged, or representative points from or to which it is proposed to maintain through rates or charges which exceed the aggregate of intermediates.

§ 342.83 Acceptance of applications.

In any case when, upon inspection, the Commission is of the opinion that an application does not sufficiently set forth required material or is otherwise deficient, the Commission may decline to accept the application for filing and may return it unfiled, or the Commission may accept it for filing and advise the person tendering it of the deficiencies

and require that such deficiencies be corrected.

§ 342.84 Applications for relief previously denied.

If the Commission denies an application, and the carrier presents a new application based upon new or additional facts in justification of the proposed rates or charges, such facts should be clearly indicated as such, and the modified application must refer specifically to the previous application and the number of the order by which it was denied.

§ 342.85 Changes and additions.

Copies of any amendment to the application, or any additional information furnished to the Commission in connection therewith, including notices of any changes in the effective date of the rates or charges as set forth in compliance with § 342.79(g), shall be served by applicant upon all parties served with a copy of the application and upon all parties protesting the application. The service and certification thereof shall conform with the requirements of § 385.203 of this chapter.

V. Part 343 is added to 18 CFR Chapter I to read as follows:

PART 343—POSTING TARIFFS OF COMMON CARRIER PIPELINES

Tariffs of Common Carriers by Pipeline and Tariffs Containing Joint Intermodal Pipeline Rates

Sec.
343.0 Application-posting of tariffs defined.
343.1 Location of complete public files of tariffs.
343.2 Time of posting.
343.3 Tariff files to be accessible to the public.
343.4 Notice required to be posted.
343.5 Check-up on files of tariffs.

Authority: Department of Energy Organization Act, 42 U.S.C. 7101–7352 (Supp. V 1981); Interstate Commerce Act, 49 U.S.C. 1–27 (1976); E.O. 12,009, 3 CFR Part 142 (1978).

Tariffs of Common Carriers by Pipeline and Tariffs Containing Joint Intermodal Pipeline Rates

§ 343.0 Application-posting of tariffs defined.

(a) The regulations in this part shall also govern the posting (by carriers subject to the jurisdiction of the Federal Energy Regulatory Commission) of any tariff containing a through route and joint rate over the lines of a common carrier by pipeline subject to the Interstate Commerce Act, on the one hand, and a vessel-operating common carrier by water engaged in the foreign commerce of the United States, as defined in the Shipping Act, 1916, on the other hand, and all other tariffs governing the application of the rate tariff, for the transportation of property between any place in the United States and any place in a foreign country. The carrier subject to the jurisdiction of this Commission receiving shipments at a port for delivery to points in the United States under joint through rate and route arrangements shall post at its office at such port the tariffs naming such rates and its governing tariffs.

(b) The term "post" as used in this part means the maintenance of a file of tariffs in the custody of an agent of the carrier in a complete, accessible, and usable form, and keeping such file of tariffs available to the public upon request during ordinary business hours. The term "tariff" as used in this part includes tariff supplements or amendments.

§ 343.1 Location of complete public files of tariffs.

Each common carrier by pipeline shall post at its principal office a complete set of all tariffs which it issued or to which it is a party, together with an index thereto.

§ 343.2 Time of posting.

Each tariff must be posted at least 30 days before its effective date, excepting those as to which the Commission has authorized a shorter period of notice to the public. Each carrier shall require the agent at every office at which tariffs are posted to write or stamp on each tariff the date on which it was posted.

§ 343.3 Tariff files to be accessible to the public.

Each file of tariffs shall be in charge of an agent of the carrier. Each carrier shall require and instruct such agent to afford inquirers an opportunity to examine any of such tariffs without asking the inquirer to assign any reason therefor, and, upon request, to lend assistance to seekers of information therefrom with all promptness possible and consistent with proper performance of other duties.

§ 343.4 Notice required to be posted.

Each carrier shall also cause to be displayed continuously in a conspicuous public place at each office at which tariffs are required to be posted, a notice printed in large type reading as follows:

With only such exceptions as have been authorized by the Federal Energy Regulatory Commission, all tariffs which contain rates and charges applying from or at this location are on file, in this office, together with an index of all of this company's tariffs. The tariffs and index may be inspected by any person upon application and without the assignment of any reason for such inspection. The agent on duty in this office will lend any assistance desired in securing information therefrom.

If request is made for a tariff naming rates from this location, the posting of which has been discountinued because of nonuse, the agent will arrange to have it reposted within 20 days and thereafter keep it posted.

In addition a complete file of all of this company's tariffs, with indexes thereof, is maintained and kept available for public inspection at:

(Here indicate the place or places where complete tariff files are maintained, including the street address and, where appropriate, the room number.)

§ 343.5 Check-up on files of tariffs.

Each carrier shall place in effect a system of supervision that will insure the continued maintenance in proper and readily accessible form of tariff files required at each office where complete files are maintained. Such offices must be furnished at least once a year with a list of all of the tariffs which should be in their files. Upon receipt of the list the agent or employee in charge will immediately check the tariffs on hand against the list, and report any deficiencies. Evidence of improper maintenance of files at any office may incur the prescription of detailed instructions to the carrier by the Commission necessary to insure compliance with the regulations.

VI. Part 344 is added to 18 CFR Chapter I to read as follows:

PART 344— FILING QUOTATIONS FOR GOVERNMENT SHIPMENTS AT REDUCED RATES

Sec.
344.1 Applicability.
344.2 Manner of submitting quotations.

Authority: Department of Energy Organization Act, 42 U.S.C. 7101–7352 (Supp. V 1981); Interstate Commerce Act, 49 U.S.C. 1–27 (1976); E.O. 12009, 3 CFR Part 142 (1978).

§ 344.1 Applicability.

The provisions of this part shall apply to copies of quotations or tenders made by all pipeline common carriers to the United States Government, or any agency or department thereof, for the transportation, storage or handling of property at reduced rates as permitted by section 22 of the Interstate Commerce Act, as amended, except quotations or tenders which, as indicated by the United States Government or any department or agency thereof to any carrier or carriers, involves information the disclosure of which would endanger the national security.

§ 344.2 Manner of submitting quotations.

(a) *General.* Copies of all quotations or tenders by common carriers to which this part applies, concerning rates or charges for the transportation, storage, or handling of property, at reduced rates, including quotations or tenders for retroactive application whether negotiated or renegotiated after the services have been performed, which are submitted to the Federal Energy Regulatory Commission on and after the effective date of this part in conformity with the provisions of paragraph (2) of section 22 of the Interstate Commerce Act (49 U.S.C. 22) shall conform to the provisions of paragraphs (b), (c), (d), (e), (f) and (g) of this section.

(b) *Copies to be submitted concurrently with submittal to government agencies.* Exact copies of the quotation or tender shall be submitted to the Commission concurrently with the submittal of the quotation or tender to the Federal department or agency for whose account the quotation or tender is offered or the proposed services are to be rendered.

(c) *Filing in duplicate required.* All quotations or tenders shall be filed in duplicate, one copy of which will be maintained at the Washington office of this Commission for public inspection. One of such copies shall be signed and both shall clearly indicate the name and official title of the officer executing the document.

(d) *Filing procedure.* Both copies of the quotations or tenders shall be filed together with a letter of transmittal which clearly indicates that they are being filed in accordance with the requirements of section 22, as amended. They must be addressed to the "Federal Energy Regulatory Commission, Washington, D.C. 20426," with the envelope marked as containing "Section 22 Quotations", and delivered free of all charges. If receipt for the accompanying documents is desired, the letter of tramsmittal must be sent in duplicate, and one copy showing date of receipt by the Commission will be returned to the sender.

(e) *Numbering.* The copies of quotations or tenders which are filed with this Commission by each carrier or agent shall be numbered consecutively in a series maintained by such carrier or agent beginning with the number "1".

(f) *Quotation or tender superseding prior one.* A quotation or tender which supersedes a prior quotation or tender shall, by a statement shown immediately under the number of the new document, cancel the prior document by number.

(g) *Amendments or supplements to quotations or tenders.* When amendments or supplements are filed to quotations or tenders issued prior to August 31, 1957, copies of the original quotations or tenders, and any prior amendments thereto, must be filed with the amendments or supplements.

VII. Part 345 is added to 18 CFR Chapter I to read as follows:

PART 345—SECTION 5a APPLICATIONS

Applications for Authority To Establish or Control Agreements Between or Among Carriers

Sec.
345.1 Form and contents of application.
345.2 Required exhibits.
345.3 Procedure.
345.4 New parties to an agreement.
345.5 Public notice.

Authority: Department of Energy Organization Act, 42 U.S.C. 7101–7352 (Supp. V 1981); Interstate Commerce Act, 49 U.S.C. 1–27 (1976); E.O. 12009, 3 CFR Part 142 (1978).

Applications for Authority to Establish or Control Agreements Between or Among Carriers

§ 345.1 Form and contents of application.

The application and supporting exhibits shall conform to Rule 203 of the general rules of practice (§ 385.203 of this chapter) and shall show, in the order indicated, with the following paragraph designations, the following information:

(a) Full and correct name and business address (street and number, city and ZIP Code, county and State) of the carrier applicant or applicants (hereinafter called applicant); whether applicant is a corporation, individual, or partnership; if a corporation, the government, State or territory under the laws of which the applicant was organized and received its present charter, and if a partnership, the names of the partners and the date of formation of the partnership.

(b) Full and correct name and business address (city and State) of each carrier on whose behalf the application is filed and whether it is a corporation, individual, or partnership.

(c) If the agreement of which approval is sought pertains to a conference, bureau, committee, or other organization, a complete description of such organization, including any subunits, and of its or their functions and methods of operation, together with a description of the territorial scope of such operations; and, if such organization has a working or other arrangement or relationship with any other organization, a complete description of such arrangement or relationship. If the agreement is of any other character, a precise statement of its nature and scope and the mode of procedure thereunder.

(d) The facts and circumstances relied upon to establish that the agreement will be in furtherance of the national transportation policy declared in the Interstate Commerce Act, as amended.

(e) The name, title, and post office address of counsel, officer, or other person to whom correspondence in regard to the application is to be addressed.

§ 345.2 Required exhibits.

There shall be filed with and made a part of each orginal application, and each copy, the following exhibits:

(a) As Exhibit 1, a true copy of the agreement.

(b) As Exhibit 2, if the agreement pertains to a conference, bureau, committee, or other organization, a copy of the constitution, by-laws, or other documents or writings, specifying the organization's powers, duties, and procedures, unless incorporated in the agreement filed as Exhibit 1.

(c) As Exhibit 3, if the agreement relates to a conference, bureau, committee, or other organization, an organization chart.

(d) As Exhibit 4, if the agreement relates to a conference, bureau, committee, or other organization, a schedule of its charges to members or, where expenses are divided among the members, a statement, showing how the expenses are divided.

(e) As Exhibit 5, opinion of counsel for applicant that the application made meets the requirements of law as set forth in section 5a of the Interstate Commerce Act, as amended, and will be legally authorized if approved by the Commission, with specific reference to any specially pertinent provisions of articles of incorporation or association.

§ 345.3 Procedure.

The following procedure shall govern the execution, filing, and disposition of the applications:

(a) The orginal application shall be made under oath and shall be signed in ink by applicant, if an individual; by all partners, if a partnership; and if a corporation, by an executive officer having knowledge of the matters therein contained; and shall show, among other things, that the affiant is duly authorized to verify and file the application.

(b) The original application and supporting papers and twenty copies thereof for the use of the Commission shall be filed with the Secretary of the

Federal Energy Regulatory Commission, Washington, D.C. 20426. Each copy shall bear the dates and signatures that appear in the original and shall be complete in itself, but the signatures in the copies may be stamped or typed, and the officer's seal may be omitted.

(c) A copy of the application shall be served by applicant by first-class mail upon the regulatory body having jurisdiction as to rates, fares, or charges of each State, territory, or district embraced within the scope of the agreement, and the original application filed with the Commission shall include a certificate naming the bodies upon whom the application has been so served.

(d) A public notice will be issued by the Commission and filed with the Director of the Federal Register stating the fact that an application has been filed under these rules and indicate how a hearing on such application may be obtained.

(e) A protest against the granting of an application should be filed in accordance with Rule 1403 of the general rules of practice (§ 385.1403 of this chapter).

(f) To the extent that matters of procedure are not covered by these special rules, the Commission's general rules of practice shall apply.

§ 345.4 New parties to an agreement.

Where a carrier becomes a party to an agreement which has been approved by the Commission, such approval will extend and be applicable to such carrier upon the filing with the Commission by the carrier or its authorized agent of a verified statement that it has become a party to the agreement, which statement shall show the information required by § 345.1(b): *Provided* (a) That such carrier is not, under the agreement, to act with carriers of a different class, within the meaning of section 5a(4) of the Interstate Commerce Act, except as the agreement relates to transportation under joint rates or over through routes, and (b) that no change is made in the agreement except the addition of such carrier.

§ 345.5 Public notice.

When independent action is announced and tariff publication is to be made by a publishing agent operating pursuant to an agreement under section 5a of the Interstate Commerce Act, notification thereof will be given by the agent to the same extent and in the same manner that the agent gives notice of actions proposed under procedures for collective consideration of the parties to the agreement; and no other joint or collective procedures under the agreement are thereby invoked.

VIII. Part 346 is added to 18 CFR Chapter I to read as follows:

PART 346—FEES

§ 346.1 Filing fees.

(a) *Manner of payment.* All filing fees will be payable at the time and place the application, petition, notice, tariff, contract, or other document is tendered for filing. Fees will be payable to the Federal Energy Regulatory Commission by check drawn upon funds deposited in a bank in the United States or money order payable in U.S. currency.

(b) *Fees not refundable.* Fees will be assessed for every filing in the types of proceedings listed in the schedule of fees contained in paragraph (d) of this section. After the application, petition, notice, tariff, contract, or other document has been accepted for filing by the Commission, the filing fee will not be refunded, regardless of whether the application, petition, notice, tariff, contract, or other document is granted or approved, denied, dismissed, or withdrawn. If an application, petition, notice, tariff, contract, or other document is rejected by the Commission as incomplete or for some other reason, the fee will be returned.

(c) *Related or consolidated proceedings.* (1) Separate fees need not be paid on related applications filed by the same applicant which would be the subject of one proceeding. In such instances, the only fee to be assessed will be that applicable to the embraced proceeding which carries the highest filing fee as listed in paragraph (d) of this section.

(2) The Commission may reject concurrently filed applications, petitions, notices, contracts, or other documents asserted to be related and refund the filing fee if, in its judgment, they embrace two or more severable matters which should be the subject of separate proceedings.

(d) *Schedule of filing fees.*[1]

Type of Proceeding Fee Applications To Enter Upon a Particular Financial Transaction of Joint Arrangement

(1) An application for the pooling or division of traffic. Section 5(1)—$100.

(2) An application for approval of, or to amend, a rate association agreement. Section 5a—$300.

Other Proceedings

(3) An application for relief from the long-and-short-haul and aggregate-of-intermediate provisions, including applications for relief with respect to additional commodities, origins or destinations, but not including petitions for modification of conditions, effective or not yet effective of outstanding orders, or amendments to applications not yet disposed of. Section 4—$250.

(4) An application for authority to establish released value rates or ratings, except that no fee will be assessed for applications seeking such authority in connection with reduced rates established to relieve distress caused by drought or other calamitous visitation under section 22(1) of the act. Sections 20(11)—$200.

(5) An application for special permission for short notice or the waiver of tariff-publishing requirements, including applications to extend or eliminate the scheduled expiration date of an outstanding special permission or to broaden the application thereof to additional territory or tariffs, except amendments to pending applications not yet disposed of, and applications to postpone the effectiveness of suspended schedules, when carrier or agent is requested to do so, in order to afford the Commission more time for disposition of the proceeding or to postpone the scheduled effective date of protested schedules or those for which a fourth-section application has been filed, in order to afford the Oil Pipeline Board more time within which to process the protests or applications—$20.

(6) Application for basic (original) valuation of a pipeline carrier's operating property. Section 19a—$10/hr.

(7) Application for each annual valuation of a pipeline carrier's operating property as of the close of any calendar year following the carrier's basic valuation. Section 19a—

The following fees are based on the carrier's size:

Cost of reproduction (millions)	Fee
Under 10	$50
10 to 29.9	200
30 to 49.9	500
50 to 74.9	700
75 to 99.9	1,000
100 to 149.9	1,300
150 to 199.9	1,850
200 to 299.9	2,500
Over 300	4,300

(Department of Energy Organization Act, 42 U.S.C. 7101–7352 (Supp. V 1981); Interstate Commerce Act, 49 U.S.C. 1–27 (1976); Executive Order 12,009, 3 CFR Part 142 (1976))

IX. Part 347 is added to 18 CFR Chapter I to read as follows:

PART 374—COMPETITIVE BIDS OIL PIPELINE

Sec.

347.1 Specifications, form of proposal and contract; publication of request for bids; variation from the generally applicable procedure.

347.2 Opening of bids; bonds; form and contents of bids.

347.3 Considerations for acceptance of bids; rejection; readvertising for new bids.

347.4 Statement of the transaction.

347.5 Examination.

Authority: Department of Energy Organization Act, 42 U.S.C. 7101–7352 (Supp.

[1] Except as noted, statutory references are to the Interstate Commerce Act.

V 1981); Interstate Commerce Act, 49 U.S.C. 1–27 (1976) E.O. 12,009, 3 CFR Part 142 (1978).

§ 347.1 Specifications, form of proposal and contract; publication of request for bids; variation from the generally applicable procedure.

(a) When any pipeline, subject to the Interstate Commerce Act, is required by section 10 of the Clayton Antitrust Act (38 Stat. 734; 15 U.S.C. 20) to call for bids for securities, supplies, or other articles of commerce, or for the construction or maintenance of any kind or part of its carrier property such carrier shall prepare specifications, form of proposals and contract, setting forth clearly and so far as applicable in each case in detail a description or descriptions of the matters and things for which bids are requested, the terms, times and conditions of delivery and payment, the place or places where delivery or performance is to be made, the character, amount, and terms of securities offered or sought, and a full description of the supplies or other ariticles required or offered for sale, hypothecation, or purchase, and shall make and attach to such specifications such maps, drawings, and illustrations and state such other substantial facts or conditions as are or may be necessary to a full understanding of the premises and procedure by bidders. Such specifications, drawings and illustrations in each case shall be kept open at the principal office or offices of the carrier for full examination, free of charges, by persons desiring to examine the same with a view to bidding, and, upon request, such carrier shall furnish to any person or persons desiring the same true and accurate copies of such specifications, maps, drawings and illustrations; *Provided,* That the pipeline may make a charge for such copies so furnished, the charge not to exceed the reasonable cost of making and forwarding the copies requested.

(b) The pipeline shall publish in each case a request for bids in at least two daily newspapers of general circulation, at least two publications in each week for two weeks, the first publication to be at least two weeks immediately preceding the day when the bids are to be submitted; one such newspaper shall be published or shall be of general circulation in the city or town where the principal operating officer of the carrier is located and the other newspaper shall be published in one other of the following cities nearest to the operating or financial office of the carrier or the place where the contract is to be performed; namely: New York, N.Y., Boston, Mass., Chicago, Ill., St. Louis, Mo., Atlanta, Ga., San Francisco, Calif., and Portland, Oreg.; and a printed copy of the published notice in each case shall be posted in plain view, for two weeks immediately preceding the day on which bids are to be received, on a bulletin board, designated for that purpose, in a public and conspicuous place in the building where the principal operating office of the carrier is located.

(1) Such published notices shall describe in general but intelligible terms the proposed contract, giving its serial number, and the special matter or things for which bids are requested, and the date and time at or before which the bids must be submitted, and the person by whom and the office at which the bids submitted will be recieved and opened as provided in this part. The carrier may in said notice reserve the right to reject, any and all bids and may, at its option, require each bidder to tender a bond in a reasonable sum to be therein named, with sufficient surety or sureties conditioned upon the faithful and prompt performance of the terms of the contract.

(c) Upon application, a pipeline owned or operated by any state or by an agency of one or more states or a wholly-owned subsidiary corporation thereof, may be authorized by the Commission to employ a competitive bidding procedure or precedures varying from the generally applicable procedure provided by this regulation upon the following showing: (1) That the applicant carrier is owned or operated by a state or by an agency of one or more states, or is a wholly-owned subsidiary corporation thereof: (2) a detailed statement of the procedure for which authorization is requested and the variations thereof from the generally applicable procedure provided by this regulation and the purpose or reason for such variation; and (3) that the generally applicable procedure provided by this regulation imposes on the carrier an unreasonable burden or interferes with obtaining by the carrier of the most favorable bid.

§ 347.2 Opening of bids; bonds; form and contents of bids.

(a) Every bid to receive consideration shall be submitted at the place and at or before the hour specified in the notice for the receipt of bids. The time specified may be any hour from 10:00 a.m. until 3:00 p.m of any business day, and the bids shall be opened after the specified hour and before six o'clock on the day and at place and by the person or persons designated in the notice. Each bidder may attend in person or by a duly authorized representative at the opening of the bids, and shall be afforded an opportunity to do so and to examine each bid. The bids shall forthwith be tabulated in conformity with the form of proposal prepared and a copy of such tabulation shall be promptly furnished to any bidder or his authorized representative upon application therefor.

(b) When required by the notice, each bid shall be accompanied by tender of a bond in the amount specified in the notice with sufficient surety or sureties conditioned upon the faithful and prompt performance of the proposed contract. A bond shall be required only in cases where the notice for bids expressly calls for a bond.

(c) Each bid shall be enclosed with accompanying papers in a plain envelope securely sealed bearing no indication of the name of the bidder or the amount of the bid, and shall be marked "Bid under proposed contract No. ———," and shall be addressed to the officer of the carrier designated in the notice to receive the name.

(d) Each bid shall state the name and address of the bidder and, if the bidder be a corporation, the names and addresses of the officers, directors and general manager thereof and of the purchasing or selling officer or agent in that transaction and, if the bidder is a firm, partnership or association, the bid shall give the names and addresses of each member thereof, and of the manager, purchasing or selling officer or agent in that transaction.

§ 347.3 Considerations for acceptance of bids; rejection; readvertising for new bids.

(a) After receiving and opening bids as aforesaid, the carrier receiving the same shall within 48 hours in cases where the sale or purchase of securities is the undertaking, and within 21 days where bids are for supplies, equipment, other articles of commerce and for construction or maintenance work, accept the most favorable bid considering (1) the lowest price or prices for the supplies, equipment, and other articles of commerce, and for the construction or maintenance work, described in the advertisement, and the highest price or prices offered for any securities or property, so described, for sale by the carrier, and (2) the ability and reliability of the bidder, financial and otherwise, to deliver the property or to perform the work or transaction, or to pay for the securities, described in the advertisement, giving due consideration to any bond or security tendered by the bidder.

(b) If the right be reserved in the notice, all bids may be rejected and the pipeline may readvertise for bids. The pipeline shall notify the successful

bidder of the acceptance of his or its bid, and the bidder shall within 10 days execute the required contract, and, if required by the notice, execute a good and sufficient bond for the faithful and prompt performance of the contract. In case the successful bidder shall neglect or fail within said time to execute the contract or bond as aforesaid the carrier may within 5 days award the contract to the next most favorable bidder, ascertained as herein provided for determining the most favorable bidder. If neither the most favorable bidder nor the next most favorable bidder shall execute a contract and qualify as aforesaid, the carrier shall readvertise for new bids.

§ 347.4 Statement of the transaction.

Each pipeline after having made and executed a contract as and in the manner above specified shall within 30 days after the execution of such contract file with the Federal Energy Regulatory Commission a statement of the transaction giving, (a) a copy of the published notice; (b) the names of all bidders, and, if the bidder be a corporation, the names and addresses of the officers, directors and general managers thereof and of the purchasing or selling officer or agent in that transaction, or if the bidder be a partnership or firm, the names and addresses of the members of the firm, the general manager and purchasing or selling agent thereof, and the total amount of each bid; (c) the name of the bidder to whom the contract was awarded together with a copy of the contract; and (d) if any other than the lowest or the highest bid, as the case may be, is accepted as being most favorable to the carrier, the reasons for such acceptance. The statement shall be made in typewriting, in pamphlet form on pages not less than 8 by 10½ inches in size nor greater than 9½ by 12 inches, in size, bound on the longer edge of the page, the paper to be of durable quality fit for permanent record.

§ 347.5 Examination.

In the case of each bid so taken as aforesaid, the pipeline shall preserve and keep open for examination by the Federal Energy Regulatory Commission or any duly authorized examiner thereof, (a) a copy of the resolution or order of the Board of Directors, Executive Committee, or officers of the said common carrier specifying the purposes and terms of the contract for which the bids were invited; (b) a copy of the specifications, maps, drawings, and illustrations upon which bids were made; (c) copies of the notices published, sworn to by or on behalf of the publisher of each paper, respectively, giving the dates and times of publication; (d) the original bids received, designating the bid accepted and giving a statement of the reasons for accepting the same; (e) a copy of the contract entered into between the carrier and the accepted bidder, together with a copy of the bonds if any; (f) references by number of volume and page to the records of proceedings of the stockholders, directors, or executive committee of the pipeline. The files in each transaction shall be securely fastened together and given the contract number and each document therein shall be numbered consecutively and at the conclusion there shall be a sworn statement by the president, a vice president, or the general manager of the pipeline, stating that the files in No. ——— contain true and complete records and statements of all the negotiations had in connection with the contract therein set forth. Carriers subject to the requirements of section 10 of the Clayton Antitrust Act, 15 U.S.C. 20, may destroy such contracts or other records required thereby 10 years after the expiration thereof, without permission of the Commission: *Provided,* There is no litigation pending involving these records: *And further provided,* That the carrier has informed the Commission of its intended action at least 2 weeks prior to the date the records are to be destroyed.

[FR Doc. 84-8383 Filed 3-29-84; 8:45 am]
BILLING CODE 6717-01-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1300

[Docket No. 37321]

Revision of Tariff Regulations, All Carriers

AGENCY: Interstate Commerce Commission.

ACTION: Final rules.

SUMMARY: In this proceeding the Commission has proposed a revision and consolidation of its regulations in 49 CFR Parts 1300 to 1310. The new regulations would be located at 49 CFR Part 1312 and 49 CFR Parts 1300 to 1310 would be removed from the Code of Federal Regulations (CFR). The Federal Energy Regulatory Commission (FERC) also uses portions of 49 CFR Part 1300 in its regulation of rates and charges for the transportation of oil by pipeline. The purpose of this notice is to transfer 49 CFR Part 1300 from Title 49 of the CFR to Title 18 of the CFR, instead of removing the part from the CFR.

DATES: Effective July 2, 1984.[1]

FOR FURTHER INFORMATION CONTACT: Kathleen M. King, (202) 275–7428 or Charles E. Langyher, (202) 275–7739.

SUPPLEMENTARY INFORMATION: By a notice of proposed rules (NPR) published in the **Federal Register** on July 7, 1983 (48 FR 31265), we proposed a revision of our regulations governing the construction, posting, and filing of carriers' tariffs and related documents. The proposed new rules would be located at 49 CFR Part 1312 and the existing rules in 49 CFR Parts 1300 to and including 1310 would be removed.

Jurisdiction over oil pipelines, as it relates to the establishment of rates or charges for the transportation of oil by pipeline and to the establishment of valuation for pipelines, was transferred from this Commission to FERC under the Department of Energy Organization Act, 42 U.S.C. 7155 and 7172(b). In its regulation of oil pipeline rates or charges, FERC has used 49 CFR Part 1300. Therefore, FERC has requested that this Commission transfer 49 CFR Part 1300 to Title 18 of the CFR, instead of removing it from the CFR entirely.

We are presently in the process of drafting final rules in response to our NPR in this proceeding. We expect to issue a final decision addressing the comments and adopting final rules for 49 CFR Part 1312 in the near future. However, granting FERC's request at this time will save that agency the cost of republishing the regulations in the **Federal Register** and will not adversely affect any of this Commission's regulations. Accordingly, we will grant FERC's request and order the redesignation of 49 CFR Part 1300 as 18 CFR Part 341. We have assigned a July 2, 1984, effective date for the redesignation. It is expected that our action regarding rules for 49 CFR Part 1312 should be finalized by that date.

The action we are taking by this notice concerns solely matters of agency practice and procedure because it merely transfers existing regulations from Title 49 CFR to Title 18 CFR. This change will aid oil pipeline companies subject to the procedural requirements. Therefore, we find pursuant to Section 553(b) of the Administrative Procedure Act, 5 U.S.C. 553(b), that prior notice and opportunity for public comment is unnecessary.

[1] The FERC is publishing a final rule contemporaneously with this notice that transfers rules for the establishment of rates or charges for the transportation of oil by pipeline from Title 49 to Title 18 of the CFR.

This decision will not significantly affect the quality of the human environment or the conservation of energy resources.

It is ordered: Part 1300 of 49 CFR, Chapter X is transferred to 18 CFR, Chapter I and redesignated as Part 341.

List of Subjects in Part 1300

Pipelines.

Authority: 5 U.S.C. 553 and 49 U.S.C. 10321.

Decided: March 23, 1984.

By the Commisson, Chairman Taylor, Vice Chairman Andre, Commissioners Sterrett and Gradison. Commissioner Gradison did not participate.

James H. Bayne,

Acting Secretary.

Department of Labor

Employment and Training Administration

20 CFR Parts 652 and 653
Services for Veterans; Final Rule

DEPARTMENT OF LABOR

Employment and Training Administration

20 CFR Parts 652 and 653

Services for Veterans

AGENCY: Office of the Assistant Secretary for Veterans' Employment and Training, Employment and Training Administration, Labor.

ACTION: Final rule.

SUMMARY: This document contains final regulations to implement certain amendments to the veterans' employment and training laws administered by the Department. It reflects the provisions of 38 U.S.C. requiring State employment service agencies to provide veterans and eligible persons the maximum of employment and training opportunities, with priority given to the needs of disabled veterans and veterans of the Vietnam era. Further, these regulations clarify the role and responsibilities of the Assistant Secretary for Veterans' Employment and Training in administering certain veterans' programs and activities that were previously under the jurisdiction of the Employment and Training Administration.

EFFECTIVE DATE: April 30, 1984.

FOR FURTHER INFORMATION CONTACT: Joseph C. Juarez, telephone: (202) 523–9110.

SUPPLEMENTARY INFORMATION: The rules published in this document replace the veterans' service regulations at 20 CFR Part 653, Subpart C, issued March 27, 1979, with a new set of regulations in 20 CFR Part 652, Subpart B. The new rules implement amendments to the veterans' employment and training laws in 38 U.S.C., Chapters 41 and 42. They also clarify and simplify the administration of ongoing legislative mandates regarding employment services to veterans.

The Veterans' rehabilitation and Education Amendments of 1980 established the Assistant Secretary of Labor for Veterans Employment and Training (ASVET) and transferred to ASVET responsibilities for administration of employment services for veterans which were previously handled by the Employment and Training Administration. The 1980 amendments also established the Disabled Veterans Outreach Program (DVOP) as a permanent program administered by the ASVET. The Veterans' Compensation, Education and Employment Amendments of 1982 further clarified the responsibilities of the State and Assistant State Directors for Veterans' Employment and Training as well as the administration of the DVOP program. The new regulations in 20 CFR Part 652 implement these amendments.

The provisions of 38 U.S.C. continue to mandate that the "public employment service system" provide priority services to veterans. Sections 2004, 2007, and 2012 of 38 U.S.C. all contain specific references to functions to be carried out by the State employment service agencies. Further, 38 U.S.C. 2000, 2002, 2002A, and 2003 direct the ASVET to work closely with the State agencies to ensure that legislative mandates are carried out. These final rules continue to address State agency priority services to veterans. They also simplify the former regulations at 20 CFR Part 653, Subpart C, which they replace, by removing requirements that are more appropriately addressed through administrative guidelines.

Proposed rulemaking for the implementation of all amendments to Title 38, U.S. Code, Chapters 41 and 42 and to replace 20 CFR Part 653, Subpart C, was published on pages 34866–34869 of the **Federal Register** on August 1, 1983, for the purpose of soliciting public comment. The Department received written comments from a variety of sources including State agencies, veterans organizations, and other interested parties. The following summarizes the significant comments, recommendations, and actions taken:

Definitions

The Department agreed with several commentators and revised the definition for "Service Delivery Point" (SDP) under § 652.101 to encompass the area served by State agency local offices including extended service locations.

State Agency Services

Many commentators criticized the wording of § 652.120 for not containing a legislative reference, the services involved, or how such services relate to providing maximum employment and training opportunities to veterans and eligible persons. The Department has added the appropriate legislative reference, an explanation of services involved and a statement describing provision of maximum employment and training opportunities.

Local Veterans Employment Representatives (LVER)

Several commentators suggested that § 652.123 should be expanded to include the criteria for determining which local offices should be assigned full-time or part-time LVERs. The Department has added the full-time criteria at § 652.123(a)(1) requiring 1,000 new or renewed applications from veterans and eligible persons during the most recent twelve-month reporting period. Also added was § 652.123(a)(2) stating that part-time LVERs shall be assigned in proportion to the full-time criteria. If the ASVET determines that appropriations exigencies preclude full application of these criteria, it may permit appropriate limited adjustments.

State Agency Cooperation and Coordination

Some commentators suggested inclusion of references in § 652.124 to cover coordination with related programs under other legislation. A new subparagraph (b) was added to include such references.

Complaints of Veterans and Eligible Persons

The Department adopted a recommendation from several commentators to include references to the type of complaints covered by § 652.125.

Determination of Compliance

Some commentators expressed concern that removal of the statistical methodology and numerical values for the socalled "indicators of compliance" from the regulations would adversely affect enforcement of the standards of performance governing State agency services to veterans and eligible persons. The Department does not agree. State agencies are held to the qualitative, verbal standards described in §§ 652.120–652.125. The indicators of compliance merely provide a convenient numerical picture of the State agency's performance. Inclusion of the indicators in the regulations has proven to be cumbersome. Accordingly, § 652.130(b) provides that statistical indicators for evaluating services to veterans and eligible persons will be established administratively through negotiations between State agency administrators and State Directors for Veterans' Employment and Training. The numerical values thus established for each reporting period will be published as a public notice in the **Federal Register**. The Department believes that this approach permits greater sensitivity to change and to the particular needs of the individual State.

Technical and Editorial Changes

Finally, various technical and editorial changes were made throughout

the regulations for purposes of clarity and consistency.

Classification—Executive Order 12291

The regulations are procedural in character. Therefore, they are not classified as a "major rule" under Executive Order 12291 on Federal regulations because they are not likely to result in (1) an annual effect on the economy of $100 million or more; (2) a major increase in cost or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Accordingly, no regulatory impact analysis is required. In addition, these regulations do not affect any trade-sensitive activity because they do not apply in any way to governments, industries, or firms engaged in international trade.

Regulatory Flexibility Act

The Department believes that these regulations will not have "significant economic impact upon a substantial number of small entities" within the meaning of section 3(a) of the Regulatory Flexibility Act, Pub. L. 96-354, 91 Stat. 1164 (5 U.S.C. 605(b)). The Secretary has certified to the Chief Counsel for Advocacy of the Small Business Administration to this effect. This conclusion is reached because these regulations are procedural in character. The regulations implement amendments to 38 U.S.C. Chapters 41 and 42 and primarily concern changes at the national level in the administration of ongoing programs with no significant economic impact expected with respect to small entities. Accordingly, no regulatory impact analysis is required.

List of Subjects

20 CFR Part 652

Employment, Grant programs—Labor, Labor employment service programs, Veterans.

20 CFR Part 653

Agriculture, Employment, Equal employment opportunity, Labor, Migrant labor.

Accordingly, Parts 652 and 653 of Title 20, Chapter V of the Code of Federal Regulations are amended as set forth below:

PART 652—ESTABLISHMENT AND FUNCTIONING OF STATE EMPLOYMENT SERVICES

1. The table of contents for Part 652 is amended by designating §§ 652.1–652.9 as "Subpart A—Employment Service Planning and Operations" and adding a table of contents for a new Subpart B, as follows:

Subpart A—Employment Service Planning and Operations

* * * * *

Subpart B—Services for Veterans

Purpose and Definitions

Sec.
652.100 Purpose and scope of subpart.
652.101 Definitions of terms used in subpart.

Federal Responsibilities

652.110 Roles of the Assistant Secretary for Veterans' Employment and Training (ASVET).

Standards of Performance Governing State Agency Services to Veterans and Eligible Persons

652.120 Standards of performance governing State agency services.
652.121 Performance standard on facilities and support for Veterans' Employment and Training Service (VETS) staff.
652.122 Reporting and budget requirements.
652.123 Performance standards governing the assignment and role of Local Veterans' Employment Representatives (LVERs).
652.124 Standards of performance governing State agency cooperation and coordination with other agencies and organizations.
652.125 Standards of performance governing complaints of veterans and eligible persons.

State Employment Service Agency Compliance

652.130 Determination of compliance.
652.131 Secretary's annual report to Congress.

Standards of Performance Governing the Disabled Veterans Outreach Program (DVOP)

652.140 Administration of DVOP.

652.142 Stationing of DVOP staff.

2. The authority citation for Part 652 is revised to read as follows:

Authority: Wagner-Peyser Act, 29 U.S.C. 49 et seq.; 38 U.S.C. Chapters 41 and 42.

3. A new Subpart A heading is added to §§ 652.1–652.9 to read as follows:

Subpart A—Employment Service Planning and Operations

* * * * *

4. A new Subpart B is added to Part 652 to read as follows:

Subpart B—Services for Veterans

Purpose and Definitions

§ 652.100 Purpose and scope of subpart.

(a) This subpart contains the Department of Labor's regulations for implementing 38 U.S.C. 2001–2012, Chapters 41 and 42, which require the Secretary of Labor to provide eligible veterans and eligible persons the maximum of employment and training opportunities, with priority given to the needs of disabled veterans and veterans of the Vietnam era, through the public employment service system established pursuant to the Wagner-Peyser Act, as amended.

(b) This subpart describes the roles and responsibilities of the Assistant Secretary for Veterans' Employment and Training (ASVET) and the staff of the Veterans' Employment and Training Service (VETS).

(c) This subpart describes the performance standards for determining compliance of State agencies in carrying out the provisions of 38 U.S.C., Chapters 41 and 42 with respect to:

(1) Providing services to eligible veterans and eligible persons to enhance their employment prospects,

(2) Priority referral of special disabled veterans and veterans of the Vietnam era to job openings listed by Federal contractors pursuant to 38 U.S.C. 2012(a), and

(3) Reporting of services provided to eligible veterans and eligible persons pursuant to 38 U.S.C. 2007(c) and 2012(c).

(d) Performance standards are contained in this subpart at §§ 652.140–652.142 on the conduct of the Disabled Veterans Outreach Program (DVOP) in accordance with 38 U.S.C. 2003A.

§ 652.101 Definitions of terms used in subpart.

"Assistant Secretary for Veterans' Employment and Training (ASVET)" shall mean the official of the Department of Labor as described in § 652.110.

"Assistant State Director for Veterans' Employment and Training Service (ASDVETS)" shall mean a Federal employee who is designated as an assistant to a State Director for Veterans' Employment and Training Service (SDVETS).

"Disabled Veteran" shall mean a veteran who is entitled to compensation (or who but for the receipt of military retired pay would be entitled to compensation) under laws administered by the Veterans Administration and who is not classified as a Special Disabled Veteran.

"Eligible person" shall mean:

(1) The spouse of any person who died of a service-connected disability; or

(2) The spouse of any member of the armed forces serving on active duty who at the time of application for assistance under this subpart, is listed, pursuant to 37 U.S.C. 556 and the regulations issued thereunder, by the Secretary concerned, in one or more of the following categories and has been so listed for a total of more than 90 days: (i) Missing in action, (ii) captured in line of duty by a hostile force, or (iii) forcibly detained or interned in line of duty by a foreign government or power; or

(3) The spouse of any person who has a total disability permanent in nature resulting from a service-connected disability or the spouse of a veteran who died while a disability so evaluated was in existence.

"Eligible veteran" shall mean a person who (1) served on active duty for a period of more than 180 days and was discharged or released therefrom with other than a dishonorable discharge, or (2) was discharged or released from active duty because of a service-connected disability.

"Local Veterans' Employment Representative (LVER)" shall mean a member of the State agency staff designated and assigned by the State agency administrator to serve veterans and eligible persons pursuant to this subpart.

"Regional Director for Veterans' Employment and Training Service (RDVETS)" is the representative of the ASVET on the staff of the Veterans' Employment and Training Service (VETS) at the regional level; supervises all other VETS staff within the region to which assigned; and shall report to, be responsible to, and be under the administrative direction of the ASVET.

"Service Delivery Point (SDP)" shall mean a designated local employment service office which serves an area that may also contain extended service locations.

"Special disabled veteran" shall mean (1) a veteran who is entitled to compensation (or who but for the receipt of military retired pay would be entitled to compensation) under laws administered by the Veterans Administration for a disability rated at 30 percent or more, or (2) a person who was discharged or released from active duty because of a service-connected disability.

"State agency" means the State governmental unit designated pursuant to section 4 of the Wagner-Peyser Act, as amended, to cooperate with the United States Employment Service in the operation of the public employment service system.

"State Director for Veterans' Employment and Training Service (SDVETS)" is the representative of ASVET on the staff of the Veterans' Employment and Training Service (VETS) at the State level.

"United States Employment Service (USES)" shall mean the component of the Employment and Training Administration of the Department of Labor, established under the Wagner-Peyser Act of 1933, as amended, to maintain and coordinate a national system of public employment service agencies.

"Veteran of the Vietnam era" shall mean an eligible veteran who (1) served on active duty for a period of more than 180 days, any part of which occurred during the Vietnam era (August 5, 1964, through May 7, 1975) and was discharged or released therefrom with other than a dishonorable discharge; or (2) was discharged or released from active duty for a service-connected disability if any part of such active duty was performed during the Vietnam era.

"Veterans' Employment and Training Service (VETS)" shall mean the organizational component of the Department of Labor administered by the Assistant Secretary of Labor for Veterans' Employment and Training established to promulgate and administer policies and regulations to provide eligible veterans and eligible persons the maximum of employment and training opportunities according to 38 U.S.C. 2002.

Federal Responsibilities

§ 652.110 Role of the Assistant Secretary for Veterans' Employment and Training (ASVET).

(a) As the principal veterans' advisor to the Secretary of Labor, the ASVET shall formulate, promulgate, and administer policies, regulations, grant procedures, grant agreements and administrative guidelines and administer them through the Veterans' Employment and Training Service (VETS) so as to provide eligible veterans and eligible persons the maximum of employment and training opportunities, with priority given to the needs of disabled veterans and veterans of the Vietnam era, through existing programs, coordination, and merger of programs and implementation of new programs.

(b) ASVET shall oversee activities carried out by State agencies pursuant to 38 U.S.C., Chapters 41 and 42.

(c) ASVET shall ensure that appropriate records and reports are maintained by State agencies within their management information systems to fulfill their obligations under this subpart.

Standards of Performance Governing State Agency Services to Veterans and Eligible Persons

§ 652.120 Standards of performance governing State agency services.

(a) To the extent required by 38 U.S.C. 2002 and other applicable law, each State agency shall assure that all of its SDPs, using LVERs and other staff, shall provide maximum employment and training opportunities to eligible veterans and eligible persons with priority given to disabled veterans and veterans of the Vietnam-era, by giving them preference over non-veterans in the provision of employment and training services available at the SDP involved. Services are those activities or efforts including but not limited to registration, counseling, referral to supportive services, job development, etc., which are directed to help applicants find jobs or training. When making referrals from the group of applicants meeting the specific eligibility criteria for a particular program, State agencies shall observe the priority order to referral in paragraph (b).

(b) In making referrals of qualified applicants to job openings and training opportunities, to provide maximum employment and training opportunities under 38 U.S.C., SDPs shall observe the following order of priority:

(1) Special disabled veterans;

(2) Veterans of the Vietnam era;

(3) Disabled veterans other than special disabled veterans;

(4) All other veterans and eligible persons; and

(5) Nonveterans.

§ 652.121 Performance standard on facilities and support for Veterans Employment and Training Service (VETS) staff.

Each State agency shall provide adequate and appropriate facilities and administrative support such as office space, furniture, telephone, equipment, and supplies to VETS staff.

§ 652.122 Reporting and budget requirements.

(a) State agencies shall provide RDVETS, SDVETS, and ASDVETS with access to regular and special internal State agency reports which relate in whole or in part with services to veterans and/or eligible persons.

(b) Each State agency shall make reports and prepare budgets pursuant to instructions issued by the ASVET and in

such format as the ASVET shall prescribe.

§ 652.123 Performance standards governing the assignment and role of Local Veterans' Employment Representatives (LVERs).

(a) To carry out the requirements of 38 U.S.C. 2004, at least one member of each State agency staff, preferably an eligible veteran, shall be designated and assigned by each State agency . administrator as a full-time or part-time LVER in each SDP in accordance with terms/requirements of a grant agreement approved by the ASVET. The ASVET intends to use the following criteria in establishing the terms and requirements of grant agreements:

(1) At least one full-time LVER shall be assigned in each SDP which has had 1,000 new or renewed applications from veterans and eligible persons during the most recent twelve-month report period unless a waiver based on demonstrated lack of need is granted by the ASVET, and

(2) At least one part-time LVER whose time shall be devoted to veterans' services in proportion to the full-time criteria shall be assigned to each SDP not meeting the criteria for full-time LVERs in § 652.123(a)(1).

(b) Additional full-time or part-time LVERs may be assigned based on a determination of need by the State agency administrator and in accordance with terms/requirements of a grant agreement approved by the ASVET.

(c) Each LVER shall perform, at the SDP level, the duties prescribed at 38 U.S.C. 2003(c) required by 38 U.S.C. 2004.

§ 652.124 Standards of performance governing State agency cooperation and coordination with other agencies and organizations.

(a) Each State agency shall establish cooperative working relationships through written agreements with the Veterans Administration (VA) offices serving the State to maximize the use of VA employment and training programs for veterans and eligible persons.

(b) All programs and activities governed by this subpart will be coordinated to the maximum extent feasible with other programs and activities under 38 U.S.C., the Wagner-Peyser Act, the Job Training Partnership Act, and other employment and training programs at the State and local level.

(c) Such relationships or agreements may be described in the Governor's Coordination and Special Services Plan prepared according to section 121(b) of the Job Training Partnership Act (Pub. L. 97–300).

§ 652.125 Standards of performance governing complaints of veterans and eligible persons.

Each SDP shall display information on the various complaint systems to advise veterans and eligible persons about procedures for filing employment service, Federal contractor, equal opportunity, and other complaints.

State Employment Service Agency Compliance

§ 652.130 Determination of compliance.

(a) The ASVET shall have authority for applying the requirements and remedial actions necessary to implement 20 CFR 658, Subpart H.

(b) The ASVET shall establish appropriate program and management measurement and appraisal mechanisms to ensure that the standards of performance set forth in §§ 652.120–125 are met. Specific performance standards designed to measure State agency services provided to veterans and eligible persons required by § 652.120(a) will be developed administratively through negotiations between State agency administrators and SDVETS and numerical values of the standards will be published as public notices in the **Federal Register**. A full report of those State agencies in noncompliance with the standards of performance and their corrective action plans shall be incorporated into the Secretary's annual report to the Congress cited at § 652.131 of this subpart.

(c) Every effort should be made by the State agency administrator and the SDVETS to resolve all issues informally before proceeding with the formal process.

(d) If it is determined by the ASVET that certain State agencies are not complying with the performance standards at §§ 652.120–125, such State agencies shall be required to provide documentary evidence to the ASVET that their failure is based on good cause. If good cause is not shown, the ASVET, pursuant to Subpart H of Part 658 of this chapter, shall formally designate the State agency as out of compliance, shall require it to submit a corrective action plan for the following program year, and may take other action against the State agency pursuant to Subpart H of Part 658 of this chapter.

§ 652.131 Secretary's annual report to Congress.

The Secretary shall report, after the end of each program year, on the success of the Department and State agencies in carrying out the provisions of this subpart.

Standards of Performance Governing the Disabled Veterans Outreach Program (DVOP)

§ 652.140 Administration of DVOP.

(a) The ASVET shall negotiate and enter into grant agreements within each State to carry out the requirements of 38 U.S.C. 2003A for support of a Disabled Veterans Outreach Program (DVOP) to meet the employment needs of veterans, especially disabled veterans of the Vietnam era.

(b) The ASVET shall be responsible forthe supervision and monitoring of the DVOP program, including monitoring of the appointment of DVOP specialists.

(c) DVOP specialists shall be in addition to and shall not supplant local veterans' employment representatives assigned under § 652.123 of this subpart.

§ 652.141 Functions of DVOP staff.

Each DVOP specialist shall carry out the duties and functions for providing services to eligible veterans according to provisions of 38 U.S.C. 2003A (b) and (c).

§ 652.142 Stationing of DVOP staff.

DVOP specialists shall be stationed at various locations in accordance with 38 U.S.C. 2003A(b)(2).

PART 653—SERVICES OF THE EMPLOYMENT SERVICE SYSTEM

§§ 653.200 through 653.231 [Removed]

5. In Part 653, §§ 653.200 through 653.231 (Subpart C—Services for Veterans) are removed.

Signed at Washington, D.C. this 23rd day of March 1984.

Raymond J. Donovan,

Secretary of Labor.

Part VI

Department of Education

34 CFR Part 796
National Diffusion Network; Final Rule

DEPARTMENT OF EDUCATION

34 CFR Part 796

National Diffusion Network

AGENCY: Department of Education.

ACTION: Final Regulations.

SUMMARY: The Secretary is issuing final regulations for the National Diffusion Network. These final regulations are part of the Department of Education's deregulation effort. The intended effect of the action is to improve the operation of the National Diffusion Network.

EFFECTIVE DATE: These regulations will take effect either 45 days after publication in the **Federal Register** or later if Congress takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Lois N. Weinberg, (202) 653–7006, Division of National Dissemination Programs, U.S. Department of Education, 400 Maryland Avenue SW., Room 613 Brown Bldg., Washington, D.C. 20202.

SUPPLEMENTARY INFORMATION:

Background

The National Diffusion Network (NDN) was established in 1974 to promote—at a fraction of their original developmental costs—the widespread national use of exemplary educational programs.

The NDN was originally authorized in Fiscal Year (FY) 1974 under the Elementary and Secondary Education Act, Title III, Section 306. In FY 1977, the program was authorized in Section 422(a) of the General Education Provisions Act (GEPA). The FY 1980 authority was contained in the Elementary and Secondary Education Act, Sections 303 and 376. Current authority is based on the Education Consolidation and Improvement Act of 1981, Pub. L. 97–35, Sec. 583(a)(1).

The NDN is a delivery system composed of two types of projects—

(a) *Developer Demonstrator Projects.* A Developer Demonstrator Project is funded to install a specific exemplary educational program in new settings nationwide.

(b) *State Facilitator Projects.* State Facilitator Projects disseminate a variety of exemplary educational programs within the particular State served.

Comments and Responses

On December 27, 1983, the Secretary published in the **Federal Register** (48 FR 57090) the Notice of Proposed Rulemaking for the National Diffusion Network. During the period allowed for comments in response to the proposed regulations, 20 letters with numerous comments and questions were received.

The provisions of these final regulations are substantially the same as those of the Notice of Proposed Rulemaking. However, § 796.15 has been changed to permit the use of instructional levels and special populations as independent priorities as well as to permit their use as limitations on other priorities. This change to the proposed rules is more consistent with the current operation of the NDN while adding the flexibility of establishing more precise priorities.

Section 796.34(a)(2) proposed that student population would be considered in determining the level of funding for State Facilitator awards. Based on further consideration within the Department, and on the comments received on this issue, the section has been removed. As in the past, the Secretary will consider the size and density of student population along with other factors in determining funding levels as part of the cost analysis required by the Education Department General Administrative Regulations (EDGAR) § 75.232.

The following is a summary of the comments received and the Secretary's response to these comments.

Section 796.3 What definitions apply to the NDN?

Comment. A commenter made suggestions for minor changes in several of the definitions in this section.

Response. No change has been made. The changes that were suggested were matters of style and not substantive issues.

Adoption-Agreement

Comment. A commenter asked whether a written agreement was required for each adoption, and expressed concern that additional paperwork would be required.

Response. No change has been made. A written agreement is not required. Many Developer Demonstrators and State Facilitators have found written agreements very effective. Whether or not a written agreement exists, there must be an understanding among all of the parties involved in the planning of an adoption of an exemplary educational program, including the State Facilitator, the Developer Demonstrator and the adopting educational service provider.

Certified Demonstration Site and Certified Trainer

Comment. A commenter asked whether the *sponsor* of an exemplary educational program was the most appropriate entity to make decisions concerning certified demonstration sites and certified trainers when the project director or other project personnel might be the persons most capable of making these decisions.

Response. No change has been made. In general, project personnel will make decisions concerning certified demonstration sites and certified trainers. However, the Department will not dictate how or at what organizational level a grantee should make a decision regarding demonstration sites and certified trainers.

Section 796.13 How long do approval and recertification by the Joint Dissemination Review Panel last?

Comment. One commenter suggested that the four-year period for funding eligibility before recertification of an exemplary educational program is required begin with the initial funding date rather than the date of JDRP approval, so that evaluation data from adoption sites would be available.

Response. No change has been made. The purpose of this requirement is to assure adopting educational service providers that programs remain as effective as when they were originally approved by the JDRP. Recertification replaces the reapproval requirement, contained in the previous regulations, under which all of the original JDRP approval requirements had to be met. Recertification will serve as a streamlined mechanism to reconfirm the quality of the original program by reviewing the program features, the educational effects, and the adoption costs every four years. Many exemplary educational programs do not receive dissemination grants from the NDN until several years after they have been approved by the JDRP. Since each exemplary educational program must have a demonstration site in order to be eligible for funding, recent evaluation data from this site may be used in lieu of or along with data from adoption sites for recertification. The JDRP approval date will serve as a consistent starting date for all programs, regardless of their funding status.

Section 796.15 Will priorities for funding Developer Demonstrator grants be established?

Comment. Several commenters expressed concern that early childhood

and special education programs could be funded only in conjunction with other priorities.

Response. A change has been made. This section has been revised to allow the identification of instructional levels and special populations as independent priorities, as well as to permit their use as limitations on other priorities.

Comment. Another commenter asked when funding priorities would be made public.

Response. Funding priorities are identified in the Application Notice, which is the official announcement published in the **Federal Register** of application deadlines and other information concerning how to apply for Department of Education grants. In most cases, funding priorities are announced annually at least 45–60 days before applications are due.

Section 796.34 What additional criteria exist for new and continuation awards?

Comment. Several commenters expressed concern about the use of student population to determine funding levels for State Facilitator projects, particularly for States with low and sparsely distributed populations.

Response. A change has been made. Proposed § 796.34(a)(2) has been removed because it appeared that undue weight was to be given to this criterion. As in the past, the Secretary will consider the size and density of student population along with other factors in determining funding levels a part of the cost analysis required by EDGAR § 75.232.

Comment. Another commenter asked on what basis the determination of project effectiveness would be made, and whether the number of adoptions and the cost effectiveness of the project would be considered.

Response. A determination of project effectiveness will be based on the annual report submitted by each project as part of the continuation application. Particular attention will be given to each applicant's report of its accomplishment of the activities described under § 796.12 or § 796.16, taking into consideration the criteria under which the original application was evaluated. The number of adoptions, the quality, and the cost effectiveness of the project will be considered.

Section 796.41 Are there restrictions on the kinds of items a grant may support?

Comment. A commenter asked whether grant funds could be used for training purposes.

Response. Many of the costs associated with training are allowable under these grants. However, stipends may not be paid to participants in training activities.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79 (48 FR 29158; June 24, 1983). The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document provides early notification of the Department's specific plans and actions for this program.

Assessment of Educational Impact

In the notice of proposed rulemaking, the Secretary requested comments on whether the proposed regulations would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the absence of any comments on this matter and the Department's own review, it has been determined that the regulations in this document do not require information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 796

Dissemination, Education, Educational research, Grant programs—education.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these final regulations.

Dated: March 27, 1984.

T. H. Bell,

Secretary of Education.

The Secretary revises Part 796 of Title 34 of the Code of Federal Regulations to read as follows:

PART 796—NATIONAL DIFFUSION NETWORK

Subpart A—General

Sec.

796.1 What is the National Diffusion Network (NDN)?
796.2 What regulations apply to the NDN?
796.3 What definitions apply to the NDN?

Subpart B—What Kinds of Projects Does the Department Assist Under This Program?

796.11 What types of projects does the NDN assist?
796.12 What activities must a Developer Demonstrator project conduct?
796.13 How long do approval and recertification by the Joint Dissemination Review Panel last?
796.14 Who is eligible to apply for a Developer Demonstrator grant?
796.15 Will priorities for funding Developer Demonstrator grants be established?
796.16 What activities must a State Facilitator Project conduct?
796.17 Who is eligible to apply for a State Facilitator grant?
796.18 What types of awards does the Secretary make under the NDN?

Subpart C—How To Apply for a Grant—[Reserved]

Subpart D—How Is a Grant Made?

796.31 How does the Secretary evaluate an application for a Developer Demonstrator or a State Facilitator grant?
796.32 What selection criteria does the Secretary use to review an application for a new Developer Demonstrator grant?
796.33 What selection criteria does the Secretary use to review an application for a new State Facilitator grant?
796.34 What additional criteria exist for new and continuation awards?

Subpart E—What Conditions Must Be Met By a Grantee?

796.41 Are there restrictions on the kinds of items a grant may support?
796.42 Nonprofit private school requirements.

Authority: Section 583 of the Education Consolidation and Improvement Act of 1981 (Pub. L. 97–35) (20 U.S.C. 3851).

Subpart A—General

§ 796.1 What is the National Diffusion Network (NDN)?

The National Diffusion Network (NDN) funds activities designed to promote across the Nation the widespread use of exemplary educational programs by educational service providers. The NDN is designed—

(a) To identify potential exemplary educational programs nationwide;

(b) To acquaint educational service providers with information on exemplary educational programs; and

(c) To help these providers adopt the exemplary educational programs through training and technical assistance.

(20 U.S.C 3851)

§ 796.2 What regulations apply to the NDN?

(a) *Regulations.* The following regulations apply to the NDN:

(1) The Education Department General Administrative Regulations (EDGAR) in Part 74 (Administration of Grants), Part 75 (Direct Grant Programs), Part 77 (Definitions), Part 78 (Education Appeals Board), and Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(2) The regulations in this Part 796.

(b) *Exceptions to EDGAR.* Section 75.650, Participation of students enrolled in private schools, does not apply to this program. (However, see § 796.42 in this part, which governs this participation.)

(20 U.S.C 3474(a); 20 U.S.C 3851)

§ 796.3 What definitions apply to the NDN?

(a) *Definitions in EDGAR apply to the NDN.* The following terms used in this part are defined in Part 77 of EDGAR:

Applicant
Application
Award
Budget period
Department
EDGAR
Equipment
Facilities
Grantee
Local educational agency (LEA)
Nonprofit
Project
Private
Public
State educational agency (SEA)

(20 U.S.C 3474(a))

(b) *Definitions that apply to this part.* The following definitions apply to this part:

"Adoption" means the use of a JDRP approved exemplary educational program by an educational service provider in a new setting.

"Adoption Agreement" means an understanding among a Developer Demonstrator grantee, a State Facilitator grantee, and officials of an educational service provider concerning the responsibilities of each for the adoption of an exemplary educational program.

"Certified Demonstration Site" means an adoption site that utilizes all key elements of an exemplary educational program and is authorized by the exemplary educational program sponsor to receive visitors and demonstrate the program.

"Certified Trainer" means an individual authorized by an exemplary educational program sponsor to perform certain functions such as awareness presentations, training, and assistance in the adoption of an exemplary educational project.

"Educational Service Provider" means any public or nonprofit private agency or organization responsible for the provision of educational services, including State educational agencies (SEAs), local educational agencies (LEAs), nonprofit private educational agencies, public or nonprofit private institutions of higher education, and other agencies such as correctional institutions and health facilities.

"Exemplary Educational Program" means a program, product, or practice approved by the Joint Dissemination Review Panel, and may be referred to as a "program" in these regulations.

"Joint Dissemination Review Panel" (JDRP) means a panel within the Department of Education that examines evidence of effectiveness in attaining goals of educational programs, products, or practices.

"JDRP Approval" means that a proposed exemplary educational program has demonstrated that a positive change has occurred that is directly attributable to the program; that the change was statistically and educationally significant; that the evidence supporting the program's claims was gathered and interpreted correctly; that the program is accurately described; that the program could be used effectively in other locations; that the cost was reasonable, considering the magnitude and the subject of change; that it has a high quality evaluation design; that it does not have any potential for educational harm to students; and that it is socially fair, e.g., free from race and sex-role stereotyping.

"JDRP Recertification" means that a program that was previously approved by the JDRP has demonstrated that the basic features of the program remain essentially the same as the originally approved program; that the educational effects at similar sites compare favorably to those that were demonstrated at the time of the initial JDRP approval; and that the costs of the program compare favorably to the costs of the originally approved program.

"Key Elements" are the components of an exemplary educational program that must be implemented if the program is to work as approved by the JDRP.

(20 U.S.C. 3851)

Subpart B—What Kinds Of Projects Does The Department Assist Under This Program?

§ 796.11 What types of projects does the NDN assist?

The National Diffusion Network assists two types of projects:

(a) Developer Demonstrator Projects—disseminate a specific exemplary educational program nationwide.

(b) State Facilitator Projects—disseminate a wide variety of exemplary educational programs within the particular State served by each project.

(20 U.S.C. 3851)

§ 796.12 What activities must a Developer Demonstrator project conduct?

A Developer Demonstrator project must—

(a) Develop and provide material—

(1) For educational service providers throughout the Nation to use in deciding whether to adopt the exemplary educational program;

(2) For training and instruction in the exemplary educational program; and

(3) For management and evaluation of the program;

(b) Negotiate adoption agreements with State Facilitator grantees and educational service providers;

(c) Install the exemplary educational program in new settings in other States by—

(1) Assisting potential adopters with preparatory stages;

(2) Providing training to staff members of the adopting educational service provider; and

(3) Providing technical assistance in the implementation and evaluation stages of an adoption;

(d) Evaluate the quality and effectiveness of the activities listed in paragraphs (a), (b), and (c) of this section as specified in the evaluation plan for the project;

(e) Monitor and evaluate the quality and effectiveness of the adoptions by collecting and analyzing impact data from a representative sample of adoption sites, as specified in the evaluation plan for the project;

(f) Maintain records during the grant period concerning the adoptions of the program including records of—

(1) Demographic data;

(2) Evaluation data; and

(3) Retention rates;

(g) Develop and implement a system to identify and train Certified Trainers;

(h) Identify and certify demonstration sites throughout the Nation;

(i) Participate with other NDN grantees in workshops and meetings arranged by the Secretary; and

(j) Cooperate with State Facilitator grantees in carrying out the activities in this section.

(20 U.S.C. 3851)

(Approved by the Office of Management and Budget under control number 1850–0066)

§ 796.13 How long do approval and recertification by the Joint Dissemination Review Panel last?

For the purposes of NDN funding—

(a) JDRP approval granted on or before September 30, 1980, remains in effect for a four-year period beginning October 1, 1980;

(b) JDRP approval granted after September 30, 1980, remains in effect for a four-year period after the date of approval; and

(c) Any subsequent JDRP recertification of the same program remains in effect for four years after the recertification date.

(20 U.S.C. 3851)

§ 796.14 Who is eligible to apply for a Developer Demonstrator grant?

(a) Any public or nonprofit private agency, organization, or institution that has developed a program that has current JDRP approval or current JDRP recertification, and is available for visitation, may apply for a Developer Demonstrator grant.

(b) If the agency that developed the exemplary educational program does not apply, another public or nonprofit private agency, organization, or institution may apply if—

(1) The program is approved or recertified by the JDRP;

(2) The program continues in operation;

(3) The program is available for visitation; and

(4) The staff includes personnel who originally developed or operated the program, or who are experienced and knowledgeable about the program.

(c) Both federally and non-federally developed exemplary educational programs are eligible for NDN funding.

(20 U.S.C. 3851)

§ 796.15 Will priorities for funding Developer Demonstrator grants be established?

(a) Each year the Secretary may announce in an application notice published in the **Federal Register** the program priorities for which applicants may apply for assistance.

(b)(1) Each time the Secretary announces a competition, the Secretary may select one or more priorities.

(2) Applicants compete separately under each priority selected by the Secretary.

(3) The Secretary may select priorities under this section after taking into consideration any unmet national needs.

(c) The Secretary may select priorities from the following subject areas or special needs:

(1) English.

(2) Science.

(3) Social studies.

(4) Mathematics or higher mathematics.

(5) Reading.

(6) Written or oral communication.

(7) Health.

(8) Nutrition.

(9) Physical fitness.

(10) Environmental education.

(11) Foreign language programs that accomplish one or more of the following—

(i) Introduce students to non-English-speaking cultures;

(ii) Heighten awareness and comprehension of one's native tongue; or

(iii) Serve the Nation's needs in commerce, diplomacy, defense, and education.

(12) Computer science programs that enable students to accomplish one or more of the following—

(i) Understand the computer as an information, computation, and communication device;

(ii) Use the computer to enhance instruction in English, mathematics, science, social studies, or for personal and work-related purposes; or

(iii) Understand the world of computers, electronics, and related technologies.

(13) Programs that advance students' personal, educational, and occupational goals, such as courses in the fine and performing arts, vocational education, and industrial arts.

(14) Programs that improve students' skills in comprehension, analysis, problem solving, deductive and inductive reasoning, or study.

(15) Programs that improve teaching and the quality of instruction through either or both of the following—

(i) The identification and transfer of non-traditional practices;

(ii) The application of current research findings in learning, teaching, and management.

(16) Educational leadership programs designed to accomplish one or more of the following—

(i) Increase academic standards and expectations;

(ii) Increase the effective use of time in schools;

(iii) Bring esteem and respect to members of the teaching profession; or

(iv) Provide support of school boards and administrators who have demonstrated the ability to marshal community, business, or industry resources needed to promote educational excellence.

(d) In addition to the priorities listed in paragraph (c) of this section, the Secretary may establish priorities as specified in one or both of the following paragraphs.

(1) The Secretary may establish priorities at specified instructional levels, such as preschool, elementary, secondary, postsecondary, or adult education.

(2) The Secretary may establish as a priority one or more of the following special populations:

(i) Gifted and talented students.

(ii) Socioeconomically disadvantaged students.

(iii) Limited English-proficient students.

(iv) Handicapped students.

(v) Migrant students.

(vi) Functionally illiterate adults or pre-adults.

(e) The Secretary may also limit a priority established under paragraph (c) of this section to—

(1) An instructional level;

(2) One or more of the special populations listed in paragraph (d)(2) of this section; or

(3) To both an instructional level and one or more of the special populations listed in paragraph (d)(2) of this section.

(20 U.S.C. 385)

§ 796.16 What activities must a State Facilitator Project conduct?

A State Facilitator Project must—

(a) Inform educational service providers about the availability of all exemplary educational programs in the National Diffusion Network, both funded and non-funded, with a major focus on those developed in States other than the one served by the State Facilitator;

(b) Assist educational service providers in—

(1) Identifying and assessing their needs; and

(2) Matching those needs with exemplary educational programs;

(c) Negotiate adoption agreements with funded and non-funded Developer Demonstrator projects and educational service providers;

(d) Arrange for funded and non-funded Developer Demonstrator projects and Certified Trainers to train staff members of educational service providers that adopt exemplary programs;

(e) Arrange for and provide follow-up services during the implementation of the adoptions;

(f) Assist funded and non-funded Developer Demonstrator projects and adopters in the evaluation of the adoptions;

(g) Maintain records during the grant period concerning the exemplary

educational programs adopted in the State, including records of—

(1) Demographic data;

(2) Evaluation data; and

(3) Retention rates;

(h) Evaluate, as specified in the evaluation plan for the project, the quality and effectiveness of the activities listed under paragraphs (a) through (e) and the quality and effectiveness of the dissemination process;

(i) Monitor, as specified in the monitoring plan for the project, the activities listed under paragraphs (d), (e) and (f);

(j) Assist in the identification and training of Certified Trainers for Developer Demonstrator projects;

(k) Assist in the identification and development of local demonstration sites for Developer Demonstrator projects;

(l) Identify and assist in the submission to JDRP of potential exemplary educational programs developed in the State served by the State Facilitator;

(m) Participate with other NDN grantees in workshops and meetings arranged by the Secretary;

(n) Provide appropriate information to national, State, local, and private agencies about NDN on the State and local level; and

(o) Cooperate with Developer Demonstrator projects in carrying out the activities in this section.

(20 U.S.C. 3851)

(Approved by the Office of Management and Budget under control number 1850–0086)

§ 796.17 Who is eligible to apply for a State Facilitator grant?

Any public or nonprofit private agency, organization, or institution located in the State to be served may apply for a State Facilitator grant.

(20 U.S.C. 3851)

§ 796.18 What types of awards does the Secretary make under the NDN?

(a) The Secretary awards grants and cooperative agreements under this program depending upon the nature of the relationship between the recipient and the Department.

(b) The Secretary evaluates cooperative agreements using the same procedures and criteria used to evaluate applications for grants.

(20 U.S.C. 3851)

Subpart C—How To Apply For A Grant—[Reserved]

Note.—EDGAR establishes the regulations for submission of applications. See, generally, 34 CFR 75.100–75.192.

Subpart D—How Is A Grant Made?

§ 796.31 How does the Secretary evaluate an application for a Developer Demonstrator or a State Facilitator grant?

(a) The Secretary evaluates an application—

(1) For a Developer Demonstrator grant on the basis of the criteria in § 796.32; and

(2) For a State Facilitator grant on the basis of the criteria in § 796.33.

(b) The Secretary awards up to 100 possible points under both—

(1) The Developer Demonstrator criteria; and

(2) The State Facilitator criteria.

(c) The maximum possible score for each criterion is indicated in parentheses.

(d) For State Facilitator projects, only one award is made in each State, selected by a separate competition for each State.

(20 U.S.C. 3851)

§ 796.32 What selection criteria does the Secretary use to review an application for a new Developer Demonstrator grant?

(a) *Plan of operdtion.* (20 points) (1) The Secretary reviews each application for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project (see § 796.12 for a description of each of the activities that a Developer Demonstrator must conduct under the design);

(ii) A description of training required to install the program in new settings;

(iii) An effective plan of management that insures proper and efficient administration of the project;

(iv) A clear description of how the objectives of the project relate to the purpose of the program;

(v) The way the applicant plans to use its resources and personnel to achieve each objective;

(vi) A clear description of how the applicant will provide equal access and treatment for eligible project participants who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly; and

(vii) If the applicant is a local educational agency or State educational agency, a clear description of how the applicant will satisfy the applicable requirements for consultation with private school officials and an opportunity for participation by private school children as stated in § 796.42.

(b) *Quality of Key Personnel.* (20 points) (1) The Secretary reviews each application for information that shows the quality of the key personnel the applicant plans to use on the project;

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (b)(2) (i) and (ii) of this section plans to commit to the project; and

(iv) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(3) To determine the qualifications of a person, the Secretary considers evidence of past experience and training in fields related to the objectives of the project, as well as other information that the applicant provides.

(c) *Budget and cost effectiveness.* (10 points) (1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities;

(ii) Costs are reasonable in relation to the objectives of the project; and

(iii) An estimate of the costs to the adopter for installing the program in a new setting and a projection of the number of educational service providers that will adopt the program each year.

(d) *Evaluation Plan.* (20 points) (1) The Secretary reviews each application for information that shows the quality of the evaluation plan for the project. (See § 75.590—Evaluation by grantee.)

(2) The Secretary looks for information that shows methods of evaluation that are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

(3) The Secretary looks for information that shows plans for evaluation of the following—

(i) The quality and effectiveness of awareness materials and conferences, of training and follow-up, and of internal management plans;

(ii) The implementation status of the adoptions, including key elements and implementation levels; and

(iii) The effectiveness of the adoption including the impact on the students or the changes in teacher or administrator behavior.

(e) *Adequacy of resources.* (5 points) (1) The Secretary reviews each application for information that shows that the applicant plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows—

(i) The facilities that the applicant plans to use are adequate; and

(ii) The equipment and supplies that the applicant plans to use are adequate.

(f) *Monitoring.* (15 points) The Secretary looks for information that shows the extent to which the applicant clearly details plans that show promise of effective management of the project, including post adoption monitoring of the program implementation and resulting benefits at the adoption sites.

(g) *Effective dissemination strategies.* (10 points) The Secretary looks for information that shows the extent to which the applicant proposes effective dissemination strategies to meet specific characteristics of the program.

(20 U.S.C. 3851)

§ 796.33 What selection criteria does the Secretary use to review an application for a new State Facilitator grant?

(a) *Plan of operation.* (15 points) (1) The Secretary reviews each application for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project, (see § 796.16 for a description of each of the activities that a State Facilitator must conduct under the design);

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective; and

(v) A clear description of how the applicant will provide equal access and treatment for eligible project participants who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(b) *Quality of key personnel.* (20 points) (1) The Secretary reviews each application for information that shows the quality of the key personnel the applicant plans to use on the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (b)(2)(i) and (ii) of this section plans to commit to the project; and

(iv) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women;

(C) Handicapped persons; and

(D) The elderly.

(3) To determine the qualifications of a person, the Secretary considers evidence of past experience and training in fields related to the objectives of the project, as well as other information that the applicant provides.

(c) *Budget and cost effectiveness.* (10 points) (1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(d) *Evaluation plan.* (15 points.) (1) The Secretary reviews each application for information that shows the quality of the evaluation plan for the project. (See § 75.590—Evaluation by the grantee.)

(2) The Secretary looks for information that shows methods of evaluation that are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable, including evaluation of the impact of adoptions in the State served by the State Facilitator.

(e) *Adequacy of resources.* (4 points) (1) The Secretary reviews each application for information that shows that the applicant plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows—

(i) The facilities that the applicant plans to use are adequate; and

(ii) The equipment and supplies that the applicant plans to use are adequate.

(f) *Consultation during application.* (5 points) The Secretary looks for information that shows the extent to which the applicant, in developing its application, has consulted with the SEA, LEAs, IHEs, nonprofit private elementary and secondary schools, and other educational service providers in the State to be served;

(g) *Consultation and participation during project.* (5 points) The Secretary looks for information that shows the extent to which the applicant, in carrying out project activities, provides for consultation with, and participation of the SEA, LEAs, IHEs, nonprofit private elementary and secondary schools, and other educational service providers in the State.

(h) *Monitoring plan.* (16 points) The Secretary looks for information that shows the extent to which the applicant clearly details plans to monitor and assist sites that adopt the programs, and provide follow-up services after training.

(i) *Effective dissemination strategies.* (10 points) The Secretary looks for information that shows the extent to which the applicant proposes effective dissemination strategies that may be used by other NDN grantees.

(20 U.S.C. 3851)

§ 796.34 What additional criteria exist for new and continuation awards?

(a) In determining the order of selection under EDGAR § 75.217(d) for new Developer Demonstrator awards, the Secretary seeks diversity in the techniques used to teach a subject or meet a special need.

(b) If the Secretary makes a continuation award under § 75.253, the Secretary may consider the effectiveness of the project during the previous budget period in determining the amount of funding for the next budget period.

(20 U.S.C. 3851)

Subpart E—What Conditions Must Be Met by a Grantee?

§ 796.41 Are there restrictions on the kinds of items a grant may support?

Funds may not be used for stipends for educational personnel to participate in training activities, construction, repair, remodeling, or alteration of facilities or sites. See EDGAR Part 74, Subpart Q—Cost Principles.

(20 U.S.C. 1221e-3(a)(1))

§ 796.42 Nonprofit private school requirements.

(a) A grant to an LEA or SEA is subject to the requirements in § 586 of the Education Consolidation and Improvement Act of 1981 concerning—

(1) Consultation with nonprofit private school officials in developing the application; and

(2) The opportunity for participation by nonprofit private school children. The requirements for consultation are governed by paragraph (b) of this section, and § 76.652 of EDGAR.

(b) *Consultation.* (1)(i) An applicant shall comply with paragraphs (b)(1)(ii) of this section if the following conditions are met:

(A) The applicant is an LEA or SEA.

(B) The applicant applies for a Developer Demonstrator grant.

(C) The project proposed under the application is designed for adoption at elementary or secondary schools.

(ii) The applicant shall consult with officials of nonprofit private elementary and secondary schools to ensure that the project can benefit children in those schools.

(2)(i) An applicant shall comply with paragraph (b)(2)(ii) of this section if the following conditions are met:

(A) The applicant is an LEA or SEA.

(B) The applicant applies for a State Facilitator grant.

(ii) The applicant shall consult with officials of nonprofit private elementary and secondary schools in the State served by the project to determine appropriate strategies to ensure that children in those schools can benefit from the project.

(c) *Participation.* (1) An LEA or SEA that receives a Developer Demonstrator grant designed for adoption at elementary and secondary schools shall—

(i) Based on the consultation under paragraph (b)(1) of this section, ensure that nonprofit private elementary and secondary schools have an opportunity to adopt the program; and

(ii) Ensure that nonprofit private elementary and secondary schools in the area served by an adopter are informed about the opportunities to adopt the program.

(2) An LEA or SEA that receives a State Facilitator grant shall use the strategies developed under paragraph (b)(2) of this section to ensure that teachers and administrators from nonprofit elementary and secondary schools have an opportunity to participate to adopt the program.

(d) An applicant that must comply with paragraph (c) of this section shall include in its application a description of how the applicant will meet the Federal requirements for participation.

(e) An LEA or SEA grantee shall comply with the rules for subgrantees in EDGAR § 76.658, Funds not to benefit a private school.

(20 U.S.C. 3851, 3862)

Part VII

Department of Education

34 CFR Part 770

Library Services and Construction Act Program; Final Rule

DEPARTMENT OF EDUCATION

34 CFR Part 770

Library Services and Construction Act Program (Titles I and III of the Library Services and Construction Act)

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary of Education is issuing final regulations for the Library Services and Construction Act Program. These final regulations implement the Library Services and Construction Act (LSCA), Pub. L. 91–600, as amended. These regulations are necessary in order to provide guidance to State library administrative agencies in the development of their State plans so that the plans may meet the purposes of the authorizing legislation.

EFFECTIVE DATE: These regulations will take effect on October 1, 1984.

FOR FURTHER INFORMATION CONTACT: Robert Klassen, U.S. Department of Education, 400 Maryland Avenue, SW., (Room 613, Brown Building), Washington, D.C. 20202. Telephone (202) 254–9664.

SUPPLEMENTARY INFORMATION:

Background

The Library Services and Construction Act (LSCA) was originally enacted as the Library Services Act in 1956, Pub. L. 84–597. Most recently, the LSCA has been extended through fiscal year 1984 by the Omnibus Budget Reconciliation Act of 1981, Pub. L. 97–35. In these regulations, the title of part 770 is changed from "Library Services, Public Library Construction, and Interlibrary Cooperation" to the "Library Services and Construction Act Program," and the regulatory provisions relating to both Title II (Public Library Construction) and Title IV (Older Readers Services) are removed. Under the Omnibus Budget Reconciliation Act of 1981, Pub. L. 97–35, no funds are authorized to be appropriated to carry out Title II for fiscal years 1982, 1983, or 1984. Thus, regulatory provisions relating to Title II have been removed. However, the effective date of these regulations is October 1, 1984. For purposes of administering grants made prior to October 1, 1984 under the Emergency Jobs Bill, Pub. L. 98–8, the Appalachian Regional Development Act of 1965, as amended, Pub. L. 89–4, or under any other authorizations to which LSCA Title II statutory requirements apply, the current Title II regulations will continue to apply until the construction projects funded with such grants are completed. Although the Library Services and Construction Act was amended by the Older American Comprehensive Services Amendments of 1973, Pub. L. 93–29, to include Title IV, this Title has never been funded and no specific funding authority was provided in the Omnibus Budget Reconciliation Act of 1981. Therefore, these regulations include no provisions relating to Title IV.

Comments and Responses

On February 28, 1983, the Secretary published in the **Federal Register** (48 FR 8303) the Notice of Proposed Rulemaking for the Library Services and Construction Act Program. During the period allowed for comments in response to the proposed regulations, 24 letters with numerous comments and questions were received. The comments were generally in favor of the deregulation effort in that it represented a Departmental effort to reduce regulatory burdens and clarify regulatory requirements. Comments were generally opposed to the removal of LSCA Title II (Public Library Construction) regulatory provisions and the removal of the "handicapped" criterion from the provision determining adequacy of public library services. Comments and responses to the NPRM can be found in the Appendix to these regulations.

While the provisions of these final regulations are substantially the same as those of the Notice of Proposed Rulemaking (NPRM), changes include: (1) The clarification of § 770.13(a)(2)(i) to show that under section 6(d)(2) of the LSCA, a State's long range program is to be reviewed and revised annually in accordance with the State's changing needs for assistance under the Act; and (2) the deletion of § 770.13(b)(3)(iv) of the NPRM because under section 6(d), criteria, policies and procedures exclusively for Title III are not required.

Paperwork Reduction Act of 1980

Information collections requirements contained in these regulations, (§§ 770.11 (The basic State plan), 770.13 (The long range program), 770.14 (The annual program), and 770.20 (State and local spending requirements as conditions for payment to States)) have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511) and have been assigned OMB control numbers 1850–0528.

Executive Order 12291

These regulations have been reviewed in accordance with Executive Order 12291. They are classified as non-major because they do not meet the criteria for major regulations established in the Order.

Regulatory Flexibility Act

The Secretary certifies that these regulations will not have a significant economic impact on a substantial number of small entities. These regulations apply to the "State library administrative agency" of each State. A State library administrative agency as defined in the statute is the official agency charged by the law of each State with the extension and development of public library services throughout the State, and which has adequate authority under State law to administer State plans in accordance with provisions of the LSCA. States and State agencies are not considered to be small entities under the Regulatory Flexibility Act.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79 (48 FR 29158; June 24, 1983). The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Assessment of Educational Impact

In the NPRM, the Secretary requested comments on whether the proposed regulations would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

Based on the absence of any comments on this matter and the Department's own review, it has been determined that the regulations in this document do not require information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 770

Correctional institutions—libraries, Education, Education of disadvantaged, Grant programs—education, Handicapped, Libraries, Mental health programs—libraries, Penal institutions—libraries, Prisons—libraries.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parenthesis on the

line following each substantive provision of these final regulations.

(Catalog of Federal Domestic Assistance No. 84.034, Title I, Public Library Services and No. 84.035, Title III, Interlibrary Cooperation)

Dated: March 27, 1984.

T. H. Bell,

Secretary of Education.

The Secretary revises Part 770 of Title 34 of the Code of Federal Regulations as follows:

PART 770—LIBRARY SERVICES AND CONSTRUCTION ACT PROGRAM

Subpart A—General

Sec.

770.1 The Library Services and Construction Act Program.
770.2 Who is eligible to apply for a grant under the Library Services and Construction Act Program?
770.3 What regulations apply to the Library Services and Construction Act Program?
770.4 What definitions apply to the Library Services and Construction Act Program?

Subpart B—How Does a State Apply for a Grant?

770.10 The State plan and the State advisory council on libraries.
770.11 The basic State plan.
770.12 Criteria for determining the adequacy of public library services.
770.13 The long-range program.
770.14 The annual program.

Subpart C—Payments and Reports

770.20 State and local spending requirements as conditions for payment to the States.
770.21 Reports.

Subpart D—Federal Financial Participation

770.30 Library services.
770.31 Interlibrary cooperation.
770.32 Use of Federal funds by State library administrative agency.
770.33 Federal and State shares of eligible expenditures.

Authority: The Library Services and Construction Act, Pub. L. 91–600, as amended, 84 Stat. 1660 (20 U.S.C. 351 *et seq.*), unless otherwise noted.

Subpart A—General

§ 770.1 The Library Services and Construction Act Program.

Under the Library Services and Construction Act, Federal funds are provided to assist States to—

(a) Extend and improve public library services in areas that are without these services or in which these services are inadequate;

(b) Establish, extend, and improve public library services including those for physically handicapped, institutionalized, and disadvantaged persons;

(c) Strengthen State library administrative agencies;

(d) Promote interlibrary cooperation;

(e) Strengthen major urban resource libraries; and

(f) Strengthen metropolitan public libraries which serve as national or regional resource centers.

(20 U.S.C. 351; 353)

§ 770.2 Who is eligible to apply for a grant under the Library Services and Construction Act Program?

Under the Library Services and Construction Act Program, States are eligible to apply for Library Services grants under Title I and Interlibrary Cooperation grants under Title III of the Act, respectively.

(20 U.S.C. 351d)

§ 770.3 What regulations apply to the Library Services and Construction Act Program?

The following regulations apply to the Library Services and Construction Act Program:

(a) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Part 74 (Administration of Grants), Part 76 (State-Administered Programs), Part 77 (Definitions), Part 78 (Education Appeal Board) and Part 79 (Intergovernmental Review of Department of Education Programs and Activities).

(b) The regulations in this Part 770.

(20 U.S.C. 1221e–3(a)(1))

§ 770.4 What definitions apply to the Library Services and Construction Act Program?

(a) *Definitions in EDGAR.* The following terms used in this part are defined in 34 CFR Part 77:

Department
ED
EDGAR
Fiscal Year
GEPA
Grant
Private
Project
Secretary
State

(b) The definitions provided for the following terms in section 3 (Definitions) of the Act, apply to this part:

Annual program
Basic State plan

Library service (For the purpose of this definition the Secretary defines "Library materials" to mean books, periodicals, newspapers, documents, pamphlets, photographs, reproductions, microforms, pictorial or graphic works, musical scores, maps, charts, globes, sound recordings, slides, films, filmstrips, and processed video and magnetic tapes, printed, published audiovisual materials, and non-conventional library materials designed specifically for the handicapped; and materials of a similar nature.

Library services for the physically handicapped
Public library
Public library services

Long-range program (Although section 3(12) of the Act refers to the long-range program as a "five year program", section 6(d)(1) of the Act provides that the long-range program may cover "a period of not less than three nor more than five years." In reconciling this inconsistency in the statute, § 770.13 (The long-range program) of this part provides that the long-range program may cover a period of "not less than three nor more than five fiscal years.")

State advisory council on libraries
State institutional library services
State library administrative agency
Major Urban resource libraries

(c) In addition, the following definitions apply to this part:

The "Act" means the Library Services and Construction Act, as amended.

"Disadvantaged" persons means persons whose socio-economic or educational deprivation, or cultural isolation from the community at large, prevent them from receiving the benefits of library services designed for persons without these deprivations.

"Interlibrary cooperation" under Title III of the Act, means the establishment, expansion and operation of local, regional, and interstate cooperative library networks. The purpose of a network is to provide for the systematic and effective coordination of the resources of school, public, academic, and special libraries and information centers for improved supplementary services for the special clientele served by each type of library or center.

"Limited English-speaking ability", when used with reference to individuals, means individuals who—

(1)(i) Were not born in the United States or whose native language is a language other than English;

(ii) Come from environments where a language other than English is dominant; or

(iii) Are American Indian and Alaskan Native students and who come from environments where a language other than English has had a significant impact on their level of English language proficiency; and

(2) Because of the reason(s) listed in paragraph (1) (i), (ii), or (iii) of this definition, have sufficient difficulty speaking, reading, writing, or understanding the English language to be denied the opportunity to learn

successfully in classrooms where the language of instruction is English. (See section 703(a) of Title VII of the Elementary and Secondary Education Act of 1965, as amended, 20 U.S.C. 2701 *et seq.*).

(20 U.S.C. 351d(b)(4))

Subpart B—How Does a State Apply for a Grant?

§ 770.10 The State plan and the State advisory council on libraries.

(a) To receive its allotment for any fiscal year a State shall—

(1) Have in effect a basic State plan approved by the Secretary, in accordance with § 770.11 (The basic State plan);

(2) Submit or update a long-range program in accordance with § 770.13 (The long-range program);

(3) Submit an annual program for each allotment which is desired, in accordance with § 770.14 (The annual program); and

(4) Establish a State advisory council on libraries pursuant to the requirements of section 3(8) of the Act.

(b) The State plan must consist of three parts:

(1) The basic State plan.

(2) The long-range program.

(3) The annual program.

(c) The State shall make its plan available to the public.

Note.—34 CFR 76.106 (State documents are Public information) also applies.

(20 U.S.C. 351d; S. Rep. No. 1162, 91st Cong., 2nd Sess. 3)

§ 770.11 The basic State plan.

(a) The basic State plan must include—

(1) A document that—

(i) Provides for the administration, or supervision of the administration, of the programs authorized by the Act by the State library administrative agency;

(ii) Provides assurances that the officially designated State library administrative agency has the fiscal and legal authority and capability to administer all aspects of the Act;

(iii) Provides assurances for establishing the State's policies, priorities, criteria, and procedures necessary to the implementation of all programs under provisions of the Act;

(iv) Provides assurances that any funds paid to the State in accordance with a long-range program (§ 770.13 of this Part) and an annual program (§ 770.14 of this Part) must be expended solely for the purposes for which funds have been authorized and appropriated and that such fiscal control and fund accounting procedures have been adopted as may be necessary to assure proper disbursement of, and accounting for, Federal funds paid to the State, including any such funds paid to any other agency, under the Act;

(v) Provides satisfactory assurance that the State administrative agency will make such reports, in such form and containing such information as the Secretary may reasonably require to carry out the Secretary's functions under the Act and to determine the extent to which funds provided under the Act have been effective in carrying out its purposes, including reports of evaluations made under the State plans; and

(vi) Provides satisfactory assurance that the State administrative agency will keep such records and afford such access to these records as the Secretary may find necessary to assure the correctness and verification of the reports required under paragraph (a)(1)(v) of this section.

(2) The statements of criteria required by § 770.12 of this part; and

(3) The certifications required by 34 CFR 76.104.

(b) The Secretary may approve the basic State plan for each fiscal year only if the Secretary determines that—

(1) The plan fulfills the conditions of a basic State plan as specified in paragraph (a) of this section and is in compliance with the requirements of the Act and of all applicable regulations; and

(2) The information contained in the basic State plan indicates that the State has adequate procedures to insure that the assurances and provisions of the basic State plan will be carried out.

(20 U.S.C. 351a(11); 351d(d); 351d(c))

(Approved by the Office of Management and Budget under control number 1850–0528)

§ 770.12 Criteria for determining the adequacy of public library services.

Among the criteria for determining the adequacy of public library services in geographical areas and for groups of persons in the State, the State library administrative agency shall include criteria which assure that priority will be given to programs or projects serving—

(a) Urban and rural areas with high concentrations of low-income families; and

(b) Areas with high concentrations of persons with limited English-speaking ability.

(20 U.S.C. 351d(b)(4))

§ 770.13 The long-range program.

(a)(1) The State shall develop the long-range program with the advice of the State advisory council on libraries and in consultation with the Secretary.

(2) The State shall—

(i) Review and revise annually the long-range program in accordance with changing needs of the State for assistance under the Act;

(ii) Use the results of evaluations and surveys by the State agency and the State advisory council on libraries in developing and revising the long-range program; and

(iii) Incorporate any revisions into the annual program for each fiscal year.

(b) The long-range program must contain the following—

(1) A description of the State's identified present and projected library needs;

(2) A plan for meeting those identified needs with Federal funds made available under the Act, covering a specified period of not less than three nor more than five fiscal years; and

(3) A statement of the following policies, criteria, priorities, and procedures, to be updated as required in meeting the state's library needs:

(i) Policies and procedures for the periodic evaluation of the effectiveness of programs and projects supported under the Act.

(ii) Policies and procedures for appropriate dissemination of the results of these evaluations and other information pertaining to these programs and projects.

(iii) Policies and procedures for the effective coordination of programs and projects supported under the Act with library programs and projects operated by institutions of higher education or local elementary or secondary schools and with other public or private library services programs.

(20 U.S.C. 351d(d); 351a(12); 354; 355e–2)

(Approved by the Office of Management and Budget under control number 1850–0528)

§ 770.14 The annual program.

The annual program must include—

(a) a description of a program for the use of funds under each of the titles of the Act;

(b) A description of how each program will fulfill the State's library needs stated in the long-range program, in a manner consistent with the policies, criteria, priorities, and procedures specified in the long-range program;

(c) The criteria used in allocating Title I funds for program purposes under section 102 of the Act. These criteria must insure that the State will expend from Federal, State, and local sources an amount not less than the amount expended by the State from such sources for State institutional library sevices, and library services to the physically handicapped during the

second fiscal year preceding the fiscal year for which the annual program is developed;

(d) During each fiscal year in which funds appropriated for Title I of the Act exceed $60,000,000, a program for that year under which the amount reserved under section 102(c) of the Act will be used for purposes contained in section 102(a)(3) of the Act. During such a year, a State shall not reduce the amount paid to a major urban resource library below the amount that it received in the preceding year;

(e) A program description of the specific activities to be carried out by the State in the fiscal year—

(1) With funds for library services under Title I (Library Services) of the Act, for the purposes and activities stated in section 102 (Uses of Federal Funds) of the Act and § 770.30 (Library services) of this Part; and

(2) With funds for interlibrary cooperation under Title III (Interlibrary Cooperation) of the Act, for the purposes and activities stated in section 302 (Uses of Federal Funds) of the Act and § 770.31 (Interlibrary Cooperation) of this part.

(f) An annual review and revision of the long-range program that must take into consideration the results of the evaluations of the State's library program.

(20 U.S.C. 351a(13); 354; 355e–2)

(Approved by the Office of Management and Budget under control number 1850–0528)

Subpart C—Payments and Reports

§ 770.20 State and local spending requirements as conditions for payment to the States.

The Secretary makes a payment to a State under Title I of the Act only after the Secretary has determined that—

(a) The State has satisfactorily assured the Secretary that it will have available for expenditure under Title I (Library Services) of the Act during the fiscal year of the allotment—

(1) From State and local sources—

(i) Sums sufficient to earn its minimum allotment as stated in section 5(a)(1) of the Act; and

(ii) Not less than the total amount actually expended for program purposes from State and local sources in the second preceding fiscal year.

(2) From State sources—

(i) Not less than the total amount actually expended for program purposes from State sources in the second preceding fiscal year.

(20 U.S.C. 351e)

(Approved by the Office of Management and Budget under control number 1850–0528)

§ 770.21 Reports.

The State agency shall submit to the Secretary one copy of all surveys, films, and other publications developed with Federal funds under the Act.

(20 U.S.C. 351d(b)(3)(A))

Subpart D—Federal Financial Participation

§ 770.30 Library services.

Funds allotted to a State for the purpose of section 101 (Grants to States for Library Services) of Title I (Library Services) of the Act, must be used solely for paying the Federal share of the cost of activities specified in section 102 (Uses of Federal Funds) of the Act.

(20 U.S.C. 353)

§ 770.31 Interlibrary cooperation.

Funds allotted to a State for the purposes of section 301 (Grants to States for Interlibrary Cooperation Programs) of Title III (Interlibrary Cooperation) of the Act, must be used solely to pay the cost of carrying out a State plan as it relates to interlibrary cooperation, which must include—

(a) Planning for and taking steps leading to the development of cooperative library networks; and

(b) Establishing, expanding, and operating local, regional, State or interstate cooperative networks of libraries.

(20 U.S.C. 355e–1)

§ 770.32 Use of Federal funds by State library administrative agency.

In addition to the program activities specified in section 102 (Uses of Federal Funds) of the Act, funds allotted to a State under the Act for the purposes of section 101 (Grants to States for Library Services) of Title I (Library Services) of the Act, may also be used to pay the Federal share of the cost of the following activities of the State library administrative agency:

(a) Administration of the State plan submitted and approved under the Act and Subpart B of this part, including obtaining the services of consultants.

(b) Statewide planning for and evaluation of library services.

(c) Dissemination of information concerning library services.

(d) The activities of the State advisory council on libraries and of other advisory groups and panels that may be necessary to assist the State library administrative agency in carrying out its functions.

(e) Strengthening the capacity of the State library administrative agency for meeting the needs of the people of the State.

(f) Administrative costs necessary to carry out activities in paragraphs (b) through (e) of this section.

(20 U.S.C. 353(b))

§ 770.33 Federal and State shares of eligible expenditures.

(a)(1) Under section 7(b)(2) of the Act, every two years the Secretary promulgates the Federal share for each State under Title I (Library Services) of the Act.

(2) The State share for Title I (Library Services) is the difference between the costs under the State plan and the applicable Federal share.

(3) The Federal share for each State under Title III (Interlibrary Cooperation) is 100 percent.

(b) All Federal funds used for administrative costs specified in § 770.32 (a) through (f) (Use of Federal funds by State library administrative agency) of this part must be matched equally by nonFederal funds.

(c) In computing its share for library services under Title I (Library Services) of the Act, the State may consider only funds, regardless of their source, expended by it, or a political subdivision, for purposes of the State plan as it applies to Title I.

(20 U.S.C. 351e; 351f)

Appendix—Summary of Comments and Responses

The following is a summary of the public comments received on the proposed regulations published in the Federal Register on February 28, 1983 (48 FR 8303), and the Secretary's responses to those comments including any changes. The comments, responses and any changes are organized in the same order as the referenced sections are organized in these final regulations.

Section 770.1 The Library Services and Construction Act Program and provisions pertaining to Title II, Public Library Construction.

Comment. Several commenters felt that the regulatory provisions for LSCA Title II (Public Library Construction) should be retained. Many commenters believed the removal of the provisions for public library construction would hamper the implementation of any specific authorizations such as the $50 million under the supplemental Emergency Jobs Bill (Pub. L. 98–8) for public library construction.

Response. No change has been made. The final regulations delete all provisions relating to Title II (Public Library Construction) of the Library Services and Construction Act. Under the Omnibus Budget Reconciliation Act

of 1981, Pub. L. 97–35, no funds are authorized to be appropriated to carry out Title II for fiscal years 1982, 1983, or 1984, and with the exception of the supplemental Emergency Jobs Bill appropriation of March 24, 1983, there have been no appropriations for Title II since 1973. However, the effective date of these final regulations is October 1, 1984. Thus, for the purpose of administering grants awarded to States prior to October 1, 1984, under any authorizations to which LSCA Title II statutory provisions apply including the Jobs Bill and the Appalachian Regional Development Act, the current Title II regulations will apply until the projects funded with such grants are completed.

Comment. One commenter felt that the word "establish" should be retained in this section of the final regulations.

Response. No change has been made. As part of the effort to bring the LSCA program regulations into closer accord with the statutory language and requirements, the term "establish" was deleted from § 770.1(a) of the NPRM. Congress did not specifically include the establishing of libraries as a purpose in Sec. 2(a) of the Act, Declaration of Policy. That section states that it is the purpose of the LSCA to "assist the States in the *extension and improvement* of public library services in areas of the States which are without such services or in which such services are inadequate * * *" (emphasis added). Nor did Congress specifically include the establishing of libraries in areas without library services or where such services are inadequate as a purpose in the similarly-worded Title I purpose, in Sec. 102(a)(2)(A). Thus the term "establish" does not appear in § 770.1(a) of the NPRM nor does it appear in this section of these final regulations.

Section 770.1(b) The Library Services and Construction Act Program.

Comment. One commenter questioned the deletion of the reference to persons of limited English-speaking ability which appears in the current regulations, from this provision of the NPRM. This provision implements the overall purpose section of the statute, Sec. 2(a) (Declaration of Policy) as well as Sec. 102 of the statute (Use of Federal Funds.)

Response. No change has been made. Statutory reference to persons of limited English-speaking ability does not appear in Secs. 2(a) or 102 of the Act, but rather in Sec. 6(b)(4) of the Act. Section 6(b)(4) requires that States, in setting forth criteria to be used in determining the adequacy of public library services, include criteria to assure that priority will be given to projects serving, among others, "areas with high concentrations of persons with limited English-speaking ability". Thus, in these final regulations reference to persons of limited English-speaking ability appears in § 770.12, implementing Sec. 6(b)(4) of the Act, rather than in § 770.1(b).

Section 770.3 What regulations apply to the Library Services and Construction Act Program?

Comment. One commenter expressed the opinion that it would be helpful if this section included a listing, by priority, of the regulations noted as applicable in the event that there are any inconsistencies between regulations.

Response. No change has been made. Generally, in the event of any inconsistency the controlling regulations would be the program regulations in this Part. However, anyone who suspects that an inconsistency exists between the applicable regulations is strongly encouraged to contact the Department for guidance.

Section 770.4(b) Definitions.

Comment. One commenter felt that "online services" should be included in the definition of the term "library materials".

Response. No change has been made. The term "library materials" refers to those *materials* which may be provided by a public library to its clientele. Thus, it is believed that the inclusion of *services* such as "online services" in the definition of "library materials" would be inappropriate. However, access to a computer terminal resulting in the retrieval of computerized data is among the services which a public library may provide.

Section 770.4(c) Definitions.

Comment. One commenter felt that the new definition of "disadvantaged" deleted several qualifying statements which in the opinion of the commenter clarified and more sharply delineated the groups covered by this term. The commenter felt that the previous definition, with its specificity, was nonetheless sufficiently broad, and that the new definition could be interpreted to include many groups (e.g., the physically handicapped and institutionalized) which are already covered in other statutory and regulatory provisions.

Response. No change has been made. The definition for "disadvantaged" persons was changed in an effort to reflect congressional intent more accurately. In the 1970 amendments to the LSCA (Pub. L. 91–600), Congress added one of the requirements which now appears in Sec. 6(b)(4) of the Act. As of the 1970 amendments it has been required that in setting forth the criteria for determining the adequacy of public library services to certain geographical areas and groups, States must include in their State plans "criteria designed to assure that priority will be given to programs or projects which serve urban and rural areas with high concentrations of low-income families." The legislative history to the 1970 amendments indicates that, in making this amendment to the Act, Congress intended to equate the term "disadvantaged" with low economic status. (See December 7, 1970 Congressional Record, House, at H11229; and January 2, 1971 Congressional Record, Extension of Remarks, at E11001). The definition currently in effect lists specific target groups, which has tended to restrict States in their development of disadvantaged projects, in a manner inconsistent with congressional intent. It is hoped that the new definition will increase flexibility while providing the States with guidance as to what is meant by the statutory term "disadvantaged". It is not intended that the term "disadvantaged" include groups such as the physically handicapped or the institutionalized, except to the extent that any handicapped or institutionalized person is also a "disadvantaged" person as defined in § 770.4(c) of these final regulations.

Comment. Several commenters felt that "planning" should be included in the definition of "interlibrary cooperation".

Response. No change has been made. The definition of "interlibrary cooperation" in these final regulations, at § 770.4(c), does not include "planning" (nor does the current regulatory definition at § 770.3(b) include "planning") because although "planning" may be necessary for, and closely related to, a given program activity such as "interlibrary cooperation", it is not necessary to include the planning process in the definition of that activity. Moreover, it should be noted that § 770.31 (Interlibrary cooperation) of these regulations states clearly that funds may be used for planning purposes as specified in Sec. 302(a)(1) of the Act. Thus, planning for and taking other steps leading to the development of cooperative library networks would, of course, be a permissible purpose under Title III of the Act, even though

"planning" is not included in the definition of "interlibrary cooperation."

Comment. Several commenters felt that the definition for limited English-speaking ability was too restrictive in that it was applicable only to formal educational school settings and not to public libraries.

Response. No change has been made. Under the Education Amendments of 1974 (Pub. L. 93–380), the Library Services and Construction Act was amended to include library services for persons of limited English-speaking ability. The applicable definition, required by Sec. 6(b)(4) of the Act, is that of Sec. 703(a) of Title VII of the Elementary and Secondary Education of 1965, as amended, 20 U.S.C. 2701 *et seq.*, which cannot be changed except by legislative amendment.

Comment. One commenter felt that the "existing language" of the definition of the term "limited English-speaking ability" was preferable to that of the definition quoted in the NPRM.

Response. No change has been made. Section 6(b)(4) of the statute mandates that the definition of "limited English-speaking ability" found in Sec. 703(a) of Title VII of the Elementary and Secondary Education Act of 1965, as amended (ESEA), 20 U.S.C. 2701 *et seq.*, be used in defining the term for purposes of the LSCA. Pursuant to Sec. 6(b)(4), it is clear that the entire definition of the term is applicable, not portions thereof. Moreover, the entire definition, as it has appeared in the ESEA, has applied to the term since July 1, 1974 pursuant to Sec. 197 (b) and (c) of Pub. L. 93–380, regardless of whether it has or has not been quoted in its entirety in the program regulations.

Section 770.10 The State plan and the State advisory council on libraries.

Comment. Several commenters requested that membership requirements currently in § 770.4(b) of the regulations be retained in § 770.10(a)(4). The current advisory council membership requirements are that the councils must include persons broadly representative of public, school, academic, special, and institutional libraries, as well as of libraries serving the handicapped. The current regulations, at § 770.4(b), also require that State advisory councils on libraries be broadly representative of the users of these various types of libraries, that "users" comprise at least one-third of the council, and that at least one member be representative of disadvantaged persons.

Response. No change has been made. Sec. 3(8) of the Act, pursuant to which State advisory councils are to be established, requires these councils to be broadly representative of public, school, academic, special, and institutional libraries and libraries serving the handicapped in the States and of persons using such libraries, including disadvantaged persons within each State. The State library administrative agency for each State retains the discretion of fulfilling this requirement in a manner it deems appropriate, so long as the advisory council in any given State is "broadly representative" of each of the libraries named.

Comment. One commenter wanted an explanation of what is meant in § 770.10 of the NPRM by the phrase: "the State plan shall be made public."

Response. In requiring the State plan to be made public it is intended that at a minimum, the State library administrative agency make the State plan available for inspection or copying or both at its main office.

Section 770.12 Criteria for determining the adequacy of public library services.

Comment. The current regulations (§ 770.17) require that in determining the adequacy of public library services to geographical areas and groups of persons, the State must give special consideration to the library needs of certain named groups. Several commenters expressed the desire that groups currently named in § 770.17 as being due special consideration, but not named in § 770.12 of the NPRM, be retained.

Response. No change has been made. Sec. 6(b)(4) of the Act requires States to include in their basic State plans criteria to be used in determining the adequacy of public library services in geographical areas and for groups of persons in the State, including criteria designed to assure that priority will be given to programs or projects which serve areas with (1) high concentrations of low-income families, and (2) high concentrations of persons of limited English-speaking ability. However, Sec. 6(b)(4) does not require that the other "special populations" currently included in § 770.17 be assigned priority. Thus, § 770.12 of the NPRM and these final regulations require no more than the statute mandates.

Comment. One commenter expressed the opinion that the terms "urban" and "rural" should be deleted from § 770.12(a). Under § 770.12 of the NPRM, among the criteria for determining the adequacy of public library services in geographical areas and for groups of persons in the States, the State must include criteria which assure that priority will be given to programs or projects serving "urban and rural areas with high concentrations of low-income families * * *"

Response. No change has been made. The language of § 770.12(a), including the terms "urban" and "rural", is taken from the statute at Section 6(b)(4).

Section 770.13(a)(2)(i) The long-range program.

Comment. Several commenters felt that this section should be clarified to show that under Sec. 6(d)(2) a State's long-range program is to be reviewed and revised annually in accordance with the State's changing needs for assistance.

Response. A change has been made. Section 770.13(a)(2)(i) now reads: "review and revise annually the long-range program in accordance with changing needs of the State for assistance under the Act."

Section 770.13(b)(3)(iv) The long-range program.

Comment. One commenter suggested that there is an inconsistency in requiring criteria, policies, and procedures for Title III and not including such a requirement for Title I in the long-range program.

Response. A change has been made. Section 770.13(b)(3)(iv) has been deleted. Under Sec. 6(d) of the Act, criteria, policies, and procedures exclusively for Title III are not required. Rather, States must set forth a program under which all funds received under the Act will be used, as is already stated in § 770.13(b)(2).

Section 770.14 The Annual Program.

Comment. Several commenters wanted the criteria for the allocation of Title I funds (§ 770.14(c)) and provisions dealing with major urban resource libraries (§ 770.14(d)) placed under the long-range program, and the maintenance of effort requirements for institutional libraries, deleted.

Response. No change has been made. Section 103 of the Act places the criteria for the use of Title I funds and major urban resource libraries in the annual program. The maintenance of effort requirements for State institutional library services and library services to the physically handicapped are statutory and are also set forth in Sec. 103 (State Annual Program for Library Services) the Act.

Comment. One commenter asked whether under § 770.14(d), the provision on expenditure of funds for major urban resource libraries requires a State to maintain the same level of spending on such libraries in a year when the State

receives "set-aside" funds under Sec. 102(c), as it had in the year preceding the Sec. 102(c) determination, even though the Federal appropriation may be below that of the preceding year.

Response. Based upon the language of Sec. 103(5), in a year when a State receives "set-aside" funds for major urban resource libraries pursuant to a Sec. 102(c) determination, which would be in a year that Title I appropriations exceed $60,000,000, it may not reduce the amount paid to a given major urban resource library below the amount paid to that library in the preceding year. The legislative history of this prohibition against reduction of the level of spending for years where Title I appropriations exceed $60,000,000, indicates congressional intent that funds allocated pursuant to Sec. 102(c) be used by the States in a supplemental fashion. By including Sec. 103(5) in the 1977 amendments to the Act, it is believed that Congress intended to prevent States from using money made available under Sec. 102(c) in place of existing funds spent on major urban resource library programs. (See House Conference Report No. 95-607, 95th Cong., 1st Sess. at 7). In response to the commenter, the requirement in § 770.14(d) remains in effect regardless of any decline in Title I appropriation. Of course, for any year that the Title I appropriation does not exceed $60,000,000, States need not concern themselves with the Sec. 103(5) and § 770.14(d) requirement as no set-aside funds would be available for major urban resource libraries.

Section 770.20 State and local spending requirements as conditions for payment to the States.

Comment. One commenter suggested that maintenance of effort requirements be deleted for Title I.

Response. No change has been made. Sections 7(a) (1)(B) and 7(a)(2) of the Act require maintenance of effort on the part of States and on the part of States and local libraries, respectively, receiving Title I funds, and thus the requirement cannot be deleted from the regulations.

Comment. One commenter felt that the "State and local" maintenance of effort requirement of Sec. 7(a)(1)(B) of the Act was meant by Congress to refer only to local maintenance of effort; and that § 770.20(a)(1)(ii) should be changed accordingly.

Response. No change has been made. The statutory language is clear. No payments can be made to any State (except the Trust Territory of the Pacific Islands) from appropriations for the purposes of Title I, for any fiscal year, unless the Secretary determines the following: That "there will be available for expenditure under the programs from *State and local sources* during the fiscal year for which the allotment is made * * * not less than the total amount actually expended, in the areas covered by the programs for such year, for the purposes of such programs from such sources in the second preceding fiscal year * * *" (emphasis added) (LSCA, Secs. 7(a)(1) and 7(a)(1)(B)). This requirement is one of joint maintenance of State and local effort.

Section 770.31 Interlibrary cooperation.

Comment. Two commenters felt that by using the term "cooperative library networks", activities such as collection of statistics, compilation of directories, and union lists would not be allowable expenditures.

Response. No change has been made. Sec. 302 (Uses of Federal Funds) requires that Title III grants be used "(1) for planning for, and taking other steps leading to the development of, cooperative library networks; and (2) establishing, expanding, and operating local, regional, and interstate cooperative networks of libraries, which provide for the systematic and effective coordination of the resources of school, public, academic, and special libraries and information centers for improved supplementary services for the special clientele served by each type of library or center." Generally, there is no restriction placed on "activities" to reach these goals so long as the activities engaged in are in the course of "carrying out the State plan as it relates to interlibrary cooperation," as required by Sec. 301 of the Act, and as long as the costs, incurred by these activities are allowable under the Act and under the Cost Principles of 34 CFR Part 74, Appendix C. In general, the activities mentioned by the commenter, namely the collection of statistics and the compilation of directories and union lists, when conducted in the course of planning for or operating a cooperative library network which provides for the "systematic and effective coordination of * * * resoureces * * *" (LSCA, Sec. 302(a) (2)), would be allowable under these final regulations.

Comment. One commenter suggested that the phrase "but is not limited to" should be inserted after the word "includes" in this provision governing the use of Title III funds. The commenter felt that the insertion of this phrase would permit States to use Title III funds for "developmental thrusts other than establishing and funding permanent cooperatives", and that, presumably, such forms of spending would be permissible under the LSCA.

Response. No change has been made. This provision implements Sec. 302(a) of the Act which requires that Title III funds be used, among other things, for "planning for, and taking other steps *leading to the development of,* cooperative library networks * * *" (emphasis added). It is not entirely clear what the commenter means when referring to developmental thrusts *other* than those leading to the establishment of cooperative networks. However, it is believed that whatever interlibrary planning or development activities a State might undertake and wish to fund in part with Title III moneys, the State must intend for such planning and development to result, ultimately, in one or more cooperative library networks.

Comment. One commenter felt that the proposed regulations at § 770.31 emphasized "networks" rather than cooperation and that such language would exclude cooperative projects that did not fit into a formal network structure.

Response. The distinction between a "formal" network structure and an "informal" network structure is not made clear by the commenter. However, neither the statute nor these final regulations preclude the use of Title III funds for any form of interlibrary cooperation project so long as the project is used to promote the systematic and effective coordination of the resources of the libraries involved in the project, and otherwise complies with applicable statutory and regulatory requirements.

Comment. One commenter asked whether a "network" must include a public library.

Response. As a matter of policy and in furtherance of the general purpose stated in Sec. 2 of the Act, States are strongly encouraged to include public libraries in all interlibrary cooperative networks. However, the inclusion of public libraries in all interlibrary cooperative networks is not clearly mandated by the statute nor is it required by these final regulations.

Section 770.32 Use of Federal funds by State library administrative agency.

Comment. Two commenters inquired as to whether the deletion of "training" from this section meant either that the use of LSCA funds for training was now considered impermissible or that training was now considered implicitly included under other definitions of "service".

Response. No change has been made. Generally, the cost of training and education are allowable under 34 CFR Part 74, (Appendix C, Principles for

Determining Costs Applicable to Grants and Contracts with State and Local Governments), which provides in Part II, B.26: "The cost of in-service training, customarily provided for employee development which directly or indirectly benefits grant programs, is allowable. Out-of-service training involving extended periods of time is allowable only when specifically authorized by the grantor agency."

Comment. One commenter felt that this provision of the NPRM—dealing with costs of administration of the LSCA program—conveyed an implicit prohibition against the use of LSCA funds for indirect costs.

Response. No change has been made. Pursuant to Sec. 102(b) of the Act, costs incurred by the State in administering State plans submitted under the Act, may be covered with Title I funds, subject to the match requirement of Sec. 8. Section 770.32(f) of the NPRM and of these final regulations sets out the types of administrative activities for which Title I funds may be expanded, as contained in Sec. 102(b) of the Act. To the extent that a State expects to incur indirect administrative costs as a result of its LSCA program, an indirect cost rate may be negotiated with the cognizant Federal agency for that State pursuant to the provisions of 34 CFR Part 74, Appendix C, and 34 CFR 75.560 and 75.561.

Removal of Title IV (Older Readers Services) from the regulations

Comment. Several commenters wanted the regulatory provisions for Older Readers Services retained.

Response. No change has been made. Although the Library Services and Construction Act was amended by Pub. L. 93–29, Older Americans Comprehensive Services Amendments of 1973, to include Title IV, this Title has never been funded and no specific funding authority was given in the Omnibus Budget Reconciliation Act of 1981. Thus, § 770.23 of the current regulations as well as other references to Title IV, have been eliminated.

Part VIII

Department of Agriculture

Food and Nutrition Service

7 CFR Part 245

Verification of Eligibility for Free and Reduced Price Meals in Schools; Proposed Rule

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Part 245

Verification of Eligibility for Free and Reduced Price Meals in Schools

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed rule.

SUMMARY: On March 25, 1983, the Department published an interim rule which established minimum verification requirements for a sample of applications for school meal and milk benefits in each School Food Authority in the National School Lunch, School Breakfast and Special Milk Programs for School Year 1983–84 and subsequent school years. This proposed rule responds both to the comments received and to the results of the income verification pilot study mandated by Pub. L. 97–35. This proposed rule would: (1) Allow use of an alternate verification method which focuses on those applications more likely to contain errors and which require fewer verifications; (2) Require additional income information on the free and reduced price application; (3) Allow food stamp households to provide their Food Stamp Program case number in lieu of income information on the application; (4) Require that households selected for verification receive written notice of selection; and (5) Require verification activity to be completed by each School Food Authority by November 15 of each school year. This proposed rule is intended to facilitate the certification process, to reduce program abuse and to result in an additional savings of Federal funds.

DATE: To be assured of consideration comments must be postmarked on or before April 30, 1984.

ADDRESSES: Comments should be sent to Stanley C. Garnett, Branch Chief, Policy and Program Development Branch, Child Nutrition Division, Food and Nutrition Service, USDA, Alexandria, Virginia 22302. All written submissions will be available for public viewing in Room 509, 3101 Park Center Drive, Alexandria, Virginia 22303, during regular business hours (8:30 a.m. to 5:00 p.m.) Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Garnett at the address listed above, or call (703) 756–3620.

SUPPLEMENTARY INFORMATION:

Classification

This proposed action has been reviewed under Executive Order 12291 and has been classified not major. We anticipate that this proposal will not have an impact on the economy of more than $100 million. The proposed rule will decrease administrative costs by providing States, School Food Authorities and institutions more flexibility in administering the National School Lunch Program. No major increase in cost or prices for program participants, individual industries, Federal agencies, or geographic regions is anticipated. The proposal is not expected to have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S. based enterprises to compete with foreign-based enterprises in domestic or foreign markets.

This proposal has also been reviewed with regard to the requirements of Pub. L. 96–354, the Regulatory Flexibility Act. The Administrator of the Food and Nutrition Service (FNS) has certified that this proposal will not have a significant economic impact on a substantial number of small entities. The substance of this rule provides schools with an alternative method of conducting verification. The Department believes this alternative will reduce the administrative burdens associated with the current rule.

In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96–511), the reporting and recordkeeping requirements contained in this proposed rule will be submitted to the Office of Management and Budget (OMB) for approval. They are not effective until OMB approval has been obtained.

The Administration of the Food and Nutrition Service has determined that an urgent need exists to limit the comment period to 30 days since the provisions of this rule directly affect the application and verification process for School Year 1984–85. In order to meet the timeframes required by States and School Food Authorities for effective implementation by the beginning of the next school year, a short comment period is necessary for this proposed rule.

Background

On March 25, 1983, for the National School Lunch, School Breakfast and Special Milk Programs, the Department published an interim rule in the **Federal Register** (48 FR 12505) which recommended minimum verification requirements for a sample of applications in each School Food Authority for School Year 1982–83 and required minimum verification standards in School Year 1983–84 and subsequent school years. An initial comment period of 60 days was subsequently extended until November 30, 1983, to allow commentors to gain operational experience with verification. A total of 183 comments were received on the interim rule. Commentors represented State educational personnel, School Food Authority personnel, private citizens, advocacy groups, and professional organizations. The Department would like to thank all commentors who responded to the interim rule. Especially appreciated were the suggestions based on practical experience which were helpful in the development of this proposed rule.

The interim rule on verification was developed in response to Congressional concern regarding fraud and abuse in federally supported school meal programs. This concern was reflected in Pub. L. 97–35, which also mandated that the Department conduct a pilot study of verification procedures designed to reduce fraud and abuse in these federally supported programs. This study, *The Income Verification Pilot Project,* involved a large-scale nationally representative test of a variety of quality assurance procedures conducted in 114 School Food Authorities during the 1982–83 School Year. These procedures were designed to deter household misreporting on the free and reduced price application and to enable School Food Authorities to verify income information submitted on these applications. One of the major findings of this study was that a revised application which requests income by source and by household member can significantly reduce misreporting. The study also determined that costs associated with this revised application are relatively low. The second major study finding concerns the method by which applications are selected for verification. The study reveals that it is significantly more cost-effective to verify applications which have been identified as likely to be high in error, "focused sampling", rather than to select applications by chance, "random sampling." The study revealed that non-food stamp household applications and, in particular, applications reflecting household income within $1200 of the annual income eligibility limit, are more likely to contain errors.

The remainder of this preamble will discuss the major concerns expressed by commentors on the interim rule and the findings of the pilot study as they affect this proposed rule.

General Comments on Interim Rule

Eighty-seven commentors expressed concerns regarding the increased administrative reponsibility associated

with verification. These commentors viewed the interim rule as requiring increased paperwork and staff time with resultant increases in administrative costs to School Food Authorities. While the Department recognizes that there are additional responsibilities associated with verification, the Department believes that current verification requirements are both reasonable and supported by Congressional intent. However, in response to these comments and the findings of the pilot study, the Department is proposing both an alternative system of verification and streamlined application/certification procedures for food stamp recipients (discussed later in the preamble). As an alternate to the 3 percent verification requirement contained in the interim rule, School Food Authorities may choose to verify approximately half as many applications if "focused sampling" is used to identify applications. This new option would require that School Food Authorities verify the eligibility of a sample of applications, selected from non-food stamp households claiming monthly or yearly income within specified dollar amounts below the eligibility limit. The dollar amount is within $100 for monthly income or $1,200 for yearly income. The number of applications reviewed for this group must be the lesser of 1,000 or 1 percent of the total applications certified by the School Food Authority. School Food Authorities choosing the new option would also be required to confirm food stamp recipient status of the lesser of one half of 1 percent or 500 applications of food stamp households that provided food stamp case numbers in lieu of income information on the application. This means that those School Food Authorities which select the new verification option will be required to perform less than half as many verifications as those School Food Authorities which select the current 3 percent verification requirement. Since the new optional verification method utilizes a focused sampling which identifies applications most likely to be in error, the Department is proposing to reduce the number of applications which must be verified. By providing School Food Authorities the flexibility to determine the verification method most suitable to local conditions, the Department believes that the administrative task may, in many cases, be reduced.

Twenty-five commentors stated that they did not believe that the level of fraud and abuse in school meal programs supported the need for any verification system. In the 1981 report entitled, "Nationwide Statistical Sample of Program Participation for May, 1980 and Verification of Free and Reduced Price Application Information," the Office of Inspector General (OIG) estimated that, prior to implementation of a verification system, approximately one of every four recipients of free and reduced price school means was receiving benefits improperly. The pilot study also confirmed that a number of recipients were not eligible for the benefits they were receiving. Further, the pilot study findings revealed that the use of an improved application, which requires that income information be identified by source and by individual household member, significantly reduced misreporting. These commentors also suggested that the administrative costs associated with verification would exceed any cost savings achieved by a verification system. The pilot study suggests that significant and worthwhile improvements in program integrity are likely to occur with a limited verification system which focuses on deterrence rather than detection. While direct recoveries or cost savings achieved through individual verification efforts may not equal the initial cost of verification, the overall deterrent effect of this verification system over time is likely to be cost-effective. Therefore, the Department is proposing that the application for free and reduced-price benefits be modified to include income information identified by source and by household member, and an abbreviated verification requirement is offered.

Thirteen commentors suggested that additional administrative funds be provided to School Food Authorities to cover the administrative costs associated with verification. Currently, program legislation contains no authorization for payment of local administrative costs. The Department recognizes that there are additional responsibilities associated with the verification process, but given the size of the verification sample and the magnitude of abuse cited by OIG, the Department does not believe that the verification responsibility imposed by the interim rule or this proposed rule is disproportionate. In most cases, the responsibility should be absorbed by existing staff and should not require additional personnel. However, this proposed rule does provide School Food Authorities with an alternative method of verification at lower administrative cost. Utilization of the focused method of verification will permit School Food Authorities to substantially reduce the number of verifications required by focusing on these applications most likely to contain errors.

More importantly, in an effort to simplify the application/certification process for School Food Authorities as well as applicants, the Department is proposing to allow food stamp households to establish eligibility without completing the income portion of the application. In many school districts, the majority of households receiving free meal benefits are also food stamp recipients. The certification process will be much faster for all such applicant households which choose to provide food stamp case numbers instead of income information. The school officials will quickly determine eligibility without calculating each household's monthly or annual income. The administrative time saved here should exceed that consumed by either verification method utilized by the School Food Authority.

Thirty-two commentors objected to the potential for the educator to be considered an investigator. These commentors believed that this perception will damage the educator's relationship with parents. The Department has intentionally provided flexibility for the State agency and local School Food Authorities to fulfill verification responsibilities. The Department believes that this flexibility should permit an adequate verification system which protects the parent-educator relationship. Both the interim rule and this proposed rule permit School Food Authorities to utilize non-teaching staff rather than educators to perform verification functions. School Food Authorities may opt to place verification responsibilities completely with non-teaching staff to avoid any possibility of endangering the parent-educator relationship.

Seventeen commentors believed that it is impossible to completely verify income if such income is not reported on the application. The Department believes that collecting income information by source and by household member, as required by this proposed rule, will alleviate much of this problem. While the Department does not expect that all failure to report income will be deterred or detected during verification efforts, the Department believes that this proposed rule represents a significant contribution to program integrity.

The pilot study findings show that an improved application, as proposed in this rule, successfully reduced misreporting especially among ineligible households. By gathering more complete information on the application, the

Department believes that the proposed improved application addresses the concerns of these commentors.

Three commentors believe that collection of social security nubers alone is sufficient to deter misreporting of income. This belief finds little support in the pilot study which suggests that more effective deterrance is predicated on an improved application/verification system as proposed by this rule.

Eleven commentors believed that verification should be a State agency/local School Food Authority option. Several of these commentors stated that their School Food Authority routinely verifies questionable applications. The Department believes that the degree of abuse identified by OIG requires that verification be mandatory on a national basis. While some individual School Food Authorities may, in prior years, have performed verification under certain circumstances, the abuse identified by OIG was national in scope and requires a consistent national response. Although both the interim rule and this proposed rule provide considerable flexibility to local School Food Authorities, the obligation to perform a minimal amount of verification is not optional.

Fourteen commentors expressed concern that children will be penalized by uncooperative parents and suggest that verification requirements may so frighten eligible households that they will not apply. The Department shares the concern that verification activity may discourage eligible applicants and wishes to point out that if a needy family fails to apply, School Food Authorities may complete and file an application for the children by using the best income and family size information available. This procedure may only be used in individual cases, not as a common form of certification.

Fourteen commentors objected to mandatory verification procedures prior to the final evaluation of the results of the pilot study on verification. In *Ernest Sargent et al.* v *John R. Block* (Civil Action No. 83–2727) the Court held that implementation of a mandatory verification system prior to the completion of the pilot study was consistent with the Department's statutory authority. Further, the results of the pilot study are now available, and the Department is proposing the improved verification system contained in this rule in response to the findings of that pilot study.

Twenty commentors suggested that verification activities be placed in either local food stamp or other welfare offices more familiar with verification requirements. The Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97–35) specified that the responsibility for verification is to be assumed by States and School Food Authorities. Consequently, the Department has imposed the primary administrative responsibility for conducting verification upon State and local school officials.

Two commentors sugested that households be required to submit income tax records at the time of application. The pilot study on verification found that requiring income documentation at the time of application did not produce a significant reduction in misreporting over and above that achieved by an improved application. Further, such income documentation resulted in a barrier to participation by eligible households. Given these two study outcomes, the Department does not believe that such a documentation requirement would be productive, and is very concerned that eligible applicants may be barred from applying for benefits under such a system.

Seven commentors suggested that verification should be required or allowed at the time of application. This proposed rule requires that households selected to provide verification information be given written notice of such selection and adequate time, as determined by the School Authority, to reply. In addition, any verification system selected must not unduly delay or deny the access of eligible children to program participation pending verification. Therefore, the Department believes that this type of verification is not possible.

Section 245.2 Definitions.

Four commentors addressed the interim definition of verification. The interim rule defined verification as " * * * confirmation of eligibility for free or reduced price benefits under the Program. At a minimum, verification shall include confirmation of income eligibility and, at State or local discretion, verification may also include confirmation of household size."

Two commentors believe that the current definition should include mandatory verification of household size. The Department believes that the current definition provides the flexibility to State agencies and School Food Authorities necessary for effective implementation of any verification system. If it is determined that verification of household size on either a State or local basis is appropriate, the current definition provides the authority for this decision.

Two commentors suggested additions to the definition section. One commentor suggested that definitions of written evidence, collateral contact and system of records be included in the definition section. The Department has provided lengthy descriptions of these sources of information at § 245.6(b) and does not believe any additional clarification would be provided by duplicating this material in the definition section.

Section 245.6(a) Verification Requirements.

Sample Size: Seven commentors addressed the provisions requiring School Food Authorities to verify 3 percent or 3,000 (whichever is less) of approved applications. Six of these commentors suggested that this level or a higher level of verification be required. One commentor suggested that this requirement be phased in over a three year period with 1 percent required the first year, 2 percent the second and 3 percent in the third and subsequent years. Another commentor suggested that recipients of other forms of assistance, such as Aid to Families with Dependent Children (AFDC), be excluded from the sample selected.

Although those commentors which specifically addressed the sample size were, in general, supportive of the number required by the interim rule, the Department is proposing an alternate method of verification in this proposed rule. This focused method of verfication consists of selecting and verifying the lesser of 1 percent or 1,000 of total applications selected from non-food stamp households claiming monthly income within $100 or yearly income within $1200 below the income eligibility limit and the lesser of one-half of one percent or 500 applications of food stamp households that provided food stamp case numbers in lieu of income information. Selection of applications which claim income within specified limits below the income eligibility cutoff has been determined by the pilot study to sharply increase the likelihood of identifying applications which contain misreported income information. Verification of households which elect to provide their food stamp case numbers rather than provide income information is necessary to reduce the chance of households falsely claiming to be food stamp recipients to avoid verification of eligibility. Verification of households supplying food stamp numbers can be accomplished by submitting a list of names and food stamp case numbers to the food stamp office for confirmation of participation, or at School Food Authority discretion, the household may be asked to provide evidence of eligibility for food stamps

by providing the "Notice of Eligibility" which is issued to the household periodically and which states the period of eligibility for food stamp benefits.

The Department believes that by providing alternate methods of verification the administrative responsibilities related to verification cited by other commentors will be reduced while maintaining an improved level of verification activity.

Five Month Timeframes

A total of fourteen commentors addressed the timeframe for completion of verification requirements by School Food Authorities. Two commentors supported the five month timeframe as adequate, while the remainder believed that five months was not sufficient for a variety of reasons. In this proposal the Department has replaced the five month timeframes with a specific deadline of November 15 of each school year. The Department recognizes that this fixed date may impose a more difficult task on those School Food Authorities which open schools later in the school year. However, the Department believes that it is necessary to identify ineligible recipients as soon as possible and thereby reduce the loss to the Federal Government. Further, completion of verification activity in School Food Authorities by November 15 will provide State agencies sufficient time to perform the monitoring activities required of them during the school year. The Department believes that the proposed streamlined application certification procedures for food stamp households discussed earlier in this preamble will allow school officials to complete the application process more quickly than in previous years. Such expedited procedures will allow school officials to proceed with verification much earlier in the school year. In addition, this proposed rule provides an alternative method of verification which reduces the number of verifications required for School Food Authorities. These provisions should eliminate the need for an extensive period of time for completion of verification. Therefore, the Department is proposing that verification be completed by November 15 of each school year. However, the Department recognizes that under certain circumstances, such as strikes which delay the start of the school year, it may be necessary to extend the time for completion of verification activity. Therefore, this proposed rule provides that extensions may be granted in writing by FNS.

Section 245.6(a)(1) Confirmation of income information.

Verification shall not delay approval of applications: A total of ten commentors addressed this provision. One commentor opposed requiring additional documentation with the application suggesting that this could discourage eligible families from applying. Seven commentors suggested that this section be amended to allow additional information requested with the application to be considered in the application review process if such verification does not delay the approval process. Several commentors suggested that all applications be verified to identify all ineligible applicants.

The pilot study indicates that requiring additional documentation at the time of application discourages some eligible households from applying and does not substantially reduce misreporting. This proposed rule establishes minimum verification requirements and does not prevent a School Food Authority from verifying all applications. The proposed rule, like the interim rule, requires that verification efforts shall not unduly delay the approval of applications. The Department is concerned that verification efforts at the time of application review could prevent prompt approval activity. Therefore, this proposed rule requires that households selected to provide verification information be given written notice of verification and adequate time, as determined by the School Food Authority, to reply. This proposed rule precludes requiring documentation at the time of application.

Confirmation of income: One commentor addressed this provision. This commentor suggested that vertification be focused on the validity of the income figure submitted on the application at the time of application and not income from a later period. This proposed rule provides that verification be completed by November 15 of each school year. This requirement should move many verifications much closer to the month of application thereby reducing the time lag which concerns this commentor. It should be noted however that both verification and continued eligibility are based on the most recent income of the household and not that received in the month of application.

Section 245.65(a)(2) Notification of Selection.

Sample Selection: The interim rule provided maximum State and local flexibility in the selection of applications to be verified. There were sixteen commentors who addressed sample selection. These commenters, in general, suggested that they desired additional guidance and direction on sample selection in order to avoid the potential for discriminatory selection. In response to these comments and to the pilot study findings, the Department is proposing an alternate method of verification which focuses on those applications most likely to contain errors. This method, if selected by School Food Authorities, will provide a clear and non-arbitrary standard for seletion of applications as requested by these commentors.

One commentor requested clarification of the need to nofity households when the School Food Authority is using a system of records to verify eligibility. The interim rule and this proposal both require that households asked to provide information be notified. However, when a system of records to which the school may legally gain access is utilized, schools would not be required to notify households. Of course, this presupposes that the application submitted by these households contains a statement, as required by the Privacy Act, to the effect that social security numbers may be utilized for vertification activity.

School Conferences: Three commentors questioned the provision which describes a school conference as a method of verification. The Department agrees that the language contained in the interim rule at § 245.6a(b)(4) concerning school conferences is confusing. The Department has determined that these conferences are not a method of verification but rather a situation in which verification activity may take place. Therefore, the Department is proposing in this rule that references to school conferences as a method of verification be eliminated. However, the Department wishes to emphasize that it views formal and informal discussion between parents and representatives from the School Food Authority as practical methods to expedite the verification process.

Special Milk Program: The Department is proposing in this rule to eliminate references to verification in the Special Milk Program for Children (Part 215). The Department believes that the potential for abuse in the Special Milk Program does not justify the administrative costs associated with a verification system.

Summary of Proposed Changes: This proposed rule would implement several changes in the verification procedures

required by the interim rule. These major changes are: (1) An alternative method of verification which focuses on those applications more likely to contain errors. School Food Authorities selecting this method must verify the eligibility of the lesser of 1 percent or 1,000 of total applications selected from the non-food stamp applications on file as of October 15. In addition, the School Food Authority must confirm the food stamp recipient status of the lesser of one half of 1 percent or 500 applications for food stamp households which provide food stamp case numbers in lieu of income information. (2) An improved application for free and reduced price meals which requires applicants to provide total household income identified by source of income for each household member. (3) Households selected to provide verification information shall receive written notice of selection and adequate time for response. (4) Verification activity shall be completed by each School Food Authority by November 15 of each school year.

Commentors are requested to direct their comments to those major proposed changes as summarized above and other conforming proposed changes as discussed in the preamble. Commentors are specifically requested not to comment on those provisions of the interim rule not modified by this proposed rule since the opportunity for comment on provisions in the interim rule was previously provided.

List of Subjects in 7 CFR Part 245

Food assistance programs, Grant programs—social programs, National school lunch program, School breakfast program, Special milk program, Reporting and recordkeeping requirements.

PART 245—DETERMINATION OF ELIGIBILITY FOR FREE AND REDUCED PRICE MEALS AND FREE MILK IN SCHOOLS

Accordingly, Part 245 is proposed to be amended as follows:

1. In § 245.2, paragraphs (a–3) and (k) are revised as follows:

§ 245.2 Definitions.

* * * * *

(a–3) "Documentation" means the completion of the following information on a free and reduced price application: (1) Names of all household members; (2) social security number of each adult household member or an indication that a household member does not possess one; (3) household income received by each household member, identified by source of income (such as earnings, wages, welfare, pensions, support payments, unemployment compensation, and social security) and total household income; or in lieu of income information, the Food Stamp Program case number for those households currently receiving food stamps; and (4) signature of an adult member of the family.

* * * * *

(k) "Verification" means confirmation of eligibility for free or reduced price benefits under the National School Lunch Program or School Breakfast Program. At a minimum, verification shall include confirmation of income eligibility or current participation in the Food Stamp Program. At State or local discretion, verification may also include confirmation of household size.

2. In § 245.5, paragraph (a)(1)(iii) is revised; paragraphs (a)(1) (iv) through (x) are redesignated as paragraphs (a)(1) (v) through (xi); and a new paragraph (a)(1)(iv) is added. The revision and addition read as follows:

§ 245.5 Public announcement of the eligibility criteria.

(a) * * *

(1) * * *

(iii) An explanation that in order to be considered eligible for free or reduced price benefits, an application must contain complete documentation of eligibility information including names of all household members, social security numbers of all adult household members or an indication that a household member does not possess one, total household income and the amount and source of income received by each household member, and the signature of an adult household member; (iv) an explanation that households currently receiving food stamps may submit their Food Stamp Program case number instead of income information;

* * * * *

3. In § 245.6:

a. Introductory paragraph (a), is amended by revising the third sentence; and by adding two sentences after the fourth sentence;

b. Paragraph (a)(1) is amended by adding the words "contacting a Food Stamp Office to determine current receipt of food stamps," between the words "determine income," and "contacting the State" in the fifth sentence;

c. Paragraph (a)(2) is amended by removing the second sentence; and

d. Paragraph (d) is removed.

The revision and addition reads as follows:

§ 245.6 Application for free and reduced price meals and free milk.

(a) * * * The information requested in the application with respect to the current annual income of the family shall be limited to the total household income, the income received by each member identified by source of income (such as earnings, wages, welfare, pensions, support payments, unemployment compensation and social security). * * * The application shall require applicants to provide total household income and the income received by each household member identified by source of income. The application shall enable households receiving food stamps to provide their Food Stamp Program case number in lieu of income information.

* * * * *

4. In § 245.6a:

a. Introductory paragraph (a) is revised;

b. The first sentence of paragraph (a)(2) is revised;

c. Paragraph (a)(3) is revised; and

d. Paragraph (b) is amended by removing the words "school conferences" in the first sentence, and by removing paragraph (b)(4).

The revisions and addition read as follows:

§ 245.6a Verification requirements.

(a) *Verification Requirement.* Unless a written extension of time is obtained from FNS, by November 15 of each School Year, School Food Authorities shall, at a minimum, select and verify the eligibility of a sample of the approved free and reduced price applications on file as of October 15. School Food Authorities shall satisfy the verification requirement by using either random sampling or focused sampling as described below. *Random* sampling consists of verifying the lesser of 3 percent or 3,000 applications which are selected by the School Food Authority. *Focused* sampling consists of selecting and verifying (1) the lesser of 1 percent or 1,000 of total applications selected from non-food stamp households claiming monthly income within $100 or yearly income within $1,200 of the income eligibility limit for free or reduced price meals; and (2) the lesser of one half of 1 percent (.5%) or 500 applications of food stamp households that provided food stamp case numbers in lieu of income information. School Food Authorities may choose to verify up to 100 percent of all applications to improve program integrity. Any State may, with the written approval of FNS, assume responsibility for complying with the verification requirements of

this Part within any of its School Food Authorities. When assuming such responsibility, States may utilize alternate approaches to verification provided that the results achieved meet the requirements of this Part.

* * * * *

(2) Households selected to provide verification shall be provided written notice that they have been selected for verification and that they are required, by such date as determined by the School Food Authority, to submit the requested verification information to confirm eligibility for free or reduced price benefits.

* * * * *

(3) Verification of the eligibility of households who provide their Food Stamp Program case number on the application in lieu of income information shall be accomplished either by confirming with the local food stamp office that the household is currently receiving Food Stamp Program benefits *or* by obtaining a copy of a current "Notice of Eligibility" for Food Stamp Program benefits from the household. If it is determined that the household is not currently receiving food stamp benefits, the household shall be notified that they shall resubmit a complete application which includes income information and documentation which confirms household income. The School Food Authority shall promptly verify such applications to determine if the household continues to be eligible for benefits.

* * * * *

34 CFR Part 222

School Assistance for Local Educational Agencies in Areas Affected by Federal Activities and Arrangements for Education of Children Where Local Educational Agencies Cannot Provide Suitable Free Public Education; Proposed Rule

DEPARTMENT OF EDUCATION

Office of Elementary and Secondary Education

34 CFR Part 222

School Assistance for Local Educational Agencies in Areas Affected by Federal Activities and Arrangements for Education of Children Where Local Educational Agencies Cannot Provide Suitable Free Public Education

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend those sections of the regulations governing the establishment of local contribution rates under the Impact Aid Program. The rates are used by the Secretary to compute assistance to school districts in federally affected areas.

The Secretary is proposing these changes to clarify the regulations and, thus, provide additional guidance to school districts applying under Pub. L. 81–874 (the Act) for assistance for maintenance and operations.

DATE: Comments must be received on or before May 14, 1984.

ADDRESS: Comments should be addressed to Dr. David G. Phillips, Division of Impact Aid, U.S. Department of Education, 400 Maryland Avenue, SW., Room 2107, Washington, D.C. 20202–6272.

FOR FURTHER INFORMATION CONTACT: Dr. David G. Phillips. Telephone: (202) 245–1975.

SUPPLEMENTARY INFORMATION: Under section 3 of Pub. L. 81–874, commonly referred to as the Impact Aid Program, the Secretary provides to certain local educational agencies (LEAs) assistance for maintenance and operations. LEAs eligible to participate in the program are those providing a free public education to certain types of so-called federally connected children; that is, children who reside on Federal property; children whose parents are employed on Federal property; children residing on Federal property with parents employed on Federal property; and children whose parents are on active duty in the uniformed services.

The proposed amendments to these regulations would affect implementation of section 3 of the Act. This section describes the process by which the Secretary determines payments to eligible applicants.

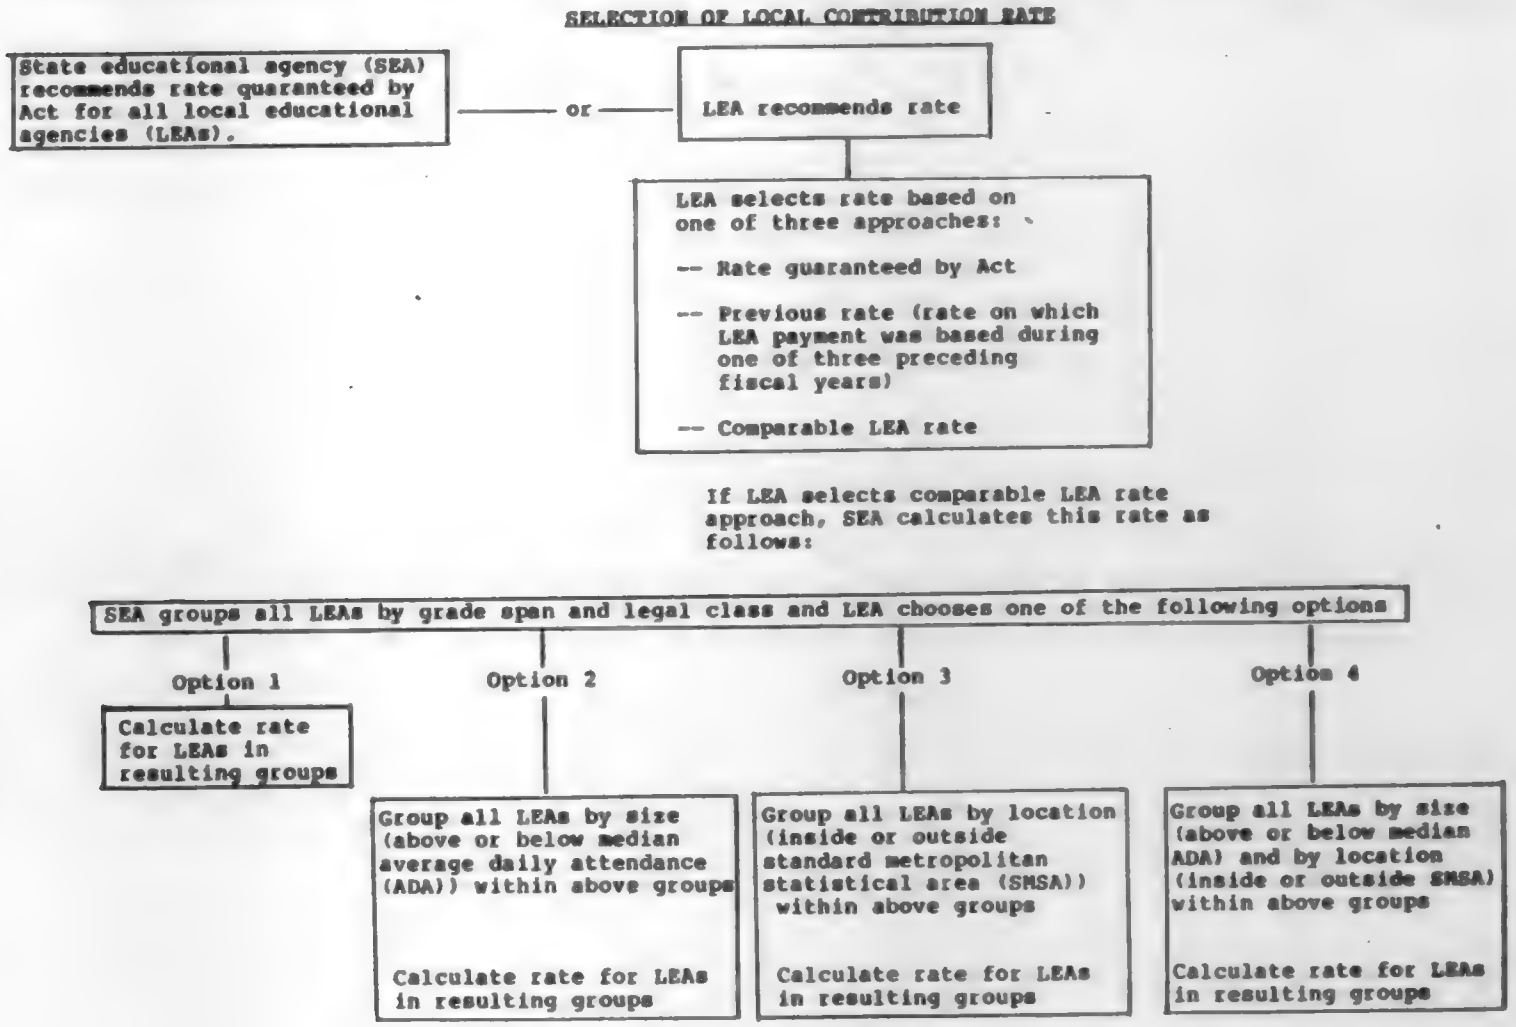
Payments are based on the number and type(s) of federally connected children attending the schools of an applicant LEA and on the applicant's local contribution rate. Among other provisions, section 3 requires the Secretary to establish for each applicant a local contribution rate and, in the case of certain applicants, to determine which LEAs in their respective States are generally comparable to the applicants.

Because of a number of inquiries regarding the methods used by the Secretary to select generally comparable districts, the Secretary has reviewed the current regulations for the program and determined that the provisions governing the methods should be simplified and clarified.

The changes proposed by the Secretary would permit the use of new methods of determining local contribution rates, in addition to rates derived under the two methods known as the "group rate" method and the "individually selected comparable district" method. Under the proposed changes, each LEA and its respective State educational agency (SEA) would have the opportunity to recommend for the Secretary's approval a rate to be used in computing payments to the LEA under section 3 of the program.

The proposed regulations would permit each applicant LEA—unless otherwise precluded by the Act or the regulations from doing so—to recommend a rate, based on one of three methods, to be used by the Secretary in determining the LEA's payment:

- The rate guaranteed by the Act.
- A rate on which the Secretary based the LEA's payment during any one of the three years preceding the year these amended regulations take effect.
- A rate based on appropriate data from generally comparable LEAs within the State. The applicant LEA would identify the generally comparable LEAs—using information supplied by its SEA—and would be permitted to recommend this method provided there were at least 10 LEAs (including the applicant itself, except in certain cases) within the generally comparable group. The regulations also would permit the LEA flexibility in selecting the type or types of LEAs it regards as generally comparable. The following chart depicts the methods described above.



Regardless of the method recommended, no LEA would receive a rate less than the rate guaranteed to the applicant by the Act.

The proposed regulations would also continue the current practice of allowing an SEA to recommend to the Secretary that the local contribution rate for all eligible LEAs in that State be the rate guaranteed by the Act. In that case the Secretary would accept the recommendation, and individual LEAs within the State would not then recommend another method for establishing their respective rates.

The proposed regulations would also clarify the requirements the Secretary applies to any LEA that requests additional assistance under section 3(d)(2)(B) of the Act. The regulations would specify, for example, that if the applicant LEA recommends for its regular payment a method based on generally comparable LEAs in its State, the Secretary uses those same LEAs in determining any additional assistance to the applicant. If an applicant recommends for its regular payment a rate based on the rate guaranteed by the Act or on a rate previously determined for the LEA, the Secretary, for purposes of determining any additional assistance, would regard the applicant LEA as being comparable to all LEAs in its State.

The changes proposed in these regulations would offer applicants a simpler and more flexible approach to the selection of comparable districts than those methods in current use. The proposed methods would reduce significantly the administrative burden for participating school districts that formerly used the "individually selected comparable district" method and would require no additional effort on the part of SEAs.

The Secretary believes that this new approach to selecting generally comparable LEAs is educationally sound. The Secretary considers the approach to be equitable because it is based on objective factors that produce a more uniform method for setting rates—among States as well as within States. For these reasons the Secretary regards this approach as preferable to the current practice.

Except for the changes to provisions governing the local contribution rate and additional assistance under section 3(d)(2)(B), these proposed regulations contain no other changes to the regulations implementing Pub. L. 81–874.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291.

They are classified as non-major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities. The small entities affected by the regulations are small LEAs. The regulations will not

have a significant economic impact on a substantial number of small LEAs because they permit three types of methods to be used in determining an LEA's local contribution rate, including a rate on which the Secretary based the LEA's payment during any one of the three years preceding the year these regulations take effect.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations. Written comments and recommendations may be sent to the address given at the beginning of this document. All comments submitted on or before (the 45th day after publication of this document) will be considered before the Secretary issues final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 2107, 400 Maryland Avenue SW., Washington, D.C., between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

Paperwork Reduction Act

The information collection requirements in these proposed regulations will be submitted to the Office of Management and Budget for review under the Paperwork Reduction Act of 1980.

Comments concerning information collection requirements only should be addressed to the Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, 17th and Pennsylvania Avenue NW., Washington, D.C. 20503, Attention: Desk Officer for the U.S. Department of Education.

All other comments regarding these proposed regulations should be sent to the Department of Education at the address given at the beginning of this preamble.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act and their overall requirements of reducing regulatory burden, public comment is especially invited on whether there may be further opportunities to reduce any regulatory burden found in these proposed regulations.

List of Subjects in 34 CFR Part 222

Education, Education of the handicapped, Elementary and secondary education, Federally affected areas, Grant programs—education, Public housing.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations.

(Catalog of Federal Domestic Assistance No. 84.041, School Assistance in Federally Affected Areas—Maintenance and Operations)

Dated: March 27, 1984.

T. H. Bell,

Secretary of Education.

The Secretary proposes to amend Part 222 of Title 34 of the code of Federal Regulations as follows:

PART 222—ASSISTANCE FOR LOCAL EDUCATIONAL AGENCIES IN AREAS AFFECTED BY FEDERAL ACTIVITIES AND ARRANGEMENTS FOR EDUCATION OF CHILDREN WHERE LOCAL EDUCATIONAL AGENCIES CANNOT PROVIDE SUITABLE FREE PUBLIC EDUCATION

1. The table of contents for Subpart D of Part 222 is revised to read as follows:

Subpart D—Generally Comparable Local Educational Agencies; Local Contribution Rates

Sec.

222.30 Determination of local contribution rates: general.
222.31 Recommendation of local contribution rate.
222.32 Local contribution rate guaranteed by the Act.
222.33 Local contribution rate based on generally comparable LEAs.
222.34 Selection of generally comparable LEAs.
222.35 Computation of local contribution rates.
222.36 Determination of additional assistance.

2. Subpart D of Part 222 is revised to read as follows:

Subpart D—Generally Comparable Local Educational Agencies; Local Contribution Rates.

§ 222.30 Determination of local contribution rates: general.

(a) Before computing the amount to be paid to an applicant local educational agency (LEA) under section 3 of the Impact Aid Program, the Secretary—after consultation with the LEA and its State educational agency (SEA)—determines the LEA's local contribution rate.

(b) The provisions in §§ 222.30 through 222.36 describe the methods that may be recommended by SEAs and LEAs to be used the Secretary in the determination of local contribution rates.

(c) Except as specified in § 222.31(c), the provisions in §§ 222.30 through 222.36 apply to all applicant LEAs except those located in—

(1) Puerto Rico;
(2) Wake Island;
(3) Guam;
(4) American Samoa;
(5) The Northern Mariana Islands;
(6) The Virgin Islands;
(7) Any State in which a substantial portion of the land is in unorganized territory; and
(8) Any State in which there is only one LEA.

(20 U.S.C. 238(d)(3))

§ 222.31 Recommendation of local contribution rate.

(a) An SEA may recommend to the Secretary that all the applicants in the State receive the local contribution rate guaranteed by the Act. If the SEA makes this recommendation—

(1) The Secretary accepts the recommendation if it meets the requirements of the Act and this Part 222; and

(2) No LEA in the State may exercise the options in paragraph (b) of this section.

(b) Except as provided in paragraph (a) of this section, an LEA may recommend to the Secretary one of the following types of local contribution rates on which the Secretary would base the LEA's payment:

(1)(i) The LEA may recommend the local contribution rate guaranteed by the Act.

(ii) The provisions governing this rate are in § 222.32.

(2)(i) The LEA may recommend the local contribution rate on which the Secretary based the LEA's payment during any one of the three fiscal years preceding the fiscal year in which this section takes effect.

(ii) However, if during the fiscal year selected, the LEA received assistance under section 3(d)(2)(B) of the Act in addition to regular assistance under section 3, the LEA may recommend only the rate used for determining its regular assistance under section 3 for the year selected.

(3)(i) The LEA may recommend a local contribution rate based on appropriate data from generally comparable LEAs within the State.

(ii) The provisions governing this rate rate are in §§ 222.33 through 222.35.

(c) In the case of a jurisdiction listed or identified in § 222.30(c), the Secretary establishes as the local contribution rate

the rate guaranteed by the Act, as described in § 222.32(b).

(20 U.S.C. 238(d)(3))

§ 222.32 Local contribution rate guaranteed by the Act.

(a) If an LEA recommends to the Secretary as its local contribution rate the rate guaranteed by the Act, the Secretary accepts the recommendation if it meets the requirements of the Act and this Part 222.

(b) The local contribution rate guaranteed by the Act is the greater of—

(1) Fifty percent of the average per pupil expenditure in the LEA's State during the second fiscal year preceding the fiscal year for which the computation is made; or

(2)(i) Fifty percent of the average per pupil expenditure in all of the 50 States and the District of Columbia during the second fiscal year preceding the fiscal year for which the computation is made.

(ii) However, the Secretary does not approve a local contribution rate that exceeds 100% of the average per pupil expenditure in the State in which the LEA is located.

(20 U.S.C. 238(d)(3)(B))

§ 222.23 Local contribution rate based on generally comparable LEAs.

(a) If an LEA recommends to the Secretary as its local contribution rate a rate based on appropriate data from generally comparable LEAs within its State, the Secretary accepts the recommendation if it meets the requirements of the Act and this Part 222.

(b)(1) The SEA for that State shall—

(i) Group all of the LEAs within the State according to each of the factors in § 222.34; and

(ii) Compute the local contribution rate for each group according to the provisions of § 222.35.

(2) In grouping LEAs under any factor or factors for purposes of establishing generally comparable LEAs, the SEA may not identify any group that contains fewer than 10 LEAs.

(c) In preparing its recommended rate, the LEA shall use the following steps:

(1) *Step 1.* The LEA shall select the factor or factors in § 222.34 the LEA wishes to use as the basis for general comparability.

(2) *Step 2.* (i) Using State-supplied data, the LEA shall identify within the State the entire group of LEAs that match the selected factor or factors.

(ii) Except as provided in paragraph (c)(2)(iii) of this section, the minimum number specified in paragraph (b) of this section shall include the applicant LEA.

(iii) The following may not be included in any group of generally comparable LEAs:

(A) Any LEA having—in the second fiscal year preceding the fiscal year for which the local contribution rate is computed for the applicant LEA—20 percent or more of its average daily attendance constituted by children identified under section 3(a) of the Act.

(B) Any LEA having—in the second fiscal year preceding the fiscal year for which the local contribution rate is computed for the applicant LEA—50 percent or more of its average daily attendance constituted by children identified under section 3(b) of the Act, or under both sections 3(a) and 3(b) of the Act.

(3) *Step 3.* (i) Using State-supplied data for the group of LEAs identified under Step 2, the LEA shall recommend to the Secretary its local contribution rate, which the SEA has computed according to the provisions of § 222.35.

(ii) In making this computation, the LEA or SEA may not include data for any LEA identified under paragraph (c)(2)(iii) of this section.

(d) An LEA identified under paragraph (c)(2)(iii) of this section is entitled to—

(1) Apply for assistance under the program; and

(2) Recommend as its local contribution rate any type of rate described in § 222.31 for which the LEA is eligible.

(20 U.S.C. 238(d)(3)(A))

§ 222.34 Selection of generally comparable LEAs.

In selecting generally comparable LEAs within its States, an LEA—

(a) Shall use the following factors:

(1) The LEA's grade span in the current year.

(2) The LEA's legal classification within the State in the current year, if the Secretary regards this classification as sufficiently different from grade span within the State; and

(b) May also use either or both of the following factors:

(1)(i) The LEA's size in the current year, as determined by placement above or below the median average daily attendance (ADA) for the LEA's grade span within the State.

(ii) The Secretary considers an ADA that is equal to the median as being below the median.

(2) The LEA's location in the current year, as determined by placement inside or outside a standard metropolitan statistical area as defined by the U.S. Bureau of the Census.

Example. An LEA applies for assistance under section 3 of the Impact Aid program and wishes to recommend to the Secretary a local contribution rate based on generally comparable LEAs within its State.

Characteristics of Applicant LEA

The grade span of the applicant LEA is kindergarten through grade 8 (K–8). In the applicant's State, legal classification of LEAs is based on grade span.

The average daily attendance (ADA) of the applicant LEA is above the median ADA of LEAs serving only K–8 in the State.

The applicant LEA is located outside a standard metropolitan statistical area (SMSA).

Characteristics of Other LEAS Serving Same Grade Span

The SEA of the applicant's State groups all LEAs in its State according to the factors in § 222.34.

The SEA identifies the following groups:

One hundred LEAs serve only K–8. One of these LEAs has 20 percent of its ADA comprised of children identified under section 3(a) of the Act and, therefore, may not be used by the applicant LEA in any determination of general comparability.

One of the remaining 99 LEAs in the group, the SEA has identified a group of 49 LEAs having an ADA above the median ADA for the group of 99, one LEA having an ADA at the median, and a group of 49 LEAs having an ADA below the median ADA; thus, according to § 222.34(b)(1)(ii), 50 LEAs are considered to have an ADA below the median ADA.

Of the 99 LEAs in the group, the SEA has identified a group of 63 LEAs as being inside an SMSA and a group of 36 LEAs as being outside an SMSA.

Among the group of 49 LEAs having an ADA above the median, the SEA has identified a group of 36 LEAs as being inside an SMSA and a group of 13 LEAs as being outside an SMSA.

Among the group of 50 LEAs having an ADA below the median, the SEA has identified a group of 27 LEAs as being inside an SMSA and 23 LEAs as being outside an SMSA.

On the basis of § 222.35 the SEA computes the local contribution rate for each group of generally comparable LEAs that the SEA has identified.

Selection of Generally Comparable LEAS

The applicant LEA selects the group of generally comparable LEAs on which it wishes to base its recommended local contribution rate.

Under the requirements of § 222.34, the applicant LEA must begin with the group that includes all LEAs in its grade span and legal classification. In this case grade span and legal classification happen to be the same. Thus, the group would include 100 LEAs. However, the applicant LEA must exclude from the group the one LEA that has 20 percent of its ADA comprised of children identified under section 3(a) of the Act. This reduces the group to 99 LEAs.

The applicant LEA then has several options:

Option 1: The LEA may select as its group of generally comparable LEAs on which to base its recommended local contribution rate

the group of 99 LEAs serving K–8. The LEA then recommends to the Secretary as its local contribution rate the rate computed for this group by the SEA.

Option 2: Instead of selecting the group of 99, the LEA may select as its generally comparable group only those LEAs within the 99 that have an ADA above the median ADA for the 99; that is, the group of 49. The LEA then recommends to the Secretary as its local contribution rate the rate computed for this group by the SEA.

Option 3: Instead of selecting either of the groups described in Options 1 and 2, the LEA may select as its generally comparable group only those LEAs within the 99 that are outside an SMSA; that is, the group of 36. The LEA then recommends to the Secretary as its local contribution rate the rate computed for this group by the SEA.

Option 4: Instead of selecting any of the groups described in Options 1, 2, and 3, the LEA may select as its generally comparable group only those LEAs that *both* have an ADA above the median ADA for the 99 *and* are outside an SMSA; that is, the group of 13. The LEA then recommends to the Secretary as its local contribution rate the rate computed for this group by the SEA.

However, as provided in § 222.339(b)(2), if the SEA were to have identified fewer than 10 LEAs under any factor or combination of factors, the SEA would not have established a group for this factor or combination of factors, and the LEA would be precluded from using this factor or combination of factors in recommending its local contribution rate to the Secretary.

(20 U.S.C. 238(d)(3)(A))

§ 222.35 Computation of local contribution rates.

Except as otherwise specified in the Act, if an LEA wishes to recommend to the Secretary a local contribution rate based on generally comparable LEAs within its State, the LEA selects the group of generally comparable LEAs, and the SEA, subject to the Secretary's review and approval, computes the LEA's local contribution rate as follows:

(a)(1) The SEA shall compile the aggregate current expenditures of the comparable LEAs during the second fiscal year preceding the fiscal year for which the computation is made.

(2) For purposes of this section, the SEA shall consider only those aggregate current expenditures made by the comparable LEAs from revenues derived from local sources.

(b) The SEA shall compile the aggregate number of children in ADA to whom the generally comparable LEAs provided free public education during the second fiscal year preceding the fiscal year for which the computation is made.

(c) The SEA shall divide—

(1) The aggregate current expenditures determined under paragraph (a) of this section; by

(2) The aggregate number of children determined under paragraph (b) of this section.

(d) If a rate computed under this section is lower than the rate guaranteed by the Act, the Secretary bases the LEA's payment on the guaranteed rate.

(20 U.S.C. 238(d)(3)(A))

§ 222.36 Determination of additional assistance.

(a) The provisions of this section govern an LEA that applies to the Secretary for assistance under section 3(d)(2)(B) of the Act, in addition to apply for a regular payment under section 3.

(b) If the LEA is applying for a regular payment under section 3 based on a local contribution rate guaranteed by the Act or a rate previously determined for the LEA under § 222.31(a)(2), the Secretary—

(1) In determining the amount of additional assistance, considers the LEA comparable to all LEAs in its State; and

(2) Establishes a rate of the additional assistance.

(c) If the LEA, in applying for a regular payment under section 3, recommends to the Secretary a local contribution rate based on generally comparable LEAs in its State, the Secretary—

(1) In determining the amount of the additional assistance, considers as comparable LEAs the same LEAs that the applicant identifies as comparable in its application for a regular payment under section 3; and

(2) Establishes a rate for additional assistance.

Part X

Department of Commerce

48 CFR Ch. 13
Acquisition Regulations; Final Rule

DEPARTMENT OF COMMERCE

48 CFR Ch. 13

Aquisition Regulations; Establishment of Chapter

AGENCY: Department of Commerce.

ACTION: Final rule.

SUMMARY: The Department of Commerce (DOC) issues this rule to be known as the Commerce Acquisition Regulation (CAR). This rule is established as Chapter 13 of Title 48 of the Code of Federal Regulations. The purpose of the CAR is to implement and supplement the Federal Acquisition Regulation (FAR) which has been separately promulgated by the General Services Administration, Department of Defense, and National Aeronautics and Space Administration as Chapter 1 of Title 48 of the Code of Federal Regulations. The FAR was published in the September 19, 1983 issue of the **Federal Register**. The FAR is promulgated as the uniform, simplified acquisition regulation called for by Executive Order 12352, Federal Procurement Reforms.

The FAR will supersede the Defense Acquisition Regulation, the Federal Procurement Regulations, and the National Aeronautics and Space Administration Procurement Regulation. Civilian agency implementations of the Federal Procurement Regulations will become obsolete as a result of the promulgation of the FAR. For this reason, the Department of Commerce Procurement Regulations (DOCPR), codified as Chapter 13 of Title 41 of the Code of Federal Regulations, and all related implementation and supplementation thereof is superseded by this final rule.

The intended effect of the FAR is to simplify the Federal procurement process by adopting a uniform regulation for all agencies. The uniform regulation will eliminate the confusion caused contractors by differing policies among the various Federal agencies. The intended effect of the CAR is to implement the FAR where required and to supplement the FAR in areas where there is no FAR coverage of Commerce unique policy.

EFFECTIVE DATE: April 1, 1984.

FOR FURTHER INFORMATION CONTACT: John Dammeyer, Office of Procurement Management, U.S. Department of Commerce, 14th & Constitution Ave., NW., Washington, D.C. 20230, Telephone: (202) 377–4248

SUPPLEMENTARY INFORMATION: The Notice of Proposed Rulemaking was published on Page 6508 of the **Federal Register** on February 22, 1984 and invited comments by March 23, 1984.

Executive Order 12291

This rule is exempt from the provisions of Executive Order 12291. The application of this exemption to this rule has been agreed to by the Office of Management and Budget.

Regulatory Flexibility Act

DOC certifies that this rule will not have a significant economic impact on a substantial number of small entities and, therefore, no regulatory flexibility analysis has been prepared.

Paperwork Reduction Act

This rule does not impose information collection and recordkeeping requirements on the public beyond those requirements established by the FAR. This rule was reviewed by the Office of Management and Budget (OMB) in accordance with section 3504(h) of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501, et seq.

National Environmental Policy Act

DOC has concluded that promulgation of this rule would not represent a major Federal action having significant impact on the human environment under the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 432 et seq. 1976) and the regulations (40 CFR Parts 1500–1508) and therefore does not require an environmental impact statement or an environmental assessment pursuant to NEPA.

List of Subjects in 48 CFR Chapter 13

Government procurement, Commerce acquisition regulations.

For the reasons set forth in the preamble, Title 48 of the Code of Federal Regulations is amended as set forth below.

Issued in Washington, D.C., March 27, 1984.

Hugh L. Brennan,

Director, Office of Procurement and Federal Assistance.

Title 48 of the CFR is amended by establishing Chapter 13 to read as follows:

Chapter 13—Department of Commerce

SUBCHAPTER A—GENERAL

Part

1301—General
1302—Definitions of words and terms
1303—Improper business practices and personal conflicts of interest
1305—Publicizing contract actions

SUBCHAPTER B—ACQUISITION PLANNING

1307—Acquisition planning
1308—Required sources of supplies and services
1309—Contractor qualifications

SUBCHAPTER C—CONTRACTING METHODS AND CONTRACT TYPES

1313—Small purchase and other simplified purchase procedures
1314—Formal advertising
1315—Contracting by negotiation
1316—Types of contracts
1317—Special contracting methods

SUBCHAPTER D—SOCIOECONOMIC PROGRAMS

1319—Small business and small disadvantaged business concerns
1322—Application of labor laws to government acquisitions
1324—Protection of privacy and freedom of information
1325—Foreign acquisition

SUBCHAPTER E—GENERAL CONTRACTING REQUIREMENTS

1331—Contract cost principles and procedures
1332—Contract financing
1333—Disputes and appeals

SUBCHAPTER F—SPECIAL CATEGORIES OF CONTRACTING

1334—Major system acquisition
1336—Construction and architect-engineer contracts
1337—Service contracting

SUBCHAPTER G—CONTRACT MANAGEMENT

1342—Contract administration
1345—Government property

SUBCHAPTER H—CLAUSES AND FORMS

1352—Solicitation provisions and contract clauses
1353—Forms

SUBCHAPTER A—GENERAL

1301.301 Policy.
1301.303 Codification and public participation.

Subpart 1301.4—Deviations

1301.402 Policy.

Subpart 1301.5—Agency and Public Participation.

Sec.

1301.501 Solicitation of agency and public views.

Subpart 1301.6—Contracting Authority and Responsibilities

1301.601 General.
1301.601–70 Responsibilities of Heads of Contracting Activities.
1301.601–71 Responsibilities of the Office of Procurement and Federal Assistance.
1301.603 Selection, appointment, and termination of appointment.
1301.603–70 Ratification of unauthorized contract awards.
1301.603–71 Responsibility of other Government personnel.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486 (c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

Subpart 1301.1—Purpose, Authority, Issuance

1301.100 Scope of subpart.

This subpart states the relationship of the Commerce Acquisition Regulation (CAR) to the Federal Acquisition Regulation (FAR). This subpart also explains the purpose, authority and issuance of the CAR.

1301.101 Purpose.

(a) Chapter 13 of Title 48 of the Code of Federal Regulations shall be known as the Commerce Acquisition Regulation (CAR).

(b) The purpose of the CAR is to implement and supplement the FAR within the Department of Commerce. Since the CAR is intended to supplement and implement the FAR without paraphrasing or duplicating FAR language, the CAP should be read in relation to the FAR.

1301.102 Authority.

The CAR is prescribed by the Department Procurement Executive pursuant to a delegation initiating from the Secretary of Commerce in accordance with the Federal Property and Administrative Services Act of 1949, as amended, and other applicable law and regulation.

1301.103 Applicability.

The FAR and CAR apply to all acquisitions within the Department of Commerce.

1301.104 Issuance.

1301.104–1 Publication and code arrangement.

(a) The CAR is published in (1) daily issues of the **Federal Register**, (2) cumulative form in the Code of Federal Regulations (CFR), and (3) a separate loose-leaf edition.

(b) The CAR is issued as Chapter 13 of Title 48 of the CFR.

1301.104–2 Arrangement of regulations.

(a) *General.* The CAR is divided into the same parts, subparts, sections, subsections and paragraphs as the FAR. When FAR coverage is adequate by itself, there will be no corresponding CAR coverage.

(b) *Numbering.* Where the CAR implements the FAR, the CAR part, subpart, section or further subdivision will be numbered the same as the corresponding FAR part, subpart, section, or further subdivision except that the CAR implementation will be preceded by a 13 or 130 so that there are four numbers to the left of the first decimal. Where the CAR supplements the FAR, supplementing material will be assigned the number 70 and above. The placement of the sequence of 70 numbers in relation to the decimal point will depend on what division of the FAR is supplemented.

(c) *References and citations.* (2) This regulation may be referred to as the Commerce Acquisition Regulation (CAR).

(3) References to FAR materials will include FAR and the identifying number, for example, FAR 1.402. Reference to CAR materials will consist of the identifying number, for example 1301.402.

1301.104–3 Copies.

(a) Copies of the CAR in **Federal Register** or CFR form may be purchased from the Superintendent of Documents, Government Printing Office (GPO), Washington, D.C. 20402. Requests should reference the CAR as Chapter 13 of Title 48 of the Code of Federal Regulations.

(b) Loose-leaf copies of the CAR are distributed within the Department by the Office of Procurement Management, Office of Procurement and Federal Assistance.

Subpart 1301.2—Administration

1301.201–1 The two FAR councils.

(b) The Department representative to the Civilian Agency Acquisition Council will be a staff member of the Office of Procurement and Federal Assistance who will be appointed for that purpose by the Procurement Executive. The Office of Procurement and Federal Assistance (OPFA) will be responsible for coordinating and advocating Department proposed revisions to the FAR.

Subpart 1301.3—Agency Acquisition Regulations

1301.301 Policy.

(a) The Procurement Executive will issue Department acquisition policy and procedure in the CAR when necessary to implement or supplement the FAR.

(b) The Office of Procurement and Federal Assistance may issue internal Department guidance in the form of Procurement Letters, policy manuals, or model operating procedures.

(c) Heads of Contracting Activities may issue internal operating procedures for their contracting activities. These internal operating procedures may include routine office procedures, procedures which implement policy prescribed by the Office of Procurement and Federal Assistance, and the dissemination of guidance or information to program officials who may be affected by the policy. Heads of Contracting Activities shall not prescribe policy and shall not issue any procedures which appear to be in conflict with policy issued by the Office of Procurement and Federal Assistance.

1301.303 Codification and public participation.

(a) The CAR is published as Chapter 13 of Title 48 of the Code of Federal Regulations.

(b) Public participation procedure is described in 1301.5.

Subpart 1301.4—Deviations

1301.402 Policy.

Requests for authority to deviate from the provisions of the FAR or the CAR shall be submitted to the Office of Procurement and Federal Assistance as soon as the need to deviate is known. Requests shall be in writing and reasonably describe the deviation desired, the reason for the deviation, and the time by which a decision is needed. When timing is crucial, the written request should be preceded by a telephone request to the Office of Procurement and Federal Assistance. Requests for both individual deviations and class deviations shall be considered and decided upon by the Procurement Executive. When requests are received for class deviations from FAR provisions, the Procurement Executive shall consult with the chairperson of the Civilian Agency Acquisition Council. (see FAR 1.404). Individuals responsible for unauthorized deviations may be considered for disciplinary action as described in the Department Administrative Order on *Discipline* (DAO 202–751).

Subpart 1301.5—Agency and Public Participation

1301.501 Solicitation of agency and public views.

The initial CAR was published with a notice of proposed rulemaking inviting public comments, review and analysis of comments received, and publication of a final rule. The final rule included a discussion of the public comments received and described any changes made as a result of the comments. A future issuance under this title may or may not require publication for public participation, depending on whether the issuance is a significant revision of the FAR which alters the substantive meaning of any coverage in the FAR having a substantive impact on the public. Each future issuance will be considered on a case-by-case basis. If a future issuance is determined by the Procurement Executive to be a significant revision of the FAR, that issuance shall be published for public participation. Any issuance under this title shall be done by or with the concurrence of the Office of Procurement and Federal Assistance.

Subpart 1301.6—Contracting Authority and Responsibilities

1301.601 General.

Contracting authority vests with the Secretary of Commerce. The Secretary has delegated this authority to the Assistant Secretary for Administration who has delegated this authority, with the right to redelegate, to the Procurement Executive, as prescribed in the Department Administrative Order on *Procurement Authority* (DAO 208–2).

1301.601–70 Responsibilities of heads of contracting activities.

Heads of Contracting Activities shall be responsible for directing and maintaining efficient contract operations within their contracting activities. Adequate controls shall be established to assure compliance with applicable laws, regulations, and policy guidance from the Office of Procurement and Federal Assistance. Heads of Contracting Activities shall provide the necessary coordination and cooperation required for periodic oversight reviews conducted by the Office of Procurement and Federal Assistance.

1301.601–71 Responsibilities of the Office of Procurement and Federal Assistance.

The Office of Procurement and Federal Assistance shall establish Department-wide policy for contracting activities. Also, the Office of Procurement and Federal Assistance shall conduct periodic oversight reviews of Department contracting activities to assure that Department contracting activities are operating efficiently and in accordance with the provisions of the FAR, the CAR, and OPFA policy.

1301.603 Selection, appointment, and termination of appointment.

The Department's systems for selection, appointment and termination of appointment of contracting officers is contained in the *Contracting Officer Certification/Warrant Program.*

1301.603–70 Ratification of unauthorized contract awards.

(a) The Department is not bound by any formal or informal type of agreement or contractual commitment which is made by persons who are not delegated contracting authority. When these unauthorized acts are discovered they shall be immediately reported to the Head of the Contracting Activity concerned. The Head of the Contracting Activity shall:

(1) Immediately inform any person who is performing work as a result of an unauthorized commitment that the work is being performed at that person's risk;

(2) Inform the person who made the unauthorized commitment of the seriousness of the act and the possible consequences;

(3) Ensure receipt of documentation detailing the actions taken and the reasons for those actions; and

(4) Decide whether ratification of the unauthorized act is proper, and take appropriate action.

1301.603–71 Responsibility of other Government personnel.

The responsibility of other Government personnel is generally described in the Department's procurement requisitioning guides and the Department Administrative Order on the *Procurement Planning System* (DAO 208–15). These documents are designed for internal Department use.

PART 1302—DEFINITIONS OF WORDS AND TERMS

Subpart 1302.1—Definitions

1302.1–1 Definitions.

Acquisition Executive The Acquisition Executive, as defined in OMB Circular A–109, means the Assistant Secretary for Administration. The Acquisition Executive monitors the development of major systems and reviews their progress through the major systems acquisition process.

Department When used in the CAR, Department means the Department of Commerce.

Head of the Agency means the Secretary of Commerce and those designees which have been delegated the authority to act for the Secretary of Commerce in specifically delegated areas. The head of the agency for procurement matters is the Assistant Secretary for Administration. This authority for procurement matters has been further delegated to the Procurement Executive pursuant to the Department Administrative Order on *Procurement Authority* (DA) 208–2). Where the term "Agency head or designee" is used, that term shall mean the Procurement Executive unless otherwise indicated in the CAR.

Head of the Contracting Activity means the official who has overall responsibility for managing the contracting activity, as more fully described in the Department Administrative Order on *Procurement Authority* (DAO 208–2).

Head of the contracting office means the official who heads the office that awards and administers contracts, as more fully described in the Department Administrative Order on *Procurement Authority* (DAO 208–2).

Procurement Executive means the official delegated broad procurement authority under the Department Administrative Order on *Procurement Authority* (DAO 208–2). Duties of the Procurement Executive include the following:

(a) Prescribe and publish Department procurement policies, regulations and procedures;

(b) Enter into, make determinations and decisions and take other actions, consistent with appropriate policies, regulations and procedures with respect to purchases, contracts, leases, sales, agreements and other transactions, except those required by law or regulation to be made by other authority;

(c) Designate contracting officers and representatives thereof;

(d) Establish clear lines of contracting authority;

(e) Exercise priorities authority concerning the internal procurement needs of the Department, in accordance with the provisions of the Defense Production Act of 1950 (50 U.S.C. App. 2071, et seq.), Department of Defense Delegation of Priorities Authority, dated October 21, 1958, and applicable policies and regulations;

(f) Evaluate and monitor the Department's procurement system performance;

(g) Manage and enhance career development of the procurement work force;

(h) Examine, in coordination with the OFPP, the procurement system to determine specific areas where Government-wide performance standards should be established and applied and participate in the development of Government-wide procurement policies, regulations and standards;

(i) Determine areas for Department unique standards and develop unique Department-wide standards;

(j) Be the advocate for competition; and

(k) Certify to the Department head that the procurement system meets approved standards.

(Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2)

PART 1303—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

Subpart 1303.1—Safeguards

Sec.
1303.101–3 Agency regulations.

Subpart 1303.2—Contractor Gratuities to Government Personnel

1303.203 Reporting procedures.

Subpart 1303.3—Reports of Identical Bids and Suspected Antitrust Violations

1303.302–70 Reporting requirements.

Subpart 1303.4—Contingent Fees

1303.409 Misrepresentations or Violations of the Covenant Against Contingent Fees.

Subpart 1303.5—Other Improper Business Practices

1303.502 Subcontractor kickbacks.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

Subpart 1303.1—Safeguards

1303.101–3 Agency regulations.

The agency rules implementing Executive Order 11222 are contained in the Department Administrative Order on *Employee Responsibilities and Conduct* (DAO 202–735).

Subpart 1303.2—Contractor Gratuities to Government Personnel

1303.203 Reporting procedures.

Suspected violations of the Gratuities clause shall be reported to the head of the contracting office in writing detailing the circumstances. The head of the contracting office will evaluate the report and if the allegations appear to support a violation the matter will be referred to the Office of Inspector General in accordance with the Department Administrative Order on *Inspector General Investigations* (DAO 207–10).

Subpart 1303.3—Reports of Identical Bids and Suspected Antitrust Violations

1303.302–70 Reporting requirements.

(a) Executive Order 12430 revoked the requirement of Executive Order 10936 to submit a report to the Attorney General on identical bids.

(b) Suspected anti-competitive practices and antitrust law violations as described in FAR 3.301 and FAR 3.303 shall be reported to the general counsel through the Head of the Contracting Activity. A copy of the report shall be sent to the Procurement Executive concurrently with the submission to the general counsel.

Subpart 1303.4—Contingent Fees

1303.409 Misrepresentations or Violations of the Covenant Against Contingent Fees.

Suspected violations of the Covenant Against Contingent Fees shall be reported to the Office of Inspector General in accordance with the Department Administrative Order on *Inspector General Investigations* (DAO 207–10).

Subpart 1303.5—Other Improper Business Practices

1303.502 Subcontractor kickbacks.

Suspected violations of the Anti-Kickback Act shall be reported to the Office of Inspector General in accordance with the Department Administrative Order on *Inspector General Investigations* (DAO 207–10).

PART 1305—PUBLICIZING CONTRACT ACTIONS

Subpart 1305.5—Paid Advertisements

1305.502 Authority.

The authority to approve the publication of paid advertisements in newspapers for recruitment of personnel was delegated to personnel managers pursuant to the Department Administrative Order on *Recruitment, Selection and Placement* (DAO 202–330). The authority to approve the publication of paid advertisements in newspapers for other than recruitment of personnel is delegated to the heads of contracting offices.

(Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2)

SUBCHAPTER B—ACQUISITION PLANNING

PART 1307—ACQUISITION PLANNING

Subpart 1307.1—Acquisition Plans

Sec.
1307.103 Agency-head responsibilities.

Subpart 1307.3—Contractor Versus Government Performance

1307.307 Appeals.

Subpart 1307.4—Equipment Lease or Purchase

1307.401 Acquisition considerations.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

Subpart 1307.1—Acquisition Plans

1307.103 Agency-head responsibilities.

The Department's procedures for acquisition planning are contained in the Department Administrative Order on the *Procurement Planning System* (DAO 208–15) and the Department Administrative Order on *Management of Automatic Data Processing Resources* (DAO 212–1).

Subpart 1307.3—Contractor Versus Government Performance

1307.307 Appeals.

The Department's appeals procedures of the cost-comparison is contained in the Department Administrative Order on the *Acquisition of Commercial or Industrial Products and Services Needed by the Department of Commerce* (DAO 201–41).

Subpart 1307.4—Equipment Lease or Purchase

1307.401 Acquisition considerations.

The contracting officer shall decide whether to acquire equipment by lease or purchase.

PART 1308—REQUIRED SOURCES OF SUPPLIES AND SERVICES

Subpart 1308.1—Excess Personal Property

Sec.
1308.101 Definition.

Subpart 1308.8—Acquisition of Printing and Related Services

1308.802 Policy.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

Subpart 1308.1—Excess Personal Property

1308.101 Definition.

The authority to designate personal property as excess is delegated to the Director of the Office of Property and Building Management or designee.

Subpart 1308.8—Acquisition of Printing and Related Services

1308.802 Policy.

The Director of the Office of Information Services is the central printing authority for liaison with the Joint Committee on Printing and the Public Printer.

PART 1309—CONTRACTOR QUALIFICATIONS

Subpart 1309.4—Debarment, Suspension and Ineligibility

Sec.

1309.403 Definitions.
1309.470 Procedures for debarment, suspension and ineligibility.
1309.470–1 Scope of section.
1309.470–2 Consolidated list of debarred, suspended, and ineligible contractors.
1309.470–3 Agency records.
1309.470–4 Procedures on debarment.
1309.470–5 Period of debarment.
1309.470–6 Scope of debarment.
1309.470–7 Procedures on suspension.
1309.470–8 Period of suspension.
1309.470–9 Scope of suspension.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

Subpart 1309.4—Debarment, Suspension and Ineligibility

1309.403 Definitions.

"Debarring official" means the Procurement Executive.

"Suspension official" means the Procurement Executive.

1309.470 Procedures for debarment, suspension and ineligibility.

1309.470–1 Scope of section.

This section prescribes Department procedures for: (a) Distribution, use and maintenance of GSA's consolidated list of debarred, suspended, and ineligible contractors; and (b) debarment and suspension of Government contractors.

1309.470–2 Consolidated list of debarred, suspended, and ineligible contractors.

The following procedures apply to GSA's consolidated list of debarred, suspended, and ineligible contractors:

(a) The Procurement Executive shall notify GSA of any Department imposed debarments or suspensions of a contractor or any modification or rescission of these actions.

(b) GSA's consolidated list shall be distributed to the Department contracting activities by the Office of Small and Disadvantaged Business Utilization (OSDBU).

(c) Preliminary and ordinary inquiries concerning GSA's consolidated list should be made from the contracting office to the agency or authority which took the action. When unique or complex matters are concerned, the contracting office shall also inform the Office of Procurement and Federal Assistance.

(d) Personnel in all contracting offices should be familiar with GSA's consolidated list and all updates.

1309.470–3 Agency records.

The Office of Small and Disadvantaged Business Utilization (OSDBU) shall maintain records relating to each suspension or debarment action taken by the Department.

1309.470–4 Procedures on debarment.

(a) *Investigation and referral.* Personnel in all contracting offices shall be familiar with the causes for debarment (FAR 9.406–2) and shall be alert to information which indicates that a contractor (to which the Department plans to award a contract) has committed an action which is a cause for debarment. If a contractor not on the list has committed an action which is a cause for debarment, heads of contracting offices shall determine which other agencies award contracts to this firm and if any of these agencies have initiated, or plan to initiate debarment actions.

(1) If another agency is considering debarment, the Head of the Contracting Activity shall promptly report this fact and recommend action to the Procurement Executive after discussions with general counsel. Within 30 days after receipt of notice, the Procurement Executive shall decide whether it is necessary for the Department to proceed with a debarment action.

(2) If another agency is not considering debarment, the Head of the Contracting Activity shall promptly report this fact and recommend action to the Procurement Executive after discussions with general counsel. The Head of the Contracting Activity shall attach all available documenting evidence to support the recommendation. The mere existence of a cause for debarment does not require that a contractor be debarred. The seriousness of the contractor's acts or omissions and any mitigating factors shall be considered in recommendations for action and any debarment decision.

(b) *Decision making process.* Upon receipt of a debarment recommendation, the Procurement Executive shall review all available evidence and shall promptly determine whether or not to proceed with debarment. The Procurement Executive may refer the matter to the Office of Inspector General for further investigation. After completion of any additional review or investigations, the Procurement Executive shall make a written determination. A copy of this determination shall be promptly sent to the initiating contracting office. (See FAR 9.406–3(b).)

(c) Notice of proposal to debar. (See FAR 9.406–3(c).)

(d) Debarring official's decision. (See FAR 9.406–3(d).)

(e) Notice of debarring official's decision. (See FAR 9.406–3(e).)

1309.470–5 Period of debarment.

(See FAR 9.406–4)

1309.470–6 Scope of debarment.

(See FAR 9.406–5)

1309.470–7 Procedures on suspension.

(a) *Investigation and referral.* Heads of contracting offices may recommend suspension of a firm or individual based on the causes for suspension listed in FAR 9.407–2. The procedures for investigation and referral of suspension are the same as those contained in 1309.470–4(a). When using that subsection for suspension procedures, substitute the word "suspension" for the word "debarment".

(b) *Decision making process.* Procedures for the decision making process of suspensions are the same as those contained in 1309.470–4(b) except that an initial decision by the Procurement Executive regarding debarment results in a proposal to debar, whereas the initial decision for suspension results in immediate suspension. (See FAR 9.407–3(b).)

(c) Notice of suspension. (See FAR 9.407–3(c).)

(d) Suspending official's decision. (See FAR 9.407–3(d).)

1309.470–8 Period of suspension.

(See FAR 9.407–4)

1309.470–9 Scope of suspension.

(See FAR 9.407–5)

SUBCHAPTER C—CONTRACTING METHODS AND CONTRACT TYPES

PART 1313—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

Subpart 1313.1—General

1313.106–70 Technical evaluation and written or oral discussion procedure for negotiated small purchases.

Subpart 1313.1—General

1313.106–70 Technical evaluation and written or oral discussion procedure for negotiated small purchases.

(a) *Technical evaluation.* A technical evaluation may be requested for negotiated small purchases, at the discretion of the contracting officer. The manner and extent of the technical evaluation shall be determined by the contracting officer, except that the technical evaluation shall not be as formal or as extensive as required for procurements above the small purchase dollar threshold.

(b) *Written or oral discussions.* Written or oral discussions may be conducted with all qualified sources which submit quotations for negotiated small purchases. The contracting officer shall determine the manner, extent, and need for written or oral discussions, except that discussions shall not be as formal or as extensive as required for procurements above the small purchase dollar threshold.

(Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2)

PART 1314—FORMAL ADVERTISING

Subpart 1314.4—Opening of Bids and Award of Contract

Sec.
1314.406–3 Other mistakes disclosed before award.
1314.407–8 Protests against award.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

Subpart 1314.4—Opening of Bids and Award of Contract

1314.406–3 Other mistakes disclosed before award.

(e) The authority to make the determinations listed in FAR 14.406–3(e) concerning mistakes in bids was delegated to the Heads of Contracting Activities.

1314.407–8 Protests against award.

(a) *General.*

(1) Protests must be received within ten working days after the basis for protest is known or should have been known unless good cause is shown to extend the time limit. However, protests based upon alleged improprieties in any type of solicitation which are apparent prior to bid opening or the closing time for receipt of initial proposals shall be filed prior to bid opening or the closing time for receipt of initial proposals.

(2) The Department-wide contact point for protests to GAO against an award of a contract is the Office of the Assistant General Counsel for Administration. This office shall represent the Department before the GAO on protests against award. This office shall furnish all necessary correspondence concerning protests to GAO, including the Department's report in response to the protest to GAO.

(b) *Protests before award.* The head of the contracting office is the designated official to approve award of a contract before a protest against award is resolved.

PART 1315—CONTRACTING BY NEGOTIATION

Subpart 1315.3—Determinations and Findings to Justify Negotiation

Sec.
1315.307 Signatory authority.

Subpart 1315.4—Solicitation and Receipt of Proposals and Quotations

1315.413–2 Alternate II.

Subpart 1315.5—Unsolicited Proposals

1315.501 Definitions.
1315.504 Advance guidance.
1315.506 Agency procedures.

Subpart 1315.6—Source Selection

Subpart 1315.612—Formal source selection.

Subpart 1315.8—Price Negotiation

1315.804–3 Exemptions from or waiver of submission of certified cost or pricing data.
1315.805–70 Audit as an aid in proposal analysis.

Subpart 1315.9—Profit

1315.902 Policy.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

Subpart 1315.3—Determinations and Findings to Justify Negotiation

1315.307 Signatory authority.

Determinations and findings for contracts negotiated under 41 U.S.C. 252(c)(11) shall be signed by the Assistant Secretary for Administration when more than $25,000 will be obligated. Determinations and findings for contracts negotiated under 41 U.S.C. 252(c)(11) which obligate $25,000 or less may be signed by the head of the contracting office.

Subpart 1315.4—Solicitation and Receipt of Proposals and Quotations

1315.413–2 Alternate II.

The procedures described in FAR 15.413–2 may be used if approved by the Head of the Contracting Activity or designee.

Subpart 1315.5—Unsolicited Proposals

1315.501 Definitions.

"Coordinating office" means the head of the contracting office.

1315.504 Advance guidance.

(a) Department employees should encourage inquiries on Department missions, needs and methods of operation and refer inquiries to the program office concerned with the subject matter of the inquiry. Any inquiry which could reasonably lead to a procurement action should be promptly coordinated with the appropriate head of the contracting office.

(b) When it appears that a person or firm is interested in making a proposal, that person or firm should be referred to the head of the contracting office concerned who will provide instructions for submission of an unsolicited proposal.

(c) Heads of contracting offices shall provide instructions for submission of unsolicited proposals to each person or firm which expresses an interest in submitting an unsolicited proposal.

1315.506 Agency procedures.

(a) The head of the contracting office is the contact point to coordinate the receipt and handling of unsolicited proposals.

(b) The head of the contracting office shall promptly acknowledge receipt of unsolicited proposals by letter.

(c) The head of the contracting office shall comply with FAR 15.509 concerning the limited use of data.

(d) Promptly after receipt of an unsolicited proposal which conforms to this regulation, the head of the

contracting office shall forward a copy of the proposal along with instructions for technical evaluation of unsolicited proposals to the appropriate program office for technical evaluation. If more than one Department activity has an interest in a proposal, copies of the proposal shall be circulated to each interested office.

(e) Program offices receiving unsolicited proposals for evaluation shall conduct the evaluation in accordance with this Subpart 1315.5, FAR Subpart 15.5, and any additional guidance provided by the Office of Procurement and Federal Assistance.

(f) Program offices shall complete the recommendation and evaluations and submit them along with all copies of the unsolicited proposal, and a written justification for a noncompetitive procurement action if appropriate, to the head of the appropriate contracting office within 60 days of receipt of a proposal for evaluation.

(g) No part of an unsolicited proposal shall be duplicated or circulated outside of the evaluation office. Each unsolicited proposal shall be closely safeguarded to prevent disclosure of any restricted data. Only heads of contracting offices or their designees may duplicate unsolicited proposals and then only to facilitate evaluation by more than one technical evaluation office.

Subpart 1315.6—Source Selection

1315.612 Formal source selection.

(e) *Safeguarding information.* The contracting officer is designated as the releasing authority for source selection information.

Subpart 1315.8—Price Negotiation

1315.804–3 Exemptions from or waiver of submission of certified cost or pricing data.

(i) *Waiver for exceptional cases.* The head of the contracting office is delegated the authority to waive the requirement for submission of certified cost or pricing data in exceptional cases.

1315.805–70 Audit as an aid in proposal analysis.

(a) Preaward audit services include:

(1) The submission of an auditor's report which sets forth the results of review and analysis of cost data submitted by contractors as part of their pricing proposals, reviews of contractors' accounting systems, recorded contract costs, and other related matters; and

(2) Personal consultation and advice regarding the use of the auditor's report in the negotiation and award of a contract.

(b) Requests for audit services should be sent to the External Audit Division, Office of Inspector General, Herbert C. Hoover Building.

(c) Preaward audits should not be routinely requested for actions below the dollar threshold specified in FAR 15.805–5. Before requesting audits below the dollar threshold, the contracting office should consider using price or cost analysis techniques, recent audit reports, price negotiation memoranda, and other relevant information regarding the offer to establish the reasonableness of price. However, audits should be considered for proposals below the specified dollar thresholds in the following circumstances:

(1) The contracting officer has reason to doubt the adequacy of the contractor's accounting policies or cost systems;

(2) The contractor has substantially changed its methods or levels of operation;

(3) Previous unfavorable experience indicates that the contractor's estimating, accounting, or purchasing methods may be unreliable; or

(4) The proposal concerns a new product for which cost experience is lacking.

Subpart 1315.9—Profit

1315.902 Policy.

(a) Except as provided in (b) and (c) below, a structured approach for determining profit or fee prenegotiation objectives shall be used in the negotiation of all contracts, subcontracts, and contract modifications above $100,000 where adequate price competition does not exist. A structured approach for determining profit or fee prenegotiation objectives may be used at lower dollar thresholds.

(b) Regardless of whether price competition exists, the structured approach for determining profit or fee prenegotiation objectives is not required for negotiation of contracts, subcontracts, and contract modifications for the following:

(1) Architect—engineering contracts;

(2) Management contracts for operation or maintenance of Government facilities;

(3) Construction contracts;

(4) Contracts primarily requiring delivery of material supplied by subcontractors;

(5) Termination settlements;

(6) Cost-plus-award-fee contracts; and

(7) Unusual pricing situations where the structured approach has been determined to be unsuitable. This exception must be justified in writing and signed by the head of the contracting office.

(c) In many circumstances, an examination of cost and profits is not required. Where adequate price competition exists and in other situations where cost analysis is not required (e.g., established catalog or market prices of commercial items sold in substantial quantities to the general public or prices set by law or regulation), contracts may be awarded without regard to the amount of profit involved.

(d) Additional internal instruction on the use of the structured approach can be found in Procurement Letters or policy manuals issued by the Office of Procurement and Federal Assistance.

PART 1316—TYPES OF CONTRACTS

Subpart 1316.3—Cost-Reimbursement Contracts

Sec.
1316.306 Cost-plus-fixed-fee contracts.

Subpart 1316.4—Incentive Contracts

1316.404–2 Cost-plus-award-fee contracts.

Subpart 1316.6—Time-and-Materials, Labor-Hour and Letter Contracts

1316.603–3 Limitations.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 206–2.

Subpart 1316.3—Cost-Reimbursement Contracts

1316.306 Cost-plus-fixed-fee contracts.

The contracting officer is delegated the authority to sign a determination and findings establishing the basis for application of the statutory fee limitation.

Subpart 1316.4—Incentive Contracts

1316.404–2 Cost-plus-award-fee contracts.

(d) *Fee determination plans.* The award fee determination plan shall include both technical performance (including scheduling as appropriate) and business management consideration tailored to the needs of the particular situation. The goals and evaluation criteria should be results-oriented. The award fee should concentrate on the end product of the contract. However, equal employment opportunity, small business programs, and functional management areas, such as safety and security, cannot be disregarded and may be appropriately part of the criteria upon which to base the award fee. Specific

goals or objectives should be established in relation to each performance evaluation criterion against which contractor performance is measured.

Subpart 1316.6—Time-and-Materials, Labor-Hour, and Letter Contracts

1316.603–3 Limitations.

The head of the contracting office is the designated official for executing a determination and findings that no contract other than a letter contract is suitable.

PART 1317—SPECIAL CONTRACTING METHODS

Subpart 1317.4—Leader Company Contracting

Sec.
1317.402 Limitations.

Subpart 1317.5—Interagency Acquisitions Under the Economy Act

1317.502 General.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

Subpart 1317.4—Leader Company Contracting

1317.402 Limitations.

Leader company contracting is authorized by the Department only when approved in writing by the Procurement Executive.

Subpart 1317.5—Interagency Acquisitions Under the Economy Act

1317.502 General.

The head of the contracting office is delegated the authority to determine if it is in the Government's interest to place orders for supplies or services with another agency.

SUBCHAPTER D—SOCIOECONOMIC PROGRAMS

PART 1319—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

Subpart 1319.2—Policies

1319.201 General policy.

(c) The Director of the Office of Small And Disadvantaged Business Utilization (OSDBU) is responsible for administering the Department's small and small disadvantaged business programs.

(d) The Head of the Contracting Activity or designee shall appoint a small business and disadvantaged business specialist for the contracting activity concerned.

(Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2)

PART 1322—APPLICATION OF LABOR LAWS TO GOVERNMENT ACQUISITIONS

Subpart 1322.1 Basic–Labor Policies

Sec.
1322.103–4 Approvals.

Subpart 1322.6—Walsh-Healey Public Contracts Act

1322.608–4 Award pending final determination.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

Subpart 1322.1—Basic Labor Policies

1322.103–4 Approvals.

The contracting officer is the designated official for approving the total dollar amount and use of overtime for contract performance.

Subpart 1322.6—Walsh-Healey Public Contracts Act

1322.608–4 Award pending final determination.

If the contracting officer determines that award must be made before a determination of the offeror's eligibility as a manufacturer or regular dealer by DOL or SBA, that decision must be approved by the head of the contracting office.

PART 1324—PROTECTION OF PRIVACY AND FREEDOM OF INFORMATION

Subpart 1324.1—Protection of Individual Privacy

Sec.
1324.103 Procedures.

Subpart 1324.2—Freedom of Information Act

1324.202 Policy.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

Subpart 1324.1—Protection of Individual Privacy

1324.103 Procedures.

(b)(2) The Department's procedures for implementing the Privacy Act are contained in 15 CFR Commerce and Foreign Trade, Subtitle A, Part 4b (Privacy Act) and the Department Administrative Order on *Implementing the Privacy Act of 1974* (DAO 205–15).

Subpart 1324.2—Freedom of Information Act

1324.202 Policy.

The Department's procedures for implementing the Freedom of Information Act (the Act) are contained in 15 CFR Commerce and Foreign Trade, Subtitle A, Part 4 (Public Information) and the Department Administrative Order on *Public Information* (DAO 205–12).

PART 1325—FOREIGN ACQUISITION

Subpart 1325.1—Buy American Act-Supplies

1325.102 Policy.

(a)(4) The contracting officer is authorized to make the written determination described by FAR 25.102(a)(4). If the contract is estimated to exceed $1 million, the Head of the Contracting Activity must approve the determination.

(Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486 (c)), as delegated by the Secretary of Commerce in Department Organization Orde 10–5 and Department Administrative Order 208–2)

SUBCHAPTER E—GENERAL CONTRACTING REQUIREMENTS

PART 1331—CONTRACT COST PRINCIPLES AND PROCEDURES

Subpart 1331.2—Contracts With Commercial Organizations

1331.205–32 Precontract costs.

The payment of precontract costs must be approved in writing by the Head of the Contracting Activity.

PART 1332—CONTRACT FINANCING

Subpart 1332.1—General

Sec.
1332.102 Description of contract financing methods.

Subpart 1332.4—Advance Payments

1332.402 General.

Subpart 1332.6—Contract Debts

Sec.

1332.605 Responsibilities and cooperation among Government officials.

1332.616 Compromise actions.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

Subpart 1332.1—General

1332.102 Description of contract financing methods.

(e)(2) Progress payments based on a percentage or stage of completion are authorized for use as a payment method under Department contracts and subcontracts for construction, alteration, repair, ship construction, ship alteration, and ship repair. For all other contracts, progress payments shall be based on costs except when the head of the contracting office determines that progress payments based on costs cannot be practically employed. In those cases, progress payments based on a percentage or stage of completion may be authorized when the head of the contracting office also determines that adequate safeguards are provided for the administration of those payments.

Subpart 1332.4—Advance Payments

1332.402 General.

(e)(1) The Head of the Contracting Activity is delegated the authority to make findings and determinations and to approve contract terms concerning any advance payments, regardless of dollar amount.

(e)(2) Before authorizing advance payments, the Head of the Contracting Activity shall coordinate with the servicing finance office.

Subpart 1332.6—Contract Debts

1332.605 Responsibilities and cooperation among Government officials.

(b) The contracting officer has primary responsibility for determining the amount of contract debt and notifying the servicing finance office of the debt due to the Government. The servicing finance office has primary responsibility for debt collection and reporting of all contract debts under the Debt Collection Act of 1982.

1332.616 Compromise actions.

The Department's policy on compromise actions is contained in the Department Administrative Order on *Collection and Other Disposition of Claims of the United States* (DAO 203–23).

PART 1333—DISPUTES AND APPEALS

Subpart 1333.70—Department Board of Contract Appeals

Sec.

1333.70–1 Department Board of Contract Appeals.

The General Services Administration (GSA) Board of Contract Appeals serves as the Board of Contract Appeals for the Department.

(Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2)

SUBCHAPTER F—SPECIAL CATEGORIES OF CONTRACTING

PART 1334—MAJOR SYSTEM ACQUISITION

§ 1334.003 Responsibilities.

(a) The Department's policy, procedures and responsibilites for implementing OMB Circular A–109 are contained in the Department Administrative Order on *Major System Acquisitions for the Department of Commerce* (DAO 208–3).

(b) When the Secretary approves a mission need, the Acquisition Executive shall designate the servicing contracting office for all phases of the major systems acquisitions.

(c) Within 60 days after identification of the servicing contracting office, the program manager shall complete and submit the overall acquisition plan to the Acquisition Executive for approval. The servicing contracting office shall assist in developing the overall acquisition plan. The overall acquisition plan shall include for each of the major systems acquisition phases (i.e., exploration of alternative systems, competitive demonstrations, full-scale development and production) a schedule for completion of at least each of the following functions:

(1) Solicitation development in terms of mission need;

(2) Advance publicity for the initial, exploration phase;

(3) Issuance of requests for proposals (RFPs)

(4) Closing dates for RFPs; and

(5) Evaluation and award.

(d) The program manager shall submit all changes in the overall acquisition plan to the Acquisition Executive along with a written explanation of the need for each change. (See 1307.1 for acquisition planning, in general).

(Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2)

PART 1336—CONSTRUCTION AND ARCHITECT-ENGINEER CONTRACTS

Subpart 1336.2—Special Aspects of Contracting for Construction

Sec.

1336.209 Construction contracts with architect-engineer firms.

Subpart 1336.6—Architect-Engineer Services

1336.602–4 Selection authority.

1336.602–5 Short selection processes for contracts not to exceed $10,000.

1336.603 Collecting data on and appraising firms' qualifications.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

Subpart 1336.2—Special Aspects of Contracting for Construction

§ 1336.209 Construction contracts with architect-engineer firms.

The head of the contracting office is delegated the authority to approve the exceptional circumstance of awarding a contract for construction of a project to the firm that designed the project. Any approval of this type of award must be justified in writing and signed by the head of the contracting office.

Subpart 1336.6—Architect-Engineer Services

§ 1336.602–4 Selection authority.

(a) The Head of the Contracting Activity is the designated selection authority for architect-engineer service contracts over the small purchase dollar threshold.

§ 1336.602–5 Short selection processes for contracts not to exceed $10,000.

Both short selection processes prescribed in FAR 36.602–5 may be used for contracts not to exceed $10,000. However, in either case the contracting officer shall review the report, approve it and commence negotiations or return it for appropriate revision.

§ 1336.603 Collecting data on and appraising firms' qualifications.

(a) *Establishing offices.* The Office of Small and Disadvantaged Business Utilization (OSDBU) is responsible for Department-wide receipt and maintenance of data on firms wishing to be considered for architect-engineer service contracts.

PART 1337—SERVICE CONTRACTING

Subpart 1337.2—Consulting Services

Sec.
1337.202 General.
1337.205 Management controls.

Authority: Federal Property and Administrative Services Act of 1949, ge a30mr0.115as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

Subpart 1337.2—Consulting Services

§ 1337.202 General.

The Department's contracts for consulting and related services are governed by FAR 37.2.

§ 1337.205 Management controls.

(b) The Department's management controls for acquisition of consulting and related services are contained in FAR 37.2.

SUBCHAPTER G—CONTRACT MANAGEMENT

PART 1342—CONTRACT ADMINISTRATION

Subpart 1342.1—Interagency Contract Administration and Audit Services

§ 1342.102–70 Post award audit reviews.

(a) Generally, the final invoice shall not be approved until a close-out audit has been performed and all outstanding issues have been negotiated or resolved on the following types of contracts of $100,000 and above:

(1) Cost-reimbursement type contracts;

(2) The cost-reimbursement portion of fixed-price contracts;

(3) Letter contracts which provide for reimbursement of costs;

(4) Time and materials contracts; and

(5) Labor-hour contracts.

(b) Even though the $100,000 postaward audit threshold generally applies, an audit may be requested regardless of the dollar amount when the contracting officer determines that an audit is justified under one of the following circumstances:

(1) There is some evidence of fraud or waste;

(2) The contractor's performance under the contract has been questionable;

(3) The contractor had a high incidence of unallowable costs under a previous contract;

(4) The contract is with a newly established firm, or a firm which has just begun dealing with the Government.

(c) All requests for audit services and all relevant documents shall be sent to the address listed in 1315.805–70(b). To ensure receipt and planned action on audit requests, all requests should include a request for confirmation of receipt of the request and the date planned for delivery of the audit report.

(d) See the Department's *Model Procedures for Closeout of Completed Contracts* for further information on audits, including desk audits for contracts of less than $100,000, and waiver of the need for post award audits.

(Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2)

PART 1345—GOVERNMENT PROPERTY

Subpart 1345.1—General

1345.102 Policy.

The Department's policy and procedures on government property are contained in the *Property Management Policy Manual*, the *Property Management Procedure Handbook*, and the Department Administrative Order on *Property Management* (DAO 208–17).

(Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2)

SUBCHAPTER H—CLAUSES AND FORMS

PART 1352—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

Subpart 1352.0—General

Sec.
1352.000 Scope of part.
1352.001 General policy.

Subpart 1352.1—Instructions for Using Provisions and Clauses

1352.100 Incorporation by reference.

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2).

Subpart 1352.0—General

1352.000 Scope of part.

This part implements and supplements FAR Part 52 by prescribing specific modifications, alterations, and deviations to FAR solicitation provisions and contract clauses for Department-wide use.

1352.001 General policy.

The Department's policy is to use the FAR and CAR prescribed solicitation provisions and contract clauses unless specific authority for deviations has been obtained. (See 1301.4 for authority to deviate.) The use of uniform solicitation provisions and contract clauses should: provide a less burdensome way for potential contractors to respond to the Government's request for information concerning the evaluation of bids and proposals; expedite solicitation and contract preparation; and facilitate contract negotiation, administration and review. Each solicitation which incorporates contract clauses or solicitation provisions which deviate from those prescribed by the FAR and the CAR must be submitted to the Office of Procurement and Federal Assistance for prior review. The Office of Procurement and Federal Assistance will coordinate requests for approval of these solicitations by the Office of Management and Budget, in accordance with the Paperwork Reduction Act of 1980 and 5 CFR Part 1320.

Subpart 1352.1—Instructions for Using Provisions and Clauses

1352.100 Incorporation by reference.

Contracting officers within the Department shall incorporate solicitation provisions and contract clauses by reference in solicitations and contracts to the maximum extent provided by applicable law and regulation. Incorporation by reference is the listing only by title, regulatory citation, and date of the provision or clause rather than the full text. The full text of the referenced solicitation provision or contract clause is contained in the Code of Federal Regulations (CFR); Chapter 1 of Title 48 for FAR provisions and clauses; and Chapter 13 of Title 48 for CAR provisions and clauses.

PART 1353—FORMS

Sec.
1353.000 Scope of part.

Subpart 1353.1—General

1353.103 Exceptions.

Subpart 1353.2—Prescription of Forms

1353.200 Scope of subpart.
1353.204 Administrative matters.
1353.204–2 Contract reporting (CD 338).
1353.232 Contract financing.
1353.232–2 (CD–45).

Authority: Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 486(c)), as delegated by the Secretary of Commerce in Department Organization Order 10–5 and Department Administrative Order 208–2.

1353.000 Scope of part.

This part supplements FAR Part 53 by prescribing specific exceptions to FAR prescribed forms for Department-wide use.

Subpart 1353.1—General

1353.103 Exceptions.

The Department's policy is to use the FAR and CAR prescribed forms unless prior specific authority for exceptions or alterations has been obtained. Requests for exceptions to FAR or CAR forms shall be submitted to the Office of Procurement and Federal Assistance in the form prescribed by FAR 53.103 (See 1301.4 for authority to deviate).

Subpart 1353.2—Prescription of Forms

1353.200 Scope of subpart.

This subpart prescribes forms for Department-wide use which are exceptions to FAR prescribed forms. This subpart is arranged by subject matter, in the same order and keyed to the parts of the FAR or CAR in which the form use requirements are addressed.

1353.204 Administrative matters.

1353.204-2 Contract reporting (CD 338).

(a) *CD 338 (9/82) FPDS Code Sheet.* CD 338 is prescribed for Department-wide use in reporting individual contract actions above the small purchase dollar threshold, in lieu of SF 279.

1353.232 Contract financing.

1353.232-2 (CD 45).

CD 45 (3/76) Requisitioning Form. CD 45 is prescribed for Department-wide use in requesting action from the servicing contract office. This form is the vehicle for administrative approvals, clearances, and certification of the availability of adequate funds as specified in FAR 32.702.

Note.—This Appendix A will not appear in the Code of Federal Regulations.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Ch. 1

[Federal Acquisition Circular 84-1]

Federal Acquisition Regulation

AGENCIES: Department of Defense (DoD), General Services Administration, (GSA), National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: This Federal Acquisition Circular (FAC) amends the Federal Acquisition Regulation (FAR) with respect to the following: OMB approval under the Paperwork Reduction Act, Pub. L. 96-511; deletion of the requirement for reporting of identical bids; increasing the limitation of civilian agencies for the negotiation of contracts using small purchase procedures from $10,000 to $25,000; updating coverage pertaining to purchases under the Trade Agreements Act of 1979, 19 U.S.C. 2501-2582; removing the coverage in FAR Subpart 22.10, Service Contract Act of 1965, and the related contract clauses; prescribing policies, procedures, and contract clauses pertaining to patents, data, and copyrights; and revising thresholds requiring advance agreements for independent research and development and bid and proposal costs. Also included in FAC 84-1 are (1) a copy of the Memorandum of Understanding for FAR Maintenance executed by the Defense Acquisition Regulatory/Civilian Agency Acquisition Councils, together with a forwarding letter executed by representatives of DoD, GSA, and NASA, and (2) items concerning procedures to be followed with respect to the following subjects: (a) Publicizing proposed procurements and noncompetitive procurements; (b) revised small business size standards; (c) labor standards for contracts involving construction; (d) implementation of labor standards for Federal service contracts; (e) cost of money for capital employed on facilities in use and capital assets under construction; and (f) leasing of real property (space).

EFFECTIVE DATE: April 1, 1984.

FOR FURTHER INFORMATION CONTACT: Roger M. Schwartz, Director, FAR Secretariat, Room 4041, GS Building, Washington, D.C. 20405, Telephone (202) 523-4782.

SUPPLEMENTARY INFORMATION:

Background

The FAR is codified in Chapter 1, Title 48 of the Code of Federal Regulations.

The initial publication of the FAR was contained in Book 2, Volume 48, No. 182 of the **Federal Register** of September 19, 1983.

FAR 1.501, Solicitation of agency and public views, states that views of agencies and nongovernmental parties or organizations will be considered in formulating acquisition policies and regulations under the FAR, and provides that, normally, at least 60 days will be given for the receipt of comments. However, because it is essential that the coverage in FAC 84-1 be published before the FAR's effective date of April 1, 1984, it has been necessary to proceed to publish FAC 84-1 prior to the solicitation of views other than those of those agencies that are represented at the Defense Acquisition Regulatory and Civilian Agency Acquisition Councils. Consequently, agencies and nongovernmental parties or organizations may submit written comments after the publication of this final rule. Comments will be considered if received by June 1, 1984.

Government procurement.

Roger M. Schwartz,

Director, FAR Secretariat.

March 26, 1984.

Federal Acquisition Circular

[Number 84-1]

Unless otherwise specified, all Federal Acquisition Regulation (FAR) and other directive material contained in this Federal Acquisition Circular is effective April 1, 1984.

Ray Kline

Acting Administrator of General Services.

S. J. Evans,

Assistant Administrator for Procurement.

Harvey J. Gordon,

Assistant Deputy Under Secretary of Defense for Acquisition.

Federal Acquisition Circular (FAC) 84-1 amends the Federal Acquisition Regulation (FAR) and prescribes procedures to be followed pending development of FAR coverage, as specified below. The following is a summary of the amendments and procedures:

Item I—OMB Approval Under the Paperwork Reduction Act

The Office of Management and Budget (OMB) requires the display of OMB control numbers in the FAR text to comply with the Paperwork Reduction Act in order to collect information associated with Federal acquisition.

A new Section 1.105 is added to place the appropriate OMB control numbers in the FAR text.

Item II—Reports of Identical Bids

Executive Order 12430, July 6, 1983, revokes the requirement for all Federal agencies to report identical bids to the Attorney General.

Subpart 3.3 is revised to delete the requirement to submit reports. Subparts 53.2 and 53.3 are revised to delete Form DJ-1500, Identical Bid Report for Procurement.

Item III—Procedures for Publicizing Proposed Procurements and Noncompetitive Procurements

Pending FAR coverage pertaining to procedures for publicizing proposed procurements and processing noncompetitive procurements under Public Law 98-72, civilian agencies, other than NASA, shall continue to follow policies and procedures in FPR Temporary Regulation 75, Procedures for Publicizing Proposed Procurements and Processing Noncompetitive Procurements, October 1, 1983. DoD and NASA will provide separate direction in accordance with their established procedures.

Item IV—Small Purchase Limitation

Public Law 98-191 amended the Federal Property and Administrative Services Act of 1949 by increasing the limitation of civilian agencies for the negotiation of contracts using small purchase procedures from $10,000 to $25,000.

Part 13 is revised to change the amount of the small purchase limitation for civilian agencies from $10,000 to $25,000.

Item V—Small Business Size Standards

Pending new FAR coverage pertaining to small business size standards, civilian agencies, other than NASA, shall continue to follow the policies and procedures in FPR Bulletin 63, March 19, 1984, Changes in Small Business Size Standards and Requirements Under the Trade Agreements Act of 1979. DoD and NASA will provide separate direction in accordance with their established procedures.

Item VI—Labor Standards for Contracts Involving Construction

Pending FAR coverage pertaining to labor standards for contracts involving construction, civilian agencies, other than NASA, shall continue to follow

policies and procedures in FPR Temporary Regulation 70, Labor Standards for Contracts Involving Construction, June 28, 1983, and agency procedures instituted thereunder. DoD and NASA will provide separate direction in accordance with their established procedures.

Item VII—Service Contract Act of 1965

Pending new FAR coverage pertaining to the Service Contract Act of 1965, civilian agencies, other than NASA, shall continue to follow policies and procedures in FPR Temporary Regulation 76, Revision of Labor Standards for Federal Service Contracts, February 23, 1984, and agency procedures instituted thereunder. DoD and NASA will provide separate direction in accordance with their established procedures.

The coverage in Subpart 22.10, Service Contract Act of 1965, and the contract clauses at 52.222–40 through 52.222–44 are removed.

Item VIII—Purchases Under the Trade Agreements Act of 1979

The FAR text and clause concerning Purchases Under the Trade Agreements Act of 1979 have been updated to implement actions taken by the U.S. Trade Representative and to eliminate references in the contract clause that are made obsolete by final editing of the FAR text.

Item IX—Patents, Data, and Copyrights

Part 27, Patents, Data, and Copyrights, has been added to prescribe policies, procedures, and contract clauses pertaining to patents, and to provide a general statement of policy for rights in data and copyrights.

General coverage on the subjects of rights in data and copyrights is being provided at this time. It was not possible to develop uniform coverage in more detail for use on the FAR's effective date, based on the public and agency comments received on the proposed FAR coverage published in the **Federal Register**. Additional coverage in this area is being developed and will be published as soon as it is available. In the interim, agency supplements to the FAR will contain regulations on rights in data and copyrights.

Item X—Cost of Money for Capital Employed on Facilities in Use and Capital Assets Under Construction

Pending FAR coverage pertaining to cost of money for capital employed on facilities in use and capital assets under construction, civilian agencies, other than NASA, shall continue to follow policies and procedures in FPR 1–3.13, and agency procedures instituted thereunder.

Item XI—Revised Thresholds Requiring Advance Agreements for Independent Research and Development and Bid and Proposal Costs (IR&D and B&P)

The DoD Authorization Act of 1981 provided that the Department of Defense may periodically adjust the threshold amounts in 31.205–18 based on economic changes. Accordingly, the $4,000,000 threshold and the $500,000 threshold in 31.205–18 are adjusted to $4,400,000 and $550,000, respectively.

Item XII—Leasing of Real Property (Space)

Pending consideration by the Defense Acquisition Regulatory/Civilian Agency Acquisition Councils of the need for coverage on the subject of leasing of real property (space) in the FAR, civilian agencies, other than NASA, shall continue to use as guidelines the policies and procedures in FPR Temporary Regulation 68, Leasing of Real Property (Space), March 14, 1983.

Item XIII—Memorandum of Understanding for FAR Maintenance

The attached Memorandum of Understanding for FAR Maintenance (Appendix A) provides a uniform and orderly basis for the processing of FAR cases and the maintenance of the FAR. It contains procedures for processing recommendations for FAR changes, establishing FAR cases, and resolving disagreements.

Therefore, 48 CFR is amended as set forth below. Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

PART 1—FEDERAL ACQUISITION REGULATIONS SYSTEM

1. Part 1 is amended by adding § 1.105 to read as follows:

* * * * *

1.105 OMB approval under the Paperwork Reduction Act.

The Paperwork Reduction Act of 1980 (Pub. L. 96–511) imposes a requirement on Federal agencies to obtain approval from the Office of Management and Budget (OMB) before collecting information from ten or more members of the public. The information collection and recordkeeping requirements contained in this regulation have been approved by the OMB. The following OMB control numbers apply.

FAR segment	OMB control No.

PART 3—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

2. The heading for Subpart 3.3 is revised to read as follows:

Subpart 3.3—Reports of Suspected Antitrust Violations

* * * * *

3. Section 3.302 is revised to read as follows:

3.302 Definitions.

"Identical bids" means bids for the same line item that are determined to be identical as to unit price or total line item amount, with or without the application of evaluation factors (e.g., discount or transportation cost).

"Line item" means an item of supply or service, specified in an invitation for bids, for which the bidder must bid a separate price.

3.302-1 and 3.302-2 [Removed]

4. Subsections 3.302–1 and 3.302–2 are removed.

5. In section 3.303, paragraph (d) is revised to read as follows:

3.303 Reporting suspected antitrust violations.

* * * * *

(d) Identical bids shall be reported under this section if the agency has some reason to believe that the bids resulted from collusion.

* * * * *

PART 13—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

6. Section 13.000 is revised to read as follows:

13.000 Scope of part.

This part prescribes policies and procedures for the acquisition of supplies, nonpersonal services, and construction from commercial sources, the aggregate amount of which does not exceed $25,000.

7. In section 13.101, the definition of "Small purchase" is revised to read as follows:

13.101 Definitions.

* * * * *

"Small purchase" means an acquisition of supplies, nonpersonal services, and construction in the amount of $25,000 or less using the procedures prescribed in this part.

* * * * *

8. In section 13.302, paragraph (a) is revised to read as follows:

13.302 Conditions for use.

* * * * *

(a) Individual orders do not exceed $25,000, except that executive agencies may establish higher dollar limitations for specified activities or items.

* * * * *

PART 22—APPLICATION OF LABOR LAWS TO GOVERNMENT ACQUISITIONS

* * * * *

Subpart 22.10—[Reserved]

* * * * *

9. The title and text of Subpart 22.10, consisting of sections 22.1000 through 22.1015, are removed, and the subpart is reserved.

PART 25—FOREIGN ACQUISITION

* * * * *

25.401 [Amended]

10. In section 25.401, the table in "Designated country" is amended by adding "Israel" to the list.

11. Section 25.402 is amended as follows:

In paragraphs (a) and (c) change "$169,000" to read "161,000".

Paragraph (b) is revised to read as follows:

25.402 Policy.

* * * * *

(b) Except when waived under section 302(b)(2) of the Trade Agreements Act, there shall be no purchases of foreign end products subject to the Act unless the foreign end products are designated country end products.

* * * * *

25.403 [Amended]

12. In section 25.403, paragraph (a) is amended by changing "$169,000" to read "$161,000".

25.405 [Amended]

13. In section 25.405, the introductory text and paragraph (e) are amended by changing "$169,000" to read "161,000".

25.406 [Amended]

14. Section 25.406 is amended by alphabetically inserting "Maritime Administration of the Department of Transportation" and "Peace Corps" to the list.

15. A new Part 27 is added to read as follows:

TABLE OF CONTENTS

27.000 Scope of part.

SUBPART 27.1—GENERAL

27.101 Applicability.
27.102 Reserved.
27.103 Policy.
27.104 General guidance.

SUBPART 27.2—PATENTS

27.200 Scope of subpart.
27.201 Authorization and consent.
27.201-1 General.
27.201-2 Clauses on authorization and consent.
27.202 Notice and assistance.
27.202-1 General.
27.202-2 Clause on notice and assistance.
27.203 Patent indemnification of Government by contractor.
27.203-1 General.
27.203-2 Clauses for formally advertised contracts (excluding construction).
27.203-3 Negotiated contracts (excluding construction).
27.203-4 Clauses for negotiated contracts (excluding construction).
27.203-5 Clause for construction contracts and for dismantling, demolition, and removal of improvements contracts.
27.203-6 Clause for Government waiver of indemnity.
27.204 Reporting of royalties—anticipated or paid.
27.204-1 General.
27.204-2 Solicitation provision for royalty information.

27.204-3 Patents—notice of Government as a licensee.
27.204-4 Clause for reporting of royalties (foreign).
27.205 Adjustment of royalties.
27.206 Refund of royalties.
27.206-1 General.
27.206-2 Clause for refund of royalties.
27.207 Classified contracts.
27.207-1 General.
27.207-2 Clause for classified contracts.

SUBPART 27.3—PATENT RIGHTS UNDER GOVERNMENT CONTRACTS

27.300 Scope of subpart.
27.301 Definitions.
27.302 Policy.
27.303 Contract clauses.
27.304 Procedures.
27.304-1 General.
27.304-2 Contracts placed by or for other Government agencies.
27.304-3 Contracts for construction work or architect- engineer services.
27.304-4 Subcontracts.
27.304-5 Appeals.
27.305 Administration of patent rights clauses.
27.305-1 Patent rights follow-up.
27.305-2 Follow-up by contractor.
27.305-3 Follow-up by Government.
27.305-4 Conveyance of invention rights acquired by the Government.
27.305-5 Publication or release of invention disclosures.
27.306 Licensing background patent rights to third parties.

SUBPART 27.4—RIGHTS IN DATA AND COPYRIGHTS

27.401 General.

SUBPART 27.5—RESERVED

SUBPART 27.6—FOREIGN LICENSE AND TECHNICAL ASSISTANCE AGREEMENTS

27.601 General

AUTHORITY: 40 USC 486(c); Chapter 137, 10 USC ; and 42 USC 2453(c).

27.000 Scope of part.

This part prescribes policies, procedures, and contract clauses pertaining to patents and directs agencies to develop coverage for Rights in Data and Copyrights.

SUBPART 27.1—GENERAL

27.101 Applicability.

The policies, procedures, and clauses prescribed by this Part 27 are applicable to all agencies. Agencies are authorized to adopt alternate policies, procedures, and clauses, but only to the extent determined necessary to meet the specific requirements of laws, executive orders, treaties, or international agreements. Any agency action adopting such alternate policies, procedures, and clauses shall be covered in published agency regulations.

27.102 Reserved.

27.103 Policy.

The policies pertaining to patents, data, and copyrights are set forth in this Part 27 and the related clauses in Part 52.

27.104 General guidance.

(a) The Government encourages the maximum practical commercial use of inventions made while performing Government contracts.

(b) Generally, the Government will not refuse to award a contract on the grounds that the prospective contractor may infringe a patent.

(c) Generally, the Government encourages the use of inventions in performing contracts and, by appropriate contract clauses, authorizes and consents to such use, even though the inventions may be covered by U.S. patents and indemnification against infringement may be appropriate.

(d) Generally, the Government should be indemnified against infringement of U.S. patents resulting from performing contracts when the supplies or services acquired under the contracts normally are or have been sold or offered for sale by any supplier to the public in the commercial open market or are the same as such supplies or services with relatively minor modifications.

(e) The Government acquires supplies or services on a competitive basis to the maximum practical extent, but it is important that the efforts directed toward increasing competition not improperly demand or use data relating to private developments.

(f) The Government honors the rights in data resulting from private developments and limits its demands for such rights to those essential for Government purposes.

(g) The Government honors rights in patents, data, and copyrights, and complies with the stipulations of law in using or acquiring such rights.

(h) Generally, the Government requires that contractors obtain permission from copyright owners before including privately-owned copyrighted works in data required to be delivered under Government contracts.

SUBPART 27.2—PATENTS

27.200 Scope of subpart.

This subpart prescribes policy with respect to—

(a) Patent infringement liability resulting from work performed by or for the Government;

(b) Royalties payable in connection with performing Government contracts; and

(c) Security requirements covering patent applications containing classified subject matter filed by contractors.

27.201 Authorization and consent.

27.201-1 General.

(a) In those cases where the Government has authorized or consented to the manufacture or use of an invention described in and covered by a patent of the United States, any suit for infringement of the patent based on the manufacture or use of the invention by or for the United States by a contractor (including a subcontractor at any tier) can be maintained only against the Government in the U.S. Claims Court and not against the contractor or subcontractor (28 U.S.C. 1498). To ensure that work by a contractor or subcontractor under a Government contract may not be enjoined by reason of patent infringement, the Government shall give authorization and consent in accordance with this regulation. The liability of the Government for damages in any such suit against it may, however, ultimately be borne by the contractor or subcontractor in accordance with the terms of any patent indemnity clause also included in the contract, and an authorization and consent clause does not detract from any patent indemnification commitment by the contractor or subcontractor. Therefore, both a patent indemnity clause and an authorization and consent clause may be included in the same contract.

(b) The contracting officer shall not include in any solicitation or contract—

(1) Any clause whereby the Government expressly agrees to indemnify the contractor against liability for patent infringement; or

(2) Any authorization and consent clause when both complete performance and delivery are outside the United States, its possessions, and Puerto Rico.

27.201-2 Clauses on authorization and consent.

(a) The contracting officer shall insert the clause at 52.227-1, Authorization and Consent, in solicitations and contracts (including those for construction; architect-engineer services; dismantling, demolition, or removal of improvements; and noncommon carrier communication services), except when small purchase procedures apply or both complete performance and delivery are outside the United States, its possessions, and Puerto Rico. Although the clause is not required when small purchase procedures apply, it may be used with them.

(b) The contracting officer shall insert the clause with its Alternate I in all R&D solicitations and contracts (including those for construction and architect-engineer services calling exclusively for R&D work or exclusively for experimental work), unless both complete performance and delivery are outside the United States, its possessions, and Puerto Rico. When a proposed contract involves both R&D work and supplies or services, and the R&D work is the primary purpose of the contract, the contracting officer shall use this alternate. In all other proposed contracts involving both R&D work and supplies or services, the contracting officer shall use the basic clause. Also, when a proposed contract involves either R&D or supplies and materials, in addition to construction or architect-engineer work, the contracting officer shall use the basic clause.

(c) If the solicitation or contract is for communication services with a common carrier and the services are unregulated and not priced by a tariff schedule set by a regulatory body, the contracting officer shall use the clause with its Alternate II.

27.202 Notice and assistance.

27.202-1 General.

The contractor is required to notify the contracting officer of all claims of infringement that come to the contractor's attention in connection with performing a Government contract. The contractor is also required, when requested, to assist the Government with any evidence and information in its possession in connection with any suit against the Government, or any claims against the Government made before suit has been instituted, on account of any alleged patent or copyright infringement arising out of or resulting from the contract performance.

27.202-2 Clause on notice and assistance.

The contracting officer shall insert the clause at 52.227-2, Notice and Assistance Regarding Patent and Copyright Infringement, in supply, service, or research and development solicitations and contracts (including construction and architect-engineer contracts) which anticipate a contract value above the dollar limit set forth at 13.000, except when small purchase procedures apply or both complete performance and delivery are outside the United States, its possessions, and Puerto Rico, unless the contracts indicate that the supplies or other deliverables are ultimately to be shipped into one of those areas.

27.203 Patent indemnification of Government by contractor.

27.203-1 General.

(a) To the extent set forth in this section, the Government requires reimbursement for liability for patent infringement arising out of or resulting from performing construction contracts or contracts for supplies or services that normally are or have been sold or offered for sale by any supplier to the public in the commercial open market or that are the same as such supplies or services with relatively minor modifications. Appropriate clauses for indemnification of the Government are prescribed in the following subsections.

(b) A patent indemnity clause shall not be used in the following situations:

(1) When the clause at 52.227-1, Authorization and Consent, with its Alternate I, is included in the contract, except that in contracts calling also for supplies of the kind described in paragraph (a) above, a patent indemnity clause may be used solely with respect to such supplies.

(2) When the contract is for supplies or services (or such items with relatively minor modifications) that clearly are not or have not been sold or offered for sale by any supplier to the public in the commercial open market. However, a patent indemnity clause may be included in (i) formally advertised contracts to obtain an indemnity regarding specific components, spare parts, or services so sold or offered for sale (see 27.203-2(b) below), and (ii) contracts to be awarded (either by formal advertising or negotiation) if a patent owner contends that the acquisition would result in patent infringement and the prospective contractor, after responding to a solicitation that did not contain an indemnity clause, is willing to indemnify the Government against such infringement either (A) without increase in price on the basis that the patent is invalid or not infringed, or (B) for other good reasons.

(3) When both performance and delivery are to be outside the United States, its possessions, and Puerto Rico, unless the contract indicates that the supplies or other deliverables are ultimately to be shipped into one of those areas.

(4) When the contract is awarded by small purchase procedures.

(5) When the contract is solely for architect-engineer work (see Part 36).

27.203-2 Clauses for formally advertised contracts (excluding construction).

(a) Except when prohibited by 27.203-1(b) above, the contracting officer shall insert the clause at 52.227-3, Patent Indemnity, in formally advertised contracts for supplies or services (excluding construction and dismantling, demolition, and removal of improvements), if the contracting officer determines that the supplies or services (or such items with relatively minor modifications) normally are or have been sold or offered for sale by any supplier to the public in the commercial open market. Also the clause may be included as authorized in 27.203-1(b)(2)(i).

(b) In solicitations and contracts (excluding those for construction) that call in part for specific components, spare parts, or services (or such items with relatively minor modifications) that normally are or have been sold or offered for sale by any supplier to the public in the commercial open market, the contracting officer may use the clause with its Alternate I or II, as appropriate. The choice between Alternate I (identification of excluded items) and Alternate II (identification of included items) should be based upon simplicity, Government administrative convenience and ease of identification of the items.

(c) In solicitations and contracts for communication services and facilities where performance is by a common carrier, and the services are unregulated and are not priced by a tariff schedule set by a regulatory body, use the basic clause with its Alternate III.

27.203-3 Negotiated contracts (excluding construction).

A patent indemnity clause is not required in negotiated contracts, (except construction contracts covered at 27.203-5), but may be used as discussed in 27.203-4 below. A decision to omit a patent indemnity clause in a negotiated fixed-price contract described in this subsection should be based on a price consideration to the Government for the foregoing indemnification rights normally received by commercial purchasers of the same supplies or services.

27.203-4 Clauses for negotiated contracts (excluding construction).

(a) The contracting officer may insert the clause at 52.227-3, Patent Indemnity—

(1) As authorized in 27.203-1(b)(2)(ii); and

(2) Except as prohibited by 27.203-1(b), in solicitations anticipating negotiated contracts (and such contracts) for supplies or services (excluding construction and dismantling, demolition, and removal of

improvements), if the contracting officer determines that the supplies or services (or such items with relatively minor modifications) normally are or have been sold or offered for sale by any supplier to the public in the commercial open market. Ordinarily, the contracting officer, in consultation with the prospective contractor, should be able to determine whether the supplies or services being purchased normally are or have been sold or offered for sale by any supplier to the public in the commercial open market. (For negotiated construction contracts, see 27.203-5).

(b) In solicitations and contracts that call in part for specific components, spare parts, or services (or such items with relatively minor modifications) that normally are or have been sold or offered for sale by any supplier to the public in the commercial open market, the contracting officer may use the clause with its Alternate I or II, as appropriate. The choice between Alternate I (identification of excluded items) and Alternate II (identification of included items) should be based upon simplicity, Government administrative convenience, and the ease of identification of the items.

(c) In solicitations and contracts for communication services and facilities where performance is by a common carrier, and the services are unregulated and are not priced by a tariff schedule set by a regulatory body, the clause shall be used with its Alternate III.

27.203-5 Clause for construction contracts and for dismantling, demolition, and removal of improvements contracts.

Except as prohibited by 27.203-1(b), the contracting officer shall insert the clause at 52.227-4, Patent Indemnity—Construction Contracts, in solicitations and contracts for construction or that are fixed-price for dismantling, demolition, or removal of improvements. If it is determined that the construction will necessarily involve the use of structures, products, materials, equipment, processes, or methods that are nonstandard, noncommercial, or special, the contracting officer may expressly exclude them from the patent indemnification by using the basic clause with its Alternate I.

27.203-6 Clause for Government waiver of indemnity.

If, in the Government's interest, it is appropriate to exempt one or more specific United States patents from the patent indemnity clause, the contracting officer shall obtain written approval from the agency head or designee and shall insert the clause at 52.227-5, Waiver of Indemnity, in solicitations and contracts in addition to the appropriate patent indemnity clause. The contracting officer shall document the contract file with a copy of the written approval.

27.204 Reporting of royalties—anticipated or paid.

27.204-1 General.

(a) (1) To determine whether royalties anticipated or actually paid under Government contracts are excessive, improper, or inconsistent with any Government rights in particular inventions, patents, or patent applications, contracting officers shall require prospective contractors to furnish certain royalty information and shall require contractors to furnish certain royalty reports. Contracting officers shall take appropriate action to reduce or eliminate excessive or improper royalties.

(2) Royalty information shall not be required (except for information under 27.204-3) in formally advertised contracts unless the need for such information is approved at a level above that of the contracting officer as being necessary for proper protection of the Government's interests.

(b) When it is expected that work may be performed in the United States, its possessions, or Puerto Rico, any solicitation that may result in a negotiated contract for which royalty information is desired or for which cost or pricing data is obtained (see 15.804) should contain a provision requesting information relating to any proposed charge for royalties. If the work is to be performed in the United States, its possessions, or Puerto Rico and the response to the solicitation includes a charge for royalties, the contracting officer shall, before award of the contract, forward the information relating to the proposed payments of royalties to the office having cognizance of patent matters for the contracting activity concerned. The cognizant office shall promptly advise the contracting officer of appropriate action. Before award, the contracting officer shall take action to protect the Government's interest with respect to such royalties, giving due regard to all pertinent factors relating to the proposed contract and the advice of the cognizant office.

(c) The contracting officer, when considering the approval of a subcontract for work to be performed in the United States, its possessions, or Puerto Rico, shall require and obtain the same royalty information and take the same action with respect to such subcontracts in relation to royalties as required for prime contracts under paragraph (b) above. However, consent need not be withheld pending receipt of advice in regard to such royalties from the office having cognizance of patent matters.

(d) The contracting officer shall forward the royalty information and/or royalty reports received to the office having cognizance of patent matters for the contracting activity concerned for advice as to appropriate action.

27.204-2 Solicitation provision for royalty information.

If it is expected that work may be performed in the United States, its possessions, or Puerto Rico, the contracting officer shall insert a solicitation provision substantially as shown in 52.227-6, Royalty Information, in any solicitation that may result in a negotiated contract for which royalty information is desired or for which cost or pricing data is obtained under 15.804. If the solicitation is for communication services and facilities by a common carrier, use the provision with its Alternate I.

27.204-3 Patents—notice of Government as a licensee.

(a) When the Government is obligated to pay a royalty on a patent because of a license agreement between the Government and a patent owner and the contracting officer knows (or has reason to believe) that the licensed patent will be applicable to a prospective contract, the Government should furnish information relating to the royalty to prospective offerors since it serves the interest of both the Government and the offerors. In such situations, the contracting officer should include in the solicitation a notice of the license, the number of the patent, and the royalty rate recited in the license.

(b) When the Government is obligated to pay such a royalty, the solicitation should also require offerors to furnish information indicating whether or not each offeror is a licensee under the patent or the patent owner. This information is necessary so that the Government may either (1) evaluate an offeror's price by adding an amount equal to the royalty, or (2) negotiate a price reduction with an offeror-licensee when the offeror is licensed under the same patent at a lower royalty rate.

(c) If the Government is obligated to pay a royalty on a patent involved in the prospective contract, the contracting officer shall insert in the solicitation, substantially as shown, the provision at 52.227-7, Patents—Notice of Government Licensee.

27.204-4 Clause for reporting of royalties (foreign).

In solicitations contemplating negotiated contracts (and such contracts) to be performed outside the United States, its possessions, and Puerto Rico, regardless of the place of delivery, the contracting officer shall insert the clause at 52.227-8, Reporting of Royalties (Foreign).

27.205 Adjustment of royalties.

(a) If at any time the contracting officer has reason to believe that any royalties paid, or to be paid, under an existing or prospective contract or subcontract are inconsistent with Government rights, excessive, or otherwise improper, the facts shall be promptly reported to the office having cognizance of patent matters for the contracting activity concerned. The cognizant office shall review the royalties thus reported and such royalties as are reported under 27.204 and 27.206 and, in accordance with agency procedures, shall either recommend appropriate action to the contracting officer or, if authorized, shall take appropriate action.

(b) In coordination with the cognizant office, the contracting officer shall promptly act to protect the Government against payment of royalties on supplies or services—

(1) With respect to which the Government has a royalty-free license;

(2) At a rate in excess of the rate at which the Government is licensed; or

(3) When the royalties in whole or in part otherwise constitute an improper charge.

(c) In appropriate cases, the contracting officer in coordination with the cognizant office shall obtain a refund pursuant to any refund of royalties clause in the contract (see 27.206) or negotiate for a reduction of royalties.

(d) For guidance in evaluating information furnished pursuant to 27.204 and 27.205(a) above, see 31.205-37 and 31.311-34. See also 31.109 regarding advance understandings on particular cost items, including royalties.

27.206 Refund of royalties.

27.206-1 General.

When a fixed-price contract is negotiated under circumstances that make it questionable whether or not substantial amounts of royalties will have to be paid by the contractor or a subcontractor, such royalties may be included in the target or contract price, provided the contract specifies that the Government will be reimbursed the amount of such royalties if they are not paid. Such circumstances might include, for example, either a pending Government anti-trust action or prospective litigation on the validity of a patent or patents or on the enforceability of an agreement (upon which the contractor or subcontractor bases the asserted obligation) to pay the royalties to be included in the target or contract price.

27.206-2 Clause for refund of royalties.

The contracting officer shall insert the clause at 52.227-9, Refund of Royalties, in negotiated fixed-price contracts and solicitations contemplating such contracts if the contracting officer determines that circumstances make it questionable whether or not substantial amounts of royalties will have to be paid by the contractor or a subcontractor at any tier.

27.207 Classified contracts.

27.207-1 General.

(a) Unauthorized disclosure of classified subject matter, whether in patent applications or resulting from the issuance of a patent, may be a violation of 18 U.S.C. 792 et seq. (Espionage and Censorship), and related statutes, and may be contrary to the interests of national security.

(b) Upon receipt from the contractor of a patent application, not yet filed, that has been submitted by the contractor in compliance with paragraph (a) or (b) of the clause at 52.227-10, Filing of Patent Applications—Classified Subject Matter, the contracting officer shall ascertain the proper security classification of the patent application. Upon a determination that the application contains classified subject matter, the contracting officer shall inform the contractor of any instructions deemed necessary or advisable relating to transmittal of the application to the United States Patent Office in accordance with procedures in the Department of Defense Industrial Security Manual for Safeguarding Classified Security Information. If the material is classified "Secret" or higher, the contracting officer shall make every effort to notify the contractor of the determination within 30 days, pursuant to paragraph (a) of the clause.

(c) In the case of all applications filed under the provisions of this section 27.207, the contracting officer, upon receiving the application serial number, the filing date, and the information furnished by the contractor under paragraph (d) of the clause at 52.227-10, Filing of Patent Applications—Classified Subject Matter, shall promptly submit that information to personnel having cognizance of patent matters in order that the steps necessary to ensure the security of the application may be taken.

(d) A request for the approval referred to in paragraph (c) of the clause at 52.227-10, Filing of Patent Applications—Classified Subject Matter, must be considered and acted upon promptly by the contracting officer in order to avoid the loss of valuable patent rights of the Government or the contractor.

27.207-2 Clause for classified contracts.

The contracting officer shall insert the clause at 52.227-10, Filing of Patent Applications—Classified Subject Matter, in all classified solicitations and contracts and in all solicitations and contracts where the nature of the work or classified subject matter involved in the work reasonably might be expected to result in a patent application containing classified subject matter.

SUBPART 27.3—PATENT RIGHTS UNDER GOVERNMENT CONTRACTS

27.300 Scope of subpart.

This subpart prescribes policies, procedures, and contract clauses with respect to inventions made in the performance of work under a Government contract or subcontract thereunder if a purpose of the contract or subcontract is the conduct of experimental, developmental, or research work, except to the extent statutory requirements necessitate different agency policies, procedures, and clauses as specified in agency supplemental regulations.

27.301 Definitions.

"Invention," as used in this subpart, means any invention or discovery that is or may be patentable or otherwise protectable under Title 35 of the U.S. Code.

"Made," as used in this subpart, when used in relation to any invention, means the conception or first actual reduction to practice of such invention.

"Nonprofit organization," as used in this subpart, means a domestic university or other institution of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)) and exempt from taxation under section 501(a) of the Internal Revenue Code (26 U.S.C. 501(a)), or any domestic nonprofit scientific or educational organization qualified under a State nonprofit organization statute.

"Practical application," as used in this subpart, means to manufacture, in the case of a composition or product; to practice, in the case of a process or method; or to operate, in the case of a

machine or system; and, in each case, under such conditions as to establish that the invention is being utilized and that its benefits are, to the extent permitted by law or Government regulations, available to the public on reasonable terms.

"Small business firm," as used in this subpart, means a domestic small business concern as defined at 15 U.S.C. 632 and implementing regulations of the Administrator of the Small Business Administration. (For the purpose of this definition, the size standard contained in 13 CFR 121.3-8 for small business contractors and in 13 CFR 121.3-12 for small business subcontractors will be used. See FAR Part 19).

"Subject invention," as used in this subpart, means any invention of the contractor conceived or first actually reduced to practice in the performance of work under a Government contract.

27.302 Policy.

(a) *Introduction.* (1) The policy of this section is based on 35 U.S.C. Chapter 18 (Pub. L. 96-517), OMB Circular A-124, and the Presidential Memorandum on Government Patent Policy to the Heads of Executive Departments and Agencies dated February 18, 1983. The objectives of this policy are to use the patent system to promote the utilization of inventions arising from federally supported research or development; to encourage maximum participation of industry in federally supported research and development efforts; to ensure that these inventions are used in a manner to promote free competition and enterprise; to promote the commercialization and public availability of the inventions made in the United States by United States industry and labor; to ensure that the Government obtains sufficient rights in federally supported inventions to meet the needs of the Government and protect the public against nonuse or unreasonable use of inventions; and to minimize the costs of administering policies in this area.

(2) Some agencies are subject, in whole or in part, to one of the following statutes, which require that information as to uses, products, processes, patents, or other developments "be available to the general public": 31 U.S.C. 666, 22 U.S.C. 2572, 50 U.S.C. 167b, 30 U.S.C. 951(c), 30 U.S.C. 937(b), 40 U.S.C. App. 302(e), 30 U.S.C. 1226, and 15 U.S.C. 1395(c). Such agencies shall generally use the clauses herein allowing title to patents to be retained by the contractor, and the related procedures.

(b) *Contractor right to elect title.* Under the policy set forth in paragraph (a) above, each contractor may, after disclosure to the Government as required by the patent rights clause included in the contract, elect to retain title to any invention made in the performance of work under the contract. To the extent an agency's statutory requirements necessitate a different policy, or different procedures and/or contract clauses to effectuate the policy set forth in paragraph (a) above, such policy, procedures, and clauses shall be contained in or expressly referred to in that agency's supplement to this subpart. In addition, a contract may provide otherwise (1) when the contract is for the operation of a Government-owned research or production facility, (2) in exceptional circumstances when it is determined by the agency that restriction or elimination of the right to retain title in any subject invention will better promote the policy and objectives of 35 U.S.C. Chapter 18 and the Presidential Memorandum, or (3) when it is determined by a Government authority which is authorized by statute or Executive Order to conduct foreign intelligence or counterintelligence activities that the restriction or elimination of the right to retain title to any subject invention is necessary to protect the security of such activities. In those instances when the Government has the right to acquire title at the time of contracting the contractor may, nevertheless, request greater rights to an identified invention. (See 27.304-1(a).) The right of the contractor to retain title shall, in any event, be subject to the provisions of paragraphs (c) through (g) below unless for contracts with other than small business or nonprofit organizations the agency determines before contract award that all or portions of these provisions may be modified, waived, or omitted. (See 27.304-1(f).)

(c) *Government license.* The Government shall have (unless provided otherwise in accordance with 27.304-1(f)) at least a nonexclusive, nontransferable, irrevocable, paid-up license to practice, or have practiced for or on behalf of the United States, any subject invention throughout the world; and may, if provided in the contract (see Alternate I of the applicable patent rights clause), have additional rights to sublicense any foreign government or international organization pursuant to existing treaties or agreements identified in the contract, and any future treaty or agreement.

(d) *Government right to receive title.* (1) The Government has the right to receive title to any invention if the contract so provides pursuant to a determination made in accordance with subparagraph (b)(1), (2), or (3) above. In addition, to the extent provided in the patent rights clause, the Government has the right to receive title to an invention—

(i) If the contractor has not disclosed the invention within the time specified in the clause;

(ii) In any country where the contractor does not elect to retain rights or fails to elect to retain rights to the invention within the time specified in the clause;

(iii) In any country where the contractor has not filed a patent application within the time specified in the clause;

(iv) In any country where the contractor decides not to continue prosecution of a patent application, pay maintenance fees, or defend in a reexamination or opposition proceeding on the patent; and/or

(v) In any country where the contractor no longer desires to retain title.

(2) For the purposes of this paragraph, election or filing in a European Patent Office Region or under the Patent Cooperation Treaty constitutes election or filing in any country covered therein to meet the times specified in the clause, provided that the Government has the right to receive title in those countries not subsequently designated by the contractor.

(e) *Utilization reports.* Unless provided otherwise in accordance with 27.304-1(f), contracts provide that the Government shall have the right to require periodic reporting on the utilization or efforts at obtaining utilization that are being made by the contractor or its licensees or assignees. Such reporting by small business firms and nonprofit organizations may be required in accordance with instructions as may be issued by the Department of Commerce. Agencies should protect the confidentiality of utilization reports to the extent permitted by 35 U.S.C. 205 or other applicable laws and OMB Circular A-124.

(f) *March-in rights.* (1) With respect to any subject invention in which a contractor has acquired title, contracts provide that the agency shall have the right (unless provided otherwise in accordance with 27.304-1(f)) to require the contractor, an assignee, or exclusive licensee of a subject invention to grant a nonexclusive, partially exclusive, or exclusive license in any field of use to a responsible applicant or applicants, upon terms that are reasonable under the circumstances, and if the contractor, assignee, or exclusive licensee refuses such request, to grant such a license itself, if the agency determines that such action is necessary—

(i) Because the contractor or assignee has not taken, or is not expected to take within a reasonable time, effective steps to achieve practical application of the subject invention in such field of use;

(ii) To alleviate health or safety needs which are not reasonably satisfied by the contractor, assignee, or their licensees;

(iii) To meet requirements for public use specified by Federal regulations and such requirements are not reasonably satisfied by the contractor, assignee, or licensees; or

(iv) Because the agreement required by paragraph (g) below has neither been obtained nor waived, or because a licensee of the exclusive right to use or sell any subject invention in the United States is in breach of its agreement obtained pursuant to paragraph (g) below.

(2) This right of the agency shall be exercised only after the contractor has been provided a reasonable time to present facts and show cause why the proposed agency action should not be taken, and afforded an opportunity to take appropriate action if the contractor wishes to dispute or appeal the proposed action, in accordance with 27.304-1(g).

(g) *Preference for United States industry.* Unless provided otherwise in accordance with 27.304-1(f), contracts provide that no contractor which receives title to any subject invention and no assignee of any such contractor shall grant to any person the exclusive right to use or sell any subject invention in the United States unless such person agrees that any products embodying the subject invention or produced through the use of the subject invention will be manufactured substantially in the United States. However, in individual cases, the requirement for such an agreement may be waived by the agency upon a showing by the contractor or assignee that reasonable but unsuccessful efforts have been made to grant licenses on similar terms to potential licensees that would be likely to manufacture substantially in the United States or that under the circumstances domestic manufacture is not commercially feasible.

(h) *Minimum rights to contractor.* (1) When the Government acquires title to a subject invention, the contractor is normally granted a revocable, nonexclusive, royalty-free license to that invention throughout the world. The contractor's license extends to its domestic subsidiaries and affiliates, if any, within the corporate structure of which the contractor is a part and includes the right to grant sublicenses of the same scope to the extent the contractor was legally obligated to do so at the time the contract was awarded. The license is transferable only with the approval of the contracting officer except when transferred to the successor of that part of the contractor's business to which the invention pertains.

(2) The contractor's domestic license may be revoked or modified to the extent necessary to achieve expeditious practical application of the subject invention pursuant to an application for an exclusive license submitted in accordance with the applicable provisions in the Federal Property Management Regulations and agency licensing regulations. This license will not be revoked in that field of use or the geographical areas in which the contractor has achieved practical application and continues to make the benefits of the invention reasonably accessible to the public. The license in any foreign country may be revoked or modified to the extent the contractor, its licensees, or its domestic subsidiaries or affiliates have failed to achieve practical application in that country. See the procedures at 27.304-1(e).

(i) *Confidentiality of inventions.* The publication of information disclosing an invention by any party before the filing of a patent application may create a bar to a valid patent. Accordingly, 35 U.S.C. 205 and OMB Circular A-124 provide that Federal agencies are authorized to withhold from disclosure to the public information disclosing any invention in which the Federal Government owns or may own a right, title, or interest (including a nonexclusive license) for a reasonable time in order for a patent application to be filed. Furthermore, Federal agencies shall not be required to release copies of any document which is part of an application for patent filed with the United States Patent and Trademark Office or with any foreign patent office. The Presidential Memorandum on Government Patent Policy specifies that agencies should protect the confidentiality of invention disclosures and patent applications required in performance or in consequence of awards to the extent permitted by 35 U.S.C. 205 or other applicable laws.

27.303 Contract clauses.

In contracts (and solicitations therefor) for experimental, developmental, or research work (but see 27.304-3 regarding contracts for construction work or architect-engineer services), a patent rights clause shall be inserted as follows:

(a) (1) The contracting officer shall insert the clause at 52.227-11, Patent Rights—Retention by the Contractor (Short Form), if all the following conditions apply:

(i) The contractor is a small business concern or nonprofit organization as defined in 27.301 or, except for contracts of the Department of Defense (DOD), the Department of Energy (DOE), or the National Aeronautics and Space Administration (NASA), any other type of contractor.

(ii) No alternative patent rights clause is used in accordance with paragraphs (c) or (d) below or 27.304-2.

(2) To the extent the information is not required elsewhere in the contract, and unless otherwise specified by agency supplemental regulations, the contracting officer may modify paragraph (f) of the clause to require the contractor to do one or more of the following:

(i) Provide periodic (but not more frequently than annually) listings of all subject inventions required to be disclosed during the period covered by the report.

(ii) Provide a report prior to the closeout of the contract listing all subject inventions or stating that there were none.

(iii) Provide notification of all subcontracts for experimental, developmental, or research work.

(iv) Provide, upon request, the filing date, serial number and title; a copy of the patent application; and patent number and issue date for any subject invention in any country in which the contractor has applied for patents.

(v) Furnish the Government an irrevocable power to inspect and make copies of the patent application file.

(3) If the acquisition of patent rights for the benefit of a foreign government is required under a treaty or executive agreement or if the agency head or a designee determines at the time of contracting that it would be in the national interest to acquire the right to sublicense foreign governments or international organizations pursuant to any existing or future treaty or agreement, the contracting officer shall use the clause with its Alternate I.

(b) (1) The contracting officer shall insert the clause at 52.227-12, Patent Rights—Retention by the Contractor (Long Form), if all the following conditions apply:

(i) The contractor is other than a small business firm or nonprofit organization.

(ii) No alternative clause is used in accordance with paragraph (c) or (d) below or 27.304-2.

(iii) The contracting agency is one of those excepted under subdivision (a)(1)(i) above.

(2) If the acquisition of patent rights for the benefit of a foreign government is required under a treaty or executive agreement or if the agency head or a designee determines at the time of contracting that it would be in the national interest to acquire the right to sublicense foreign governments or international organizations pursuant to any existing or future treaty or agreement, the contracting officer shall use the clause with its Alternate I.

(c) (1) The contracting officer shall insert the clause at 52.227-13, Patent Rights—Acquisition by the Government, if any of the following conditions apply:

(i) No alternative clause is used in accordance with subparagraph (c)(2) or paragraph (d) below or 27.304-2.

(ii) The work is to be performed outside the United States, its possessions, and Puerto Rico by contractors that are not small business firms, nonprofit organizations as defined in 27.301, or domestic firms. For purposes of this subparagraph, the contracting officer may presume that a contractor is not a domestic firm unless it is known that the firm is not foreign owned, controlled, or influenced. (See 27.304-4(a) regarding subcontracts with U.S. firms.)

(2) Pursuant to their statutory requirements, DOE and NASA may specify in their supplemental regulations use of a modified version of the clause at 52.227-13 in contracts with other than small business concerns or nonprofit organizations.

(3) If the acquisition of patent rights for the benefits of a foreign government is required under a treaty or executive agreement or if the agency head or a designee determines at the time of contracting that it would be in the national interest to acquire the right to sublicense foreign governments or international organizations pursuant to any existing or future treaty or agreement, the contracting officer shall use the clause with its Alternate I.

(d) (1) If one of the following applies, the contracting officer may insert the clause prescribed in paragraph (a) or (b) above as otherwise applicable; agency supplemental regulations may provide another clause and specify its use; or the contracting officer shall insert the clause prescribed in paragraph (c) above:

(i) The contract is for the operation of a Government-owned research or production facility.

(ii) There are exceptional circumstances and the agency head determines that restriction or elimination of the right to retain title to any subject invention will better promote the policy and objectives of Chapter 18 of Title 35 of the United States Code.

(iii) It is determined by a Government authority which is authorized by statute or executive order to conduct foreign intelligence or counterintelligence activities that restriction or elimination of the right to retain any subject invention is necessary to protect the security of such activities.

(2) Any determination under subdivision (1)(ii) above will be in writing and accompanied by a written statement of facts justifying the determination. The statement of facts will contain such information as the agency deems relevant and, at a minimum, will (i) identify the organization involved, (ii) describe the extent to which agency action restricted or eliminated the right to retain title to a subject invention, (iii) state the facts and rationale supporting the agency action, (iv) provide supporting documentation for those facts and rationale, and (v) indicate the nature of any objections to the agency action and provide any documentation in which those objections appear. In the case of contracts with small business concerns or nonprofit organizations, a copy of each such determination and written statement of facts will be sent to the Comptroller General of the United States within 30 days after the award of the applicable funding agreement. In the case of contracts with small business concerns, copies will also be sent to the Chief Counsel for Advocacy of the Small Business Administration.

(e) To qualify for the clause at 52.227-11, a prospective contractor may be required by the agencies excepted under subdivision (a)(1)(i) above to certify that it is either a small business firm or a nonprofit organization. If one of these agencies has reason to question the status of the prospective contractor, the agency may file a protest in accordance with 13 CFR 121.3-5 if small business firm status is questioned or require the prospective contractor to furnish evidence of its status as a nonprofit organization.

(f) The Alternates to the clauses at 52.227-11, 52.227-12, and 52.227-13, as applicable, may be modified by deleting the reference to future treaties or agreements or by otherwise more narrowly defining classes of future treaties or agreements. It may also be modified to make clear that the rights granted to the foreign government or international organization may be for additional rights beyond a license or sublicense if so required by the applicable treaty or international agreement. For example, in some cases exclusive licenses or even assignment of title in the foreign country involved might be required. In addition, the Alternate may be modified to provide for direct licensing by the contractor of the foreign government or international organization.

27.304 Procedures.

27.304-1 General.

(a) *Greater rights determinations.* Whenever the contract contains the clause at 52.227-13, Patent Rights—Acquisition by the Government, the contractor (or an employee-inventor of the contractor after consultation with the contractor) may request greater rights to an identified invention within the period specified in such clause. Requests for greater rights may be granted if the agency head or designee determines that the interests of the United States and the general public will be better served thereby. In making such determinations, the agency head or designee shall consider at least the following objectives:

(1) Promoting the utilization of inventions arising from federally supported research and development.

(2) Ensuring that inventions are used in a manner to promote free competition and enterprise.

(3) Promoting public availability of inventions made in the United States by United States industry and labor.

(4) Ensuring that the Government obtains sufficient rights in federally-supported inventions to meet the needs of the Government and protect the public against nonuse or unreasonable use of inventions.

(b) *Retention of rights by inventor.* If the contractor does not elect to retain title to a subject invention, the agency may consider and, after consultation with the contractor, grant requests for retention of rights by the inventor. Retention of rights by the inventor will be subject to the conditions in paragraph (d) (except subparagraph (d)(1)), subparagraph (f)(4), and paragraphs (h), (i), and (j) of the applicable Patent Rights—Retention by the Contractor clause.

(c) *Government assignment to contractor of rights in Government employees' inventions.* When a Government employee is a coinventor of an invention made under a contract with a small business firm or nonprofit organization, the agency employing the coinventor may transfer or reassign whatever right it may acquire in the subject invention from its employee to the contractor, subject to the conditions of 35 U.S.C. Chapter 18 and OMB Circular A-124.

(d) *Additional requirements.* (1) If it is desired to have the right to require any of the following, the contract shall be modified to require the contractor to do one or more of the following:

(i) Provide periodic (but not more frequently than annually) listings of all subject inventions required to be disclosed during the period covered by the report.

(ii) Provide a report prior to the closeout of the contract listing all subject inventions or stating that there were none.

(iii) Provide notification of all subcontracts for experimental, developmental, or research work.

(iv) Provide upon request, the filing date, serial number and title; a copy of the patent application; and patent number and issue date for any subject invention in any country in which the contractor has applied for patents.

(v) Furnish the Government an irrevocable power to inspect and make copies of the patent application file.

(2) To the extent provided by such modification (and automatically under the terms of the clauses at 52.227-12 and -13), the contracting officer may require the contractor to—

(i) Furnish a copy of each subcontract containing a patent rights clause (but if a copy of a subcontract is furnished under another clause, a duplicate shall not be requested under the patent rights clause);

(ii) Submit interim and final invention reports listing subject inventions and notifying the contracting officer of all subcontracts awarded for experimental, developmental, or research work;

(iii) Submit information regarding the filing date, serial number and title, and, upon request, a copy of the patent application, and patent number and issue date for any subject invention in any country for which the contractor has retained title; and

(iv) Submit periodic reports on the utilization of a subject invention or on efforts at obtaining utilization that are being made by the contractor or its licensees or assignees.

(3) The contractor is required to deliver to the contracting officer an instrument confirmatory of all rights to which the Government is entitled and to furnish the Government an irrevocable power to inspect and make copies of the patent application file. Such delivery should normally be made within 6 months after filing each patent application, or within 6 months after submitting the invention disclosure if the application has been previously filed.

(e) *Revocation or modification of contractor's minimum rights.* Before revocation or modification of the contractor's license in accordance with 27.302(h)(2), the contracting officer will furnish the contractor a written notice of intention to revoke or modify the license, and the contractor will be allowed 30 days (or such other time as may be authorized by the contracting officer for good cause shown by the contractor) after the notice to show cause why the license should not be revoked or modified. The contractor has the right to appeal, in accordance with applicable provisions in the Federal Property Management Regulations and agency licensing regulations, any decisions concerning the revocation or modification.

(f) *Modification, waiver, or omission of rights of the Government or obligations of the contractor.* (1) In contracts not subject to 35 U.S.C. Chapter 18, an agency may modify, waive, or omit, in whole or in part, any of the rights of the Government or obligations of the contractor described in 27.302(c) through (h) if the agency head or designee determines at the time of contracting (i) that the interests of the United States and the general public will be better served thereby as, for example, where this is necessary to obtain a uniquely or highly qualified contractor, or (ii) that the contract involves cosponsored, cost sharing, or joint venture research and development, and the contractor, cosponsor, or joint venturer is making a substantial contribution of funds, facilities, or equipment to the work performed under the contract.

(2) Any modification, waiver, or omission of the rights of the Government shall be in writing and accompanied by a written statement of facts justifying the determination. Inasmuch as these rights are normally considered the minimum rights necessary to protect the interests of the United States and the general public under the policy and objectives of 27.302(a)(1), such statement must specifically—

(i) Describe the extent to which the Government's rights are to be modified, waived, or omitted;

(ii) State the facts and rationale for such modification, waiver, or omission; and

(iii) Include a statement as to why the interests of the United States and the general public will be better served by such modification, waiver, or omission under the policy and objectives of 27.302(a)(1), with particular emphasis on (A) ensuring that the Government obtains sufficient rights to meet its needs competitively and at the lowest cost when relinquishing the Government's royalty-free license rights, (B) protecting the public against nonuse or unreasonable use of inventions arising out of the contract when relinquishing march-in rights intended to prevent suppression of such inventions and to assure their availability to meet health or safety needs or regulatory requirements, and (C) promoting the public availability of such inventions through commercialization by United States industry and labor.

(g) *Exercise of march-in rights.* The following procedures shall govern the exercise of the march-in rights set forth in 35 U.S.C. 203, paragraph (j) of the Patent Rights—Retention by the Contractor clauses, and subdivision (c)(1)(ii) of the Patent Rights—Acquisition by the Government clause:

(1) When the agency receives information that it believes might warrant the exercise of march-in rights, before initiating any march-in proceeding in accordance with the procedures of subparagraph (2) below, it shall notify the contractor in writing of the information and request informal written or oral comments from the contractor. In the absence of any comments from the contractor within 30 days the agency may, at its discretion, initiate the procedures below. If a comment is received, whether or not within 30 days, then the agency shall, within 60 days after it receives the comment, either initiate the procedures below or notify the contractor, in writing, that it will not pursue march-in rights based on the information about which the contractor was notified.

(2) A march-in proceeding shall be initiated by the issuance of a written notice by the agency head or a designee to the contractor and its assignee or exclusive licensee, as applicable, stating that the Government has determined to exercise march-in rights. The notice shall state the reasons for the proposed march-in in terms sufficient to put the contractor on notice of the facts upon which the action is based, and shall specify the field or fields of use in which the Government is considering requiring licensing. The notice shall advise the contractor, assignee, or exclusive licensee of its rights as set forth in 33.011 and in any supplemental agency regulations or procedures. The determination to exercise march-in rights shall be made by the contracting officer, as a final decision for purposes of the Contract Disputes Act in accordance with 33.011.

(3) These procedures shall also apply to the exercise or march-in rights against inventors receiving title to subject inventions under 35 U.S.C. 202(d) and, for that purpose, the term

"contractor" as used herein shall be deemed to include the inventor.

(4) The contractor, assignee, or exclusive licensee will not be required to grant a license and the Government will not grant any license until after either (i) 90 days from the date of the contractor's receipt of the contracting officer's decision, if no appeal of the decision has been made to a Board of Contract Appeals and if no action has been brought under 41 U.S.C. 609 within that time, or (ii) the board or court has made a final decision, in cases when an appeal or action has been brought within 90 days of the contracting officer's decision.

(h) *Licenses and assignments under contracts with nonprofit organizations.* If the contractor is a nonprofit organization, the clause at 52.227-11 provides that certain contractor actions require agency approval, as specified below. Agencies shall provide procedures for obtaining such approval.

(1) Rights to a subject invention in the United States may not be assigned without the approval of the contracting agency, except where such assignment is made to an organization which has as one of its primary functions the management of inventions and which is not, itself, engaged in or does not hold a substantial interest in other organizations engaged in the manufacture or sale of products or the use of processes that might utilize the invention or be in competition with embodiments of the invention (provided that such assignee will be subject to the same provisions as the contractor).

(2) The contractor may not grant exclusive licenses under United States patents or patent applications in subject inventions to persons other than small business firms for a period in excess of the earlier of—

(i) Five years from first commercial sale or use of the invention; or

(ii) Eight years from the date of the exclusive license excepting that time before regulatory agencies necessary to obtain premarket clearance, unless on a case-by-case basis the contracting agency approves a longer exclusive license. If exclusive field of use licenses are granted, commercial sale or use in one field of use will not be deemed commercial sale or use as to other fields of use, and a first commercial sale or use with respect to a product of the invention will not be deemed to end the exclusive period to different subsequent products covered by the invention.

27.304-2 Contracts placed by or for other Government agencies.

The following procedures apply unless agency agreements provide otherwise:

(a) When a Government agency requests another Government agency to award a contract on its behalf, the request should explain any special circumstances surrounding the contract and specify and furnish the patent rights clause to be used. Normally, the clause will be in accordance with the policies and procedures of this subpart. If, however, the request states that a clause of the requesting agency is required (e.g., because of statutory requirements, a deviation, or exceptional circumstances) that clause shall be used rather than those of this subpart.

(1) If the request states that an agency clause is required and the work to be performed under the contract is not severable and is funded wholly or in part by the agency, then that agency clause and no other patent rights clause shall be included in the contract.

(2) If the request states that an agency clause is required, and the work to be performed under the contract is severable and is only in part for the requesting agency, then the work which is on behalf of the requesting agency shall be identified in the contract, and the agency clause shall be made applicable to that portion. In such situations, the remaining portion of the work (for the agency awarding the contract) shall likewise be identified and the appropriate patent rights clause (if required) shall be made applicable to that remaining portion.

(3) If the request states that an agency clause is not required in any resulting contract, then the appropriate patent rights clause shall be used, if a patent rights clause is required.

(b) Where use of the specified clause, or any modification, waiver, or omission of the Government's rights under any provisions therein, requires a written determination, the reporting of such determination, or a deviation, if any such acts are required in accordance with 27.303(d)(2), 27.304-1(f)(2), or 1.4, it shall be the responsibility of the requesting agency to make such determination, submit the required reports, and obtain such deviations, in consultation with the contracting agency, unless otherwise agreed between the contracting and requesting agencies. However, a deviation to a specified clause of the requesting agency shall not be made without prior approval of that agency.

(c) The requesting agency may require, and provide instructions regarding, the forwarding or handling of any invention disclosures or other reporting requirements of the specified clauses. Normally the requesting agency shall be responsible for the handling of any disclosed inventions, including the filing of patent applications where the Government receives title, and the custody, control, and licensing thereof, unless provided otherwise in the instructions or other agreements with the contracting agency.

27.304-3 Contracts for construction work or architect-engineer services.

(a) If a solicitation or contract for construction work or architect-engineer services has as a purpose the performance of experimental, developmental, or research work or test and evaluation studies involving such work and calls for, or can be expected to involve, the design of a Government facility or of novel structures, machines, products, materials, processes, or equipment (including construction equipment), it shall include a patent rights clause selected in accordance with the policies and procedures of this Subpart 27.3.

(b) A solicitation or contract for construction work or architect-engineer services that calls for or can be expected to involve *only* "standard types of construction" to be built by previously developed equipment, methods, and processes shall not include a patent rights clause. The term "standard types of construction" means construction in which the distinctive features, if any, in all likelihood will amount to no more than—

(1) Variations in size, shape, or capacity of otherwise structurally orthodox and conventionally acting structures or structural groupings; or

(2) Purely artistic or esthetic (as distinguished from functionally significant) architectural configurations and designs of both structural and nonstructural members or groupings, which may or may not be sufficiently novel or meritorious to qualify for design protection under the design patent or copyright laws.

27.304-4 Subcontracts.

(a) The policies and procedures covered by this subpart apply to all contracts at any tier. Hence, a contractor awarding a subcontract and a subcontractor awarding a lower-tier subcontract that has as a purpose the conduct of experimental, developmental, or research work is required to determine the appropriate patent rights clause to be included that is consistent with these policies and procedures. Generally, the clause at either 52.227-11, 52.227-12, or 52.227-13 is to be used and will be so specified in the patent rights clause contained in the higher-tier contract, but the contracting officer may direct the use of a particular patent

rights clause in any lower-tier contract in accordance with the policies and procedures of this subpart. For instance, when the clause at 52.227-13 is in the prime contract because the work is to be performed overseas, any subcontract with a nonprofit organization would contain the clause at 52.227-11.

(b) Whenever a prime contractor or a subcontractor considers the inclusion of a particular clause in a subcontract to be inappropriate or a subcontractor refuses to accept the proffered clause, the matter shall be resolved by the agency contracting officer in consultation with counsel.

(c) It is Government policy that contractors shall not use their ability to award subcontracts as economic leverage to acquire rights for themselves in inventions resulting from subcontracts.

27.304-5 Appeals.

(a) The agency official initially authorized to take any of the following actions shall provide the contractor with a written statement of the basis for the action at the time the action is taken, including any relevant facts that were relied upon in taking the action:

(1) A refusal to grant an extension to the invention disclosure period under subparagraph (c)(4) of the clauses at 52.227-11 and 52.227-12.

(2) A request for a conveyance of title to the Government under 27.302(d)(1)(i) through (v).

(3) A refusal to grant a waiver under 27.302(g), Preference for U.S. Industry.

(4) A refusal to approve an assignment under 27.304-1(h)(1).

(5) A refusal to approve an extension of the exclusive license period under 27.304-1(h)(2).

(b) Each agency shall establish and publish procedures under which any of the agency actions listed in paragraph (a) above may be appealed to the head of the agency or designee. Review at this level shall consider both the factual and legal basis for the action and its consistency with the policy and objectives of 35 U.S.C. 200-206 and this subpart.

(c) Appeals procedures established under paragraph (b) above shall include administrative due process procedures and standards for fact-finding at least comparable to those set forth in Part 13e-g of OMB Circular A-124 whenever there is a dispute as to the factual basis for an agency request for a conveyance of title under 27.302(d)(1)(i) through (v) including any dispute as to whether or not an invention is a subject invention.

(d) To the extent that any of the actions described in paragraph (a) above are subject to appeal under the Contract Disputes Act, the procedures under that Act will satisfy the requirements of paragraphs (b) and (c) above.

27.305 Administration of patent rights clauses.

27.305-1 Patent rights follow-up.

(a) It is important that the Government and the contractor know and exercise their rights in inventions conceived or first actually reduced to practice in the course of or under Government contracts in order to ensure their expeditious availability to the public and to enable the Government, the contractor, and the public to avoid unnecessary payment of royalties and to defend themselves against claims and suits for patent infringement. To attain these ends, contracts having a patent rights clause should be so administered that—

(1) Inventions are identified, disclosed, and reported as required by the contract, and elections are made;

(2) The rights of the Government in such inventions are established;

(3) Where patent protection is appropriate, patent applications are timely filed and prosecuted by contractors or by the Government;

(4) The rights of the Government in filed patent applications are documented by formal instruments such as licenses or assignments; and

(5) Expeditious commercial utilization of such inventions is achieved.

(b) If a subject invention is made under funding agreements of more than one agency, at the request of the contractor or on their own initiative, the agencies shall designate one agency as responsible for administration of the rights of the Government in the invention.

27.305-2 Follow-up by contractor.

(a) *Contractor procedures.* If required by the applicable clause, the contractor shall establish and maintain effective procedures to ensure its patent rights obligations are met and that subject inventions are timely identified and disclosed, and when appropriate, patent applications are filed.

(b) *Contractor reports.* Contractors shall submit all reports required by the patent rights clause to the contracting officer or other representative designated for such purpose in the contract. Agencies may, in their implementing instructions, provide specific forms for use on an optional basis for such reporting.

27.305-3 Follow-up by Government.

(a) Agencies shall maintain appropriate follow-up procedures to protect the Government's interest and to check that subject inventions are identified and disclosed, and when appropriate, patent applications are filed, and that the Government's rights therein are established and protected. Follow-up activities for contracts that include a clause referenced in 27.304-2 shall be coordinated with the appropriate agency.

(b) The contracting officer administering the contract (or other representative specifically designated in the contract for such purpose) is responsible for receiving invention disclosures, reports, confirmatory instruments, notices, requests, and other documents and information submitted by the contractor pursuant to a patent rights clause. If the contractor fails to furnish documents or information as called for by the clause within the time required, the contracting officer shall promptly request the contractor to supply the required documents or information and, if the failure persists, shall take appropriate action to secure compliance. Invention disclosures, reports, confirmatory instruments, notices, requests, and other documents and information relating to patent rights clauses shall be promptly furnished by the contracting officer administering the contract (or other designee) to the procuring agency or contracting activity for which the procurement was made for appropriate action.

(c) Contracting activities shall establish appropriate procedures to detect and correct failures by the contractor to comply with its obligations under the patent rights clauses, such as failures to disclose and report subject inventions, both during and after contract performance. Ordinarily a contractor should have written instructions for its employees covering compliance with these contract obligations. Government effort to review and correct contractor compliance with its patent rights obligations should be directed primarily towards contracts that, because of the nature of the research, development, or experimental work or the large dollar amount spent on such work, are more likely to result in subject inventions significant in number or quality, and towards contracts when there is reason to believe the contractors may not be complying with their contractual obligations. Other contracts may be reviewed using a spot-check method, as feasible. Appropriate follow-up procedures and activities may include the investigation or review of selected contracts or contractors by those qualified in patent and technical matters

to detect failures to comply with contract obligations.

(d) Follow-up activities should include, where appropriate, use of Government patent personnel—

(1) To interview agency technical personnel to identify novel developments made in contracts;

(2) To review technical reports submitted by contractors with cognizant agency technical personnel;

(3) To check the Official Gazette of the United States Patent and Trademark Office and other sources for patents issued to the contractor in fields related to its Government contracts; and

(4) If additional information is required, to have cognizant Government personnel interview contractor personnel regarding work under the contract involved, observe the work on site, and inspect laboratory notebooks and other records of the contractor related to work under the contract.

(e) If it is determined that a contractor or subcontractor does not have a clear understanding of the rights and obligations of the parties under a patent rights clause, or that its procedures for complying with the clause are deficient, a post-award orientation conference or letter should ordinarily be used to explain these rights and obligations (see Subpart 42.5). When a contractor fails to establish, maintain, or follow effective procedures for identifying, disclosing, and, when appropriate, filing patent applications on inventions (if such procedures are required by the patent rights clause), or after appropriate notice fails to correct any deficiency, the contracting officer may require the contractor to make available for examination books, records, and documents relating to the contractor's inventions in the same field of technology as the contract effort to enable a determination of whether there are such inventions and may invoke the withholding of payments provision (if any) of the clause. The withholding of payments provision (if any) of the patent rights clause or of any other contract clause may also be invoked if the contractor fails to disclose a subject invention. Significant or repeated failures by a contractor to comply with the patent rights obligation in its contracts shall be documented and made a part of the general file (see 4.801(c)(3)).

27.305-4 Conveyance of invention rights acquired by the Government.

(a) Agencies are responsible for those procedures necessary to protect the Government's interest in subject inventions. When the Government acquires the entire right, title, and interest in an invention by contract, this is normally accomplished by an assignment either from each inventor to the contractor and from the contractor to the Government, or from the inventor to the Government with the consent of the contractor, so that the chain of title from the inventor to the Government is clearly established. When the Government's rights are limited to a license, there should be a confirmatory instrument to that effect.

(b) The form of conveyance of title from the inventor to the contractor must be legally sufficient to convey the rights the contractor is required to convey to the Government. Agencies may, by supplemental instructions, develop suitable assignments, licenses, and other papers evidencing any rights of the Government in patents or patent applications, including such instruments as may be required to be recorded in the Statutory Register or documented in the Government Register maintained by the U.S. Patent and Trademark Office pursuant to Executive Order 9424, February 18, 1944.

27.305-5 Publication or release of invention disclosures.

(a) In accordance with the policy at 27.302(i), to protect their mutual interests, contractors and the Government should cooperate in deferring the publication or release of invention disclosures until the filing of the first patent application, and use their best efforts to achieve prompt filing when publication or release may be imminent. The Government will, on its part and to the extent authorized by 35 U.S.C. 205, withhold from disclosure to the public any invention disclosures reported under the patent rights clauses of 52.227-11, 52.227-12, or 52.227-13 for a reasonable time in order for patent applications to be filed. The policy in 27.302(i) regarding protection of confidentiality shall be followed.

(b) The Government will also use reasonable efforts to withhold from disclosure to the public for a reasonable time other information disclosing a reported invention included in any data delivered pursuant to contract requirements; *provided*, that the contractor notifies the agency as to the identity of the data and the invention to which it relates at the time of delivery of the data. Such notification must be to both the contracting officer and any patent representative to which the invention is reported, if other than the contracting officer.

27.306 Licensing background patent rights to third parties.

(a) A contract with a small business firm or nonprofit organization will not contain a provision allowing the Government to require the licensing to third parties of inventions owned by the contractor that are not subject inventions unless such provision has been approved by the agency head and written justification has been signed by the agency head. Any such provision will clearly state whether the licensing may be required in connection with the practice of a subject invention, a specifically identified work object, or both. The agency head may not delegate the authority to approve such provisions or to sign justifications required for such provisions.

(b) The Government will not require the licensing of third parties under any such provision unless the agency head determines that the use of the invention by others is necessary for the practice of a subject invention or for the use of a work object of the contract and that such action is necessary to achieve the practical application of the subject invention or work object. Any such determination will be on the record after an opportunity for a hearing, and the contractor shall be given notification of the determination by certified or registered mail. The notification shall include a statement that any action commenced for judicial review of such determination must be brought by the contractor within 60 days after the notification.

SUBPART 27.4—RIGHTS IN DATA AND COPYRIGHTS

27.401 General.

It is necessary for Government departments and agencies, in order to carry out their missions and programs, to acquire or obtain access to many kinds of data developed under or used in performing their contracts. Such data are required in order to obtain competition among suppliers; to meet acquisition needs; to ensure logistic support; to fulfill certain responsibilities for disseminating and publishing the results of their activities; to ensure appropriate use of the results of research, development, and demonstration activities; and to meet other programmatic and statutory requirements. At the same time, the Government recognizes that its contractors may have a property right or other valid economic interest in certain data resulting from private investment, and that the protection from unauthorized use and disclosure of this

data, and other data made available to the Government for use, is required in order to preclude the compromise of such property right or economic interest, jeopardizing the contractor's commercial position, and impairment of the Government's ability to obtain access to or use of such data. Protecting this data is therefore necessary to encourage qualified contractors to participate in Government programs and apply innovative concepts to such programs. Specific agency regulations shall be framed in light of the above considerations to strike a balance between the Government's need and the contractor's economic interest.

SUBPART 27.5—RESERVED

SUBPART 27.6—FOREIGN LICENSE AND TECHNICAL ASSISTANCE AGREEMENTS

27.601 General.

Agencies shall provide all necessary rules and regulations as are required for the proper application of the laws and policies of the U.S. Government regarding—

(a) Elimination in agreements between domestic concerns and foreign governments or foreign concerns of charges for the use of patents in which the U.S. Government has a royalty-free license or of charges in agreements for the use of data that the U.S. Government has a right to use and disclose to others, that is in the public domain, or that was acquired by the U.S. Government with the unrestricted right to use, duplicate, or disclose and to have or permit others to do so;

(b) Foreign license and technical assistance agreements between the U.S. Government and United States domestic concerns;

(c) Guidance on negotiating contract prices and terms concerning patents and data, including royalties, in contracts between the U.S. Government and a foreign government or foreign concern; and

(d) Regulations and guidance on controls on the exportation of data relating to certain designated items, such as arms or munitions of war, and guidance on reviews of agreements involving such data (see 22 CFR 124).

PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

31.205–18 [Amended]

16. In subsection 31.205–18, paragraphs (c)(1)(i) and (c)(1)(v) are amended by changing "$4 million" to read "$4,400,000", and paragraph (c)(1)(ii) is amended by changing "$500,000" to read "$550,000".

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

17. The table of contents for Part 52 is amended by adding the following entries:

* * * * *

52.227–1 Authorization and Consent.
52.227–2 Notice and Assistance Regarding Patent and Copyright Infringement.
52.227–3 Patent Indemnity.
52.227–4 Patent Indemnity—Construction Contracts.
52.227–5 Waiver of Indemnity.
52.227–6 Royalty Information.
52.227–7 Patents—Notice of Government Licensee.
52.227–8 Reporting of Royalties (Foreign).
52.227–9 Refund of Royalties.
52.227–10 Filing of Patent Applications—Classified Subject Matter.
52.227–11 Patent Rights—Retention by the Contractor (Short Form).
52.227–12 Patent Rights—Retention by the Contractor (Long Form).
52.227–13 Patent Rights—Acquisition by the Government.

* * * * *

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C.; and 42 U.S.C. 2453(c).

18. The titles and text of subsections 52.222–40 through 52.222–44 are removed and reserved.

19. In paragraph (b) of the contract clause at subsection 52.225–9, the last sentence is revised to read as follows:

52.225–9 Buy American Act—Trade Agreements Act—Balance of Payments Program.

* * * * *

(b) * * * Contractors may not supply a foreign end product with a total value of $161,000 or more unless the foreign end product is a designated country end product (see FAR 25.401), or unless a waiver is granted under section 302 of the Trade Agreements Act of 1979 (see FAR 25.402(b)).

* * * * *

52.227 [Removed]

20. Section 52.227 [Reserved] is removed.

21. Subsections 52.227–1 through 52.227–13 are added to read as follows:

52.227-1 Authorization and Consent.

As prescribed at 27.201-2(a), insert the following clause:

AUTHORIZATION AND CONSENT
(APR 1984)

(a) The Government authorizes and consents to all use and manufacture, in performing this contract or any subcontract at any tier, of any invention described in and covered by a United States patent (1) embodied in the structure or composition of any article the delivery of which is accepted by the Government under this contract or (2) used in machinery, tools, or methods whose use necessarily results from compliance by the Contractor or a subcontractor with (i) specifications or written provisions forming a part of this contract or (ii) specific written instructions given by the Contracting Officer directing the manner of performance. The entire liability to the Government for infringement of a patent of the United States shall be determined solely by the provisions of the indemnity clause, if any, included in this contract or any subcontract hereunder (including any lower-tier subcontract), and the Government assumes liability for all other infringement to the extent of the authorization and consent hereinabove granted.

(b) The Contractor agrees to include, and require inclusion of, this clause, suitably modified to identify the parties, in all subcontracts at any tier for supplies or services (including construction, architect-engineer services, and materials, supplies, models, samples, and design or testing services expected to exceed $25,000; however, omission of this clause from any subcontract, under or over $25,000, does not affect this authorization and consent.

(End of clause) (R 7-103.22 1961 JAN)

Alternate I (APR 1984). The following is substituted for paragraph (a) of the clause:

(a) The Government authorizes and consents to all use and manufacture of any invention described in and covered by a United States patent in the performance of this contract or any subcontract at any tier.

(R 7-302.21 1964 MAR)

Alternate II (APR 1984). The following is substituted for paragraph (a) of the clause:

(a) The Government authorizes and consents to all use and manufacture in the performance of any order at any tier or subcontract at any tier placed under this contract for communication services and facilities for which rates, charges, and tariffs are *not* established by a government regulatory body, of any invention described in and covered by a United States patent (1) embodied in the structure or composition of any article the delivery of which is accepted by the Government under this contract or (2) used in machinery, tools, or methods whose use necessarily results from compliance by the contractor or a subcontractor with specifications or written provisions forming a part of this contract or with specific written instructions given by the Contracting

Officer directing the manner of performance.

(R 7-1702.5(a) 1971 APR)

52.227-2 Notice and Assistance Regarding Patent and Copyright Infringement.

As prescribed at 27.202-2, insert the following clause:

NOTICE AND ASSISTANCE REGARDING PATENT AND COPYRIGHT INFRINGEMENT (APR 1984)

(a) The Contractor shall report to the Contracting Officer, promptly and in reasonable written detail, each notice or claim of patent or copyright infringement based on the performance of this contract of which the Contractor has knowledge.

(b) In the event of any claim or suit against the Government on account of any alleged patent or copyright infringement arising out of the performance of this contract or out of the use of any supplies furnished or work or services performed under this contract, the Contractor shall furnish to the Government, when requested by the Contracting Officer, all evidence and information in possession of the Contractor pertaining to such suit or claim. Such evidence and information shall be furnished at the expense of the Government except where the Contractor has agreed to indemnify the Government.

(c) The Contractor agrees to include, and require inclusion of, this clause in all subcontracts at any tier for supplies or services (including construction and architect-engineer subcontracts and those for material, supplies, models, samples, or design or testing services) expected to exceed the dollar amount set forth in 13.000 of the Federal Acquisition Regulation (FAR).

(End of clause) (R 7-103.23 1965 JAN)

52.227-3 Patent Indemnity.

Insert the following clause as prescribed at 27.203-1(b), 27.203-2(a), or 27.203-4(a)(2)as applicable:

PATENT INDEMNITY (APR 1984)

(a) The Contractor shall indemnify the Government and its officers, agents, and employees against liability, including costs, for infringement of any United States patent (except a patent issued upon an application that is now or may hereafter be withheld from issue pursuant to a Secrecy Order under 35 U.S.C. 181) arising out of the manufacture or delivery of supplies, the performance of services, or the construction, alteration, modification, or repair of real property (hereinafter referred to as "construction work") under this contract, or out of the use or disposal by or for the account of the Government of such supplies or construction work.

(b) This indemnity shall not apply unless the Contractor shall have been informed as soon as practicable by the Government of the suit or action alleging such infringement and shall have been given such opportunity as is afforded by applicable laws, rules, or regulations to participate in its defense. Further, this indemnity shall not apply to (1) an infringement resulting from compliance with specific written instructions of the Contracting Officer directing a change in the supplies to be delivered or in the materials or equipment to be used, or directing a manner of performance of the contract not normally used by the Contractor, (2) an infringement resulting from addition to or change in supplies or components furnished or construction work performed that was made subsequent to delivery or performance, or (3) a claimed infringement that is unreasonably settled without the consent of the Contractor, unless required by final decree of a court of competent jurisdiction.

(End of clause) (R 7-104.5 1975 JUN)

Alternate I (APR 1984). The following paragraph (c) is added to the clause:

(c) This patent indemnification shall not apply to the following items:

.....

[*Contracting Officer list and/or identify the items to be excluded from this indemnity*]

(R 7-104.5(a) 1964 SEP)

Alternate II (APR 1984). The following paragraph (c) is added to the clause:

(a) This patent indemnification shall cover the following items:.....

[*List and/or identify the items to be included under this indemnity*] (R 7-104.5(a) 1964 SEP)

Alternate III (APR 1984). The following paragraph is added to the clause:

( ) As to subcontracts at any tier for communication service, this clause shall apply only to individual communication service authorizations over $5.000 issued under this contract and covering those communications services and facilities (1) that are or have been sold or offered for sale by the Contractor to the public, (2) that can be provided over commercially available equipment, or (3) that involve relatively minor modifications.

(R 7-1701.10 1971 APR)

52.227-4 Patent Indemnity—Construction Contracts.

As prescribed at 27.203-5, insert the following clause:

PATENT INDEMNITY—CONSTRUCTION CONTRACTS (APR 1984)

Except as otherwise provided, the Contractor agrees to indemnify the Government and its officers, agents, and employees against liability, including costs and expenses, for infringement upon any United States patent (except a patent issued upon an application that is now or may hereafter be withheld from issue pursuant to a Secrecy Order under 35 U.S.C. 181) arising out of performing this contract or out of the use or disposal by or for the account of the Government of supplies furnished or work performed under this contract.

(End of clause) (R 7-602.16 1964 JUN)

Alternate I (APR 1984) Designate the first paragraph as paragraph(a) and add the following to the basic clause as paragraph (b):

(b) This patent indemnification shall not apply to the following items:

.....

[*Contracting Officer specifically identify the item to be excluded*]

(R 7-602.16(b) 1966 APR)

NOTE: Exclusion from indemnity of specified, identified patents, as distinguished from items, is the exclusive prerogative of the agency head or designee (See 27.203-6).

52.227-5 Waiver of Indemnity.

As prescribed at 27.203-6, insert the following clause:

WAIVER OF INDEMNITY (APR 1984)

Any provision or clause of this contract to the contrary notwithstanding, the Government hereby authorizes and consents to the use and manufacture, solely in performing this contract, of any invention covered by the United States patents identified below and waives indemnification by the Contractor with respect to such patents:

.....

.....

[*Contracting Officer identify the patents by number or by other means if more appropriate*].

(End of clause) (AV 7-104.5(b) 1955 JAN)

52.227-6 Royalty Information.

As prescribed at 27.204-2, insert the following provision:

ROYALTY INFORMATION (APR 1984)

(a) *Cost or charges for royalties.* When the response to this solicitation contains costs or charges for royalties totaling more than $250, the following information shall be included in the response relating to each separate item of royalty or license fee:

(1) Name and address of licensor.

(2) Date of license agreement.

(3) Patent numbers, patent application serial numbers, or other basis on which the royalty is payable.

(4) Brief description, including any part or model numbers of each contract item or component on which the royalty is payable.

(5) Percentage or dollar rate of royalty per unit.

(6) Unit price of contract item.

(7) Number of units.

(8) Total dollar amount of royalties.

(b) *Copies of current licenses.* In addition, if specifically requested by the Contracting Officer before execution of the contract, the offeror shall furnish a copy of the current license agreement and an identification of applicable claims of specific patents.

(End of provision) (R 7-2003.42 1961 AUG)

Alternate I. (APR 1984) Substitute the following for the introductory portion of paragraph (a) of the basic clause:

When the response to this solicitation covers charges for special construction or special assembly that contain costs or charges for royalties totaling more than $250, the following information shall be included in the response relating to each separate item of royalty or license fee:

(R 7-1710.12)

52.227-7 Patents—Notice of Government Licensee.

As prescribed at 27.204-3(c), insert the following provision:

PATENTS—NOTICE OF GOVERNMENT LICENSEE (APR 1984)

The Government is obligated to pay a royalty applicable to the proposed acquisition because of a license agreement between the Government and the patent owner. The patent number is ..... [*Contracting Officer fill in*], and the royalty rate is ..... [*Contracting Officer fill in*]. If the offeror is the owner of, or a licensee under, the patent, indicate below:

( ) Owner ( ) Licensee

If an offeror does not indicate that it is the owner or a licensee of the patent, its offer will be evaluated by adding thereto an amount equal to the royalty.

(End of provision) (R 7-2003.15 1974 APR)

52.227-8 Reporting of Royalties (Foreign).

As prescribed at 27.204-4, insert the following clause:

REPORTING OF ROYALTIES (FOREIGN) (APR 1984)

(a) If this contract is in an amount that exceeds 50,000 United States dollars, the Contractor shall report in writing to the Contracting Officer while performing this contract the amount of royalties paid or to be paid by the Contractor directly to others in performing this contract. The Contractor shall also (1) furnish in writing any additional information relating to such royalties as may be requested by the Contracting Officer and (2) insert a provision similar to this clause in any subcontract at any tier that involves an amount in excess of the equivalent of 50,000 United States dollars.

(b) The term "royalties" as used in this clause refers to any costs or charges in the nature of royalties, license fees, patent or license amortization costs, or the like for the use of or for rights in patents or patent applications.

(End of clause) (R 7-104.8 1966 OCT)

52.227-9 Refund of Royalties.

As prescribed at 27.206-2, insert the following clause. In solicitations and contracts with an incentive fee arrangement, change "price" to "target cost and target profit" wherever it appears.

REFUND OF ROYALTIES (APR 1984)

(a) The contract price includes certain amounts for royalties payable by the Contractor or subcontractors or both, which amounts have been reported to the Contracting Officer.

(b) The term "royalties" as used in this clause refers to any costs or charges in the nature of royalties, license fees, patent or license amortization costs, or the like, for the use of or for rights in patents and patent applications in connection with performing this contract or any subcontract hereunder.

(c) The Contractor shall furnish to the Contracting Officer, before final payment under this contract, a statement of royalties paid or required to be paid in connection with performing this contract and subcontracts hereunder together with the reasons.

(d) The Contractor will be compensated for royalties reported under paragraph (c) above, only to the extent that such royalties were included in the contract price and are determined by the Contracting Officer to be properly chargeable to the Government and allocable to the contract. To the extent that any royalties that are included in the contract price are not in fact paid by the Contractor or are determined by the Contracting Officer not to be properly chargeable to the Government and allocable to the contract, the contract price shall be reduced. Repayment or credit to the Government shall be made as the Contracting Officer directs.

(e) If, at any time within 3 years after final payment under this contract, the Contractor for any reason is relieved in whole or in part from the payment of the royalties included in the final contract price as adjusted pursuant to paragraph (d) above, the Contractor shall promptly notify the Contracting Officer of that fact and shall reimburse the Government in a corresponding amount.

(f) The substance of this clause, including this paragraph (f), shall be included in any subcontract in which the amount of royalties reported during negotiation of the subcontract exceeds $250.

(End of clause) (V 7-104.8(b) 1968 FEB)

52.227-10 Filing of Patent Applications—Classified Subject Matter.

As prescribed at 27.207-2, insert the following clause:

FILING OF PATENT APPLICATIONS—CLASSIFIED SUBJECT MATTER (APR 1984)

(a) Before filing or causing to be filed a patent application in the United States disclosing any subject matter of this contract classified "Secret" or higher, the Contractor shall, citing the 30-day provision below, transmit the proposed application to the Contracting Officer. The Government shall determine whether, for reasons of national security, the application should be placed under an order of secrecy, sealed in accordance with the provision of 35 U.S.C. 181-188, or the issuance of a patent otherwise delayed under pertinent United States statutes or regulations. The Contractor shall observe any instructions of the Contracting Officer regarding the manner of delivery of the patent application to the United States Patent Office, but the Contractor shall not be denied the right to file the application. If the Contracting Officer shall not have given any such instructions within 30 days from the date of mailing or other transmittal of the proposed application, the Contractor may file the application.

(b) Before filing a patent application in the United States disclosing any subject matter of this contract classified "Confidential," the Contractor shall furnish to the Contracting Officer a copy of the application for Government determination whether, for reasons of national security, the application should be placed under an order of secrecy or the issuance of a patent should be otherwise delayed under pertinent United States statutes or regulations.

(c) Where the subject matter of this contract is classified for reasons of security, the Contractor shall not file, or cause to be filed, in any country other than in the United States as provided in paragraphs (a) and (b) of this clause, an application or registration for a patent containing any of the subject matter of this contract without first obtaining written approval of the Contracting Officer.

(d) When filing any patent application coming within the scope of this clause, the Contractor shall observe all applicable security regulations covering the transmission of classified subject matter and shall promptly furnish to the Contracting Officer the serial number, filing date, and name of the country of any such application. When transmitting the application to the United States Patent Office, the Contractor shall by separate letter identify by agency and number the contract or contracts that require security classification markings to be placed on the application.

(e) The Contractor agrees to include, and require the inclusion of, this clause in all subcontracts at any tier that cover or are likely to cover classified subject matter.

(End of clause) (R 7-104.6 1969 DEC)

52.227-11 Patent Rights—Retention by the Contractor (Short Form).

As prescribed at 27.303(a), insert the following clause:

PATENT RIGHTS—RETENTION BY THE CONTRACTOR (SHORT FORM) (APR 1984)

(a) *Definitions.*

"Invention" means any invention or discovery which is or may be patentable or otherwise protectable under Title 35 of the United States Code.

"Subject invention" means any invention of the Contractor conceived or first actually reduced to practice in the performance of work under this contract.

"Practical application" means to manufacture in the case of a composition or product, to practice in the case of a process or method, or to operate in the case of a machine or system; and, in each case, under such conditions as to establish that the invention is being utilized and that its benefits are, to the extent permitted by law or Government regulations, available to the public on reasonable terms.

"Made", when used in relation to any invention, means the conception or first actual reduction to practice of such invention.

"Small business firm" means a small domestic business concern as defined at Section 2 of Public Law 85-536 (15 U.S.C. 632) and implementing regulations of the Administrator of the Small Business Administration. For the purpose of this clause, the size standards for small business concerns involved in Government procurement and subcontracting at 13 CFR 121.3-8 and 13 CFR 121.3-12, respectively, will be used.

"Nonprofit organization" means a domestic university or other institution of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)) and exempt from taxation under section 501(a) of the Internal Revenue Code (26 U.S.C. 501(a)) or any domestic nonprofit scientific or educational organization qualified under a state nonprofit organization statute.

(b) *Allocation of principal rights.* The Contractor may retain the entire right, title, and interest throughout the world to each subject invention subject to the provisions of this clause and 35 U.S.C. 203. With respect to any subject invention in which the Contractor retains title, the Federal Government shall have a nonexclusive, nontransferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States the subject invention throughout the world.

(c) *Invention disclosure, election of title, and filing of patent applications by Contractor.*

(1) The Contractor shall disclose each subject invention to the Contracting Officer within 2 months after the inventor discloses it in writing to Contractor personnel responsible for patent matters. The disclosure to the Contracting Officer shall be in the form of a written report and shall identify the contract under which the invention was made and the inventor(s). It shall be sufficiently complete in technical detail to convey a clear understanding, to the extent known at the time of the disclosure, of the nature, purpose, operation, and physical, chemical, biological, or electrical characteristics of the invention. The disclosure shall also identify any publication, on sale, or public use of the invention and whether a manuscript describing the invention has been submitted for publication and, if so, whether it has been accepted for publication at the time of disclosure. In addition, after disclosure to the Contracting Officer, the Contractor shall promptly notify the Contracting Officer of the acceptance of any manuscript describing the invention for publication or of any on sale or public use planned by the Contractor.

(2) The Contractor shall elect in writing whether or not to retain title to any such invention by notifying the Federal agency within 12 months of disclosure; *provided*, that in any case where publication, on sale, or public use has initiated the 1-year statutory period wherein valid patent protection can still be obtained in the United States, the period of election of title may be shortened by the agency to a date that is no more than 60 days prior to the end of the statutory period.

(3) The Contractor shall file its initial patent application on an elected invention within 2 years after election or, if earlier, prior to the end of any statutory period wherein valid patent protection can be obtained in the United States after a publication, on sale, or public use. The Contractor will file patent applications in additional countries within either 10 months of the corresponding initial patent application or 6 months from the date permission is granted by the Commissioner of Patents and Trademarks to file foreign patent applications where such filing has been prohibited by a Secrecy Order.

(4) Requests for extension of the time for disclosure to the Contracting Officer, election, and filing may, at the discretion of the funding Federal agency, be granted.

(d) *Conditions when the Government may obtain title.* The Contractor shall convey to the Federal agency, upon written request, title to any subject invention—

(1) If the Contractor fails to disclose or elect the subject invention within the times specified in paragraph (c) above, or elects not to retain title (the agency may only request title within 60 days after learning of the Contractor's failure to report or elect within the specified times);

(2) In those countries in which the Contractor fails to file patent applications within the times specified in paragraph (c) above; *provided*, however, that if the Contractor has filed a patent application in a country after the times specified in paragraph (c) above, but prior to its receipt of the written request of the Federal agency, the Contractor shall continue to retain title in that country; or

(3) In any country in which the Contractor decides not to continue the prosecution of any application for, to pay the maintenance fees on, or defend in reexamination or opposition proceeding on, a patent on a subject invention.

(e) *Minimum rights to contractor.* (1) The Contractor shall retain a nonexclusive, royalty-free license throughout the world in each subject invention to which the Government obtains title except if the Contractor fails to disclose the subject invention within the times specified in paragraph (c) above. The Contractor's license extends to its domestic subsidiaries and affiliates, if any, within the corporate structure of which the Contractor is a part and includes the right to grant sublicenses of the same scope to the extent the Contractor was legally obligated to do so at the time the contract was awarded. The license is transferable only with the approval of

the funding Federal agency except when transferred to the successor of that part of the Contractor's business to which the invention pertains.

(2) The Contractor's domestic license may be revoked or modified by the funding Federal agency to the extent necessary to achieve expeditious practical application of the subject invention pursuant to an application for an exclusive license submitted in accordance with applicable provisions in the Federal Property Management Regulations and agency licensing regulations (if any). This license shall not be revoked in that field of use or the geographical areas in which the Contractor has achieved practical application and continues to make the benefits of the invention reasonably accessible to the public. The license in any foreign country may be revoked or modified at the discretion of the funding Federal agency to the extent the Contractor, its licensees, or its domestic subsidiaries or affiliates have failed to achieve practical application in that foreign country.

(3) Before revocation or modification of the license, the funding Federal agency shall furnish the Contractor a written notice of its intention to revoke or modify the license, and the Contractor shall be allowed 30 days (or such other time as may be authorized by the funding Federal agency for good cause shown by the Contractor) after the notice to show cause why the license should not be revoked or modified. The Contractor has the right to appeal, in accordance with applicable agency licensing regulations (if any) and the Federal Property Management Regulations concerning the licensing of Government-owned inventions, any decision concerning the revocation or modification of its license.

(f) *Contractor action to protect the Government's interest.* (1) The Contractor agrees to execute or to have executed and promptly deliver to the Federal agency all instruments necessary to (i) establish or confirm the rights the Government has throughout the world in those subject inventions to which the Contractor elects to retain title, and (ii) convey title to the Federal agency when requested under paragraph (d) above, and to enable the Government to obtain patent protection throughout the world in that subject invention.

(2) The Contractor agrees to require, by written agreement, its employees, other than clerical and nontechnical employees, to disclose promptly in writing to personnel identified as responsible for the administration of patent matters and in a format suggested by the Contractor each subject invention made under contract in order that the Contractor can comply with the disclosure provisions of paragraph (c) above, and to execute all papers necessary to file patent applications on subject inventions and to establish the Government's rights in the subject inventions. This disclosure format should require, as a minimum, the information required by subparagraph (c)(1) above. The Contractor shall instruct such employees through employee agreements or other suitable educational programs on the importance of reporting inventions in sufficient time to permit the filing of patent applications prior to U.S. or foreign statutory bars.

(3) The Contractor shall notify the Federal agency of any decision not to continue the prosecution of a patent application, pay maintenance fees, or defend in a reexamination or opposition proceeding on a patent, in any country, not less than 30 days before the expiration of the response period required by the relevant patent office.

(4) The Contractor agrees to include, within the specification of any United States patent application and any patent issuing thereon covering a subject invention, the following statement: "This invention was made with Government support under (identify the contract) awarded by (identify the Federal agency). The Government has certain rights in this invention."

(g) *Subcontracts.* (1) The Contractor shall incude this clause (52.227-11 of the Federal Acquisition Regulation (FAR)), suitably modified to identify the parties, in all subcontracts, regardless of tier, for experimental, developmental, or research work to be performed by a small business firm or nonprofit organization. The subcontractor shall retain all rights provided for the Contractor in this clause, and the Contractor shall not, as part of the consideration for awarding the subcontract, obtain rights in the subcontractor's subject inventions.

(2) In the case of subcontracts, at any tier, when the prime award with the Federal agency was a contract (but not a grant or cooperative agreement), the agency, subcontractor, and the Contractor agree that the mutual obligations of the parties created by this clause constitute a contract between the subcontractor and the Federal agency with respect to those matters covered by this clause.

(h) *Reporting utilization of subject inventions.* The Contractor agrees to submit on request periodic reports no more frequently than annually on the utilization of a subject invention or on efforts at obtaining such utilization that are being made by the Contractor or its licensees or assignees. Such reports shall include information regarding the status of development, date of first commercial sale or use, gross royalties received by the Contractor, and such other data and information as the agency may reasonably specify. The Contractor also agrees to provide additional reports as may be requested by the agency in connection with any march-in proceedings undertaken by the agency in accordance with paragraph (j) of this clause. To the extent data or information supplied under this paragraph is considered by the Contractor, its licensee, or assignee to be privileged and confidential and is so marked, the agency agrees that, to the extent permitted by law, it shall not disclose such information to persons outside the Government.

(i) *Preference for United States industry.* Notwithstanding any other provision of this clause, the Contractor agrees that neither it nor any assignee will grant to any person the exclusive right to use or sell any subject invention in the United States unless such person agrees that any products embodying the subject invention will be manufactured substantially in the United States. However, in individual cases, the requirement for such an agreement may be waived by the Federal agency upon a showing by the Contractor or its assignee that reasonable but unsuccessful efforts have been made to grant licenses on similar terms to potential licensees that would be likely to manufacture substantially in the United States or that under the circumstances domestic manufacture is not commercially feasible.

(j) *March-in rights.* (1) The Contractor agrees that with respect to any subject invention in which it has acquired title, the Federal agency has the right in accordance with the procedures in FAR 27.304-1(g) to require the Contractor, an assignee, or exclusive licensee of a subject invention to grant a nonexclusive, partially exclusive, or exclusive license in any field of use to a responsible applicant or applicants, upon terms that are reasonable under the circumstances, and if the Contractor, assignee, or exclusive licensee refuses such a request, the Federal agency has the right to grant such a license itself if the Federal agency determines that—

(i) Such action is necessary because the Contractor or assignee has not taken, or is not expected to take within a reasonable time, effective steps to achieve practical application of the subject invention in such field of use;

(ii) Such action is necessary to alleviate health or safety needs which are not reasonaby satisfied by the Contractor, assignee, or their licensees;

(iii) Such action is necessary to meet requirements for public use specified by Federal regulations and such requirements are not reasonably satisfied by the Contractor, assignee, or licensees; or

(iv) Such action is necessary because the agreement required by paragraph (i) of this clause has not been obtained or waived or because a licensee of the exclusive right to use or sell any subject invention in the United States is in breach of such agreement.

(k) *Special provisons for contracts with nonprofit organizations.* If the Contractor is a nonprofit organization, it agrees that—

(1) Rights to a subject invention in the United States may not be assigned without the approval of the Federal agency, except where such assignment is made to an organization which has as one of its primary functions the management of inventions and which is not, itself, engaged in or does not hold a substantial interest in other organizations engaged in the manufacture or sale of products or the use of processes that might utilize the invention or be in competition with embodiments of the invention (provided, that such assignee will be subject to the same provisions as the Contractor);

(2) The Contractor may not grant exclusive licenses under United States patents or patent applications in subject inventions to persons other than small business firms for a period in excess of the earlier of—

(i) Five years from first commercial sale or use of the invention; or

(ii) Eight years from the date of the exclusive license excepting that time before regulatory agencies necessary to obtain premarket clearance, unless on a case-by-case basis, the Federal agency approves a longer exclusive license. If exclusive field-of-use licenses are granted, commercial sale or use in one field of use will not be deemed commercial sale or use as to other fields of use, and a first commercial sale or use with respect to a product of the invention will not be deemed to end the exclusive period to different subsequent products covered by the invention;

(3) The Contractor shall share royalties collected on a subject invention with the inventor; and

(4) The balance of any royalties or income earned by the Contractor with respect to subject inventions, after payment of expenses (including payments to inventors) incidental to the administration of subject inventions, will be utilized for the support of scientific research or education.

(l) *Communications.* Reserved.

(End of clause) (R 7-302.23(h) 1981 JUL)

Alternate I (APR 1984). Add the following sentence at the end of paragraph (b) of the basic clause:

The license shall include the right of the Government to sublicense foreign governments and international organizations pursuant to the following treaties or international agreements: .....* or pursuant to any future treaties or agreements with foreign governments or international organizations.

[*Contracting Officer complete with the names of applicable existing treaties or international agreements. The above language is not intended to apply to treaties or agreements that are in effect on the date of the award but are not listed.]

(R 7-302.23(b) 1981 JUL)

52.227-12 Patent Rights—Retention by the Contractor (Long Form)

As prescribed at 27.303(b), insert the following clause:

PATENT RIGHTS—RETENTION BY THE CONTRACTOR (LONG FORM) (APR 1984)

(a) *Definitions.*

"Invention" means any invention or discovery which is or may be patentable or otherwise protectable under Title 35 of the United States Code.

"Subject invention" means any invention of the Contractor conceived or first actaully reduced to practice in the performance of work under this contract.

"Practical application" means to manufacture in the case of a composition or product, to practice in the case of a process or method, or to operate in the case of a machine or system; and, in each case, under such conditions as to establish that the invention is being utilized and that its benefits are, to the extent permitted by law or Government regulations, available to the public on reasonable terms.

"Made" when used in relation to any invention means the conception or first actual reduction to practice of such invention.

"Small business firm" means a domestic small business concern as defined at Section 2 of Public Law 85-536 (15 U.S.C. 632) and implementing regulations of the Administrator of the Small Business Administration. For the purpose of this clause, the size standards for small business concerns involved in Government procurement and subcontracting at 13 CFR 121.3-8 and 13 CFR 121.3-12, respectively, will be used.

"Nonprofit organization" means a domestic university or other institution of higher education or an organization of the type described in section 501(c)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 501(c)) and exempt from taxation under section 501(a) of the Internal Revenue Code (26 U.S.C. 501(a)) or any domestic nonprofit scientific or educational organization qualified under a state nonprofit organization statute.

(b) *Allocation of principal rights.* The Contractor may elect to retain the entire right, title, and interest throughout the world to each subject invention subject to the provisions of this clause and 35 U.S.C. 203. With respect to any subject invention in which the Contractor elects to retain title, the Federal Government shall have a nonexclusive, nontransferable, irrevocable, paid-up license to practice or have practiced for or on behalf of the United States the subject invention throughout the world.

(c) *Invention disclosure, election of title, and filing of patent applications by Contractor.* (1) The Contractor shall disclose each subject invention to the Contracting Officer within 2 months after the inventor discloses it in writing to Contractor personnel responsible for patent matters or within 6 months after the Contractor becomes aware that a subject invention has been made, whichever is earlier. The disclosure to the Contracting Officer shall be in the form of a written report and shall identify the contract under which the invention was made and the inventor(s). It shall be sufficiently complete in technical detail to convey a clear understanding, to the extent known at the time of the disclosure, of the nature, purpose, operation, and physical, chemical, biological, or electrical characteristics of the invention. The disclosure shall also identify any publication, on sale, or public use of the invention and whether a manuscript describing the invention has been submitted for publication and, if so, whether it has been accepted for publication at the time of disclosure. In addition, after disclosure to the Contracting Officer, the Contractor shall promptly notify the Contracting Officer of the acceptance of any manuscript describing the invention for publication or of any on sale or public use planned by the Contractor.

(2) The Contractor shall elect in writing whether or not to retain title to any such invention by notifying the Federal agency at the time of disclosure or within 8 months of disclosure, as to those countries (including the United

States) in which the Contractor will retain title; *provided*, that in any case where publication, on sale, or public use has initiated the 1-year statutory period wherein valid patent protection can still be obtained in the United States, the period of election of title may be shortened by the agency to a date that is no more than 60 days prior to the end of the statutory period.

(3) The Contractor shall file its initial patent application on an elected invention within 1 year after election or, if earlier, prior to the end of any statutory period wherein valid patent protection can be obtained in the United States after a publication, on sale, or public use. The Contractor shall file patent applications in additional countries (including the European Patent Office and under the Patent Cooperation Treaty) within either 10 months of the corresponding initial patent application or 6 months from the date permission is granted by the Commissioner of Patents and Trademarks to file foreign patent applications where such filing has been prohibited by a Secrecy Order.

(4) Requests for extension of the time for disclosure to the Contracting Officer, election, and filing may, at the discretion of the funding Federal agency, be granted, and will normally be granted unless the Contracting Officer has reason to believe that a particular extension would prejudice the Government's interest.

(d) *Conditions when the Government may obtain title.* The Contractor shall convey to the Federal agency, upon written request, title to any subject invention—

(1) If the Contractor elects not to retain title to a subject invention;

(2) If the Contractor fails to disclose or elect the subject invention within the times specified in paragraph (c) above (the agency may only request title within 60 days after learning of the Contractor's failure to report or elect within the specified times);

(3) In those countries in which the Contractor fails to file patent applications within the times specified in paragraph (c) above; *provided*, however, that if the Contractor has filed a patent application in a country after the times specified in paragraph (c) above, but prior to its receipt of the written request of the Federal agency, the Contractor shall continue to retain title in that country; or

(4) In any country in which the Contractor decides not to continue the prosecution of any application for, to pay the maintenance fees on, or defend in reexamination or opposition proceeding on, a patent on a subject invention.

(e) *Minimum rights to Contractor.* (1) The Contractor shall retain a nonexclusive, royalty-free license throughout the world in each subject invention to which the Government obtains title except if the Contractor fails to disclose the subject invention within the times specified in paragraph (c) above. The Contractor's license extends to its domestic subsidiaries and affiliates, if any, within the corporate structure of which the Contractor is a part and includes the right to grant sublicenses of the same scope to the extent the Contractor was legally obligated to do so at the time the contract was awarded. The license is transferable only with the approval of the funding Federal agency except when transferred to the successor of that part of the Contractor's business to which the invention pertains.

(2) The Contractor's domestic license may be revoked or modified by the funding Federal agency to the extent necessary to achieve expeditious practical application of the subject invention pursuant to an application for an exclusive license submitted in accordance with applicable provisions in the Federal Property Management Regulations and agency licensing regulations (if any). This license shall not be revoked in that field of use or the geographical areas in which the Contractor has achieved practical application and continues to make the benefits of the invention reasonably accessible to the public. The license in any foreign country may be revoked or modified at the discretion of the funding Federal agency to the extent the Contractor, its licensees, or its domestic subsidiaries or affiliates have failed to achieve practical applciation in that foreign country.

(3) Before revocation or modification of the license, the funding Federal agency shall furnish the Contractor a written notice of its intention to revoke or modify the license, and the Contractor shall be allowed 30 days (or such other time as may be authorized by the funding Federal agency for good cause shown by the Contractor) after the notice to show cause why the license should not be revoked or modified. The Contractor has the right to appeal, in accordance with applicable agency licensing regulations and the Federal Property Management Regulations concerning the licensing of Government-owned inventions, any decision concerning the revocation or modification of its license.

(f) *Contractor action to protect the Government's interest.* (1) The Contractor agrees to execute or to have executed and promptly deliver to the Federal agency all instruments necessary to (i) establish or confirm the rights the Government has throughout the world in those subject inventions to which the Contractor elects to retain title, and (ii) convey title to the Federal agency when requested under paragraph (d) above and subparagraph (n)(2) below, and to enable the Government to obtain patent protection throughout the world in that subject invention.

(2) The Contractor agrees to require, by written agreement, its employees, other than clerical and nontechnical employees, to disclose promptly in writing to personnel identified as responsible for the administration of patent matters and in a format suggested by the Contractor each subject invention made under contract in order that the Contractor can comply with the disclosure provisions of paragraph (c) above, and to execute all papers necessary to file patent applications on subject inventions and to establish the Government's rights in the subject inventions. This disclosure format should require, as a minimum, the information required by subparagraph (c)(1) above. The Contractor shall instruct such employees through employee agreements or other suitable educational programs on the importance of reporting inventions in sufficient time to permit the filing of patent applications prior to U.S. or foreign statutory bars.

(3) The Contractor shall notify the Federal agency of any decision not to continue the prosecution of a patent application, pay maintenance fees, or defend in a reexamination or opposition proceeding on a patent, in any country, not less than 30 days before the expiration of the response period required by the relevant patent office.

(4) The Contractor agrees to include, within the specification of any United States patent application and any patent issuing thereon covering a subject invention, the following statement: "This invention was made with Government support under (identify the contract) awarded by (identify the Federal agency). The Government has certain rights in this invention."

(5) The Contractor shall establish and maintain active and effective procedures to assure that subject inventions are promptly identified and disclosed to Contractor personnel responsible for patent matters within 6 months of conception and/or first actual reduction to practice, whichever occurs first in performance of work under this contract. These procedures shall include the maintenance of laboratory notebooks or equivalent records and

other records as are reasonably necessary to document the conception and/or the first actual reduction to practice of subject inventions, and records that show that the procedures for identifying and disclosing the inventions are followed. Upon request, the Contractor shall furnish the Contracting Officer a description of such procedures for evaluation and for determination as to their effectiveness.

(6) The Contractor agrees, when licensing a subject invention, to arrange to avoid royalty charges on acquisitions involving Government funds, including funds derived through Military Assistance Program of the Government or otherwise derived through the Government, to refund any amounts received as royalty charges on the subject invention in acquisitions for, or on behalf of, the Government, and to provide for such refund in any instrument transferring rights in the invention to any party.

(7) The Contractor shall furnish the Contracting Officer the following:

(i) Interim reports every 12 months (or such longer period as may be specified by the Contracting Officer) from the date of the contract, listing subject inventions during that period and certifying that all subject inventions have been disclosed or that there are no such inventions.

(ii) A final report, within 3 months after completion of the contracted work, listing all subject inventions or certifying that there were no such inventions, and listing all subcontracts at any tier containing a patent rights clause or certifying that there were no such subcontracts.

(8) The Contractor shall promptly notify the Contracting Officer in writing upon the award of any subcontract at any tier containing a patent rights clause by identifying the subcontractor, the applicable patent rights clause, the work to be performed under the subcontract, and the dates of award and estimated completion. Upon request of the Contracting Officer, the Contractor shall furnish a copy of such subcontract, and no more frequently than annually, a listing of the subcontracts that have been awarded.

(9) In the event of a refusal by a prospective subcontractor to accept one of the clauses in subparagraph (g)(1) or (2) below, the Contractor (i) shall promptly submit a written notice to the Contracting Officer setting forth the subcontractor's reasons for such refusal and other pertinent information that may expedite disposition of the matter and (ii) shall not proceed with such subcontracting without the written authorization of the Contracting Officer.

(10) The Contractor shall provide, upon request, the filing date, serial number and title, a copy of the patent application (including an English-language version if filed in a language other than English), and patent number and issue date for any subject invention for which the Contractor has retained title.

(11) Upon request, the Contractor shall furnish the Government an irrevocable power to inspect and make copies of the patent application file.

(g) *Subcontracts.* (1) The Contractor shall incude the clause at 52.227-11 of the Federal Acquisition Regulation (FAR), suitably modified to identify the parties, in all subcontracts, regardless of tier, for experimental, developmental, or research work to be performed by a small business firm or nonprofit organization. The subcontractor shall retain all rights provided for the Contractor in this clause, and the Contractor shall not, as part of the consideration for awarding the subcontract, obtain rights in the subcontractor's subject inventions.

(2) The Contractor shall include this clause (FAR 52.227-12) in all other subcontracts, regardless of tier, for experimental, developmental, or research work.

(3) In the case of subcontracts, at any tier, when the prime award with the Federal agency was a contract (but not a grant or cooperative agreement), the agency, subcontractor, and the Contractor agree that the mutual obligations of the parties created by this clause constitute a contract between the subcontractor and the Federal agency with respect to those matters covered by this clause.

(h) *Reporting utilization of subject inventions.* The Contractor agrees to submit on request periodic reports no more frequently than annually on the utilization of a subject invention or on efforts at obtaining such utilization that are being made by the Contractor or its licensees or assignees. Such reports shall include information regarding the status of development, date of first commercial sale or use, gross royalties received by the Contractor, and such other data and information as the agency may reasonably specify. The Contractor also agrees to provide additional reports as may be requested by the agency in connection with any march-in proceedings undertaken by the agency in accordance with paragraph (j) of this clause. To the extent data or information supplied under this paragraph is considered by the Contractor, its licensee or assignee to be privileged and confidential and is so marked, the agency agrees that, to the extent permitted by law, it shall not disclose such information to persons outside the Government.

(i) *Preference for United States industry.* Notwithstanding any other provision of this clause, the Contractor agrees that neither it nor any assigneee will grant to any person the exclusive right to use or sell any subject invention in the United States unless such person agrees that any products embodying the subject invention will be manufactured substantially in the United States. However, in individual cases, the requirement for such an agreement may be waived by the Federal agency upon a showing by the Contractor or its assignee that reasonable but unsuccessful efforts have been made to grant licenses on similar terms to potential licensees that would be likely to manufacture substantially in the United States or that under the circumstances domestic manufacture is not commercially feasible.

(j) *March-in rights.* The Contractor agrees that with respect to any subject invention in which it has acquired title, the Federal agency has the right in accordance with the procedures in FAR 27.304-1(g) to require the Contractor, an assignee, or exclusive licensee of a subject invention to grant a nonexclusive, partially exclusive, or exclusive license in any field of use to a responsible applicant or applicants, upon terms that are reasonable under the circumstances, and if the Contractor, assignee, or exclusive licensee refuses such a request, the Federal agency has the right to grant such a license itself if the Federal agency determines that—

(1) Such action is necessary because the Contractor or assignee has not taken, or is not expected to take within a reasonable time, effective steps to achieve practical application of the subject invention in such field of use;

(2) Such action is necessary to alleviate health or safety needs which are not reasonably satisfied by the Contractor, assignee, or their licensees;

(3) Such action is necessary to meet requirements for public use specified by Federal regulations and such requirements are not reasonably satisfied by the Contractor, assignee, or licensees,; or

(4) Such action is necessary because the agreement required by paragraph (i) of this clause has not been obtained or waived or because a licensee of the exclusive right to use or sell any subject invention in the United States is in breach of such agreement.

(k) *Special provisions for contracts with nonprofit organizations.* Reserved.

(l) *Communications.* Reserved.

(m) *Other inventions.* Nothing contained in this clause shall be deemed to grant to the Government any rights with respect to any invention other than a subject invention.

(n) *Examination of records relating to inventions.* (1) The Contracting Officer or any authorized representative shall, until 3 years after final payment under this contract, have the right to examine any books (including laboratory notebooks), records, and documents of the Contractor relating to the conception or first reduction to practice of inventions in the same field of technology as the work under this contract to determine whether—

(i) Any such inventions are subject inventions;

(ii) The Contractor has established and maintains the procedures required by subparagraphs (f)(2) and (f)(3) of this clause; and

(iii) The Contractor and its inventors have complied with the procedures.

(2) If the Contracting Officer determines that an inventor has not disclosed a subject invention to the Contractor in accordance with the procedures required by subparagraph (f)(5) of this clause, the Contracting Officer may, within 60 days after the determination, request title in accordance with subparagraphs (d)(2) and (d)(3) of this clause. However, if the Contractor establishes that the failure to disclose did not result from the Contractor's fault or negligence, the Contracting Officer shall not request title.

(3) If the Contracting Officer learns of an unreported Contractor invention which the Contracting Officer believes may be a subject invention, the Contractor may be required to disclose the invention to the agency for a determination of ownership rights.

(4) Any examination of records under this paragraph shall be subject to appropriate conditions to protect the confidentiality of the information involved.

(o) *Withholding of payment (this paragraph does not apply to subcontracts).* (1) Any time before final payment under this contract, the Contracting Officer may, in the Government's interest, withhold payment until a reserve not exceeding $50,000 or 5 percent of the amount of the contract, whichever is less, shall have been set aside if, in the Contracting Officer's opinion, the Contractor fails to—

(i) Establish, maintain, and follow effective procedures for identifying and disclosing subject inventions pursuant to subparagraph (f)(5) above;

(ii) Disclose any subject invention pursuant to subparagraph (c)(1) above;

(iii) Deliver acceptable interim reports pursuant to subdivision (f)(7)(i) above; or

(iv) Provide the information regarding subcontracts pursuant to subparagraph (f)(6) above.

(2) Such reserve or balance shall be withheld until the Contracting Officer has determined that the Contractor has rectified whatever deficiencies exist and has delivered all reports, disclosures, and other information required by this clause.

(3) Final payment under this contract shall not be made before the Contractor delivers to the Contracting Officer all disclosures of subject inventions required by subparagraph (c)(1) above, an acceptable final report pursuant to subdivision (f)(7)(ii) above, and all past due confirmatory instruments.

(4) The Contracting Officer may decrease or increase the sums withheld up to the maximum authorized above. No amount shall be withheld under this paragraph while the amount specified by this paragraph is being withheld under other provisions of the contract. The withholding of any amount or the subsequent payment thereof shall not be construed as a waiver of any Government right.

(End of clause) (R 7-302.23(b) 1981 JUL)

Alternate I (APR 1984). Add the following sentence at the end of paragraph (b) of the basic clause:

The license shall include the right of the Government to sublicense foreign governments and international organizations pursuant to the following treaties or international agreements: .....* or pursuant to any future treaties or agreements with foreign governments or international organizations.

[*Contracting Officer complete with the names of applicable existing treaties or international agreements. The above language is not intended to apply to treaties or agreements that are in effect on the date of the award but are not listed.]

(R 7-302.23(h) 1981 JUL)

52.227-13 Patent Rights—Acquisition by the Government.

As prescribed at 27.303(c), insert the following clause:

PATENT RIGHTS—ACQUISITION BY THE GOVERNMENT (APR 1984)

(a) *Definitions.*

"Invention," as used in this clause, means any invention or discovery which is or may be patentable or otherwise protectable under Title 35 of the United States Code.

"Subject invention," as used in this clause, means any invention of the Contractor conceived or first actually reduced to practice in the performance of work under this contract.

"Practical application," as used in this clause, means to manufacture, in the case of a composition or product; to practice, in the case of a process or method; or to operate, in the case of a machine or system; and, in each case, under such conditions as to establish that the invention is being utilized and that its benefits are, to the extent permitted by law or Government regulations, available to the public on reasonable terms.

(b) *Allocations of principal rights.* (1) *Assignment to the Government.* The Contractor agrees to assign to the Government the entire right, title, and interest throughout the world in and to each subject invention, except to the extent that rights are retained by the Contractor under subparagraph (b)(2) and paragraph (d) below.

(2) *Greater rights determinations* (i) The Contractor, or an employee-inventor after consultation with the Contractor, may retain greater rights than the nonexclusive license provided in paragraph (d) below, in accordance with the procedures of paragraph 27.304-1(a) of the Federal Acquisition Regulation (FAR). A request for a determination of whether the Contractor or the employee-inventor is entitled to retain such greater rights must be submitted to the Head of the Contracting Agency or designee at the time of the first disclosure of the invention pursuant to subparagraph (e)(2) below, or not later than 8 months thereafter, unless a longer period is authorized in writing by the Contracting Officer for good cause shown in writing by the Contractor. Each determination of greater rights under this contract normally shall be subject to paragraph (c) below, and to the reservations and conditions deemed to be appropriate by the Head of the Contracting Agency or designee.

(ii) Upon request, the Contractor shall provide the filing date, serial number and title, a copy of the patent application (including an English-language version if filed in a language other than English), and patent number and issue date for any subject invention in any country for which the Contractor has retained title.

(iii) Upon request, the Contractor shall furnish the Government an irrevocable power to inspect and make copies of the patent application file.

(c) *Minimum rights acquired by the Government.* (1) With respect to each subject invention to which the

Contractor retains principal or exclusive rights, the Contractor agrees as follows:

(i) The Contractor hereby grants to the Government a nonexclusive, nontransferable, irrevocable, paid-up license to practice or have practiced each subject invention throughout the world by or on behalf of the Government of the United States (including any Government agency).

(ii) The Contractor agrees that with respect to any subject invention in which it has acquired title, the Federal agency has the right in accordance with the procedures in FAR 27.304-1(g) to require the Contractor, an assignee, or exclusive licensee of a subject invention to grant a nonexclusive, partially exclusive, or exclusive license in any field of use to a responsible applicant or applicants, upon terms that are reasonable under the circumstances, and if the Contractor, assignee, or exclusive licensee refuses such a request, the Federal agency has the right to grant such a license itself if the Federal agency determines that—

(A) Such action is necessary because the Contractor or assignee has not taken, or is not expected to take within a reasonable time, effective steps to achieve practical application of the subject invention in such field of use;

(B) Such action is necessary to alleviate health or safety needs which are not reasonably satisfied by the Contractor, assignee, or their licensees;

(C) Such action is necessary to meet requirements for public use specified by Federal regulations and such requirements are not reasonably satisfied by the Contractor, assignee, or licensees; or

(D) Such action is necessary because the agreement required by paragraph (i) of this clause has neither been obtained nor waived or because a licensee of the exclusive right to use or sell any subject invention in the United States is in breach of such agreement.

(iii) The Contractor agrees to submit on request periodic reports no more frequently than annually on the utilization of a subject invention or on efforts at obtaining such utilization of a subject invention or on efforts at obtaining such utilization that are being made by the Contractor or its licensees or assignees. Such reports shall include information regarding the status of development, date of first commercial sale or use, gross royalties received by the Contractor, and such other data and information as the agency may reasonably specify.. The Contractor also agrees to provide additional reports as may be requested by the agency in connection with any march-in proceedings undertaken by the agency in accordance with subdivision (ii) above. To the extent data or information supplied under this section is considered by the Contractor, its licensee, or assignee to be privileged and confidential and is so marked, the agency agrees that, to the extent permitted by law, it will not disclose such information to persons outside the Government.

(iv) The Contractor agrees, when licensing a subject invention, to arrange to avoid royalty charges on acquisitions involving Government funds, including funds derived through a Military Assistance Program of the Government or otherwise derived through the Government, to refund any amounts received as royalty charges on a subject invention in acquisitions for, or on behalf of, the Government, and to provide for such refund in any instrument transferring rights in the invention to any party.

(v) The Contractor agrees to provide for the Government's paid-up license pursuant to subdivision (i) above in any instrument transferring rights in a subject invention and to provide for the granting of licenses as required by subdivision (ii) above, and for the reporting of utilization information as required by subdivision (iii) above, whenever the instrument transfers principal or exclusive rights in a subject invention.

(2) Nothing contained in this paragraph (c) shall be deemed to grant to the Government any rights with respect to any invention other than a subject invention.

(d) *Minimum rights to the Contractor.* (1) The Contractor is hereby granted a revocable nonexclusive, royalty-free license in each patent application filed in any country on a subject invention and any resulting patent in which the Government obtains title, unless the Contractor fails to disclose the subject invention within the times specified in subparagraph (e)(2) below. The Contractor's license extends to its domestic subsidiaries and affiliates, if any, within the corporate structure of which the Contractor is a part and includes the right to grant sublicenses of the same scope to the extent the Contractor was legally obligated to do so at the time the contract was awarded. The license is transferable only with the approval of the funding Federal agency except when transferred to the successor of that part of the Contractor's business to which the invention pertains.

(2) The Contractor's domestic license may be revoked or modified by the funding Federal agency to the extent necessary to achieve expeditious practical application of the subject invention pursuant to an application for an exclusive license submitted in accordance with applicable provisions in the Federal Property Management Regulations and agency licensing regulations. This license will not be revoked in that field of use or the geographical areas in which the Contractor has achieved practical application and continues to make the benefits of the invention reasonably accessible to the public. The license in any foreign country may be revoked or modified at the discretion of the funding Federal agency to the extent the Contractor, its licensees, or its domestic subsidiaries or affiliates have failed to achieve practical application in that foreign country.

(3) Before revocation or modification of the license, the funding Federal agency will furnish the Contractor a written notice of its intention to revoke or modify the license, and the Contractor will be allowed 30 days (or such other time as may be authorized by the funding Federal agency for good cause shown by the Contractor) after the notice to show cause why the license should not be revoked or modified. The Contractor has the right to appeal, in accordance with applicable agency licensing regulations and the Federal Property Management Regulations concerning the licensing of Government-owned inventions, any decision concerning the revocation or modification of its license.

(4) When the Government has the right to receive title, and does not elect to secure a patent in a foreign country, the Contractor may elect to retain such rights in any foreign country in which the Contractor elects to secure a patent, subject to the Government's rights in subparagraph (c)(1) above.

(e) *Invention identification, disclosures, and reports.* (1) The Contractor shall establish and maintain active and effective procedures to assure that subject inventions are promptly identified and disclosed to Contractor personnel responsible for patent matters within 6 months of conception and/or first actual reduction to practice, whichever occurs first in the performance of work under this contract. These procedures shall incude the maintenance of laboratory notebooks or equivalent records and other records as are reasonably necessary to document the conception and/or the first actual reduction to practice of subject inventions, and records that show that the procedures for identifying and disclosing the inventions are followed. Upon request,

the Contractor shall furnish the Contracting Officer a description of such procedures for evalution and for determination as to their effectiveness.

(2) The Contractor shall disclose each subject invention to the Contracting Officer within 2 months after the inventor discloses it in writing to Contractor personnel responsible for patent matters or, if earlier, within 6 months after the Contractor becomes aware that a subject invention has been made, but in any event before any on sale, public use, or publication of such invention known to the Contractor. The disclosure to the agency shall be in the form of a written report and shall identify the contract under which the invention was made and the inventor(s). It shall be sufficiently complete in technical detail to convey a clear understanding, to the extent known at the time of the disclosure, of the nature, purpose, operation, and physical, chemical, biological, or electrical characteristics of the invention. The disclosure shall also identify any publication, on sale, or public use of the invention and whether a manuscript describing the invention has been submitted for publication and, if so, whether it has been accepted for publication at the time of disclosure. In addition, after disclosure to the agency, the Contractor shall promptly notify the agency of the acceptance of any manuscript describing the invention for publication or of any on sale or public use planned by the Contractor.

(3) The Contractor shall furnish the Contracting Officer the following:

(i) Interim reports every 12 months (or such longer period as may be specified by the Contracting Officer) from the date of the contract, listing subject inventions during that period, and certifying that all subject inventions have been disclosed (or that there are not such inventions) and that the procedures required by subparagraph (e)(1) above have been followed.

(ii) A final report, within 3 months after completion of the contracted work, listing all subject inventions or certifying that there were no such inventions, and listing all subcontracts at any tier containing a patent rights clause or certifying that there were no such subcontracts.

(4) The Contractor agrees to require, by written agreement, its employees, other than clerical and nontechnical employees, to disclose promptly in writing to personnel identified as responsible for the administration of patent matters and in a format suggested by the Contractor each subject invention made under contract in order that the Contractor can comply with the disclosure provisions of paragraph (c) above, and to execute all papers necessary to file patent applications on subject inventions and to establish the Government's rights in the subject inventions. This disclosure format should require, as a minimum, the information required by subparagraph (2) above.

(5) The Contractor agrees subject to FAR 27.302(i) that the Government may duplicate and disclose subject invention disclosures and all other reports and papers furnished or required to be furnished pursuant to this clause.

(f) *Examination of records relating to inventions.* (1) The Contracting Officer or any authorized representative shall, until 3 years after final payment under this contract, have the right to examine any books (including laboratory notebooks), records, and documents of the Contractor relating to the conception or first actual reduction to practice of inventions in the same field of technology as the work under this contract to determine whether—

(i) Any such inventions are subject inventions;

(ii) The Contractor has established and maintains the procedures required by subparagraphs (e)(1) and (4) of this clause; and

(iii) The Contractor and its inventors have complied with the procedures.

(2) If the Contracting Officer learns of an unreported Contractor invention which the Contracting Officer believes may be a subject invention, the Contractor may be required to disclose the invention to the agency for a determination of ownership rights.

(3) Any examination of records under this paragraph will be subject to appropriate conditions to protect the confidentiality of the information involved.

(g) *Withholding of payment (this paragraph does not apply to subcontracts).* (1) Any time before final payment under this contract, the Contracting Officer may, in the Government's interest, withhold payment until a reserve not exceeding $50,000 or 5 percent of the amount of this contract, whichever is less, shall have been set aside if, in the Contracting Officer's opinion, the Contractor fails to—

(i) Establish, maintain, and follow effective procedures for identifying and disclosing subject inventions pursuant to subparagraph (e)(1) above;

(ii) Disclose any subject invention pursuant to subparagraph (e)(2) above;

(iii) Deliver acceptable interim reports pursuant to subdivision (e)(3)(i) above;

(iv) Provide the information regarding subcontracts pursuant to subparagraph (h)(4) below.

(2) Such reserve or balance shall be withheld until the Contracting Officer has determined that the Contractor has rectified whatever deficiencies exist and has delivered all reports, disclosures, and other information required by this clause.

(3) Final payment under this contract shall not be made before the Contractor delivers to the Contracting Officer all disclosures of subject inventions required by subparagraph (e)(2) above, and acceptable final report pursuant to subdivision (e)(3)(ii) above, and all past due confirmatory instruments.

(4) The Contracting Officer may decrease or increase the sums withheld up to the maximum authorized above. No amount shall be withheld under this paragraph while the amount specified by this paragraph is being withheld under other provisions of the contract. The withholding of any amount or the subsequent payment thereof shall not be construed as a waiver of any Government rights.

(h) *Subcontracts.* (1) The Contractor shall include this clause (suitably modified to identify the parties) in all subcontracts, regardless of tier, for experimental, developmental, or research work. The subcontractor shall retain all rights provided for the Contractor in this clause, and the Contractor shall not, as part of the consideration for awarding the subcontract, obtain rights in the subcontractor's subject inventions.

(2) In the event of a refusal by a prospective subcontractor to accept such a clause the Contractor—

(i) Shall promptly submit a written notice to the Contracting Officer setting forth the subcontractor's reasons for such refusal and other pertinent information that may expedite disposition of the matter; and

(ii) Shall not proceed with such subcontract without the written authorization of the Contracting Officer.

(3) In the case of subcontracts at any tier, the agency, subcontractor, and Contractor agree that the mutual obligations of the parties created by this clause constitute a contract between the subcontractor and the Federal agency with respect to those matters covered by this clause.

(4) The Contractor shall promptly notify the Contracting Officer in writing upon the award of any subcontract at any tier containing a patent rights clause by identifying the subcontractor, the applicable patent rights clause, the work to be performed under the subcontract,

and the dates of award and estimated completion. Upon request of the Contracting Officer, the Contractor shall furnish a copy of such subcontract, and, no more frequently than annually, a listing of the subcontracts that have been awarded.

(i) *Preference for United States industry.* Unless provided otherwise, no Contractor that receives title to any subject invention and no assignee of any such Contractor shall grant to any person the exclusive right to use or sell any subject invention in the United States unless such person agrees that any products embodying the subject invention will be manufactured substantially in the United States. However, in individual cases, the requirement may be waived by the Government upon a showing by the Contractor or assignee that reasonable but unsuccessful efforts have been made to grant licenses on similar terms to potential licensees that would be likely to manufacture substantially in the United States or that under the circumstances domestic manufacture is not commercially feasible.
(End of clause) (R 7-302.23(a) 1981 JULY)

Alternate I (APR 1984). Add the following sentence at the end of subdivision (c)(1)(i) of the basic clause:

The license will include the right of the Government to sublicense foreign governments and international organizations pursuant to the following treaties or international agreements: .....* or pursuant to any future treaties or agreements with foreign governments or international organizations.

[*Contracting Officer complete with the names of applicable existing treaties or international agreements. The above language is not intended to apply to treaties or agreements that are in effect on the date of the award but are not listed.]

(R 7-302.23(a) 1981 JUL)

PART 53—FORMS

53.203 [Amended]

22. In section 53.203, the reference to "DJ–1500" is removed from the title, and paragraph (b) is removed and reserved.

53.222 [Amended]

23. In section 53.222, the references to "98, 98a" are removed from the title, paragraph (a) is removed and reserved, and paragraph (b) is amended by removing "and 22.1009".

53.303 [Amended]

24. Section 53.303 is amended by removing Form DJ–1500, Identical Bid Report For Procurement.

BILLING CODE 4410-01-M

UMI 1984 MR 30 ISS 63 49 VOL

OFFICE OF THE UNDER SECRETARY OF DEFENSE

WASHINGTON D.C. 20301

RESEARCH AND ENGINEERING

21 FEB 1984

Honorable Donald E. Sowle
Administrator
Office of Federal Procurement Policy
Office of Management and Budget
Washington, D.C. 20503

Dear Mr. Sowle:

We are enclosing herewith a copy of the Memorandum of Understanding for FAR Maintenance executed by James T. Brannan, Director, Defense Acquisition Regulatory Council and William B. Ferguson, Chairman, Civilain Agency Acquisition Council and concurred in by the appropriate executives of DoD, GSA, and NASA. This memorandum provides a uniform and orderly basis for the processing of FAR cases and orderly maintenance of the FAR.

Sincerely,

MARY ANN GILLEECE
Deputy Under Secretary
(Acquisition Management)

ALLAN W. BERES
Assistant Administrator
for Acquisition Policy

S. J. EVANS
Assistant Administrator
for Procurement

MEMORANDUM OF AGREEMENT FOR FAR MAINTENANCE

RECOMMENDATIONS FOR FAR CHANGES

- Military Services, Defense Agencies, other components of the Department of Defense, and NASA shall submit recommendations for change to the DAR Council.
- Other Executive agencies governed by the FAR shall submit recommendations for change to the CAA Council.
- The others (e.g. the public and agencies not covered by the FAR) may submit recommendations for change to either Council.
  - -- Matters that may affect defense and civilian acquisition equally should be submitted to the FAR Secretariat who will refer it to the cognizant Council for consideration of the establishment of a FAR Case in accordance with the attached listing.
  - -- Matters primarily involving civilian agency aquisition may be submitted to the CAA Council.
  - -- Matters primarily involving defense acquisition may be submitted to the DAR Council.

ESTABLISHING A FAR CASE

- Either Council receiving a recommendation for a change may establish a FAR case after receiving concurrence of the other Council.
- A Council establishing a FAR case shall obtain a FAR case number from the FAR Secretariat. The FAR Secretariat shall examine the list of open FAR cases and advise whether an existing FAR case covers the same subject matter.
- A Council receiving a recommendation for change pertaining to the subject matter of an open FAR case shall consult with the other Council before establishing a FAR case; if appropriate, the new recommendation may be incorporated into the existing FAR case and may be transferred to the other Council for processing.
- A Council establishing a FAR case shall give the other Council an opportunity to provide a representative to work on the development of the case.
- A Council receiving a recommendation for change shall communicate, as necessary, with the proponent to obtain sufficient information to establish or develop the FAR case.
- A Council receiving a recommendation for change which it believes

FAR APPORTIONMENT LISTING

- A Council receiving a recommendation for change which it believes would more appropriately be processed by the other Council may request the other Council to establish it as a FAR case.

PROCESSING A FAR CASE

- The Council processing a FAR case shall keep the other Council advised of any significant change in scope or direction from the original recommendation for change.
- The Council processing a FAR case shall periodically keep the FAR Secretariat advised of the current status of the case.
- The Council processing a FAR case shall obtain the concurrence of the other Council in any proposed resolution, including rejection of the recommendation.
- The Council processing a FAR case shall respond to information requests concerning the case.
- The Council providing final concurrence shall forward the approved coverage to the FAR Secretariat for publication.
- The FAR Secretariat shall not publish a change or notice of proposed change in the Federal Register until both Councils concur.

RESOLVING DISAGREEMENTS

- When the two Councils cannot agree on the resolution of a FAR case, the matter shall be forwarded to the Deputy Under Secretary of Defense for Acquisition Management, DoD; the Assistant Administrator for Acquisition Policy, GSA; and the Assistant Administrator for Procurement, NASA for resolution. In the event an agreement cannot be reached within 30 days for reasons pertaining to substantive differences, the matter shall be deemed a disagreement in accordance with Public Law 98-191.

JAMES T. BRANNAN
Director
Defense Acquisition
Regulatory Council

WILLIAM B. FERGUSON
Chairman
Civilian Agency
Acquisition Council

List of Public Laws

Last List March 29, 1984

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 (phone 202–275–3030).

H.J. Res. 454 / Pub. L. 98–245

Honoring the contribution of blacks to American independence. (Mar. 27, 1984; 98 Stat. 111) Price: $1.50

S.J. Res. 250 / Pub. L. 98–246

Declaring the week of May 7 through May 13, 1984, as "National Photo Week". (Mar. 27, 1984; 98 Stat. 113) Price: $1.50

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected),* the *Federal Register Index,* or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$20.00 per year

Federal Register Index

The Index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$18.00 per year

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register

Note to FR Subscribers
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Rules and Regulations

Federal Register
Vol. 49, No. 64
Monday, April 2, 1984

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 430

Sugar Beet Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: This action makes final a revision and reissuance of the Sugar Beet Crop Insurance Regulations, effective for the 1983 and succeeding crop years. The revision and reissuance of the regulations was implemented by the Federal Crop Insurance Corporation (FCIC) on an interim basis to allow insureds sufficient time to consider changes in the regulations for insuring sugar beets. The intended effect of this action is to confirm the interim rule.

EFFECTIVE DATE: April 2, 1984.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C. 20250, telephone (202) 447–3325.

The Impact Statement describing the options considered in developing this rule and the impact of implementing each option is available upon request from Peter F. Cole.

SUPPLEMENTARY INFORMATION: On Friday, November 5, 1982, FCIC published an interim rule in the **Federal Register** at 47 FR 50188, revising and reissuing the Sugar Beet Crop Insurance Regulations (7 CFR Part 430), effective for the 1983 and succeeding crop years in order to provide sufficient time for insureds to consider changes in the regulations for insuring sugar beets. Under the regulations, any amendments must be placed on file in the service office by a date 15 days prior to the cancellation date in order to be effective for the crop year. It was determined that there would not have been sufficient time to allow insureds to consider such changes and still comply with the regulations with respect to placing the changes on file 15 days prior to the cancellation date. Notification of changes for the 1983 crop year were sent on June 25, 1982, to all current insureds in Arizona and California, where the cancellation date is July 15, thus constituting notice as required by 7 CFR 430.7.

The public was given 60 days after publication of the interim rule in which to submit comments, data, and opinions on the rule and the rule was scheduled for review in order to provide for any amendments made necessary by such public comment, but no comments were received.

In reviewing this rule prior to issuance as a final rule, it was determined that the control numbers assigned by the Office of Management and Budget (OMB) to information collection requirements of these regulations would be included for the purpose of codification as required by OMB, and that the level at which the Manager, FCIC, is authorized to take action to grant relief in cases of good faith reliance on misrepresentation be changed from $20,000 to $100,000 as approved by the Board of Directors of FCIC. These changes relate to internal agency practice and procedure and are therefore exempt from the notice and comment provisions of the Administrative Procedure Act.

Merritt W. Sprague, Manager, FCIC, has determined that this action (1) is not a major rule as defined by Executive Order No. 12291 (February 17, 1981), (2) will not increase the Federal paperwork burden for individuals, small businesses, and other persons, and (3) conforms to the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), and other applicable law.

The title and number of the Federal Assistance Program to which these regulations apply are: Title—Crop Insurance; Number 10.450.

As set forth in the final rule related notice to 7 CFR Part 3015, Subpart V (48 FR 29116, June 24, 1983), the Federal Crop Insurance Corporation's program and activities, requiring intergovernmental consultation with State and local officials, are excluded from the provisions of Executive Order No. 12372.

It has been determined that this action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Impact Statement was prepared.

This action has been reviewed under USDA procedures established in Departmental Regulation No. 1512–1 (December 15, 1983). This action does not constitute a review under such procedures as to the need, currency, clarity, and effectiveness of these regulations. The sunset review date established for these regulations is November 1, 1987.

List of Subjects in 7 CFR Part 430

Crop insurance, Sugar beets.

Final Rule

PART 430—[AMENDED]

Accordingly, under the authority contained in the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), the Interim Rule, revising and reissuing the Sugar Beet Crop Insurance Regulations as published at 47 FR 50189 on Friday, November 5, 1982, as amended in the following instances, is hereby adopted as final:

1. 7 CFR 430.3 is added to read as follows:

§ 430.3 OMB control numbers.

The information collection requirements contained in these regulations (7 CFR Part 430) have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35 and have been assigned OMB Nos. 0563–0003 and 0563–0007.

2. 7 CFR 430.5(b) is revised to read as follows:

§ 430.5 Good faith reliance on misrepresentation.

* * * * *

(b) The Board of Directors of the Corporation, or the Manager in cases involving not more than $100,000.00, finds (1) that an agent or employee of the Corporation did in fact make such misrepresentation or take other erroneous action or give erroneous advice, (2) that said insured person relied thereon in good faith, and (3) that to require the payment of the additional premiums or to deny such insured's

entitlement to the indemnity would not be fair and equitable, such insured person shall be granted relief the same as if otherwise entitled thereto.

Done in Washington, D.C., on February 23, 1984.

Peter F. Cole,

Secretary, Federal Crop Insurance Corporation.

Dated: March 23, 1984.

Approved by:

Merritt W. Sprague,

Manager.

[FR Doc. 84-8805 Filed 3-30-84; 8:45 am]

BILLING CODE 3410-08-M

Agricultural Marketing Service

7 CFR Part 1049

Milk in the Indiana Marketing Area; Order Terminating Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Termination of rules.

SUMMARY: This action terminates the seasonal incentive producer payment plan ("Louisville" plan) that was designed to encourage level milk production by dairy farmers throughout the year for the Indiana milk order. Hoosier Milk Marketing Agency, Inc., a federation of cooperative associations representing a large number of the producers who supply milk for the market, proposed the suspension of the provisions until December 1985. The comments received in response to a Notice of Proposed Suspension indicate that the plan no longer serves its intended purpose, a situation that likely will not change with the passage of time. Accordingly, termination of the provisions is more appropriate and is needed to maintain an appropriate alignment of producer prices with neighboring markets.

EFFECTIVE DATE: April 2, 1984.

FOR FURTHER INFORMATION CONTACT: Richard A. Glandt, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S., Department of Agriculture, Washington, D.C. 20250, 202-447-4829.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding:

Notice of Proposed Suspension/ Termination: Issued February 16, 1984; published February 23, 1984 (49 FR 6499).

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. Such action will lessen the regulatory impact of the order on dairy farmers and will not affect milk handlers.

This order of termination is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and of the order regulating the handling of milk in the Indiana marketing area.

Notice of proposed rulemaking was published in the **Federal Register** on February 22, 1984 (FR 6499) concerning a proposed suspension/termination of certain provisions of the order. Interested persons were afforded opportunity to file written data, views, and arguments thereon by March 8, 1984. Two comments were filed in favor of suspending the specified provisions.

After consideration of all relevant information, including the proposal in the notice, the comments received, and other available information, it is hereby found and determined that the following provisions of the order no longer tend to effectuate the declared policy of the Act:

1. In § 1049.61, paragraph (f), the words "For the months of January through March and August," and all of paragraphs (g) through (l).

2. In § 1049.75(a), the words ", and , for the months of April through July plus an additional 20 cents, or for the months of September through December minus the amount computed pursuant to § 1049.61(i)".

Statement of Consideration

This action removes from the Indiana order the provisions that contain the seasonal producer payment plan, commonly known as the "Louisville plan." Under those provisions, 20 cents per hundredweight of producer milk is deducted from the pooled value of milk in computing the uniform prices to producers during the months of April through July. The monies withheld plus accrued interest are added to the pooled funds in computing the uniform prices to producers for each month of September through December. This payment plan is intended to encourage relatively level milk production throughout the year.

Suspension of the Louisville plan for April 1984 through December 1985 was requested by Hoosier Milk Marketing Agency, Inc., a federation of cooperative associations representing more than two-thirds of the producers supplying the market. In the notice of proposed action, it was noted that the Louisville plan had been suspended from operation in 1983 in the Indiana order. The suspension last year and the proposed supension for two years raised a question whether the plan should be terminated. Interested parties were invited to comment whether the Louisville plan was accomplishing its intended purpose and whether it should be terminated.

This action is needed because the Louisville plan is no longer an adequate stimulus toward leveling out production. The 20 cents per hundredweight deduction represents less than two percent of the uniform price paid to producers by handlers regulated by the Indiana order. The amount of the deduction is too low to effectively encourage the desired adjustment to level production.

This action also is needed to maintain the alignment of producer pay prices with adjoining markets. The Louisville plan under the neighboring Louisville-Lexington-Evansville order was replaced with a seasonal base and excess payment plan in 1983. The Louisville plan under the adjoining Ohio Valley order was terminated on February 29, 1984. Producers shipping to handlers regulated by the Indiana, Louisville-Lexington-Evansville, and Ohio Valley orders are intermingled in some areas. Unless the Louisville plan is suspended or terminated in Indiana, a misalignment of pay prices among the three orders could result in disorderly marketing as producers change markets for temporary gains. These problems with current provisions will not be corrected merely with the passage of time.

The termination action, taken herein, is more appropriate than the suspension action requested by the proponent federation of cooperatives. The proponents had requested the Louisville plan be suspended from April 1984 through December 1985. The reasons offered for suspending the provisions are expected to continue through 1985 and beyond. Under a suspension, the provisions would have been inoperative for a period of three years. Accordingly, the more appropriate action is to terminate the Louisville plan provisions at this time. If the Indiana dairy industry would desire to implement another seasonal incentive producer payment plan after 1985, sufficient time is available to consider such a plan through an amendatory proceeding.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) The termination is necessary to reflect current marketing conditions and to assure orderly marketing conditions in the marketing area in that the program no longer achieves its intended purpose.

(b) Termination of the provisions does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of proposed rulemaking was given interested parties and they were afforded opportunity to file written data, views, or arguments concerning this suspension. No comments were filed in opposition to this action.

Therefore, good cause exists for terminating the aforesaid provisions of the Indiana order effective upon publication in the **Federal Register.**

List of Subjects in 7 CFR Part 1049

Milk marketing orders, Milk, Dairy products.

It is Therefore Ordered

§ 1049.61 [Amended]

PART 1049—[AMENDED]

1. In § 1049.61, paragraph (f), the words "For the months of January through March and August," and all of paragraphs (g) through (l).

§ 1049.75 [Amended]

2. In § 1049.75(a), the words ", and, for the months of April through July plus an additional 20 cents, or for the months of September through December minus the amount computed pursuant to § 1049.61(i)".

Effective date: April 2, 1984.

(Sec. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Signed at Washington, D.C., on March 27, 1984.

John E. Ford,

Deputy Assistant Secretary for marketing and Inspection Services.

Packers and Stockyards Administration

9 CFR Part 201

Regulations and Policy Statements; Clarification

AGENCY: Packers and Stockyards Administration, Agriculture.

ACTION: Final rule; clarification.

SUMMARY: This document clarifies the last sentence of paragraph (e) of regulation 201.56, which was published on February 17, 1984 (49 FR 6080), to make the language clear pertaining to disclosure of the relationship a buyer has with the market agency selling consigned livestock.

EFFECTIVE DATE: March 19, 1984.

FOR FURTHER INFORMATION CONTACT: Harold W. Davis, Director, Livestock Marketing Division, (202) 447–6951.

SUPPLEMENTARY INFORMATION: It has come to the attention of the Agency, subsequent to promulgation of paragraph (e) of regulation 201.56, that it is interpreted as incresing regulatory requirements concerning disclosure. The Packers and Stockyards Administration clarifies paragraph (e) of regulation 201.56, as it pertains to the disclosure of the relationship of a buyer to the market agency, at the time of sale, when the buyer is an owner, officer, agent or employee of the market agency selling consigned livestock. It was not the intention of the Administration to require disclosure of this relationship at the time of sale. Accordingly, the requirement of disclosure, at the time of sale, of a buyer's relationship to the market agency is deleted, but the requirement that such buyer's name be disclosed at the time of sale continues in effect. The requirement of full disclosure on the account of sale, including disclosure of the buyer's relationship with the market agency, is retained.

List of Subjects in 9 CFR Part 201

Reporting and recordkeeping requirements, Stockyards, Surety bonds, Trade practices.

Authority: 7 U.S.C. 228.

Done at Washington, D.C. this 28th day of March 1984.

B. H. (Bill) Jones,

Administrator, Packers and Stockyards Administration.

PART 201—[AMENDED]

Accordingly, the Packers and Stockyards Administration is clarifying 9 CFR 201.56(e), as revised paragraph (e) reads as follows:

§ 201.56 Market agencies selling on commission; purchases from consignment.

* * * * *

(e) Purchase from consignments; disclosure required. When a market agency purchases livestock consigned to it for sale to fill orders or to support the market, or sells consigned livestock to any owner, officer, agent, employee, or any person in whose business such market agency, owner, officer, agent, or employee has an ownership or financial interest, the market agency shall disclose the name of the buyer and the nature of the relationship existing between the market agency and the buyer. Such disclosure shall be made on the account of sale and the name of the buyer shall be publicly announced at the time of sale.

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Part 330

FEDERAL HOME LOAN BANK BOARD

12 CFR Parts 561 and 564

Brokered Deposits; Limitations on Deposit Insurance

Dated: March 28, 1984.

AGENCIES: Federal Deposit Insurance Corporation and Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: The Federal Deposit Insurance Corporation ("FDIC") and the Federal Home Loan Bank Board ("Board"), as operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC"), have adopted final regulations on deposits brokered by third parties into institutions whose accounts are insured by the FDIC or FSLIC ("insured institutions"). The regulations are intended to address the concern of the two Agencies with the problems arising from brokered funds, particularly in view of the recent decontrol of interest rates paid on deposits by insured institutions. As adopted, the regulations limit insurance coverage afforded to deposits placed with insured institutions by brokers engaged in the business of placing deposits, with certain specified exemptions.

EFFECTIVE DATE: October 1, 1984, with certain exceptions described in sections to be codified at 12 CFR 330.13 and 564.12.

FOR FURTHER INFORMATION CONTACT: Joseph A. DiNuzzo, Senior Attorney, Federal Deposit Insurance Corporation, Legal Division, (202) 389–4171, Room 4126B, 550 17th Street, N.W., Washington, D.C. 20429, or Christopher P. Bolle, Law Clerk, (202) 377–7057, or Robert S. Monheit, (202) 377–6465, Attorney, Federal Home Loan Bank Board, Office of General Counsel, 1700 G. Street, N.W., Washington, D.C. 20552.

SUPPLEMENTARY INFORMATION:

Background

On November 1, 1983, the FDIC and the Board ("Agencies") issued an Advance Notice of Proposed

Rulemaking, soliciting comments on the brokering of deposits of institutions whose accounts are insured by the FDIC or FSLIC ("insured institutions"). 48 FR 50399 (1983). The Advance Notice set forth the concerns shared by the FDIC and the Board about deposit brokerage, principally the swift receipt of large volumes of funds by insured institutions from outside their natural market areas irrespective of the institutions' managerial and financial soundness, and the increased costs to the FDIC and the FSLIC in the form of either greater insurance payments or higher assistance expenditures if the institutions are subsequently closed or merged because of insolvency. The Advance Notice posed a series of questions to the public concerning those issues and the possible means of dealing with them.

In January 1984, after reviewing the information received pursuant to the Advance Notice and other relevant data, the FDIC and the Board proposed amendments to their respective regulations governing the insurance coverage to be afforded deposits placed by or through brokers with insured institutions. 49 FR 2787 (1984). The proposal was designed to limit the insurance coverage on deposits placed by or through deposit brokers to $100,000 per insured institution per deposit broker. The term "deposit broker" was defined as any person or entity, other than an insured institution or its employee, engaged in the business of placing or listing for placement deposits of insured institutions. The proposal also limited insurance for deposit accounts established by a trustee or agent pursuant to an agreement to fund a prearranged loan. After careful consideration of the comments received and further analysis of other available information, the Agencies have decided to adopt the proposed amendments, with the modifications discussed below.

Overview of Comments Received

The FDIC received 3,498 comments on the proposed rule. The majority of these comments (2,823) were from individuals, with 281 from banks, 105 from savings and loan associations, 70 from brokers and other financial intermediaries, and 92 from credit unions. The other comments received were submitted by government agencies, local public units, Members of Congress, law firms, private businesses and trade associations.

The Board received 3,403 comments on the proposed rule, 2,776 of which were from individuals, 264 from savings institutions, 41 from commercial banks, and 104 from credit unions. Brokers and other financial intermediaries submitted 23 comments, and 195 letters were received from other entities, including government agencies, Members of Congress, law firms, trade associations and private businesses.

Virtually all the individuals who commented on the proposal identified themselves as customers of deposit brokers and opposed the rule, citing convenience, competitive rates and maturities, and liquidity of brokered funds. A small minority of individuals who commented favored the proposal, noting the negative economic implications of the abuses connected with brokered deposits. Credit union commenters, also identified as deposit brokerage customers, opposed the rule for similar reasons, noting that credit unions do not generally have the resources to place funds themselves in a cost-effective manner.

A slight majority of the banks that expressed an overall opinion about the proposal opposed it on the grounds of cost-effectiveness and the access to national markets provided by brokers. They recommended further supervisory action regarding the use of brokered funds. Banks favoring the proposal asserted that deposit brokerage increases an institution's cost of funds and could increase insurance premiums for all FDIC-insured banks, and causes funds to flow from local communities. The American Bankers Association and the Independent Bankers Association of America (the two major bank trade associations) supported the proposal.

One out of every twelve savings institutions (or 264 out of approximately 3,200 savings institutions) submitted individual comments. A slight majority of comments from individual savings institutions opposed implementation of the regulation as proposed, offering various approaches to ameliorate the problems addressed. Comments in opposition emphasized cost-effectiveness, competition and establishment of a national market, and the use of brokered funds for maturity matching. The National Council of Savings Institutions and the Texas Savings and Loan League also opposed the proposal. Thrifts favoring the rule referred to higher deposit liability costs to all institutions, resulting in higher borrowing costs; their major concern, however, is increased exposure of the deposit insurance funds and resulting increases in insurance premiums. The U.S. League of Savings Associations also favored the rule because of the threat brokered funds pose to the Insurance Fund. All but one of the state savings leagues which commented expressed general support for the proposed rule, although some suggested various modifications. These included the California League of Savings Institutions (California institutions hold sixty-three percent of all brokered deposits in the thrift industry), the New Hampshire Co-operative Savings and Loan League, the New York League of Savings Institutions, the New Jersey Savings League, the Ohio Savings and Loan League, the Florida League of Financial Institutions, the Pennsylvania Association of Savings Institutions, and the West Virginia League of Savings Institutions.

Deposit brokers and other financial intermediaries opposed the rule, which they argued was unfairly directed at them rather than at problems of institution mismanagement. These commenters warned of disruption in the secondary market for certificates of deposit with a consequent detrimental effect on individual investors and small and medium-sized institutions, and discrimination in favor of large institutions with the capacity to reach a national customer base. They recommended restricting the application of the rule to funds of "institutional" investors and funds invested in weak institutions, registration of deposit brokers with the Securities and Exchange Commission, and higher insurance premium assessments for institutions engaged in riskier activities.

Thirty-seven members of the United States Congress commented on the proposal; they acknowledged the negative aspects of deposit brokerage but requested that the Agencies defer action until Congress has had the opportunity to act on the matter. The Comptroller of the Currency criticized the proposal and recommended that the Agencies utilize a supervisory approach to the problems engendered by deposit brokerage; he suggested a limitation of $100,000 on the insurance coverage any single depositor could obtain on funds placed through any one broker, irrespective of the number of insured institutions involved. The Antitrust Division of the United States Department of Justice expressed the view that the proposal would cause competitive harm and recommended a more limited approach to the problem. The Comptroller and the Antitrust Division, as well as some other commenters, questioned the statutory authority supporting the restriction on deposit insurance coverage and the effectiveness and enforceability of the proposed approach.

Discussion of Issues Raised by Commenters

Statutory Authority

Several commenters expressed the view that the proposed rule would exceed express statutory authority regarding insurance coverage. They asserted a conflict between the proposal and the Congressional objective of protecting investors by insuring all deposits up to an aggregate amount per investor, pointing out that the federal deposit insurance system was intended to safeguard the savings of depositors, increase depositor confidence in financial institutions and promote economic growth through increased availability of credit.

Those commenters favoring the proposed approach frequently asserted that deposit brokerage has resulted in the misuse and exploitation of the deposit insurance funds. They noted that the legislative purpose in creating the federal deposit insurance system was to guarantee the safety of consumers' savings and not to maximize the investment yields of large investors. These commenters believe that deposit brokerage is unjustified and hazardous to the federal deposit insurance system.

The FDIC and the Board agree that insured deposit brokerage is inconsistent with the fundamental and overriding purposes which were meant to be served by the federal deposit insurance system. Deposit insurance was originally intended to establish stability and to promote confidence in the monetary and banking systems by protecting primarily small, relatively unsophisticated depositors in their relationships with banks and savings associations. It was not intended to protect investors seeking the highest yields available in money markets.

With regard to specific statutory authority, the Agencies note that they are clearly empowered to promulgate an insurance-limitation rule pursuant to provisions of the Federal Deposit Insurance Act (12 U.S.C. 1811–1832) and Title IV of the National Housing Act (12 U.S.C. 1724 *et seq.*) which expressly authorize the promulgation of "legislative" rules clarifying, defining, and limiting the insurance coverage provided, and the promulgation of rules proscribing unsafe or unsound practices. The FDIC and the Board have carefully observed explicit statutory limitations in this area (and, for example, have excluded certain IRA and Keogh accounts from coverage under this rule).

Cost of Funds to Insured Institutions

Insured institutions opposing restrictions to deposit brokerage activities frequently cited substantial savings realizable by obtaining deposits through brokers, and suggested that such cost savings could be passed along to the public. Many commenters view such funds as an inexpensive alternative to direct solicitation, especially for smaller institutions lacking extensive branch networks, and argued that only money-center banks would be capable of attracting lower-cost funds outside the local area.

Financial institution commenters supporting the proposal expressed alarm at the prospect of being subjected to the vagaries of the marketplace through heavy dependence on brokered deposits. Because brokered funds are typically generated outside of the depository institution's retail deposit base, the institution is forced to pay the highest national market rates to attract these funds, leading ultimately to increased costs for all institutions operating in the same retail deposit area. In the view of these commenters, the proposal would eliminate the deposit brokers' retailing of certificates of deposit to the highest bidder and would return the deposits to their deposit base—the local community—thus containing the cost of raising funds through retail deposits.

The Agencies note that opinion was divided as the the actual effect of the use of brokers on an insured institution's cost of funds. Those who alleged that brokered deposits are less expensive often offered a branch network as the alternative, and did not consider the relative costs of raising funds through other low overhead means such as direct solicitation, advertising and deposit-listing services, none of which would be affected by the new rule.

Investor Convenience

Individual commenters generally praised the convenience of placing deposits in insured institutions through investment brokers. Many commenters stated that use of these third-party intermediaries provided small investors with access to national markets, permitting wider choices of deposit instruments, interest rates and maturities formerly available only to large investors. Commenters also cited the liquidity of brokered CDs facilitated by the active secondary market in these instruments.

The Agencies understand the desire of individual investors to use the most convenient method of obtaining high protected yields. The FDIC, however, does not agree that deposit insurance was ever intended to facilitate shopping by investors for the highest yields available in national money markets, irrespective of the credit-worthiness of the borrowing institutions. The Board concurs, and finds that limiting insurance of deposits placed through brokers is not necessarily detrimental to the investor's goal; deposit-listing services, for example, may offer a wider choice than a broker who merely recommends a particular depository. Furthermore, it does not appear unreasonable that investors should choose between accepting a broker's judgment as to the safety of an uninsured investment and doing minimal research to find an insured investment. An investor who believes that only a broker can offer the convenience needed may continue to use such a service, but full deposit insurance will not be provided to that investor.

Capital Markets

Redistribution of funds from "capital rich" to "capital poor" markets was frequently mentioned as a desirable by-product of deposit brokerage. Commenters suggested that this redistribution provided funds for housing and other lending needs in many areas of the country. In addition, many institutions viewed brokered CDs as valuable tools in balancing their assets and liabilities. Several commenters suggested that the prudent use of brokered funds could assist struggling institutions in restructuring their operations, ultimately saving the Insurance Funds from costly assisted mergers or liquidations.

The Agencies have seen no evidence that brokered funds move capital from one area to another in ways that are uniquely helpful to the financial institutions involved or to their depositors and borrowers. Rather, it appears that brokered funds move to the institutions willing to pay the highest rate, wherever located. Other mechanisms can be used to aid institutions in cash-poor areas in raising capital, such as the inter-bank market, advertisements, stock or debt sales, and secondary market activity in loans. In the view of the Board and the FDIC, there is not compelling reason to permit continued brokering of insured deposits to meet these needs when there are other less objectionable means available. Moreover, one comment, indicating that without brokered funds the commenting institution could not even meet its current obligations to pay interest on outstanding instruments, illustrated precisely the kind of dangerous "capital movement" practice the rule is intended to curb. Funds flows should be based on the creditworthiness

of the borrowing institution, not simply the rate of interest paid on a federally guaranteed instrument.

Appropriateness of Mechanism Based on Supervisory Concerns

The FDIC and the Board have reviewed their data on banks and savings associations which are involved with deposit brokerage. Indications are that, although brokered deposits at the present time comprise a modest percentage of total domestic deposits, a significantly greater proportion of poorly-rated institutions use brokered deposits than highly-rated institutions. The 77 commercial banks that failed in 1982 and 1983 had substantial brokered deposits, constituting, on the average, 16 percent of total deposits. In three instances, brokered deposits equalled more than 60 percent of the failed bank's total deposits. In 19 other cases, these deposits equalled between 20 and 50 percent of the failed bank's deposits. As of mid-March 1984, 13 commercial banks had failed in 1984; seven of these held brokered deposits ranging as high as 53 percent of total deposits.

In savings associations insured by the FSLIC, brokered deposits totaled approximately $3 billion in January, 1982, and had increased tenfold to almost $30 billion by December, 1983. Moreover, there has been a significant correlation between associations which use brokered deposits and those which have supervisory problems. In 1982 and 1983, more than half of the insured institutions that were closed by the FSLIC had brokered funds in excess of one-third of their deposits. Almost half of the institutions with a net worth below acceptable levels have brokered deposits in excess of 20 percent of their total deposits. For example, in one case, an institution had $240 million in brokered deposits, representing 90 percent of its deposit base. Another problem association used brokered deposits to increase its assets by over 2,500 percent, with brokered deposits representing 70 percent of its total liabilities. In 1983, only 670 of the approximately 3,200 FSLIC-member institutions reported any use of brokered deposits. The use of brokered deposits is even more highly concentrated than that figure indicates: 94 percent of all brokered deposits are concentrated in the 369 FSLIC-insured institutions (approximately one-tenth of the industry) that hold brokered deposits in excess of 5 percent of total deposits, and of these, 145 are troubled institutions. The FDIC and the Board are continuing to collect information on deposit brokerage and, as discussed below, are monitoring the use of brokered funds by problem institutions.

Commenters have questioned these figures by suggesting that a large portion of the brokered funds of recently failed banks and thrifts are in fact uninsured deposits of institutional investors. Cases handled recently indicate that quite the opposite is true, and suggest that, since the occurrence of several highly publicized depository institution failures, the great majority of investors have sought full insurance coverage of deposits.

In addition to their concern about the effects of deposit brokerage on already troubled institutions, the FDIC and the Board are concerned about the potential which exists for the abuse of brokered funds by insured institutions generally. There are a number of reasons why currently sound institutions might succumb to the opportunity to swiftly and dramatically increase their deposit size through massive infusions of brokered funds. These funds, which are often received in large amounts at high cost, must be invested quickly for purposes of economic efficiency. The Agencies' experience has shown that the speed required may not allow for the usual care to be taken in appraisals and credit checks relative to investments. Moreover, the need to offer a high rate of return to attract brokered funds may require institutions to take greater investment risks, a factor often aggravated where the broker or associated parties suggest or stipulate particular uses for the funds. Healthy institutions may become problem cases very quickly through a very few transactions of this sort. One institution, for example, used brokered deposits to quadruple its asset size in a year. Although this institution was healthy at the outset of the year, the brokered funds were used to invest in highly speculative commercial loans at a pace that precluded the association from using adequate underwriting procedures, so that it is now a problem for the FSLIC. In another transaction, brokered funds were deployed to fund transactions where the value of security properties were artificially inflated to levels bearing no resemblance to real value as security for loans.

Although only a small percentage of institutions currently engage in the brokered deposits market, the Board believes the expanded use of such funds could have a significant effect on the entire insured depository industry. If brokered deposits grew into a dominant source of funds, it is possible that high national market rates would become a "floor" even in remote areas, and therefore, as a commenter observed, raise the cost of home loans and other consumer borrowing, or force institutions into making more speculative investments in order to cover the cost of funds. In addition to increasing the cost of money, such a situation also could result in a standardization of terms and the imposition of minimum amounts of deposits.

The Board also in concerned that the continued use of brokered funds could, through the use of nationwide brokers, draw institutions away from direct contact with their local communities and that the "local nexus" could be lost. Particularly troublesome is the possibility that, if institutions rely heavily on brokered funds rather than the local savings base, they will feel less need to respond to the housing and credit needs of their local communities.

Several commenters suggested that the Agencies adopt a differential approach to the treatment of brokered funds. It was suggested that the funds be divided into uninsured accounts, insured individual accounts and insured institutional accounts. Only the latter would be regulated, since commenters asserted that these accounts represented the greatest risk to the Insurance Funds because they frequently are placed by brokers not registered with the SEC and do not receive the prudent analysis of risk enjoyed by insured individual depositors.

This approach is discussed in more detail in the section describing alternatives considered. In brief, however, the Agencies see no reason to differentiate between these two types of deposit: Both sources of funds are placed by brokers and result in large sums moving rapidly among institutions.

A number of commenters questioned the enforceability and effectiveness of the proposed approach. They expressed the belief that weak institutions could easily circumvent the proposed restrictions by advertising directly in nationally circulated newspapers or merely by bringing the brokerage function in-house. Further, the use of brokers could be concealed from deposit insurers, encouraging troubled institutions to use subterfuge as to the origin of deposits. Finally, these commenters noted that neither the Agencies nor the depository institution could easily distinguish between brokered deposits placed by individuals directly (although on the advice of a deposit-listing service) and other more readily ascertainable types of brokered deposits, thus making enforcement even more difficult.

The FDIC and the Board believe that institutions will comply with the final rule, and that attempts at evasion would be discovered in the course of regularly scheduled examinations through detection of account patterns. In addition, institutions probably would be unwilling to participate in such arrangements because of the uncertainty of ultimate insurability. Finally, the Agencies do not believe brokers would participate in such activities because the potential discovery of evasion could result in significant broker liability.

Consideration of Alternative Approaches

Many commenters suggested alternatives to the approach taken by the proposed regulation.

1. Focus on Institutional accounts. Several commenters recommended that a distinction be made between institutional and individual investors, and insured and uninsured brokered funds. They allege that insured institutional deposits, comprising less than 10 percent of the market, in which deposits are broken into $100,000 lots to achieve full insurance coverage, pose the most risk to the Insurance Funds because they generally are short-term and are largely placed by unregulated money brokers without the benefit of credit analysis.

The FDIC and the Board believe that this approach would not accomplish their objectives, and would not address many of the problems inherent in brokered funds. Even if the characterization of institutional insured brokered deposits is accurate, it does not argue strongly for a different approach; an account with a longer maturity does not carry the imminent threat of nonrenewal, but is nonetheless subject to the same reinvestment problems as a shorter-term account. Furthermore, the Agencies have not been presented with convincing evidence that there are significant differences between brokers of institutional funds and brokers of individuals' deposits; there are brokers of institutional funds who are registered, use credit analysis, and carefully select insured banks and thrifts for their clients, while brokers for individual investors have not been immune from placing deposits in troubled institutions. Assuming that a difference does exist, a rule allowing continued insurance of individual investors would merely invite institutional brokers to enter the individual investor market and to continue their allegedly inadequate practices. Moreover, the growth of the money market mutual fund industry indicates that insured third-party deposit brokerage, even if limited to the deposits of individuals, would continue to proliferate and present problems similar to those presented today.

2. Focus on Troubled Institutions Only. Commenters suggested limiting application of the regulation to institutions which fall below required levels of net worth or pose other supervisory problems.

The FDIC and the Board already have taken certain actions in this area and are proposing additional steps. The FDIC currently requires all of its regulated institutions subject to an enforcement action or party to a memorandum of understanding with the FDIC to notify the FDIC before the institution's proportion of brokered deposits to total deposits exceeds five percent. The Board has issued a supervisory directive, dated October 26, 1983, requiring any insured institution failing to meet its regulatory net-worth requirement to give ten days' notice prior to increasing its use of brokered funds to a level above five percent of total deposits, along with information indicating the sources and expected uses of the funds. In addition, the Board today is adopting a temporary regulation limiting to five percent of assets the amount of brokered deposits that may be taken in by an institution with net worth below a certain level; that regulation is intended to prevent unsafe practices by thinly-capitalized institutions which might seek to increase unreasonably their levels of insured brokered deposits prior to the October 1 effective date of the regulation set forth in this Resolution.

However, focusing only on the access of particularly vulnerable banks and thrifts to brokered funds would not prevent abuse by such institutions that were not of supervisory concern prior to their last examination, nor would it effectively protect the FDIC and the FSLIC from increased liabilities stemming from the actions of desperate bank or thrift managers willing to violate regulations in a gamble to use brokered deposits to stave off failure. In one case, a State-chartered, FSLIC-insured thrift institution raised over $40 million in brokered deposits in two days and used these funds to finance a transaction in direct violation of a State cease-and-desist order; while the State regulatory authority may take disciplinary action against the management of that institution, the cost to the FSLIC to resolve the case will nonetheless increase significantly.

The insurance-limitation rule will be "self-implementing" and thus very effective, without imposing substantial regulatory or reporting requirements, and it will encourage the market to discipline investors and recipients of brokered deposits. The rule also reduces the risk to the FDIC and the FSLIC from potential increased liabilities incurred by mangement in supervisory situations.

3. Limit Deposit Growth. Other comments suggested that limitations be placed on the rate of all deposit growth of institutions, based upon varying percentages of net worth, assets, liabilities or other determinants.

The FDIC and the Board find the suggestions to limit or monitor the deposit growth of all insured banks and thrifts to be a more burdensome regulatory approach. The FDIC believes that it is not apparent how any particular limit could be arrived at or supported. Moreover, any limit, such as 15 percent of deposits, which has been suggested by some, would be excessive for poorly operated institutions and unduly restrictive for institutions with strong management and financial ratios. The insurance-limitation approach allows each institution to utilize brokered funds to the extent it can attract them based on its own creditworthiness. The Board concurs, and notes that a rule effectively limiting but not over-regulating deposit growth could be quite complex; such an approach could impose significant regulatory burdens on types of growth that occur more slowly and therefore are of less regulatory concern than the use of brokered funds.

4. Registration of Brokers. A significant number of commenters recommended that all deposit brokers be required to register with the Securities and Exchange Commission ("SEC").

The Agencies find that requiring registration of brokers with the SEC would be a meaningless exercise so long as their customers' deposits were fully insured by the FDIC or the FSLIC, because there would be no market discipline in the placement of deposits. In this connection, the Agencies have found that SEC-registered brokers have not been immune from placing brokered deposits into troubled banks and thrifts; registering additional brokers will not provide additional assurances. Further, SEC registration requirements would not protect the FDIC or FSLIC funds, because they are not oriented toward the safety and soundness of insured institutions or the deposit insurance funds.

5. Variable-rate Insurance Premiums. A number of commenters recommended that deposit insurance premiums either be increased or varied to reflect the

increased risk factor created by deposit brokerage. The FDIC believes risk-related deposit insurance premiums should be implemented and has requested Congress to enact enabling legislation. Risk-related premiums, however, would not be a panacea. Assessment of higher premiums might discourage the acquisition of troubled banks or thrifts, or increase the amount of federal financial assistance required in connection with supervisory solutions for such institutions. A variable insurance premium, even if authorized, would not necessarily solve the problems addressed by the final rule. Such a premium structure, if based upon the level of brokered funds, could also invite circumvention through manipulation of brokered-deposit levels during phases of reporting periods. Consistent with the goals of deregulation, the insurance-limitation rule will act to deter investors from placing deposits in what the *market* determines to be high-risk institutions, rather than trying to deter such institutions from making investments that the *regulators* believe are high-risk. Lastly, the variable-premium suggestion erroneously assumes that the Congress intended insured banks and thrifts to pay higher premiums in order to permit deposit brokers to continue to profit through the marketing of FDIC- or FSLIC-insured products.

6. Increased Supervisory Efforts. A substantial number of commenters recommended increased examinations, reporting requirements and other forms of supervision to regulate the investment practices of institutions utilizing brokered funds. These alternatives could be applied to all institutions, or only to those experiencing net-worth deficiencies or other supervisory problems, or could be tied to a scale depending on the institution's rating, net worth, capital, or any other measure of economic viability. The Agencies have considered these alternatives, but believe that they would require constant monitoring, and would only serve to increase the regulatory burden on depository institutions and supervisory role of the Agencies. This is contrary to the spirit of deregulation and would necessitate an increase in the staff and costs of the Agencies, while doing little to protect the Insurance Funds from institutions unconcerned with the consequences of regulatory violation. Also, the ability of institutions to raise millions of dollars in brokered funds in a very short period would render ineffective any provision for additional monitoring or reporting, because the damage would already have been incurred.

7. Prohibition or Limitation on Receipt of Brokered Funds. The Agencies also considered a blanket prohibition on the use of brokered deposits, but rejected it because it would totally eliminate the benefits to insured institutions of brokered deposits. A stringent limitation would have much the same effect, and a generous percentage would allow continuation of current abuses. Limiting the insurance coverage of brokered deposits, on the other hand, will not defeat the liquidity benefits of brokered deposits for well-run institutions. Such deposits will still be obtainable, but without the insurance guaranty. Investment decisions will have to be made on the basis of analysis of the strength or weakness of the involved depository institution, and not on the insurance feature of the deposit. Inasmuch as a number of deposit-broker comments have indicated that this process has already been established for their individual investor depositors, the new rule should not prove unduly burdensome.

After careful consideration of all of the alternatives, the FDIC and the Board have found the insurance-limitation approach to be the most effective method for addressing the problems presented by the growth of brokered deposits in a deregulated environment. Further, the final rule achieves the Agencies' intended purposes by using market discipline rather than by imposing burdensome regulatory and reporting requirements. The alternatives suggested are, in contrast, ineffective and/or overly burdensome, and all assume that the Congress intended deposit brokers to benefit through the marketing of FDIC- or FSLIC-insured products without being directly subject to regulations intended to ensure the soundness of the Insurance Funds.

Explanation of the Rule

The Definition of Deposit Broker

Many commenters suggested modifications to the definition of the term "deposit broker" contained in the proposal. Most recommended exemptions of certain groups from the definition, such as beneficial owners of IRA, Keogh and qualified pension and profit-sharing plans and part-time investment advisers/agents, typically affiliated with small, community-based depository institutions. Other commenters urged a broader definition to encompass persons or entities, such as real estate and insurance agents, who solicit deposits generally for insured depository institutions lacking extensive branch networks. Other commenters, responding to a question posed in the proposal, recommended inclusion of insured institution subsidiary/joint ventures within the scope of the definition of deposit broker.

The final rule limits the insurance coverage of funds placed by or through a "deposit broker" to $100,000 per broker per insured institution. This differs from the current FDIC and Board regulations which, if certain requirements are met, deem the customer of the deposit broker to be the "depositor" or "member." "Deposit broker" is defined as any person or entity engaged in the business of placing deposits for others, or of placing funds in accounts to be sold to others, and an agent or trustee who establishes a deposit or member account in connection with an agreement with the institution to use the proceeds in the account to fund a prearranged loan.

The definition of "deposit broker" includes not only deposit brokerage arrangements where the broker is the holder of an account for a number of principals, but also where the broker directs or otherwise facilitates the transfer of funds of depositors to an institution without itself becoming a holder of an account. Except for the situations noted below, the definition includes anyone in the business of placing funds in an account for a third party, whether or not the deposit broker is the legal or beneficial owner of the account, and whether or not the placement of funds in accounts is that person's primary business. The term "deposit broker" excludes a depository institution which generates deposits for itself, but includes depository institutions generating deposits for other depository institutions. Also, the definition includes subsidiaries, service corporations or affiliates which place funds with related depository institutions. Likewise, no exception is made for depository institutions either owned by or affiliated with securities firms.

The definition does not include employees of depository institutions. Because the agencies are concerned, however, that too broad a definition of "employee" would lead to circumvention of the intent behind the proposed amendments, the rule adopts the proposed definition of an "employee" of an institution as a person: (1) Who is employed exclusively by the institution for which he or she is soliciting deposits; (2) whose primary compensation is in the form of a salary; (3) who does not share his or her compensation with a deposit broker; and (4) whose office space or place of

business is used exclusively for the benefit of his or her institution/employer.

The definition of "deposit broker" does not generally include trust departments of insured institutions; however, where a deposit broker places deposits through a trust department, all funds placed by that deposit broker will be insured only up to $100,000. Also, a trust department would be deemed a deposit broker in connection with trusts established primarily for the purpose of placing funds with insured institutions.

The definition of "deposit broker" in the proposed rule included all deposit-listing services. In light of the comments and other available information, the Agencies have concluded that it would be infeasible to identify deposits that are placed by reference to listing services that did not actually facilitate the placement of funds with insured institutions. In addition, where the only function of a deposit listing service is to provide information on the availability and terms of accounts, the Agencies believe that the service's minimal participation in the placement process does not merit treatment as a deposit broker. Therefore, the Agencies have specifically excluded from the definition of "deposit broker" any deposit-listing service that does not receive a commission for the number or amount of deposits placed as the result of its service, if the service provided is limited to the collection and transmission of information on the accounts available, and the customer, rather than the deposit-lister or its agent, transmits the funds to the insured institution.

The FDIC and the Board do not intend to disturb traditional deposit relationships. Accounts held by agents will remain insured up to $100,000 per principal, provided that the agent is not engaged in the business of placing deposits. Thus, arrangements such as real estate agent accounts and attorney escrow accounts will not be affected by the amendments because such accounts are held for a purpose incidental to the ordinary business activities of the agent.

Some commenters expressed concern that the rule as proposed could limit the insurance coverage available to trustees under the current regulations. While the agencies do not intend to alter the coverage currently available to traditional trust arrangements, they are concerned that a blanket exemption of all trustees from the definition of deposit broker could lead to substantial circumvention of the rule through various trust-type mechanisms. The final rule therefore exempts trustees from the definition of "deposit broker" provided that the trust in question is not used primarily for the purpose of placing funds in insured institutions. This will preserve the current insurance coverage for trusts while limiting the usefulness of trusts as devices to circumvent the rule.

The insurance coverage currently available to deposits held in connection with pension funds and other employee benefit plans will not be affected by the rule unless such deposits are placed by or through a deposit broker. In addition, trustees and custodians of IRA and Keogh accounts will not be deemed to be deposit brokers. Likewise, the insurance coverage of accounts of public units will not be affected, provided that a deposit broker is not employed to place the funds.

In situations where deposits of pension or other employee-benefit plans are placed by plan administrators or investment advisors, such deposits will not be deemed "placed by or through a deposit broker" as long as such plan administrator or investment advisor plays a managerial role relative to the applicable pension or employee-benefit plan. The reason for this exception is to prevent undue disruption in the pension-fund industry and to further the intent of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1001–1462).

Negotiable Certificates of Deposit

Under the current regulations, for insurance purposes, the "depositor" of a negotiable or bearer-form deposit is the person holding the deposit on the date the institution is closed because of insolvency, 12 CFR 330.11 and 570.11. The Agencies were concerned that such deposits might be used to subvert the intent of the proposed amendments, and requested comments on amendments to current rules which would address this potential problem. After careful consideration of comments received in this regard, the Agencies have determined that it is not appropriate at this time to impose any special restrictions on negotiable certificates. The FDIC and the Board will monitor this area and will take appropriate action in the future if necessary.

Effective Date

The Agencies received numerous comments with regard to the effective date of the regulation. Some commenters endorsed an earlier effective date, while others supported a more gradual phase-out of insurance for brokered deposits. Still others recommended immediate emphasis on existing supervisory remedies for troubled institutions in conjunction with continued study of the issue, including deferral to legislative initiatives. The Agencies also received a petition for revision of this rulemaking process and request for an extension of the comment period from an owner of a listing service; the Board and the FDIC are taking this opportunity to deny that petition and request because they believe it essential that the issue of brokered funds abuse be promptly addressed, particularly in view of the recent decontrol of interest rates. The Agencies believe that the public has had ample time, during the comment periods provided for in the Advance Notice and the Proposal, to express its views on the issues raised by deposit brokerage and the means of addressing those issues.

The effective date for the final rule, as stated in the proposal, is October 1, 1984. Thus, except for the situations noted below, any brokered deposits placed or renewed on or after October 1, 1984, will be subject to the new regulations on insurance coverage. All deposits with insured institutions prior to October 1, 1984, irrespective of whether they would qualify as brokered deposits under the final rule, will be insured until their maturity dates under the regulations predating the final rule. The purposes of the delayed effective date and continuation of insurance on accounts existing before that date are: (1) To fulfill depositors' expectations as to terms and conditions of existing deposits which, because of the term remaining, could not be withdrawn without imposition of a penalty for early withdrawal; (2) to allow institutions relying heavily on brokered deposits time to adjust their deposit structures; and (3) to provide for an orderly adjustment of funding techniques. Based on their examination of the problems facing institutions in adjusting to the effects of the rule, and their analysis of comments received, the Agencies have concluded that an effective date of October 1, 1984, provides enough time for institutions and the purchasers of brokered deposits to adjust their business practices.

Questions arose in the comments about the treatment to be afforded money market deposit accounts ("MMDAs") and other accounts without existing maturities placed before October 1, 1984. The issue was raised whether such accounts placed by or through a broker prior to the effective date of the final rule would be insured under the pre-existing regulations until the funds are withdrawn or whether the insurance coverage on those accounts would change as of the effective date of the rule. Upon consideration of the comments, the Agencies have decided that funds in such accounts placed by brokers with insured institutions before

October 1, 1984, will be insured under the insurance coverage rules predating the final rule until November 30, 1984. This treatment allows for a two-month period after the general effective date of the final rule in which holders of such accounts may adjust their deposit-placement practices. Deposits with no fixed Maturities placed by brokers on or after October 1, 1984, will be subject to the final rule and its general effective date of October 1, 1984.

Certificates of deposit held in trust for bondholders under "loans-to-lenders" or industrial development bond ("IDB") programs are covered by the final rule. These programs entail a transaction where the proceeds of an IDB issuance are placed with an insured institution, in exchange for a certificate of deposit, to fund a designated project. Because of the trust arrangement involved, under the Agencies' current insurance coverage rules each bondholder owns an insured interest in the deposit up to $100,000 and the deposit, therefore, may be fully insured by either the FDIC or the FSLIC. The final rule will limit the insurance coverage of such deposits to $100,000 inasmuch as it specifically defines a trustee in this type of transaction to be a "deposit broker." Thus, beginning October 1, 1984, IDB programs will no longer be buttressed by full deposit insurance. A question arises, however, about existing IDB programs in which the deposit in question has a term shorter than the period of the underlying loan, as opposed to the date of the maturity of the underlying bond. If such existing deposits are deemed to be placed or renewed after October 1, 1984, under the final rule, they will be subject to the new regulations and will therefore be ineligible for multiple insurance coverage. Such a result would trigger acceleration of the maturity dates of the underlying bonds, an event which could result in the bankruptcy of the project and severe liquidity problems for the involved depository institution. In order to avoid this undue hardship, and because of the mandatory nature of the rollover provisions in the bond indentures, the Agencies believe that the maturity dates of such deposits should be deemed to be those of the bonds they secure. Therefore, the final rule provides that deposits issued by an institution to a trustee who is a "deposit broker" with respect to such certificates under either § 330.0(b)(2) or § 561.2a(a)(2) shall not be deemed to be renewed, for purposes of the regulation, unless such renewal is discretionary. This exception will apply only to IDB transactions entered into prior to October 1, 1984.

As already noted, brokered deposits placed or renewed on or after October 1, 1984, will be subject to the restrictive insurance coverage provisions of the final rule. Upon considering the many comments on this issue and analyzing other available data, the Agencies believe it is necessary to safeguard against liquidity problems for insured institutions that have relied heavily in the recent past on brokered deposits as a source of funding. Thus, the final rule provides that brokered deposits held at insured institutions on the date the final rule is adopted by the Agencies may be renewed one or more times by the depositor within a period of two years after the effective date of the final rule (up to October 1, 1986) and continue to qualify for deposit insurance under the regulations predating the final rule until their first maturity after October 1, 1986. However, such deposits may not be renewed for a dollar amount greater than their original denomination, and must be held by the owners in their individual capacities. Deposits held prior to the date of adoption of the final rule (March 26, 1984) in custodial or trust capacities by or through deposit brokers may become eligible for this "rollover" exception only if, by June 30, 1984, the institution is provided with the names and ownership interests of the parties for whom such deposits are maintained. The resulting insurance coverage will then apply only to the owner so identified.

Final Regulatory Flexibility Analysis

Pursuant to section 3 of the Regulatory Flexibility Act, Pub. L. No. 96–354, 94 Stat. 1164 (Sept. 19, 1980), the FDIC and the Board are providing the following regulatory flexibility analysis:

1. *Reasons, objectives, and legal bases underlying the rules.* These elements have been incorporated elsewhere in the supplementary information regarding the rule.

2. *Small entities to which the rules apply.* The rules apply to insured institutions.

3. *Impact of the rules on small institutions.* As brokered deposits do not yet constitute a significant portion of total deposits of most insured institutions, the rules will not have a significant impact on a substantial number of small entities.

4. *Overlapping or conflicting federal rules.* There are no federal rules that duplicate, overlap, or conflict with this rule.

5. *Alternatives to the rules.* The rule limits federal deposit insurance on brokered deposits. Other alternatives considered, such as increased monitoring and approval mechanisms and blanket prohibitions on brokered deposits, would be more burdensome to the regulatees or would eliminate the benefits of a regulated activity, including availability of liquidity.

List of Subjects

12 CFR Part 330

Bank deposit insurance, Banks, Banking.

12 CFR Parts 561 and 564

Bank deposit insurance, Banks, Banking, Savings and loan associations.

Accordingly, the FDIC hereby amends Part 330 of Title 12 of the Code of Federal Regulations and the Board hereby amends Parts 561 and 564 of Title 12 of the Code of Federal Regulations as set forth below.

PART 330—CLARIFICATION AND DEFINITION OF DEPOSIT INSURANCE COVERAGE

1. The authority citation for Part 330 is as follows:

Authority: 12 U.S.C. 1813, 1817, 1819, 1821, 1822.

2. Section 330.0 is hereby revised as follows:

§ 330.0 Definitions.

(a) For the purpose of this Part 330, the term "insured bank" includes an insured branch of a foreign bank.

(b) Except as provided in paragraph (c) of this section, the term "deposit broker" includes: (1) Any person engaged in the business of placing funds, or facilitating the placement of funds, of third parties with insured banks or the business of placing funds with insured banks for the purpose of selling interests in those deposits to third parties; and (2) an agent or trustee who establishes a deposit account to facilitate a business arrangement with an insured bank to use the proceeds of the account to fund a prearranged loan.

(c) The term "deposit broker" shall not include the following: (1) An insured bank, with respect to funds placed with that bank; (2) an employee of an insured bank, with respect to funds placed with his or her employer/bank; (3) a trust department of an insured bank or of an institution insured by the Federal Savings and Loan Insurance Corporation, provided that the trust in question has not been established for the primary purpose of placing funds with insured depository institutions; (4) the trustee of a pension or other employee benefit plan, with respect to funds of the plan; (5) a person acting as a plan administrator or an investment

adviser in connection with a pension plan or other employee benefit plan provided that that person is performing managerial functions with respect to the plan; (6) the trustee of a testamentary account under section 330.3 of this Part; (7) the trustee of an irrevocable trust (other than one described in paragraph (b)(2) of this section), as long as the trust in question has not been established for the primary purpose of placing funds with insured depository institutions; (8) a trustee or custodian of a pension or profit-sharing plan qualified under section 401(d) of 408(a) of the Internal Revenue Code of 1954, as amended; (9) an agent or nominee whose primary purpose is not the placement of funds with depository institutions.

(d) The term "employee," for purposes of this section only, includes only an employee: (1) Who is employed exclusively by the insured bank for which he or she is soliciting deposits; (2) whose compensation is primarily in the form of a salary; (3) who does not share his or her compensation with a deposit broker; and (4) whose office space or place of business is used exclusively for the benefit of his or her insured bank/employer.

(e) For purposes of this section only, the term "business of placing funds or facilitating the placement of funds" shall not include deposit listing services where: (1) The person or entity listing the deposit is compensated only by means of a subscription fee which is not calculated on the basis of the number or dollar amount of deposits placed as the result of information provided by such service; (2) the service provided is limited to the gathering and transmission of information concerning the availability of deposits; and (3) any funds to be invested in deposit accounts are remitted directly by the depositor to the insured bank and not, directly or indirectly, through the person or entity providing the listing service.

3. Section 330.2 is hereby revised as follows:

§ 330.2 Individual accounts.

Funds owned by an individual (or by the community between husband and wife of which the individual is a member) and deposited into one or more deposit accounts in his or her own name shall be insured up to $100,000 in the aggregate.

4. Section 330.10 is hereby revised as follows:

§ 330.10 Trust accounts.

All trust interests for the same beneficiary deposited into deposit accounts established pursuant to valid trust agreements created by the same settlor (grantor) shall be added together and insured up to $100,000 in the aggregate, except time and savings deposits of the same beneficiary which qualify as pension or profit-sharing plans under section 401(d) or 408(a) of the Internal Revenue Code of 1954, as amended. The vested and ascertainable interest (excluding any remainder interest) of each beneficial owner in a time or savings deposit established under either of the above sections, shall be added together and insured to an additional $100,000 maximum for each beneficial owner, notwithstanding the insurance provided in this section to other types of deposit accounts. Except where the trustee is a deposit broker, the insurance of such trust interests shall be separate from that afforded deposit accounts of the trustee of such trust funds or the settlor or beneficiary of such trust arrangement.

5. Section 330.13 is hereby added as follows:

§ 330.13 Accounts held by or established through intermediaries.

(a) Except as provided in paragraph (b) of this section, funds owned by a principal and deposited into one or more deposit accounts in the name or names of agents or nominees shall be added to any individual accounts of the principal and insured up to $100,000 in the aggregate.

(b) Notwithstanding any other provision of this part, funds deposited into one or more deposit accounts by or through a deposit broker shall be added to any other deposits placed by or through that deposit broker and insured up to $100,000 in the aggregate. This subsection shall apply to all accounts opened, added to, or renewed on or after October 1, 1984, except that it shall not apply until:

(1) Either October 1, 1986, or the maturity date of the deposit account, whichever is later, with respect to renewals of all time deposits in existence on March 26, 1984, provided that: (i) Only the interests of persons in such accounts as of March 26, 1984, shall be recognized for purposes of insurance coverage; and (ii) the identities and interests of those beneficial owners are reflected on the books and records of the bank by June 30, 1984;

(2) November 30, 1984, with respect to deposit accounts which have no specified maturity date; and

(3) The maturity date of the corresponding loan with respect to renewals of deposits established before October 1, 1984, by a person who is a deposit broker under section 330.0(b)(2) of this part, only if renewals of such deposits are mandatory under the underlying account agreement.

(c) Funds held by a guardian, custodian or conservator for the benefit of a ward or for the benefit of a minor under a Uniform Gifts to Minors Act and deposited into one or more accounts in the name of the guardian, custodian or conservator shall be added to any individual accounts of the ward or minor and insured up to $100,00 in the aggregate.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 561—DEFINITIONS

1. The authority citation for Part 561 is as follows:

Authority: 12 U.S.C. 1724, 1725, 1726, 1728, 1730.

2. Add new § 561.2a, as follows:

§ 561.2a Definition of "deposit broker."

(a) Except as provided in paragraph (b) of this section, the term "deposit broker" includes: (1) Any person engaged in the business of placing funds, or facilitating the placement of funds, of third parties in accounts issued by an insured institution or the business of placing funds in accounts issued by insured institutions for the purpose of selling interests in such accounts to third parties; (2) an agent or trustee who establishes an account to facilitate a business arrangement with the institution to use the proceeds of the account to fund a prearranged loan.

(b) The term "deposit broker" does not include the following: (1) An insured institution, with respect to accounts issued by that institution; (2) an employee of an insured institution, with respect to accounts issued by his or her employer; and (3) a trust department of a bank, the accounts of which are insured by the Federal Deposit Insurance Corporation, or of an insured institution, provided that the trust in question has not been established for the primary purpose of placing funds in accounts issued by insured depository institutions; (4) the trustee of a pension or other employee benefit plan, with respect to funds of the plan; (5) a person acting as a plan administrator or an investment adviser in connection with a pension or other employee benefit plan, provided that that person is performing managerial functions with respect to the plan; (6) the trustee of a testamentary account; (7) the trustee of an irrevocable express trust (other than one described in paragraph (a)(2) of this section), provided that the trust in question has not been established and is not being used primarily for the purpose of placing

funds in accounts issued by insured institutions; (8) the trustee or custodian of a pension or profit-sharing plan which qualifies under sections 401(d) or 408(a) of the Internal Revenue Code of 1954 as amended; and (9) an agent or custodian, provided that the primary function of the relationship pursuant to which the funds are invested is not investment of funds in insured accounts.

(c) The term "employee," for purposes of this section only, includes only an employee: (1) Who is employed exclusively by the institution for which he or she is soliciting deposits; (2) whose compensation is primarily in the form of a salary; (3) who does not share his or her compensation with a deposit broker; and (4) whose office space or place of business is use exclusively for the benefit of his or her institution/employer.

(d) For purposes of this section, the term "business of placing funds or facilitating the placement of funds" does not include the provision of deposit-listing services where: (1) the person or entity providing the service is compensated only by means of a subscription fee which is not calculated on basis of the number or dollar amount of accounts placed as a result of information provided by such service; (2) the service provided is limited to the gathering and transmission of information concerning availability of accounts; and (3) any funds to be invested in accounts are transmitted directly to the insured institution by the depositor and not, directly or indirectly, through the person or entity providing the listing service.

PART 564—SETTLEMENT OF INSURANCE

3. The authority citation for Part 564 is as follows:

Authority: 12 U.S.C. 1724, 1725, 1728, 1728, 1730.

5. Revise § 564.3 as follows:

§ 564.3 Individual accounts.

Funds owned by an individual (or by the husband-wife community of which the individual is a member) and invested in one or more accounts in his or her own name shall be insured up to $100,000 in the aggregate.

6. Amend § 564.10 by adding a sentence at the end thereof, as follows:

§ 564.10 Trust accounts and IRA and Keogh accounts.

* * * Except where the trustee is a deposit broker, the insurance of such trust interests shall be separate from that afforded deposit accounts of the trustee of such trust funds or the settler or beneficiary of such trust arrangement.

7. Add § 564.12, as follows:

§ 564.12 Accounts held by or established through intermediaries.

(a) Except as provided in paragraph (b) of this section, funds owned by a principal and invested in one or more accounts in the names of agents or nominees shall be added to any individual accounts held directly by the principal, and insured up to $100,000 in the aggregate.

(b) Notwithstanding any other provision of this Part, funds invested in one or more accounts by or through a deposit broker shall be added to any other deposits placed by or through that deposit broker and insured up to $100,000 in the aggregate. This paragraph shall apply to all accounts opened, funds placed in existing accounts, and renewals of existing accounts, where such opening, placement, or renewal occurs on or after October 1, 1984, except that it shall not apply until:

(1) Either October 1, 1986, or the maturity date of the account, whichever is later, with respect to renewals of time deposits in existence on March 26, 1984, provided that: (i) Only interests of persons in such accounts as of March 26, 1984, will be recognized for purposes of insurance coverage, and (ii) the identities and interests of such beneficial owners are reflected on the records of the insured institution by June 30, 1984;

(2) November 30, 1984, with respect to accounts which have no specified maturity date; and

(3) The maturity date of the corresponding loan, with respect to renewals of accounts established prior to October 1, 1984, and held by a person who is, with respect to such accounts, a deposit broker under § 561.2a(a)(2), only if such renewal is mandatory under the terms of the account agreement or trust agreement governing the rights and obligations of the trustee or agent.

(c) A loan servicer who receives loan payments and places or maintains such payments in an insured institution prior to remittance to the lender or other parties entitled to the funds shall, for insurance-of-accounts purposes, be considered an agent of each borrower.

(d) Funds held by a guardian, custodian, or conservator for the benefit of a ward or a minor under a Uniform Gifts to Minors Act, and invested in one or more accounts in the name of the guardian, custodian, or conservator, shall be added to any individual accounts of the ward or minor and insured up to $100,000 in the aggregate.

By Order of the Board of Directors, March 26, 1984.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

By Order of the Board, March 26, 1984.

Federal Home Loan Bank Board.

J. J. Finn,

Secretary to the Board.

BILLING CODE 6714-01-M, 6720-01-M

FEDERAL HOME LOAN BANK BOARD

12 CFR Part 563

Brokered Deposits; Limitations Applicable to Institutions With Low Net Worth

Dated: March 26, 1984.

AGENCY: Federal Home Loan Bank Board.

ACTION: Interim final rule.

SUMMARY: The Federal Home Loan Bank Board ("Board"), as the operating head of the Federal Savings and Loan Insurance Corporation ("FSLIC" or "Corporation"), has adopted an interim final rule amending the regulations applicable to institutions the accounts of which are insured by the Corporation ("insured institutions"), by limiting to five percent the amount of deposits that certain insured institutions may acquire by or through a deposit broker. This rule will apply only to insured institutions whose net worth at the beginning of any quarter is less than three percent of their liabilities, without averaging or phase-in calculations. The amendment is intended to address the possibility that institutions with low net worth could have accumulated large amounts of insured deposits through brokers prior to the effective date of the final rule adopted today by the Board limiting insurance on such deposits. This regulation will expire on October 1, 1984.

DATES: Effective from March 26, 1984, through September 30, 1984.

FOR FURTHER INFORMATION CONTACT: Wendy B. Samuel, Attorney, (202) 377-6447, Federal Home Loan Bank Board, Office of General Counsel, 1700 G Street, N.W. Washington, D.C. 20552.

SUPPLEMENTARY INFORMATION: On November 1, 1983, the Board (together with the Federal Deposit Insurance Corporation) issued an Advance Notice of Proposed Rulemaking soliciting comments on the use of brokered deposits by insured institutions. 48 FR 50339. On January 23, 1984, the FDIC and

the Board issued a proposed rule which would limit the insurance on accounts placed by or through a broker to $100,000 per broker. *See* 49 FR 2787 (January 23, 1984). That regulation was adopted substantially as proposed, in final form, today, March 26, 1984, effective October 1, 1984.

Among the concerns raised by the Advance Notice, the proposed rule, and the comments received was the problem presented by troubled or weak institutions having unlimited access to brokered funds. Access to brokered deposits was seen as making it possible for institutions with little net-worth "cushion" to continue operating beyond the time at which natural market forces would otherwise have precipitated their failure. Brokered deposits also enable insured institutions to obtain deposits more rapidly than they may be able to find safe and sound investments to purchase with the funds thus obtained, and the Board's experience indicates that an institution with low net worth is particularly vulnerable to failure under such circumstances. Noting this possibility, a number of commenters suggested increased monitoring and supervision of brokered funds acquisition by institutions with low net worth. Commenters also suggested that a limit be placed on the amount of brokered funds a troubled or weak institution may acquire.

The Board is seriously concerned by a perceived trend toward rapid increases in the deposit base of troubled and potentially troubled institutions without a concomitant increase in their net worth. The level of brokered deposits in insured institutions has risen rapidly since the beginning of 1980. Of those institutions which obtained more than five percent of their deposits through brokers, 42 percent had regulatory net worth below three percent. In 1983, two-thirds of the insured institutions closed by the FSLIC had brokered deposits in excess of five percent of their total deposits. The Board is concerned about the adverse effect that the acquisition of substantial amounts of high-rate brokered deposits by institutions with a low net worth may have on such institutions and ultimately on the FSLIC.

While the Board believes that the final rule adopted today limiting insurance of brokered deposits will reduce the availability of such funds to weak or troubled institutions, it is also concerned that such institutions will seek to take in substantial amounts of insured brokered deposits prior to the effective date of that rule. The delayed effective date, while necessary to permit insured institutions to adjust to the final rule limiting deposit insurance for funds placed by or through brokers, may offer an incentive for weak or thinly-capitalized institutions to accept large amounts of brokered deposits without prudent reinvestment plans. While solvent, well-managed institutions should be able to absorb any losses associated with brokered-fund investments in the few months before the effective date, an institution with little net-worth cushion would substantially increase its chances of failure.

Consequently, the Board is adopting this interim final regulation to prohibit institutions with low net worth from having more than five percent of their deposits acquired by or through deposit brokers. "Deposit broker" is defined as in the final regulation limiting insurance coverage for deposits obtained by or through brokers. The definition includes any person or entity engaged in the business of placing or listing for placement deposits of an insured institution. It also includes agents or trustees who establish an account to facilitate a business arrangement with the institution to use the proceeds of the account to fund a prearranged loan. Excluded from the definition are: (1) An insured institution, with respect to accounts issued by that institution; (2) employees of the insured institution, with respect to accounts issued by their employer; (3) trust departments of insured institutions; (4) trustees of pension and other employee-benefit funds investing such funds; (5) investment advisers of pension funds; (6) trustees of testamentary trusts; (7) trustees of irrevocable express trusts, to the extent that the beneficiaries of such trusts have not, directly or indirectly, contributed to the corpus of the trust; (8) trustees or custodians of IRA and Keogh deposits; and (9) agents or custodians, provided that the primary function of the relationship pursuant to which the funds are invested is not investment in insured account funds.

This interim final regulation will apply to institutions that have net worth of less than three percent of liabilities. Liabilities are computed in the same manner as in the minimum net-worth requirement of 12 CFR 563.13(b)(2), with two exceptions. First, the calculation of net worth does not permit the averaging of liabilities over a five-year period. The Board believes that five-year averaging permits rapidly expanding institutions to understate their true net-worth requirements. Second, net worth will not be calculated by use of the twenty-year "phase-in" method. That method permits institutions that have not reached the twentieth anniversary of account insurance to "phase in" their net-worth requirement by multiplying three percent of liabilities by a fraction of which the numerator is the number of consecutive years of insurance and the denominator is twenty. Use of the twenty-year phase-in would permit institutions with net worth as low as 0.15 percent of liabilities to avoid limitation of their use of brokered deposits. By excluding the use of the twenty-year phase-in calculation, the rule will permit the Board to limit the use of brokered funds by many potentially troubled and very thinly-capitalized institutions. *De novo* institutions subject to the requirements of 12 CFR 563.13(b)(2)(iii) will be subject to this regulation if their net worth is less than the percentage of liabilities required by that provision.

Rather than absolutely prohibiting the use of brokered deposits by these institutions, the rule allows funds to be obtained by or through deposit brokers in amounts up to five percent of deposits, determined quarterly. The Board believes that this provision will preserve the ability of institutions with low net worth to raise deposits through brokers without significantly increasing their chance of failure.

Pursuant to the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), the Board hereby certifies that the interim final rule would not have a significant economic impact on a substantial number of small entities. The reason for this certification is that only a few institutions would have both net worth below the proposed requirement and brokered deposits in excess of five percent of deposits. Therefore, an initial regulatory flexibility analysis is not required, 5 U.S.C. 605(b).

The Board finds that observance of the public notice and comment period set forth at 5 U.S.C. 552(b) and 12 CFR 508.11, and the delay of the effective date set forth at 5 U.S.C. 552(d) and 12 CFR 508.14, would be impracticable and contrary to the public interest for the reasons described above.

List of Subjects in 12 CFR Part 563

Savings and loan associations.

Accordingly, the Federal Home Loan Bank Board hereby amends Part 563, Subchapter D, Chapter V, of Title 12 of the Code of Federal Regulations, as set forth below.

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 563—OPERATIONS

Add a new § 563.4 as follows:

§ 563.4 Brokered deposits.

(a) For purposes of this section, the term "net-worth requirement" means: (1) An amount at least equal to three percent of all liabilities (i.e., total assets, net of the following: loans in process, specific reserves, and deferred credits other than deferred taxes; minus net worth as defined by § 561.13 of this Subchapter); or (2) for institutions subjects to the requirements of § 563.13(b)(2)(iii) of this Part, the applicable percentage of such liabilities required by § 563.13(b)(2)(iii).

(b) Any insured institution which, at the beginning of any calendar quarter, does not meet its net-worth requirement shall not, during that quarter, accept deposits obtained by or through a deposit broker, as defined in § 561.2a of this Subchapter, in excess of five percent of its total deposits.

(c) This section expires October 1, 1984.

(12 U.S.C. 1724, 1725, 1728, 1728)

By the Federal Home Loan Bank Board.

J. J. Finn,

Secretary.

BILLING CODE 6720-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 83-NM-88-AD; Amdt. 39-4837]

Airworthiness Directives; British Aerospace Viscount Models 700 and 800 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) which increases the scope of an inspection of the nosewheel assembly on British Aerospace, Aircraft Group, Viscount Model 700 and 800 series airplanes. In addition, a modification on the nosewheel steering lock detent cable assemblies is required on all Model 700 series airplanes. The inspections and modifications are necessary to prevent possible collapse of the nose landing gear. This action will supersede an existing AD applicable to the same components.

EFFECTIVE DATE: May 6, 1984.

ADDRESSES: The applicable service information may be obtained from British Aerospace, Inc., Box 17414, Dulles International Airport, Washington, D.C. 20041, or may also be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. James Leeder, Foreign Aircraft Certification Branch, ANM-150S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 446-2826. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98165.

SUPPLEMENTARY INFORMATION: The United Kingdom Civil Aviation Authority (CAA) has classified British Aerospace Preliminary Technical Leaflets (PTL) No. 262, Issue 4, for all Model 700 series airplanes and PTL No. 125, Issue 4, for all Model 800 series airplanes as mandatory. Compliance with Issue 3 of these PTL's is required by AD 70-16-06.

A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthinesss directive requiring inspections, repairs, and modifications, as necessary, of the nose wheel landing gear was published in the **Federal Register** on December 27, 1983 (48 FR 56959). The comment period closed February 13, 1984, and interested parties have been afforded an opportunity to participate in the making of this amendment. No comments were received.

It is estimated that the cost impact to the U.S. operators will be less than $745 per airplane, or less than $25,330 for the entire fleet, which includes repetitive inspections for the next 10 years. For these reasons, this rule is not considered to be a major rule under the criteria of Executive Order 12291. Few, if any, small entities within the meaning of the Regulatory Flexibility Act will be affected.

Therefore the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

British Aerospace, Aircraft Group: Applies to all Viscount Model 700 series and 800 series airplanes certificated in all categories. Compliance required as indicated. To prevent collapse of the nose landing gear, accomplish the following:

1. Within the next six months time in service after the effective date of this AD, unless previously accomplished within the last six months, and thereafter at intervals not to exceed six months, inspect and repair, as necessary, the nose landing gear in accordance with the Paragraph 2, Accomplishment Instructions, of British Aerospace Preliminary Technical Leaflet No. 125, Issue 4, for all Model 800 series airplanes. Paragraphs 2.5 and 2.5.1 must be accomplished at the first inspection and thereafter at intervals not to exceed one year.

2. Within the next six months time in service after the effective date of this AD, unless previously accomplished within the last six months, and thereafter at intervals not to exceed six months, inspect and repair, as necessary, the nose landing gear in accordance with the Accomplishment Instructions of paragraphs 2.1 through 2.4, and 2.7 of the British Aerospace Preliminary Technical Leaflet No. 262, Issue 4, for all Model 700 series airplanes; and during the first inspection only, accomplish paragraph 2.6 and BA Modification D.3284, if applicable. Paragraph 2.5 must be accomplished at the first inspection and thereafter at intervals not to exceed one year.

3. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

4. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

This supersedes Amendment 39-1058 (35 FR 12325), AD 70-16-06.

This amendment becomes effective May 6, 1984.

(Secs. 313(a), 314(a), 601 through 610, and 1102 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 through 1430, and 1502); 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities because few, if any, Model Viscount 700 and 800 series airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket. A copy of it may be obtained by contacting the person identified under the caption "**FOR FURTHER INFORMATION CONTACT.**"

Issued in Seattle, Washington, on March 22, 1984.

Charles R. Foster,

Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 83-NM-102-AD; Amdt. 39-4838]

Airworthiness Directives; McDonnell Douglas Model DC-9-10 and -30 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) which requires eddy current inspection, and repair, if necessary, of the non-ventral aft pressure bulkhead on certain McDonnell Douglas Model DC-9 airplanes. There have been reports of cracks in the webs. This action is necessary to detect fatigue cracks which could lead to possible structural failure of the non-ventral aft pressure bulkhead and loss of cabin pressurization.

DATES: Effective May 6, 1984. Compliance schedule as prescribed in the body of the AD, unless already accomplished.

ADDRESSES: The applicable service information may be obtained from: McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1-750 (54-60). This information also may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington or at 4344 Donald Douglas Drive, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Michael N. Asahara, Sr., Aerospace Engineer, Airframe Branch, ANM-122L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California 90808, telephone (213) 548-2824.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include a new airworthiness directive (AD) to require eddy current inspection for fatigue cracks and repair, if necessary, of the non-ventral aft pressure bulkhead on certain McDonnell Douglas Model DC-9 airplanes was published as a Notice of Proposed Rulemaking (NPRM) in the **Federal Register** November 25, 1983 (48 FR 53128). The comment period for the proposal closed on January 11, 1984.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to all comments received. Six comments were received. One commenter objected to the intent of this proposed rule and questioned the validity of imposing AD action against the modified bulkhead structures after the accomplishment of preventive modification per McDonnell Douglas DC-9 Service Bulletin 53-174. This commenter considered the repetitive inspection an appropriate item for inclusion in the Supplemental Inspection Document (SID). In view of the demonstrated safety problem, and the fact that the SID program has not been mandated for the DC-9, the FAA considers inclusion of the repetitive inspections for all airplanes necessary.

One commenter felt that the compliance time for the final rule should be extended to 6,000 landings as recommended by McDonnell Douglas DC-9 Service Bulletin 53-174, instead of 4,500 landings as proposed in the NPRM. The FAA considers that the 4,500 landing requirement is appropriate based upon the anticipated effective date of this rule.

Several editorial comments have been suggested to rewrite and/or rephrase portions of the accomplishment instructions of the proposed rule. The comments do not significantly affect the intent of the proposed rule. Therefore, the FAA concurs and the suggested changes have been incorporated in this AD as appropriate.

Two commenters agreed with the intent of the AD as proposed, and one commenter disagreed with the number of U.S. registered airplanes that were affected. The FAA concurs and this AD has been changed to specify the correct number of affected airplanes.

The estimated costs associated with the proposed AD are as follows: 156 U.S. registered airplanes are affected which will require approximately 386 manhours per airplane to accomplish the required repair/rework, and 356 manhours per airplane to accomplish the required repetitive inspections. Average labor charge is $35 per hour and replacement parts can be obtained at an estimated cost of $800 per unit assembly. Based on these figures, the inspection cost would be $1,943,760, and repair cost is $2,232,360. Therefore, the total expected economic impact is estimated to be $4,176,120. Few, if any, small entities within the meaning of the Regulatory Flexibility Act will be affected.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the proposed rule, with the changes previously noted.

Aviation safety, Aircraft.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

McDonnell Douglas: Applies to certain McDonnell Douglas Model DC-9-10 and -30 series airplanes, certificated in all categories, which correspond to the factory serial numbers listed in McDonnell Douglas DC-9 Service Bulletin No. 53-174, dated August 4, 1983 (hereinafter referred to as S/B 53-174), or later revisions approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region. Compliance required as indicated in the body of this AD, unless previously accomplished.

To detect fatigue cracks in the non-ventral aft pressure bulkhead and repair, if necessary, accomplish the following:

A. Prior to the accumulation of 50,000 landings, or within the next 4,500 landings after the effective date of this AD, whichever occurs later, perform initial eddy current inspection of the pressure bulkhead webs as shown on McDonnell Douglas Service Sketch 3483 of S/B 53-174, or later revisions approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

B. If no cracks are found in aircraft Group I, as referenced in S/B 53-174, perform repetitive eddy current inspections at intervals not to exceed 14,000 landings until a preventive modification has been accomplished in accordance with the Accomplishment Instructions in S/B 53-174, or later revisions approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region. After the accumulation of an additional 30,000 landings from the date of the crack preventive modification installation, reinstate eddy current inspections at intervals not to exceed 17,500 landings.

C. For aircraft Groups II and III, as referenced in S/B 53-174: If no cracks are found, perform repetitive eddy current inspections at intervals not to exceed 17,500 landings until a crack preventive modification has been accomplished in accordance with the Accomplishment Instructions in S/B 53-174, or later revisions approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region. After the accumulation of an additional 30,000 landings from the date of

the crack preventive modification installation, reinstate the eddy current inspection at intervals not to exceed 17,500 landings.

D. For all aircraft Groups (i.e. I, II, and III, as referenced in S/B 53–174): If cracks are found, repair cracked area per the crack preventive modification in accordance with the Accomplishment Instructions in S/B 53–174, and, after the accumulation of an additional 30,000 landings from the date of repair, reinstate the repetitive eddy current inspection at intervals not to exceed 17,500 landings.

E. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

F. Upon request of operator, an FAA Maintenance Inspector, subject to prior approval of the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region, may adjust the initial repetitive inspection intervals specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for that operator.

G. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplanes unpressurized to a base in order to comply with the requirements of this AD.

H. For the purposes of complying with this AD, Subject to acceptance by the assigned FAA Maintenance Inspector, the number of landings may be determined by dividing each airplane's hours time in service by the operator's fleet average time from takeoff to landing for the DC–9 airplane.

All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director, Publications and Training, C1–750 (54–60). These documents also may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington or the Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California.

This Amendment becomes effective May 6, 1984.

(Sec. 313(a), 314(a), 601 through 610, and 1102 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 through 1430 and 1502); 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities because few, if any, Model DC–9 airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has been placed in the docket. A copy of it may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in Seattle, Washington, on March 22, 1984.

Charles R. Foster,

Director, Northwest Mountain Region.

14 CFR Part 39

[Docket No. 83–CE–42–AD; Amdt. 39–4615]

Pilatus Britten-Norman Ltd. BN–2, BN–2A and BN–2B; Islander Series and BN–2A MK. III Trislander Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction of final rule.

SUMMARY: This action corrects Airworthiness Directive (AD) 83–07–12, Amendment 39–4615 (48 FR 14353, 14354), applicable to Pilatus Britten-Norman Ltd. BN–2, BN–2A, BN–2B Islander Series and BN–2A MK. III Trislander Series airplanes. This correction is necessary because the applicability statement inadvertently included the BN–2T series airplanes.

EFFECTIVE DATE: April 9, 1984.

FOR FURTHER INFORMATION CONTACT: Mr. A. Astorga, Aircraft Certification Staff, AEU–100, Europe, Africa and Middle East Office, FAA, c/o American Embassy, 1000 Brussels, Belgium; telephone 513.38.30; or Mr. Larry Werth, FAA, ACE–109, 601 East 12th Street, Kansas City, Missouri 64106; telephone (816) 374–6932.

SUPPLEMENTARY INFORMATION: Subsequent to the issuance of AD 83–07–12, Amendment 39–4615 (48 FR 14353, 14354), applicable to Pilatus Britten-Norman Ltd. BN–2, BN–2A, BN–2B Islander Series and BN–2A MK. III Trislander Series airplanes equipped with wing tip tanks, the FAA found that the applicability statement should not have included the BN–2T series airplanes. The Pilatus Britten-Norman Ltd modification (NB/M/364), equipping the BN–2 series airplanes with wing tip fuel tanks, is not authorized for the BN–2T series airplanes. Therefore, action is taken herein to make this correction. Since this action is both clarifying and relieving in nature, notice and public procedure hereon are not considered necessary.

BILLING CODE 4910–13–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21CFR Part 173

[Docket No. 81F–0197]

Secondary Direct Food Additives Permitted in Food for Human Consumption; Dimethylamine-Epichlorohydrin Copolymer

AGENCY: Food and Drug Administration.

ACTION: Final rule; clarification.

SUMMARY: The Food and Drug Administration (FDA) is publishing additional information on a final rule published in the **Federal Register** of August 19, 1983 (48 FR 37614), that amended the food additive regulations to provide for the use of dimethylamine-epichlorohydrin copolymer for use as a flocculant and/or decolorizer in the clarification of refinery sugar liquors and juices. The agency is providing an additional 30-day period for submitting objections or additional information in support of objections already filed in response to this regulation.

DATE: Objections or additional information in support of previously filed objections by May 2, 1984.

ADDRESS: Written objections or additional information in support of previously filed objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Andrew D. Laumbach, Center for Food Safety and Applied Nutrition (formerly Bureau of Foods) (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: FDA published a final rule in the **Federal Register** of August 19, 1983 (48 FR 37614) that amended the food additive regulations (21 CFR 173.60) to provide for the safe use of dimethylamine-epichlorohydrin copolymer for use as a flocculant and/or decolorizer in clarifying refinery-sugar liquors and juices. That action responded to a petition (FAP OA3500) filed by American Cyanamid Co., Wayne, NJ 07470.

The preamble to the regulation explained that the agency had evaluated data in the petition and had concluded that the proposed use of the substance was safe, and that the food additive regulations should be amended as requested in the petition. The document did not discuss the specific nature of the data evaluated.

Subsequently, the Natural Resources Defense Council, Inc., 122 East 42d St., New York, NY 10168; and Public Citizen's Health Research Group, 2000 P St. NW., Washington, DC 20036, filed objections to the regulation. The objections argued that the agency did not provide adequate information about the additive and the basis for FDA's decision to approve it.

The objections stressed that the preamble to the **Federal Register** document did not disclose that the agency's action involved consideration of whether the Delaney anticancer clause might apply to the additive. According to the objections, omission of such an explanation foreclosed interested persons from effectively commenting on or objecting to the regulation. The objections requested that FDA publish a supplemental **Federal Register** notice discussing the factual and legal bases for the decision. The objections also argued that the final regulation is illegal because it relies on the constituents theory, which the objections characterize as contrary to the Delaney anticancer clause. Finally, the objections requested an immediate stay of the regulation and an additional opportunity for objection, and they reserved the right to request a hearing at a later stage in the process.

This clarification of the final rule responds to the request for supplemental information about the reasons for FDA's decision and provides an additional 30 days for the submission of objections or additional information in support of objections that have already been filed. FDA will act on the remaining issues raised by the objections and requests for a hearing after it has evaluated any further objections or other information filed in response to this document. The agency is not staying the regulation because FDA believes that the additive is safe, and that a stay would not serve the public interest.

In evaluating American Cyanamid's petition, FDA considered data bearing on the possible presence in food of tiny amounts of a carcinogenic chemical that might be present as a constituent in the finished additive. After evaluating all the available data, FDA concludes that there is no reason to expect that even trivial amounts of epichlorohydrin (the carcinogenic chemical) will be added to food. Any attempt to quantitate risk would, therefore, be meaningless, because it would be based on an assumption that FDA believes to be unsupported by fact.

Nevertheless, the agency has done an informal risk estimate to assure itself of the safety of the use of this additive. The agency has estimated that a consumer could ingest 4.5 micrograms per day of dimethylamine-epichlorohydrin copolymer if all sugar consumed were prepared with this additive. Under the specifications established by the agency, the additive may contain no more than 10 parts per million epichlorohydrin (although, in fact, epichlorohydrin has never been found in the additive). If the additive did contain 10 parts per million epichlorohydrin, and if epichlorohydrin remained in the sugar at the same level at which it was added as part of the additive, the epichlorohydrin would present a lifetime risk of cancer of no more than 2 in 1 trillion. The agency concludes that a finding of such a low risk, even using speculative, worst case assumptions, establishes that there is effectively no risk of cancer from the use of dimethylamine-epichlorohydrin copolymer.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition, the administrative record, and all documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h)(2), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection. Among the documents that the agency has relied upon are the following:

1. FAP OA3500, submission of January 31, 1980, Parts II and III.1.

2. Memorandum: Food Additive and Animal Drug Chemistry Evaluation Branch to Petitions Control Branch; March 7, 1980; FAP OA3500, submission of January 31, 1980.

3. FAP OA3500, submission of May 7, 1981.

4. Memorandum: Food Additive and Animal Drug Chemistry Evaluation Branch to Petitions Control Branch; June 2, 1981; FAP OA3500, submission of May 7, 1981.

5. Memorandum: Food Additives Evaluation Branch to Petitions Control Branch; November 10, 1982; Risk assessment for epichlorohydrin found as a constituent in dimethylamine-epichloro-hydrin copolymer.

6. Memorandum to the file: from W. Gary Flamm and Taylor M. Quinn; August 19, 1983; FAP OA3500.

List of Subjects in 21 CFR Part 173

Food additives, Food processing aids.

For convenience, FDA is republishing in its entirety the final regulation that appeared in the **Federal Register** of August 19, 1983. This clarification of the final rule does not amend the regulation in any way. This clarification of the final rule is issued under the Federal Food, Drug, and Cosmetic Act.

(Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348))

PART 173—SECONDARY DIRECT FOOD ADDITIVES PERMITTED IN FOOD FOR HUMAN CONSUMPTION

§ 173.60 Dimethylamine-epichlorohydrin copolymer.

Dimethylamine-epichlorohydrin copolymer (CAS Reg. No. 25988–97–0) may be safely used in food in accordance with the following prescribed conditions:

(a) The food additive is produced by copolymerization of dimethylamine and epichlorohydrin in which not more than 5 mole-percent of dimethylamine may be replaced by an equimolar amount of ethylenediamine, and in which the mole ratio of total amine to epichlorohydrin is approximately 1:1.

(b) The additive meets the following specifications:

(1) The nitrogen content of the copolymer is 9.4 to 10.8 weight percent on a dry basis.

(2) A 50-percent-by-weight aqueous solution of the copolymer has a minimum viscosity of 175 centipoises at 25° C as determined by LVT-series Brookfield viscometer using a No. 2 spindle at 60 RPM (or by another equivalent method).

(3) The additive contains not more than 1,000 parts per million of 1,3-dichloro-2-propanol and not more than 10 parts per million epichlorohydrin. The epichlorohydrin and 1,3-dichloro-2-propanol content is determined by an analytical method entitled "The Determination of Epichlorohydrin and 1,3-Dichloro-2-Propanol in Dimethylamine-Epichlorohydrin Copolymer," which is incorporated by reference. Copies are available from the Division of Food and Color Additives, Bureau of Foods (HFF–330), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, or available for inspection at the Office of the Federal Register, 1100, L St. NW., Washington, DC 20408.

(4) Heavy metals (as Pb), 2 parts per million maximum.

(5) Arsenic (as As), 2 parts per million maximum.

(c) The food additive is used as a decolorizing agent and/or flocculant in the clarification of refinery sugar liquors and juices. It is added only at the defecation/clarification stage of sugar liquor refining at a concentration not to exceed 150 parts per million of copolymer by weight of sugar solids.

(d) To assure safe use of the additive, the label and labeling of the additive shall bear, in addition to other information required by the act, adequate directions to assure use in compliance with paragraph (c) of this section.

Any person who will be adversely affected by the foregoing regulation may at any time on or before May 2, 1984 submit to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto or submit additional information in support of previously filed objections and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identtfied with the docket number found in brackets in the heading of this regulation. Received objections may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 23, 1984.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

21 CFR Parts 175 and 178

[Docket No. 82F–0055]

Indirect Food Additives: Adhesive Coatings and Components; Adjuvants, Production Aids, and Sanitizers

AGENCY: Food and Drug Administration.

ACTION: Final rule; clarification.

SUMMARY: The Food and Drug Administration (FDA) is publishing additional information on a final rule published in the **Federal Register** of August 19, 1983 (48 FR 37615), that amended the food additive regulations to provide for the use of 2,2'-oxamidobis[ethyl 3-(3,5-di-*tert*-butyl-4-hydroxyphenyl)propionate] as an antioxidant and/or stabilizer in polystyrene, rubber-modified polystyrene, and olefin polymers and as a component in adhesive formulations. The agency is providing an additional 30-day period for submitting objections or additional information in support of objections previously filed in response to the August 19, 1983 regulation.

DATE: Objections or additional information in support of previously filed objections by May 2, 1984.

ADDRESS: Written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Thomas C. Brown, Center for Food Safety and Applied Nutrition (formerly Bureau of Foods) (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In a final rule published in the **Federal Register** of August 19, 1983 (48 FR 37615), FDA provided for the use of 2,2'-oxamidobis[ethyl 3-(3,5-di-*tert*-butyl-4-hydroxyphenyl)propionate] as an antioxidant and/or stabilizer in polystyrene, rubber-modified polystyrene, and olefin polymers and as a component in adhesive formulations (21 CFR 175.105(c)(5) and 178.2010(b)). That action responded to a petition (FAP 2B3592) filed by Uniroyal Chemical, Naugatuck, CT 06770.

The August 19, 1983 final rule explained that FDA believed that one of the materials used in manufacturing the additive was a carcinogenic compound but did not identify the substance because FDA had concluded that its identity was a trade secret. The final rule did discuss the rationale for regulating the additive and described the results of the agency's assessment of the risk from the constituent. Subsequently, The Natural Resources Defense Council, Inc., 122 East 42d St., New York, NY 10168; and Public Citizen's Health Research Group, 2000 P St. NW., Washington, DC 20036, filed objections to the regulation. The objections requested that the agency publish a supplemental **Federal Register** notice disclosing the constituent's chemical identity and discussing all other relevant health and safety issues. The objections also argued that the final regulation is illegal because it relied on the constituents theory, which the objections characterized as contrary to the Delaney clause. Finally, the objections requested an immediate stay of the regulation and an additional opportunity for objection and reserved the right to request a hearing at a later stage in the process.

Following FDA's receipt of the objections, Uniroyal informed FDA that it would waive trade secret status for the constituent at issue here. FDA is reissuing the final rule to provide the identity of the carcinogenic constituent and to respond to the request for a discussion of the health and safety issues involved. The agency is also providing an additional 30 days for the submission of objections or additional information in support of objections already filed to the final rule. FDA will act on the remaining issues raised by the objections and requests for a hearing after it has evaluated any further objections filed in response to this document. The agency is not staying the final rule because it believes that the additive is safe, and that a stay would not serve the public interest.

Although the food additive has not itself been found to induce cancer, it may contain trace amounts of dibutyltin diacetate, a carcinogenic compound, which is used in the manufacture of the additive. Residual amounts of reactants and manufacturing aids are commonly found as contaminants in all chemical products, even in highly purified reagent grade chemicals, including many food additives.

Under section 409(c)(3)(A) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 348(c)(3)(A)), the so-called "general safety clause" of the statute, a food additive cannot be approved for a particular use unless the data presented to FDA establish that the food additive is safe for that use. The concept of safety embodied in this requirement was explained in the legislative history of the Food Additives Amendment of 1958. "Safety requires proof of a reasonable certainty that no harm will result from the proposed use of an additive. It does not—and cannot—require proof beyond any possible doubt that no harm will result under any conceivable circumstances." H.R. Rep. No. 2284, 85th Cong., 2d Sess. 1 (1958). This definition of safety has been incorporated into FDA's food additive regulations (21 CFR 170.3(i)). The Delaney anticancer clause of the Food Additives Amendment of 1958 (section 409(c)(3)(A) of the act (21 U.S.C. 348(c)(3)(A))) provides further that no food additive can be deemed to be safe if it is found to induce cancer when ingested by man or animal.

In the past, FDA has often refused to list a use of a food additive that contained or was suspected of containing minor amounts of a carcinogenic chemical, even if the additive as a whole had not been shown to cause cancer. The agency now believes, however, that developments in scientific technology and experience with risk assessment procedures make it possible for FDA to establish the safety of additives that contain a carcinogenic chemical but that have not themselves been shown to cause cancer.

In the preamble to the final rule permanently listing D&C Green No. 6, published in the **Federal Register** of April 2, 1982 (47 FR 14138), FDA explained the basis for approving the use of a color additive that had not been shown to cause cancer, even though that color additive contains a carcinogenic constituent.

Since that decision, FDA has approved the use of three such color additives, D&C Green No. 5 (47 FR 24278; June 4, 1982) and D&C Red No. 6 and D&C Red No. 7 (47 FR 57681; December 28, 1982), on the same basis. FDA fully explained the scientific, legal, and policy underpinnings for those decisions in the advance notice of proposed rulemaking on a policy for regulating carcinogenic chemicals in food and color additives, which was published in the **Federal Register** of April 2, 1982 (47 FR 14464). In brief, the agency believes that the Delaney anticancer clause is not triggered unless the food additive as a whole is found to cause cancer. An additive that has not been shown to cause cancer but that contains a carcinogenic constituent may properly be evaluated under the general safety clause of the statute, using risk assessment procedures to determine whether there is a reasonable certainty that no harm will result from the proposed use of the additive.

The agency's position is supported ty *Scott* v. *FDA*, —— F.2d —— (Nos. 82–3544/3759) (6th Cir. February 23, 1984). That case involved a challenge to FDA's decision to approve the use of D&C Green No. 5, which, as explained above, contains a carcinogenic chemical but has not itself been shown to cause cancer. Relying heavily on the reasoning in the agency's decision to list this color additive, the United States Court of Appeals for the Sixth Circuit rejected the challenge to FDA's action and affirmed the listing regulation.

Because 2,2'-oxamidobis[ethyl 3-(3,5-di-*tert*-butyl-4-hydroxyphenyl) propionate] has not been shown to cause cancer, the anticancer clause does not apply to it. FDA has evaluated the safety of this additive under the general safety clause, using risk assessment procedures to estimate the upper bound limit of risk presented by the carcinogenic chemical that may be present as an impurity in the additive, and has concluded that the additive is safe under the proposed conditions of use.

The risk assessment procedures used are similar to the methods used to examine the risk associated with the presence of minor carcinogenic impurities in D&C Green No. 6 (47 FR 14138; April 2, 1982), D&C Green No. 5 (47 FR 24278; June 4, 1982), and D&C Red No. 6 and D&C Red No. 7 (47 FR 57681; December 28, 1982). This risk evaluation of a carcinogenic constituent consists of two parts: (1) Assessment of the probable exposure to the constituent from the proposed use of the additive, and (2) extrapolation of the risk observed in the animal bioassays to the conditions of probable exposure to humans.

FDA estimated the potential exposure to dibutyltin diacetate from extraction studies, taking into account what fraction of the daily diet might be packaged in materials containing 2,2'-oxamidobis[ethyl 3-(3,5-di-*tert*-butyl-4-hydroxyphenyl)propionate]. FDA used data from the National Cancer Institute (NCI) carcinogenicity bioassays in which dibutyltin diacetate was administered in the diet of rats and mice to estimate the upper level of human risk from exposure to dibutyltin diacetate stemming from the proposed use of 2,2'-oxamidobis[ethyl 3-(3,5-di-*tert*-butyl-4-hydroxyphenyl)propionate]. The results of the NCI bioassay on dibutyltin diacetate indicated compound-related increases in the incidence of hepatocellular adenomas in male and female mice. (The rat study was negative.) These particular lesions, while not frank malignancies, are considered by the agency to be precursors to carcinomas and, therefore, indicative of the carcinogenicity of dibutyltin diacetate.

The agency used a quantitative risk assessment procedure (linear proportional model) to extrapolate from the dose used in the animal experiment to the very low doses encountered under the proposed conditions of use. This procedure is not likely to underestimate the actual risk from very low doses and may, in fact, exaggerate it because the extrapolation models used are designed to estimate the maximum risk consistent with the data. FDA estimates that the upper limit individual lifetime risk from potential exposure to dibutyltin diacetate at the level considered to be a conservative estimated daily intake is 7×10^{-8} or less than 1 in 10 million. Because of numerous conservatisms in the exposure estimate, lifetime-averaged individual exposure to dibutyltin diaceatte is expected to be substantially less than the estimated daily intake, and therefore the calculated upper bound risk would be less. Thus, the agency concludes that there is a reasonable certainty of no harm from the exposure to dibutyltin diacetate that results from the use of 2,2'-oxamidobis[ethyl 3-(3,5-di-*tert*-butyl-4-hydroxphenyl)propionate].

The agency has calculated an estimated daily intake of 2,2'-oxamidobis[ethyl 3-(3,5-di-*tert*-butyl-4-hydroxphenyl)propionate] based on considerations such as migration of the additive under maximum intended use conditions into food stimulants and estimates of the probable fraction of the daily diet that packaging containing the additive may contact. The estimated daily intake for 2,2'-oxamidobis[ethyl 3-(3,5-di-*tert*-butyl-4-hydroxphenyl)propionate] under the intended use conditions is 0.6 milligram per day (mg/day) for a 60-kilogram (kg) person (0.2 part per million (ppm) in the daily diet).

The petitioner (Uniroyal Chemical Co., Naugatuck, CT 06770) has submitted the results of several studies to demonstrate that there is a reasonable certainty of no harm from the intended use of 2,2'-oxamidobis[ethyl 3-(3,5-di-*tert*-butyl-4-hydroxyphenyl)-propionate].

These studies include an acute oral toxicity study in rats, a range-finding study (14-day maximum tolerated dose feeding study in dogs), an Ames-type mutagenicity test, and 90-day (subchronic) feeding studies in rats and dogs. The subchronic rat study included an in utero phase. The acute oral toxicity in rats is greater than 10 grams per kilogram body weight. No adverse effects were observed in the range-finding study at feeding levels of 15 percent or less. The mutagenicity test was negative. No tissue abnormalities or other compound-related adverse effects were observed in either the dog or rat subchronic feeding studies over the range of doses tested.

For the level of dietary exposure (0.2 ppm) estimated for 2,2'-oxamidobis[ethyl 3-(3,5-di-*tert*-butyl-4-hydroxyphenyl)propionate], the agency ordinarily requires, at a minimum, a subchronic toxicology study in a rodent with in utero exposure and a subchronic toxicology study in a nonrodent (Refs. 1 and 2). The toxicology studies submitted by the petitioner, therefore, satisfy the agency toxicology testing requirements for this indirect food additive. The data from the submitted toxicology studies indicate no need for additional toxicology studies. In particular, the toxicology information gives no reason to suspect 2,2'-oxamidobis[ethyl 3-(3,5,-di-*tert*-butyl-4-hydroxyphenyl)propionate] to be a carcinogen.

The level at which exposure to a food additive can be considered safe is called the acceptable daily intake. The acceptable daily intake is determined by first establishing a highest no-adverse-effect level for each of the required subchronic animal feeding studies, by applying a safety factor of 1000 to each of these no-adverse-effect levels, and by selecting the study that leads to the lower level. In both subchronic studies, the highest no-adverse-effect level was the highest level at which the additive was fed: 500 milligram per kilogram per day (mg/kg/day) for dogs and 2000 mg/kg/day for rats. A safety factor of 1000 is applied to these studies yielding 0.5 mg/kg/day for dogs and 2 mg/kg/day for rats. The study yielding the lower level is the dog study. Therefore, the agency has established the acceptable daily intake for humans as 0.5 mg/kg/day or 30 mg/day for a 60 kg person. This acceptable daily intake is 50 times greater than estimated daily intake of 2,2'-oxamidobis[ethyl 3-(3,5-di-*tert*-butyl-4-hydroxphenyl]propionate].

FDA applied a thousandfold safety factor rather than the hundredfold safety factor set forth in 21 CFR 170.22 because the agency's calculation is based on subchronic studies. It has been the agency's general practice to apply a thousandfold safety factor when subchronic studies are relied upon to support safety, and when lifetime studies are neither required nor available (Ref. 2).

The agency has considered whether a specification is necessary to control the amount of dibutyltin diacetate that might migrate to food. The agency finds that a specification is not necessary for the following reasons: (1) The upper limit lifetime risk resulting from exposure to dibutyltin diacetate is very low; (2) use of the 2,2'-oxamidobis[ethyl 3-(3,5-di-*tert*-butyl-4-hydroxyphenyl)propionate] is limited to 0.5 percent or less of a formulation, except for use of the additive in adhesives, where migration to food is expected to be much less than migration from the regulated polymeric food-contact surfaces; and (3) when used in accordance with current good manufacturing practice, it is likely that dibutyltin diacetate will be used in the manufacture of this additive in amounts consistent with those reviewed by the agency.

FDA has reviewed the available toxicity data and its exposure calculation for the additive, and it has determined that the risk posed by exposure to dibutyltin diacetate is very low. The agency has therefore concluded that the proposed use of the food additive 2,2'-oxamidobis[ethyl 3-(3,5-di-*tert*-butyl-4-hydroxyphenyl)propionate] is safe.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h)(2), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection. Among the documents that the agency has relied upon are Refs. 3 through 15.

BILLING CODE 4160–01–M

---

21 CFR Part 176

[Docket No. 82F–0087]

Indirect Food Additives; Paper and Paperboard Components; Components of Paper and Paperboard in Contact with Aqueous and Fatty Foods

AGENCY: Food and Drug Administration.

ACTION: Final rule; clarification.

SUMMARY: The Food and Drug Administration (FDA) is publishing additional information on a final rule published in the **Federal Register** of August 19, 1983 (48 FR 37617), that amended the food additive regulations by removing the upper viscosity limit of a currently regulated retention aid. The retention aid is polyamide-epichlorohydrin water-soluble thermosetting resins prepared by reacting adipic acid with diethylenetriamine to form a basic polyamide and further reacting the polyamide with an epichlorohydrin and dimethylamine mixture. The agency is providing an additional 30-day period for submitting objections or additional information in support of objections already filed in response to this regulation.

DATE: Objections or additional information in support of previously filed objections by May 2, 1984.

ADDRESS: Written objections or additional information in support of previously filed objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: John L. Herrman, Center for Food Safety and Applied Nutrition (formerly Bureau of Foods) (HFF–334), Food and Drug

Administration, 200 C St. SW., Washington, DC 20204, 202–472–5740.

SUPPLEMENTARY INFORMATION: FDA published a final rule in the **Federal Register** of August 19, 1983 (48 FR 37617), that amended the food additive regulations (21 CFR 176.170) by removing the upper viscosity limit of a currently regulated retention aid. The retention aid is polyamide-epichlorohydrin water-soluble thermosetting resins prepared by reacting adipic acid with diethylenetriamine to form a basic polyamide and further reacting the polyamide with an epichlorohydrin and dimethylamine mixture. That action responded to a petition (FAP 2B3622) filed by Sandoz Colors and Chemicals, East Hanover, NJ 07936.

The preamble to the regulation explained that the agency had evaluated data in the petition and had concluded that the proposed use of the substance was safe, and that the food additive regulations should be amended as requested in the petition. The document did not discuss the specific nature of the data evaluated.

Subsequently, The Natural Resources Defense Council, Inc., 122 East 42d St., New York, NY 10168; and Public Citizen's Health Research Group, 2000 P St. NW., Washington, DC 20036, filed objections to the regulation. The objections argued that the agency did not provide adequate information about the additive and the basis for FDA's decision to approve it. The objections stressed that the preamble to the **Federal Register** document did not disclose that the agency's action involved consideration of whether the Delaney anticancer clause might apply to the additive. According to the objections, omission of such an explanation foreclosed interested persons from effectively commenting on or objecting to the regulation. The objections requested FDA to publish a supplemental **Federal Register** notice discussing the factual and legal bases for the decision. The objections also argued that the final regulation is illegal because it relies on the constituents theory, which the objections characterize as contrary to the Delaney anticancer clause. Finally, the objections requested an immediate stay of the regulation and an additional opportunity for objection, and they reserved the right to request a hearing at a later stage in the process.

This clarification of the final rule responds to the request for supplemental information about the reasons for FDA's decision and provides an additional 30 days for the submission of objections or additional information in support of objections that have already been filed. FDA will act on the remaining issues raised by the objections and requests for a hearing after it has evaluated any further objections or other information filed in response to this document. The agency is not staying the regulation because FDA believes that the additive is safe, and that a stay would not serve the public interest.

In evaluating Sandoz's petition, FDA considered data bearing on the safety of the additive, including the safety of the various constituents of the additive. The polyamide-epichlorohydrin water-soluble thermosetting resins that constitute the food additive have not been found to induce cancer. However, the resins may contain trace amounts of a carcinogenic compound, epichlorohydrin which is used in the manufacture of the additive.

Under section 409(c)(3)(A) of the Federal Food, Drug, and Cosmetic Act (the act) (21 U.S.C. 348(c)(3)(A)), the so-called "general safety clause" of the statute, a food additive cannot be approved for a particular use unless the data presented to FDA establish that the additive is safe for that use. The concept of safety embodied in this requirement was explained in the legislative history of the Food Additives Amendment of 1958. "Safety requires proof of a reasonable certainty that no harm will result from the proposed use of an additive. It does not—and cannot—require proof beyond any possible doubt that no harm will result under any conceivable circumstances." H.R. Rep. No. 2284, 85th Cong., 2d Sess. 1 (1958). This definition of safety has been incorporated into FDA's food additive regulations (21 CFR 170.3(i)). The Delaney anticancer clause of the Food Additives Amendment of 1958 (section 409(c)(3)(A) of the act (21 U.S.C. 348(c)(3)(A))) provides further that no food additive can be deemed to be safe if it is found to induce cancer when ingested by man or animal.

In the past, FDA has often refused to list a use of a food additive that contained or was suspected of containing minor amounts of a carcinogenic chemical, even if the additive as a whole has not been shown to cause cancer. The agency now believes, however, that developments in scientific technology and experience with risk assessment procedures make it possible for FDA to establish the safety of food additives that contain a carcinogenic chemical but that have not themselves been shown to cause cancer.

In the preamble to the final rule permanently listing D&C Green No. 6, published in the **Federal Register** of April 2, 1982 (47 FR 14138), FDA explained the basis for approving the use of a color additive that had not been shown to cause cancer, even though the color additive contains a carcinogenic constituent. Since that decision, FDA has approved the use of three such color additives, D&C Green No. 5 (47 FR 24278; June 4, 1982) and D&C Red No. 6 and D&C Red No. 7 (47 FR 57681; December 28, 1982), on the same basis. FDA fully explained the scientific, legal, and policy underpinnings for those decisions in the advance notice of proposed rulemaking on a policy for regulating carcinogenic chemicals in food and color additives, which was published in the **Federal Register** of April 2, 1982 (47 FR 14464). In brief, the agency believes that the Delaney anticancer clause is not triggered unless the food additive as a whole is found to cause cancer. An additive that has not been shown to cause cancer but that contains a carcinogenic constituent may properly be evaluated under the general safety clause of the statute, using risk assessment procedures to determine whether there is a reasonable certainty that no harm will result from the proposed use of the additive.

The agency's position is supported by *Scott* v. *FDA*, —— F.2d —— (Nos. 82–3544/3759) (6th Cir. February 23, 1984). That case involved a challenge to FDA's decision to approve the use of D&C Green No. 5, which, as explained above, contains a carcinogenic chemical but has not itself been shown to cause cancer. Relying heavily on the reasoning in the agency's decision to list this color additive, the United States Court of Appeals for the Sixth Circuit rejected the challenge to FDA's action and affirmed the listing regulation.

The agency calculated the upper bound limit of lifetime risk of cancer resulting from exposure to epichlorohydrin from the previously regulated uses of polyamide-epichlorohydrin water-soluble copolymer resins to be no more than 1.3×10^{-6}. Removing the upper viscosity limit for the polymer allows for a higher molecular weight copolymer, which is more efficient as a retention aid for paper and paperboard. FDA concludes that a higher molecular weight copolymer is not likely to contain any more epichlorohydrin monomer than the copolymer resin with the lower viscosity. The upper bound risk estimate for the lower viscosity resin was based on the conservative assumption that all uncoated paper was treated with the resin. Therefore, FDA concludes that the decision to allow a higher viscosity resin

would not increase the exposure to epichlorohydrin monomer from that previously assumed.

The agency has not performed a risk estimate for all food exposure to epichlorohydrin because it does not have, nor could it reasonably obtain, adequate, reliable data on the total dietary exposure to epichlorohydrin from other regulated additives. Nonetheless, in this specific situation, despite its inability to cumulate exposure to the carcinogenic constituent, FDA still finds the use of polyamide-epichlorohydrin is safe. FDA has reached this conclusion for the following reasons: (1) The exposure to epichlorohydrin from the use of this retention aid is so small that it will not contribute significantly to the level of epichlorohydrin in the diet. (2) The agency regards the upper-bound limit of risk calculated for exposure to epichlorohydrin from use of polyamide-epichlorohydrin to be sufficiently low to assure safe use of this additive even with additional exposure to epichlorohydrin from other products. (3) The food additive regulation at issue does not approve a new additive; it merely changes the conditions of use of an already approved additive and does so in such a way as not to increase exposure to epichlorohydrin. Thus, the agency concludes that there is a reasonable certainty that no harm will result from the proposed removal of the upper viscosity limit.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h)(2), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection. Among the documents that the agency has relied upon are the following:

1. FAP 3B2856, Exhibit B, Appendix II, April 11, 1972.

2. FAP 3B2856, Exhibit B, August 9, 1973.

3. Memorandum: Organic and Additives Chemistry Branch to Petitions Control Branch; August 21, 1973; FAP 3B2856.

4. Memorandum: Food Additive and Animal Drug Chemistry Evaluation Branch to Petitions Control Branch; November 29, 1982; FAP 2B3622 estimated daily intake for epichlorohydrin.

5. Memorandum: Color and Cosmetics Evaluation Branch to Marcia Van Gemert, November 29, 1982; Risk estimation for epichlorohydrin.

6. Memorandum: Food Additives Evaluation Branch to Petitions Control Branch; December 16, 1982; FAP 2B3622.

7. Memorandum: Associate Director for Compliance, Bureau of Foods to Associate Commissioner for Regulatory Affairs, May 9, 1983; Amendment to § 176.170; FAP 2B3622.

List of Subjects in 21 CFR Part 176

Food additives; Food packaging; Paper and paperboard.

For convenience, FDA is republishing in its entirety the final regulation that appeared in the **Federal Register** of August 19, 1983. This clarification of the final rule does not amend the regulation in any way.

This clarification of the final rule is issued under the Federal Food, Drug, and Cosmetic Act.

(Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348))

PART 176—INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS

§ 176.170 Components of paper and paperboard in contact with aqueous and fatty foods

* * * * *

(a) * * *

(5) * * *

List of substances	Limitations
* * * * *	
Polyamide-epichlorohydrin water-soluble thermosetting resins [CAS Reg. No. 68583-79-9] prepared by reacting adipic acid with diethylenetriamine to form a basic polyamide and further reacting the polyamide with an epichlorohydrin and dimethylamine mixture such that the finished resins have a nitrogen content of 17.0 to 18.0 percent on a dry basis, and that a 30-percent-by-weight aqueous solution has a minimum viscosity of 350 centipoises at 20° C, as determined by a Brookfield viscometer using a No. 3 spindle at 30 r.p.m. (or equivalent method).	For use only under the following conditions: 1. As a retention aid employed prior to the sheet-forming operation in the manufacture of paper and paperboard and limited to use at a level not to exceed 0.12 percent by weight of dry paper or paperboard. 2. The finished paper or paperboard will be used in contact with food only of the types identified in paragraph (c) of this section, table 1, under types I and IV–B and under conditions of use described in paragraph (c) of this section, table 2, conditions of use F and G.
* * * * *	

* * * * *

Any person who will be adversely affected by the foregoing regulation may at any time on or before May 2, 1984, submit to the Dockets Management Branch (address above), written objections thereto or submit additional information in support of previously filed objections and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this regulation. Received objections may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 23, 1984.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Parts 1601, 1610, 1611, and 1626

Provisional Revisions Necessitated by Reorganization of Field Office Structure

AGENCY: Equal Employment Opportunity Commission.

ACTION: Final rule.

SUMMARY: The Equal Employment Opportunity Commission has recently approved a reorganization of its field office structure which will enable it to more efficiently administer and enforce the employment discrimination statutes for which it is responsible. There will now be three types of field office instead of two. This document amends the Commission's regulations to reflect this change.

DATES: This Final Rule is effective on April 1, 1984.

FOR FURTHER INFORMATION CONTACT: The Office of Legal Counsel, Legal Services, Nicholas M. Inzeo (634–6592) or Thomas J. Schlageter (634–6592).

PART 1601—PROCEDURAL REGULATIONS

§ 1601.5 [Amended]

1. Section 1601.5 is amended by adding the following after the fourth sentence:

* * * The term "local office" shall mean an EEOC office with responsibility over a part of the United States within a district fixed by the Commission as a particular sub-unit of a district. The term "local director" shall refer to that person designated as the Commission's chief officer for the local office. * * *

2. Section 1601.5 is amended by adding "and local" after "area" in the next to the last sentence.

§ 1601.8 [Amended]

3. Section 1601.8 is amended by removing "district or area" and replacing it with "district, area or local".

4. Section 1601.8 is amended by removing "district" in the last sentence and replacing it with "field".

§§ 1601.10, 1601.14, 1601.20 and 1601.28 [Amended]

5. Sections 1601.10, 1601.14(b), 1601.20(a) and 1601.28(c) are amended by adding "Local Directors," after "Area Directors" wherever it appears.

§§ 1601.19 and 1601.24 [Amended]

6. Sections 1601.19(g) and 1601.24(b) are amended by adding "or Local Directors" after "Area Directors" wherever it appears.

§ 1601.21 [Amended]

7. The introductory paragraph of § 1601.21(d) is amended by adding "or Local Directors" after "Area Directors" in the first sentence.

8. The introductory paragraph of § 1601.21(d) is amended by substituting "Each" for "Such" in the next to the last sentence.

9. The introductory paragraph of § 1601.21(d) is amended by substituting "each Area Director and each Local Director" for "and each Area Director" in the last sentence.

§ 1601.28 [Amended]

10. Section 1601.28(a)(2) is amended by adding "the Local Director" after "the Area Director".

11. Section 1601.28(a)(3) is amended by inserting "Local Director;" after "Area Director" in the first sentence.

12. Section 1601.28(c) is amended by inserting "Local Directors," after "Area Directors".

PART 1610—AVAILABILITY OF RECORDS

§ 1610.4 [Amended]

13. Section 1610.4(b) is amended by removing "district and area" and replacing it with "district, area and local."

14. Section 1610.4(c) is amended by removing "District and Area" and replacing it with "District, Area and Local."

15. Section 1610.4(c) is amended by removing "Area" after "Buffalo", "El Paso," "Fresno," "Greensboro," "Greenville," "Minneapolis," "Oakland," "San Diego" and "San Jose" and replacing it with "Local."

16. Section 1610.4(c) is amended by substituting the below listed addresses for the following offices:

§ 1610.4 Public reference facilities and current index.

BILLING CODE 4310–05–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 947

Surface Mining and Reclamation Operations Under a Federal Program for Washington

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Responses to public comments on interim final rule.

SUMMARY: The Office of Surface Mining (OSM) is responding to public comments submitted regarding the interim final rule which promulgated a Federal surface coal mining program for Washington (48 FR 7078, February 24, 1983). The Secretary of the Interior has reviewed all comments, and no changes to the interim final rule were found to be necessary. Therefore, that rule remains effective as published on February 24, 1983 (48 FR 7078).

DATES: None.

FOR FURTHER INFORMATION CONTACT: James M. Kress, Branch of Regulatory Programs, Office of Surface Mining, U.S. Department of Interior, 1951 Constitution Ave., NW., Washington, D.C. 20240. Telephone: (202) 343–5866.

SUPPLEMENTARY INFORMATION: On February 24, 1983, OSM promulgated a surface coal mining regulatory program for the State of Washington by means of an interim final rule, 48 FR 7870, pursuant to Section 504 of the Surface Mining Control and Reclamation Act (the Act), 30 U.S.C. 1254. The rule provided for a comment period of fifty days. OSM requested comments on how OSM's revisions to its permanent program rules at 30 CFR Chapter VII effected the interim final rule for Washington. The effective date of the program was to be April 25, 1983, but in response to several requests, OSM extended the comment period to April 28, 1983, and changed the affective date of the program to May 13, 1983 (48 FR 16058, April 14, 1983).

The Washington Irrigation and Development Company (WIDCO) brought suit on April 23, 1983, challenging the program, claiming principally that persons who would be required to file a permit application within two months of the effective date of the program were not given enough lead time to prepare the application. See *Washington Irrigation and Development Co.* v. *Watt, et al.*, No. C83–244T (U.S.D.C. E.D. Wash.). OSM met with the plaintiff's representatives on May 12 and 13, 1983, and the parties agreed to dismiss the action dependent upon OSM taking certain actions.

OSM published a notice in the **Federal Register** on May 13, 1983, announcing an effective date for the Washington program of May 16, 1983, and making several changes in the program rules in response both to public comments and to issues raised in the litigation. 48 FR 22292. Although OSM considered all public comments on the Washington program in its May 13, 1983, notice, it did not formally respond to all such comments because of the short period of time between the end of the extended comment period and the date of the notice. This notice, then, responds to the remaining unanswered comments on the interim final rule notice of February 24, 1983. The Secretary of the Interior has reviewed all comments, and no changes to the interim final rule were found to be necessary. Therefore, that rule remains effective as published on February 24, 1983 (48 FR 7078).

Six different persons or entities submitted comments, including comments from a prospective operator. Extensive comments were received from WIDCO. Two comments were submitted by individuals residing in King County who could be affected by operations of the prospective operator mentioned above. Weyerhaeuser Company, which owns a substantial amount of land in the State, some of which is underlain with coal, and the King County Department of Planning and Community Development, in which county a small operation is presently located and a moderate sized one is proposed, also submitted comments.

1. WIDCO took issue with the use of cross-referencing as a means of promulgating the Washington Federal Program. The company contented that the use of cross-referencing provides inadequate public notice, violates the Federal Program regulations at 30 CFR 736.12(a)(2) and the Administrative Procedure Act (5 U.S.C. 553), and causes uncertainty as to which rules comprise the program because of OSM's revision of its permanent program rules. Specifically, WIDCO stated that cross-referencing does not allow adequate consideration of differing regional conditions, that OSM has omitted certain applicable regulations from cross-referencing, and that cross-referencing does not allow for a necessary review period on amendments to permanent program rules as they affect cross-referenced Federal programs. The company urged a two step amendment process for Federal program rules: Amendment of the OSM permanent program rules followed by a separate rulemaking for a similar change to cross-referenced Federal programs.

This comment constitutes the principal grounds on which WIDCO brought suit. In settling the litigation, the parties agreed that for any proposed OSM rule revisions appearing in the **Federal Register** after the effective date of the program, OSM would follow the procedures in 30 CFR Part 736 for amending Federal programs. Further, for any proposed OSM rule revisions appearing in the **Federal Register** before the effective date of the Washington Federal program, no separate rulemaking would be necessary for amending the program if the final rule appeared in the **Federal Register** after the program effective date.

It is OSM's position that cross-referencing does provide adequate notice to the public under the Surface Mining Act and the Federal Administrative Procedure Act. It allows for adequate consideration of regional differences because changes to particular permanent program rules can be made in the cross-referencing

provisions of the Federal program. Further, 30 CFR 947.700(g), allows for specific modifications or variances from the permanent program rules based on local or regional conditions in Washington.

With the concurrent promulgation of the Federal program rules and revisions to the permanent program rules, confusion as to which rules form the Washington program could understandably result. However, OSM completed its permanent program rule revisions and promulgation of all Federal programs, all of which now utilize cross-referencing, on September 30, 1983, and obtained a delay from the Office of the Federal Register for the annual revision of Title 30 of the Code of Federal Regulations. When that edition is available, around July 1984, it will contain all of the permanent program rules, as revised, and all cross-referenced Federal program rules. Thus, all rules will be in one volume, readily available to any member of the public.

2. WIDCO raised several matters concerning the supersession of State law under 30 CFR 947.700(f). The commenter contended that OSM's regulations should be superseded when they are in conflict with State law even if the State law is less environmentally effective.

The Federal act and permanent program regulations set minimum standards for comparison with State law and regulations. If compliance with State laws or regulations would interfere with the purposes of the Federal program, then the State law and regulations are to be superseded pursuant to Section 504(g) of the Act. The Washington Surface Mining Act and implementing regulations establish standards which are less stringent than those in the Federal act and regulations (See Comment 3). Thus, if they establish performance standards that are less stringent than the Federal program, they will interfere with the accomplishment of the Federal program and must be superseded.

With respect to other State statutes and regulations which regulate aspects of surface coal mining and reclamation, there may be a need for supersession of a particular performance standard as a result of a conflict with one of the Federal program standards (30 CFR 947.700(e)(1)–(9). Such supersession is left to a case-by-case determination.

3. WIDCO urged that OSM complete a stringency analysis of the Federal and Washington State programs before superseding any State laws.

While OSM did not produce a formal document, it did conduct such analyses for all Federal programs. In this case, OSM has been unable to conclude that there is any provision of the Washington Surface Mining Act and regulations that establishes more stringent standards than the Federal program. Further, OSM sees no basis for superseding any other State law. *See* the discussion below under Comment no. 5.

4. WIDCO also stated that when OSM supersedes a State statute or regulation because of conflict with a Federal program standard, formal rulemaking is required rather than the mere publication of a notice of such action in the **Federal Register**.

OSM agrees and intends to conduct formal rulemaking in all supersession cases. OSM has used the formal rulemaking process to supersede a State statutory provision under Section 505(a) of the Act. *See* 48 FR 17071 (April 21, 1983) and 48 FR 46028 (October 11, 1983) involving the Virginia State regulatory program. Should a case arise when a provision of State law would have to be superseded, OSM must take the necessary steps of adequately informing the public and then of making the decision whether to supersede the law.

5. WIDCO pointed out that while generally the Washington Surface Mining Act, RCW 78–44, and implementing regulations, WAC 332–18, establish less stringent standards than the Federal program, confidentiality and bonding provisions are more stringent and should not be superseded.

OSM disagrees. The State bonding provisions are not as stringent as the Federal provisions. The commenter suggested that the annual bond modification in the State program establishes a more stringent standard than that in the Federal program. However, the revised Federal bonding regulations, 30 CFR Part 800 (July 19, 1983 48 FR 32932), provide for incremental bonding which could be done on an annual basis. *See* 30 CFR 800.11(b). Since 30 CFR 800 is cross-referenced in § 942.800 of the Federal program, no change in program is required.

With respect to confidentiality, RCW 78.44.180 provides that all reclamation plans, operators' reports, and other required information submitted to the State are for its confidential use. This provision is less stringent than Section 507(b)(17) of the Act, which requires information pertaining to coal seams, test borings, core samplings, or soil samples to be made available to any person with an interest that is or may be adversely affected, except that information pertaining to the analysis of the chemical contents of the coal shall be kept in confidence. OSM believes that the State confidentiality provision interferes with the achievement of the public disclosure and public participation purposes of the Act and the Federal program, and requires supersession.

6. Another commenter has sought OSM's determination that a King County ordinance requiring a grading permit interferes with the purposes of the Federal program and, consequently, should be superseded. The commenter contended that some of the ordinance's provisions sometime conflict with Federal requirements.

It is only when a State statute or regulation interferes with the achievement of the purposes and requirements of the Federal program that a State law may be superseded under Section 504(g) of the Act. A State law which is inconsistent with a provision of the Federal statute may be superseded under Section 505(a) of the Act. Review of the King County grading ordinance, §§ 16.82.010–16.82.140, does not indicate any interference or inconsistency with the Act or the Federal program. However, there may be duplication. The commenter has not pointed to any particular design criteria in the ordinance that conflict with the Federal requirements. In light of the detail of the Federal regulatory program, compliance with the county grading ordinance could be viewed as unnecessary. However, there is no basis for superseding it since it does not interfere with the Federal program. Here duplication is an insufficient basis for supersession.

7. King County, through its Department of Planning and Community Development, submitted a comment stating that its understanding was that unless local ordinances were less stringent than Federal standards, there would be no supersession.

OSM agrees. However, no local zoning ordinance other than the grading ordinance has been brought to OSM's attention. There is, at this time, no basis for superseding any local ordinances.

8. WIDCO urged revision of the variance provision of 30 CFR 947.900(g). Rather than granting the variance where necessary due to the unique conditions in the State and the achievement of equal or greater environmental protection, the commenter suggested simple consideration of consistency with Federal environmental protection requirement standards with no consideration of uniqueness.

In settlement of the litigation and in response to the comment, the parties agreed to revise the variance provision. In the final rule, published on May 18, 1983, OSM provided for the granting of a variance where: (1) It is necessary due

to the conditions in the area of the mine, and (2) the practice sanctioned by the variance will result in environmental protection provisions which are no less effective than the Federal regulations and consistent with the Act. It is incumbent on an applicant, however, to justify the granting of the variance in any particular instance.

9. WIDCO raised other questions in connection with the variance as proposed, including the meaning of the term "necessary," the procedures for the issuance of a variance, and the length of time a variance may last.

"Necessary" means that the practice is dictated by the particular environmental conditions, not simply economic conditions, although there may be economic benefits to the operator. The variance must be sought in the permit application or, if a condition arises during mining operations, in the permit revision process. The applicant has the burden of demonstrating that the variance is necessary due to the physical conditions in the mine area and that the variance, if granted, will produce a result which is no less effective than the Federal regulations and consistent with the Federal Act.

The practice sought to be approved through the variance need not be the only manner in which the practice can be accomplished, but it must be tied to the environmental conditions at the mine site and be demonstrated to be no less effective than the Federal standards. Such demonstration does not involve a showing of how the Federal standard may be unworkable. Rather it is a postitive showing of the necessity of the alternative for which the variance is sought. The OSM office which reviews the permit application will make the decision on the variance request. The justification for the variance must be made in the application. Should the variance not be granted, the applicant may appeal the decision to the Office of Hearings and Appeals pursuant to 43 CFR 4.1280. The information submitted in support of a requested variance is in lieu of the information required under the performance standard for which the variance is sought. Should the variance request not be granted, then the particular permit information would have to be furnished. A variance becomes a part of the permit once it is granted. Unless the permit specifies to the contrary, the variance lasts as long as the permit term and is subject to renewal in the same manner as a permit.

10. WIDCO also advocated that there be recognition of a need for a variance beyond the mine site.

In recognition of regional differences in the State of Washington, OSM modified the alluvial valley floor provisions in 30 CFR 947.701 and 947.842 to except the coal fields located in the State west of the crest of the Cascade mountain range. Those coal fields are not in an arid or semi-arid area. Therefore, operators in this area need not comply with the alluvial valley floor provisions.

11. WIDCO presented seven different situations in which it might request a variance, including the construction of roads without removal of vegetative mats. The commenter has sought seven such variances in its permit application.

OSM believes it is inappropriate at this time to comment on these seven instances since WIDCO is seeking these variances through the permitting process and OSM has no decisions thereon.

12. Another commenter asked whether a proposed postmining land use to develop a new lake and wetlands and to develop a new city park should be treated as a request for a variance under 30 CFR 947.700(g). A permit application has been submitted in which a final cut lake is proposed.

OSM will consider the reclamation plan indicating the final cut lake and wetlands as a request for a variance, and make its decision in the course of the permitting process.

13. WIDCO advocated an addition to the definition of the term "agricultural use" to include "forest practices" as defined in Washington Administrative Code 222–16–010(19), and the inclusion of an exception for agricultural use in the term "disturbed area." Another commenter advocated a clear separation of the regulation of surface mining under the Federal program and forest practices pursuant to the Washington Forest Practices Act, Revised Code of Washington Chapter 76.009, and the Forest Practice Act rules and regulations, Title 222 of the Washington Administration Code.

The adoption of these comments would preclude OSM jurisdiction under the law of Washington during the time such forest practices occur. There is a clear overlap in at least one activity that may constitute both a forest practice and a surface mining activity: road construction. Road and trail construction is included in the definition of the term "forest practices" in WAC 22–16–010(19), and road building standards are set in 30 CFR 816.150 and 817.150 (*See* 48 FR 22110, May 16, 1983). Thus, what the commenters seek is either a relinquishment of jurisdiction to the State when activities falling under the definition of "forest practices" are involved, or the supersession of any such exercise of jurisdiction by the State. Rather than set a clear demarcation between Washington State jurisdiction under the Forest Practices Act and OSM jurisdiction, OSM has opted to defer to the State's regulation under the Forest Practices Act, yet retain the authority to exercise its jurisdiction should an instance arise in which there is a clear environmental consequence prohibited by surface mining standards, which appears to be permitted under the forest practices regulations. The settlement agreement in the litigation indicated above contains the following provision: "The Federal officials agree that the term 'surface coal mining operations' shall exclude activities which are forest practices under the Washington Forest Practices Act and regulations, except to the extent that they constitute surface coal mining operations under 30 CFR 700.5."

OSM recognizes that the Washington Forest Practices Act is one of the most stringent State statutes regulating such practices. 13 Natural Resources Lawyer 421, 432 (1980). It addresses a broad array of forest management activities.

However, the statute is limited to forest management activity. No State forest practices statute regulates all activities that may take place within the forest boundaries such as surface mining. *Id.* at 428. Therefore, OSM may not completely defer to the State's exercise of jurisdiction under the Forest Practices Act.

14. One commenter has requested that records and permit application information be made available to the public at the local, county, or municipal level.

The revised permit application public participation requirements at 30 CFR 773.13(a)(2) (48 FR 44393, September 28, 1983), require an applicant to make a copy of such information available by filing the same with the recorder at the courthouse of the county where the mining is to occur.

The interim final rule at 30 CFR 947.701(c) has a provision requiring the retention of such records at the county recorder's office of the county in which the operation is located and at the nearest OSM Field Office. That section cites 30 CFR 701.14, which should be 30 CFR 700.14, the availability of records provision. OSM will correct the citations in a later **Federal Register** notice.

15. WIDCO raised several questions concerning the Federal and State permit coordination process. It questioned the rejection in the interim final rule of an implementation task force.

OSM decided against an implementation task force because there are only two existing and one proposed surface mining operations in the State. Three permit reviews, two of which would be for small operators less than 100,000 tons of coal per year, do not warrant the creation of a task force. OSM does not expect circumstances to change which would warrant the creation of such a task force. Further, OSM has coordinated with two States agencies, the departments of Ecology and Natural Resources. OSM and the two State agencies have designated contact persons who will manage the State review of permit applications.

16. WIDCO also raised questions about the lead OSM office for the Federal program conducting inspections and permit application review.

OSM's Casper Field Office located in Mills, Wyoming, has the responsibility for implementation of the Washington Federal program, including inspections. OSM has also established a sub-field office in Olympia, Washington. The OSM Western Technical Center in Denver, Colorado has the lead responsibility for the review of permit applications.

17. The King County Department of Planning and Community Development asked what process OSM will use to coordinate other Federal and State permits.

OSM will coordinate, as explained above, through the two persons serving as liaison between OSM and the two State agencies.

18. WIDCO raised a concern about the air quality monitoring requirement found at 30 CFR 947.780 of the Washington Federal program and, in particular, the requirement in 30 CFR 780.15(a) that surface mining operations producing more than 1 million tons of coal per year west of the 100th west longitude devise an air pollution control plan. The commenter claimed that surface mining operations west of the crest of the Cascades produce no fugitive dust and, therefore, meet air quality standards because of the wet climate. Thus, an air quality monitoring plan is unnecessary.

The **Federal Register** notice announcing the program effective date accepts compliance with 30 CFR 780.15(a). A surface coal mining operation in Washington producing one million tons of coal or more per year need not provide an air quality monitoring program unless the regulatory authority requires one. *See* also the response to the following comment.

19. The King County Department of Planning and Community Development commented on the air quality control provisions of the Program. It objected to the exemption of mines producing one million tons per year from compliance with local air pollution requirements.

As stated above in response to comment No. 18, a surface coal mining operation producing one million tons or more per year of coal need not automatically submit an air quality monitoring program nor a plan for fugitive dust control. Under 30 CFR 780.15(b), OSM has the discretion to require a monitoring program if it determines one is necessary. However, OSM's authority to regulate air quality is limited to that pollution produced as a result of erosion. *See In re: Permanent Surfacing Mining Regulation Litigation*, No. 79–1144 (U.S.D.C., D.C.), Memorandum opinion filed May 16, 1980, at p. 28.

On the other hand, OSM is not superseding any Washington State laws regulating air quality control. Both 30 CFR 947.780(b) and 947.784(b) mandate specific demonstration of compliance with local air pollution control requirements and the Washington Clean Air Act if production of coal exceeds one million tons per year. Further, an operation of King County which meets the definition of a new air contaminate source must obtain a notice of construction from the Puget Sound Air Pollution Control Agency.

However, only a mine producing one million tons or more per year should provide a copy of that notice to OSM under 30 CFR 947.780(b).

20. The company proposing to open a small mine in King County commented that OSM should become a joint lead agency with King County in the issuance of the final Environmental Impact Statement (EIS)—one which will suffice under the State Environmental Policy Act and the National Environmental Policy Act (NEPA), 42 U.S.C. 4332(C). This action would expedite the permitting process and avoid duplication of State and Federal requirements.

Implementation of the program came too late to have joint lead agencies. OSM has determined that the EIS prepared by King County is not adequate for NEPA compliance. Therefore, separate Federal NEPA compliance is necessary.

21. WIDCO pointed out the difficulty of complying with bonding requirements which OSM proposed to change, but for which no final rulemaking notice had appeared by the close of the final comment period on the Washington Federal Program. OSM had proposed to cross-reference only 30 CFR 800 since that was the only part which the revised OSM bonding rules would use, while the other parts, 801, 805, 806, 807, and 808, were still in effect.

The final rulemaking notice on the bonding rules appeared on July 19, 1983, at 48 FR 32932. The final rulemaking notice for the self-bonding rules appeared on August 10, 1983 at 48 FR 36418. Thus, all of the bonding rules are now located in 30 CFR 800, and are in effect in the Washington Federal program through cross-referencing.

22. WIDCO questioned OSM's decision not to except the area west of the crest of the Cascade Mountain range from the alluvial valley floor requirements. The alluvial valley floor provisions of the Act and regulations apply to the region west of the 100th meridian on the presumption that those lands are in arid and semi-arid areas. The Weyerhaeuser Company also questioned the inclusion of the alluvial valley floor requirements for the area west of the crest of the Cascade Mountains. In the company's view, the average annual rainfall, which is almost 60 inches per year, dictates the removal of the area from the alluvial valley floor requirements.

The May 18, 1983, **Federal Register** notice made two changes in the program with respect to alluvial valley floors, which satisfy the commenters' concerns. The definition in 30 CFR 947.701(b)(1) of the term "arid and semi-arid area" excepts the coal fields in the State west of the crest of the Cascade Mountains. The cross-reference in 30 CFR 947.822 to the alluvial valley floor performance standards also added the same exception.

23. An individual commented that the enforcement part of the Washington program should have more provisions to force operators to pay fines, and should provide that no new permits be issued to operators with outstanding penalties.

OSM's former rule at 30 CFR 780.17(c) prohibited the regulatory authority from issuing a permit to an operator who had an outstanding violation of any Federal or State law, rule, or regulation pertaining to air or water environmental protection, unless the violation had been corrected or was in the process of review either administratively or judicially. OSM has revised the provision but has retained the same substantive prohibition in 30 CFR 773,15(b) (48 FR 44394, September 28, 1983).

24. Another individual commenter asked whether copies of each inspection report could be made available at the local planning agency.

30 CFR 947.842 and 947.843 require that OSM furnish a copy of each enforcement action to the local planning

department of the county government of the county where the operation is located. Such enforcement action includes the inspection report.

25. WIDCO pointed out that OSM must develop a blaster training, examination, and certification program. The revised blaster rules, 30 CFR Parts 816, 817 and 850 (48 FR 9486, March 4, 1983), require the regulatory authority to develop such a program. The commenter urged OSM to develop such a program in consultation with a number of other Federal agencies and other interested parties.

OSM has begun the development of a blaster program. It will consult with other governmental agencies having a interest in the program during its development.

26. An operator asked about permit fees, when will they be established, and the amount of such fees.

OSM has not yet proposed a Federal program permit fee schedule. The proposed rulemaking notice may appear in the next several months. However, OSM will not require payment of such a fee until promulgation of the rule. Even though a fee will not be assessed or payable until the final fee-schedule rule is effective, an operator may receive a permit prior to the rule's effective date.

27. WIDCO commented that the Washington, Surface Mining Act is not superseded with respect to bonding requirements on areas under State permit prior to the implementation of the permanent program performance standards and the posting of a bond under the Federal program.

The commenter is correct that the State can continue to require a bond under its law for areas under State permit which would not be a part of the permit area under the Federal program. Thus, the State could forfeit a bond on an area for which a bond was posted under the State statute as long as that area is not within a Federal program permit area. Once OSM has made the decision to issue a permit and the operator has posted bond under that permit, the State bonding requirement would be superseded and the bond payable to the State would no longer be required. However, the operator could change the payee of any such bond from the State to the United States and adjust the bond amount, if necessary.

28. WIDCO requested guidance for a significant departure which would require a revision to a permit. It pointed out that a surface mine which supplies an electric generating plant has a variable production rate in the northwest depending on the availability of hydropower. Thus, operators have to vary their production levels, often significantly.

A change in the rate of production would not require a revision to the permit as long there is no deviation from the mining and reclamation plan. However, if there is a change in the steps indicated in the mining and reclamation plan, a permit revision is required. The revised permit revision rules, 30 CFR Part 774, indicate that revision is necessary when there is a change in any of the permit application information. (48 FR 44396, September 28, 1983). Pursuant to 30 CFR Part 774.13(b)(2), if the revision is a significant one, additional requirements and procedures are required.

Carl C. Close,

Assistant Director, Program Operations and Inspections.

[FR Doc. 84-8712 Filed 3-30-84; 8:45 am]

BILLING CODE 4310-05-M

LIBRARY OF CONGRESS

Copyright Office

37 CFR Part 201

[Docket RM 80-2]

Compulsory License for Cable Systems

AGENCY: Library of Congress, Copyright Office.

ACTION: Final regulations.

SUMMARY: This notice is issued to inform the public that the Copyright Office of the Library of Congress is adopting amendments to 37 CFR 201.11 and 201.17, as amended through final regulations on June 27, 1978, and July 3, 1980, and through interim regulations on May 20, 1982. These regulations implement portions of section 111 of the Copyright Act of 1976, title 17 of the United States Code. That section prescribes conditions under which cable systems may obtain a compulsory license to retransmit copyrighted works, including the filing of Notices of Identity and Signal Carriage Complement and Statements of Account, and the submission of statutory royalty fees. The amendments revise or clarify certain requirements governing the form and content of such Notices and Statements.

EFFECTIVE DATES: June 1, 1984. Written comments on the specific language of the regulations should be received on or before May 2, 1984.

ADDRESSES: Ten copies of written comments should be addressed, if sent by mail, to: Library of Congress, Department D.S., Washington, D.C. 20540.

If delivered by hand, copies should be brought to: Office of the General Counsel, James Madison Memorial Building, Room 407, First and Independence Avenue, S.E., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Dorothy Schrader, General Counsel, U.S. Copyright Office, Library of Congress, Washington, D.C. 20559, (202) 287-8380.

SUPPLEMENTARY INFORMATION: Section 111(c) of the Copyright Act of 1976 (Act of October 19, 1976, 90 Stat. 2541) establishes a compulsory licensing system under which cable systems may make secondary transmissions of copyrighted works. The compulsory license is subject to various conditions, including the requirements that the cable systems comply with provisions regarding recordation of Notices of Identity and Signal Carriage Complement and Notices of Change of Identity or Signal Carriage Complement under section 111(d)(1), and deposit of Statements of Account and statutory royalty fees under section 111(d)(2).

On June 27, 1978, the Copyright Office announced in the **Federal Register** (43 FR 27827) the adoption of Statement of Account forms and published amendments to its regulations (37 CFR 201.17) to reflect changes necessitated by the new forms.

Further experience with these regulations led the Copyright Office to publish in the **Federal Register** on July 3, 1980 (45 FR 45270) certain clarifying and technical amendments to its regulations (37 CFR 201.17) governing the form, content, and filing of Statements of Account.

During the July 3, 1980, rulemaking proceeding, the Copyright Office received several comments suggesting substantive revisions to the regulations and Statement of Account forms (45 CFR 45273):

Based on their experience reviewing the Statements of Account submitted during the first three accounting periods, copyright owners noted in their comments particular areas where they feel further information and/or clarifications are needed. These areas principally concern the designation of local and distant stations, classification of Canadian and Mexican stations, and problems resulting from the filings submitted on behalf of joint "individual" cable systems. In addition, some copyright owners proposed changes that they contend would streamline the royalty calculation steps required on forms CS/SA-2 and CS/SA-3.

Comments on behalf of the cable operators, on the other hand, suggested that a good deal of the information required on the Statement of Account for the purpose of assisting

copyright owners and the Copyright Royalty Tribunal in the distribution of cable royalties is, in fact, unnecessary. They also advocated a review of our definition of "gross receipts for the 'basic service of providing secondary transmission of primary broadcast transmitters' " based on recent technological advances and new marketing strategies affecting the types of services now available for a single monthly fee.

Although these issues were outside the scope of the rulemaking, the Copyright Office stated its belief "that some of these developments do warrant a review of our cable regulations and Statement of Account forms at an appropriate time" (45 CFR 45273).

Subsequently, several administrative actions were taken, or judicial decisions rendered, affecting the cable television compulsory license mechanism.[1]

The Copyright Office decided that these administrative determinations warranted attention and might provide an adequate basis for a review of the cable television regulations and Statement of Account forms. To this end, the Copyright Office, on June 10, 1981, published in the **Federal Register** (46 FR 30649) a Notice of Public Hearing to be held on July 28, 1981, intended to elicit comments, views, and information regarding these matters.

During the public hearing, the Copyright Office received testimony and written submissions from two cable television operators and representatives of the Motion Picture Association of America (MPAA), the National Cable Television Association (NCTA), and professional sports. The Copyright Office also received written comments from other interested parties in response to the Notice of Public Hearing. Because the Commission's actions had an immediate impact on the responsibility of cable systems under the copyright compulsory license, the Office decided to publish in the **Federal Register** (47 FR 21786) regulations concerning this impact effective May 20, 1982, on an interim basis.[2]

At that time, the Office also announced that proposed regulations pertaining to the other issues addressed during the Office's July 1981 public hearing would be forthcoming. Initially, the Office believed only a few months would elapse before publication of proposed rules. On October 20, 1982, however, the Copyright Royalty Tribunal adopted a final rule in CRT Docket No. 81–2 (published at 47 FR 52146 on November 19, 1982). By this rule, the Tribunal made two types of cable royalty rate adjustments [3] and set January 1, 1983, as the effective date for both. Both rate adjustments were appealed to the U.S. Court of Appeals for the D.C. Circuit (which upheld the Tribunal's rate determination on December 30, 1983).[4]

In December 1982, Congress, as part of an appropriations measure, imposed a bar on the expenditure of funds to implement the 3.75% portion of the rate adjustment until final decision by the Court of Appeals or until March 15, 1983, whichever occurred first.[5]

In late 1982 and early 1983, the Copyright Office received numerous requests for advice or interpretive rulings regarding the 1982 cable rate adjustment. Our urgent guidance was requested before March 15, 1983, the expiration of the legislative stay. The Office published a Notice of Inquiry, Docket No. RM 83–3 (48 FR 6372; February 11, 1983), in which we summarized the issues presented to us for guidance and requested comment. Based upon our preliminary analysis of the issues and the comment letters, the Office issued a letter of opinion on March 11, 1983 (published at 48 FR 13166; March 30, 1983) in which we expressed tentative, limited views about intepretation of the 3.75% portion of the rate adjustment.[6]

During this same period, the National Cable Television Association formally requested that the Office act immediately on two issues covered by this rulemaking, on the ground that these issues were now critical in light of the CRT's 1982 cable rate adjustment. ("Petition for Expedited Action"; February 3, 1983.) The two issues identified were: computation of the cable royalty fees affected by: (1) Addition or replacement of a regularly carried distant signal in the middle of an accounting period and (2) carriage of a distant broadcast signal on a tier with non-broadcast services for a single fee—the so-called "tiering" issue.[7]

The Office believes that its position regarding the first issue was made clear in the interim rules issued May 20, 1982 (47 FR at 21786), and this view was repeated in letters of opinion from the Office to the NCTA on December 27, 1982,[8] and December 30, 1982. In our

---

[1] On September 11, 1980, the Federal Communications Commission (FCC) published in the **Federal Register** (45 FR 60186) its decision to remove the cable television distant signal limitations and syndicated program exclusivity rules from the FCC regulations. The Court of Appeals for the Second Circuit upheld the authority of the FCC to repeal these rules in *Malrite* v. *FCC*, 652 F.2d 1140 (2d Cir. 1981), and the Supreme Court on January 11, 1982, denied a petition for certiorari on this issue in *National Association of Broadcasters* v. *FCC*, 102 S.Ct. 1002 (1982).

On September 23, 1980, the Copyright Royalty Tribunal published in the **Federal Register** (45 FR 63026) its determination of the 1978 cable royalty distribution. The Court of Appeals for the D.C. Circuit generally upheld the Tribunal's royalty distribution in *NAB* v. *CRT, et al.*, No. 80–2273 (D.C. Cir. April 9, 1982); *NPR* v. *CRT, et al.*, No. 80–2281 (D.C. Cir. April 9, 1982); *Major League Baseball, NBA, NHL and NASL* v. *CRT, et al.*, No. 80–2284 (D.C. Cir. April 9, 1982); *CBS* v. *CRT, et al.*, No. 80–2290 (D.C. Cir. April 9, 1982); and *ASCAP* v. *CRT, et al.*, No. 80–2298 (D.C. April 9, 1982). On January 5, 1981, the Copyright Royalty Tribunal published in the **Federal Register** (46 FR 892) its first adjustment of the compulsory license royalty rates (the "1981 inflationary" rate adjustment). This determination was upheld on appeal by the Court of Appeals for the D.C. Circuit, *NCTA* v. *CRT*, 688 F.2d 1077 (1982), and the Copyright Office subsequently implemented the rate adjustment.

[2] The interim rules are clearly interpretive, as noted in a footnote. 47 FR 21788. Moreover, since the Copyright Office considered it prudent to wait until the Supreme Court acted on the petition for certiorari in the *Malrite* case, before the Office issued any interpretation of the impact of the FCC's 1980 deregulation order on cable system Statement of Account filings, it was necessary to act on an interim basis in order to give cable systems guidance for the then current accounting period. (We refer to the first half of 1982; the Supreme Court denial of certiorari was handed down on January 11, 1982.)

[3] One adjustment is a "surcharge" on certain distant signals to compensate copyright owners for the carriage of syndicated programming formerly prohibited by the FCC's syndicated exclusivity rules in effect on June 24, 1981 (former 47 CFR 76.151 et seq.) ("syndicated exclusivity surcharge"). The second adjustment raised the royalty rate to 3.75% of gross receipts per additional distant signal equivalent (DSE) with respect to carriage of distant signals not generally permitted to be carried under the FCC's distant signal rules prior to June 25, 1981. Under the Tribunal's initial order, both rates were to be effective on January 1, 1983.

[4] The Court of Appeals affirmed the Tribunal's rate adjustment in all respects. *NCTA, Inc.* v. *Copyright Royalty Tribunal*, No. 83–2389 (D.C. Court of Appeals, December 30, 1983). In a Statement of Views concerning the 1982 cable rate adjustment, the Office noted that we would not take affirmative steps to implement the rate adjustment pending a final decision of the Court of Appeals. 48 FR 13166. *See infra.* The Office is now in the process of developing procedures, forms, and policies to implement the rate adjustment.

[5] Section 143 of House Joint Resolution 631, Pub. L. 97–377. In fact, the legislative stay expired on March 15, 1983, since the decision of the Court of Appeals was rendered on December 30, 1983.

[6] The issues addressed in Docket No. 83–3 and rules concerning implementation of the Tribunal's 1982 cable rate adjustment will be taken up in a separate proceeding. As the Office noted in the March 1983 Statement of Views, the comment letters received in February 1983 will be considered now in implementing the cable rate adjustment.

[7] The Motion Picture Association of America and the Professional Sports Leagues, while differing with NCTA on the merits, also asked the Office to issue regulations on the tiering issue.

[8] In our December 27, 1982 letter, we said, at page 2: "[W]e have concluded, for reasons hereafter given, that royalty fees must be paid, at least at the current rates, for any affected distant signal carried during any part of the accounting period January–June 1983 as if it were carried for the entire accounting period." Published in the Copyright Office Notice of Inquiry, 48 FR at 6373.

opinion, proration of the DSE value defined by 17 U.S.C. 111(f) is permitted only in the specific cases set forth in the definition of the DSE value. Except as expressly permitted by the DSE definition, partial carriage of a signal at any time during a given accounting period must be computed at full value for that type of signal, as though the signal were carried the entire accounting period.[9]

As discussed below, with respect to the "tiering" issue, the Office has taken a position as part of practices adopted in examining Statements of Account that allocation of gross receipts is not expressly permitted by the Copyright Act. Some have interpreted the Office's definition of "gross receipts," in effect since 1978, as a regulatory position on the "tiering" issue. The issue is now addressed fully in this proceeding.

In response to letters from motion picture copyright owners regarding the "tiering" issue and compliance with the compulsory license, a cable system, Cablevision Systems Development Company, brought an action for declaratory judgment in June 1983 against the Motion Picture Association of America, Inc. and its eight-member motion picture production companies. *Cablevision Systems Development Company* v. *Motion Picture Association of America, et al.* Civ. No. 83–1655 (D.D.C., filed June 8, 1983). The complaint generally seeks an adjudication that 17 U.S.C. 111 permits a cable system to allocate gross receipts in some way to reflect the "tiering" practices of cable systems. The defendants have counterclaimed for copyright infringement.

In September 1983, the NCTA also filed an action in the federal court for the District of Columbia, seeking a declaratory judgment regarding the "tiering" issue. *NCTA, Inc.* v. *Columbia Industries, Inc., et al.,* Civ. No. 83–2785 (D.D.C., filed September 21, 1983).

Finally, with respect to the "tiering" issue, a Petition for Adoption of Rule was filed on December 9, 1983, on behalf of the "professional sports leagues" (Major Leagues Baseball, the National Basketball Association, the National Hockey League, and the North American Soccer League). The Petition requested that the Office terminate RM 80–2 by adopting a rule "consistent with, and indeed mandated by, the language and legislative history of the Copyright Act, prior Copyright Office rulings and sound policy considerations." (Petition of Major League Baseball, et al., at 6). The NCTA, Cablevision, and a law firm filed comments opposing adoption of rule by the Copyright Office relating to the "tiering" issue on the general ground that the issue is now before the courts and the Office cannot, in any event, decide the matter finally since definitive interpretation of a statute is the province of the courts.

As noted, the Office has decided to address the "tiering" issue in this proceeding. On this issue specifically, the rule is interpretive. While the courts will determine the correct interpretation of the Act and the Copyright Office will welcome the guidance of the courts on "tiering" and other issues, the Office finds no justification for further delay in specifically addressing in regulations and important issue that continues to affect the filing of Statements of Account. At one time or another, the major interests affected by the compulsory license (cable systems and copyright owners) have asked the Office to "take a position" (cable systems generally) or "confirm a position" (copyright owners generally) regarding "tiering." Interpretation of the Act for purposes of administering the compulsory license of 17 U.S.C. 111 is within the authority of the Copyright Office—*e.g.,* to develop forms, practices, and policies. The statement in Copyright Office regulations at 37 CFR 201.2(a)(iv) that the Office does not give "legal opinions or advice" regarding the "sufficiency, extent or scope of compliance with the copyright law" has been interpreted and applied by the Office to mean that is will not act as a lawyer for members of the general public. The Office does not give *specific* advice whether certain conduct actually constitutes copyright infringement. With respect to administration of the Copyright Act in general and the compulsory licenses in particular, the Copyright Office must and does, however, interpret the Act. In appropriate cases, courts have accorded weight to Office interpretations.[10] The courts, of course, are the final arbiters of what the law means.

After careful consideration of all the hearing testimony and written comments, the Copyright Office now has decided to adopt several amendments to the cable regulations and changes in the Statement of Account forms. A discussion of the amendments and major substantive comments appears below.

1. *Proration of DSE's.* Paragraph (f) of section 111 of the Copyright Act sets forth the definition of "distant signal equivalent" (DSE), which has been incorporated by reference in § 201.17(f) of the Copyright Office regulations. The DSE is the value assigned to the secondary transmission of any nonnetwork television programming carried by a cable system, in whole or in part, beyond the local service area of the primary transmitter of such programming. Cable systems that complete Statement of Account form CS/SA–3 compute their statutory royalty payments on the basis of their total number of DSE's.

Under the compulsory license, each year is divided into two semi-annual accounting periods: January 1 through June 30, and July 1 through December 31. Ordinarily, the DSE of a distant television station carried full time for an entire accounting period is that station's full type value—that is, either 1.0 for an independent station, or .25 for a network or noncommercial educational station. Cable systems and their representatives have frequently questioned the appropriate calculation of the DSE value when a station is carried for an entire broadcast day during an accounting period, but is not carried every day of the period.

The Office has rejected similar if not identical proration arguments in past rulemaking proceedings. (45 FR 45270; July 30, 1980, which established 37 CFR 201.17(f)(3).) Nevertheless, responsive to the requests of cable systems, the Office sought testimony and comments specifically on whether "a cable system should be permitted to make a prorated adjustment to the full DSE value of a distant television station added, deleted or carried on a part-time basis during an accounting period if that station is also carried full time during any portion of that accounting period?"

Representatives from the cable industry maintained the compulsory license mechanism is sufficiently flexible to enable a cable system to prorate the ordinary DSE value in any of the above circumstances to reflect actual carriage. Furthermore, they asserted that the statutory division of

[9] The central question of the NCTA, to which the Office responded in December 1982, was "whether an affected television station which is dropped prior to March 15 (the expiration of the legislative stay) must be paid for through March 15 or through June 30." The Office responded that, in light of the meager legislative history concerning Section 143 of the H.S. Resolution 631, we were unable to conclude that a modification of our existing non-proration regulation was intended. Therefore, payment must be made for the entire accounting period, but different rates apply before and after March 15, 1983.

[10] *Mazer* v. *Stein,* 347 U.S. 201, 211–213 (1954); *DeSylva* v. *Ballentine,* 351 U.S. 570, 577–78 (1955); *Norris Industries, Inc.* v. *International Telephone and Telegraph Corp. and Ladd,* 696 F.2d 918 (11th Cir. 1983), *cert. denied,* 52 U.S.L.W. 3282 (U.S. Oct. 4, 1983); *Esquire, Inc.* v. *Ringer,* 591 F.2d 796, 801–02 (D.C. Cir. 1978); *Eltra Corp.* v. *Ringer,* 579 F.2d 294, 298–99 (4th Cir. 1978).

the year into two accounting periods is merely procedural for purposes of royalty and Statement of Account submissions and is not a substantive element or condition of the compulsory license. The cable industry representatives suggested that a strict interpretation of this provision would result in an unjustified windfall to copyright proprietors.

Representatives of the program supply industry, on the other hand, noted that the statute itself specifies only a few, narrow instances where DSE proration is permissible and that all other types of limited carriage must be computed as full time carriage.

After careful consideration, the Copyright Office once more confirms its interpretation that proration of DSE's is not permitted under 17 U.S.C. 111 except in the specific cases included in the DSE definition in section 111(f). The statute, therefore, requires the computation of the DSE value on the basis of full-time carriage [11] in the above-mentioned circumstances irrespective of the amount of actual carriage during the accounting period. The Office finds no basis in the Copyright Act or its legislative history for a departure from the views expressed at 45 FR 45271–2. In sum, actual carriage is not the sole basis for computation of cable copyright royalties;[12] "distant signal equivalent" is a phrase which was uniquely crafted and defined in the Copyright Act; and the brief references to proration in the legislative committee reports confirm that proration would be permissible only in the cases specially defined in the statute. H.R. Rept. No. 1476, 94th Cong., 2d Sess. 100 (1976). Section 111(d)(2)(B), moreover, in part requires the computation of a "*total* royalty fee for the *period covered by the statement*" (emphasis added). The Copyright Office believes that this language illustrates that the division of each year into two separate accounting periods represents a substantive element of the compulsory license mechanism which we have no statutory authority to alter. In an effort to clarify this point further with respect to the appropriate calculation of DSE's, the Copyright Office is amending § 201.17(f) by adding a new subsection (2)(A) to read as follows:

(2)(A) Where a cable system carries a primary transmitter on a full-time basis during any portion of an accounting period, the system shall compute a DSE for that primary transmitter as if it was carried full-time during the entire accounting period.

2. *Multiple part time carriage.* The "distant signal equivalent" value can be prorated in the case of lack of activated channel capacity, and in the case of permissive substitution for programming primarily of interest to the distant community. These bases for proration of DSE's are unaffected by the FCC deregulation effective June 25, 1981.

In its comments to the Copyright Office rulemaking proceeding under Docket No. 79–4 (regulations issued July 3, 1980), the MPAA raised questions concerning the appropriate total DSE value to be assigned where two or more distant television stations having different DSE type values are carried part time on any one cable channel during an acounting period. The MPAA advocated that in this circumstance, a cable system should be required to set the total DSE values for those stations at not less than full value of the signal carried most frequently during the accounting period.[13] In support of this position, the MPAA noted that it is illogical to suggest that Congress intended to require cable systems to pay the value of a full DSE for full-time carriage of one signal, but some lesser value if the same amount of programming is delivered to the cable subscriber from two or more part-time signals with different DSE type values.

Comments submitted on behalf of three multi-system operators (MSO's) opposed the MPAA position. They asserted that the treatment of multiple stations carried part time on a single channel should be consistent with the treatment of any single station carried on a part-time basis.

The Copyright Office has emphasized its inability to alter the clear and unambiguous statutory definition of "distant signal equivalent":

We cannot emphasize too strongly that the "distant signal equivalent" is a statutory definition, and one which was created *sui generis* in the Copyright Act. The Copyright Office was not given any authority by Congress to elaborate on this definition. General principles of statutory construction require that clear and unambiguous definitions, and provisos contained in and limiting the operative effect of definitions, shall be given controlling effect. This is especially true where the term or phrase was created by the very statute in which it appears. Thus, if the Copyright Office should attempt to modify this statutory definition, there is no other body of law to which we could look for guidance. (45 FR 45271)

Because the DSE definition does not *require* the accumulation of part-time DSE values based on lack of activated channel capacity to equal, at a minimum, the full DSE value of the part-time station most frequently carried, the Copyright Office does not believe it has the authority to impose such requirement by regulation.

3. *Classification of Canadian, Mexican, and Specialty television stations.* Although the cable compulsory license principally concerns the retransmission of domestic signals, section 111(c)(4) extends the compulsory license to the retransmission of Mexican and Canadian signals by "grandfathered" U.S. cable systems and by U.S. cable systems located within the limited border zones of Mexico and Canada respectively. As part of its comments to Docket No. RM 79–4, the MPAA questioned the validity of form CS/SA–3 filings which classify carriage of Canadian television stations as "network" stations and assign to them a DSE value of one-quarter. Because of its significance in the royalty calculation process, the Office sought testimony during the July 1981 hearing as to whether Canadian and Mexican

[11] By "full-time carriage" the Office means carriage in excess of the partial or limited carriage for which proration is specifically allowed in the DSE definition.

[12] The NCTA at the July 28, 1981, public hearing and in briefs submitted to the D.C. Court of Appeals in *NCTA* v. *Columbia Pictures Industries*, Civ. No. 83–2765, D.D.C. Sept. 21, 1983 (made part of this record by NCTA's submission of December 22, 1983) argued that payment of royalties based upon the amount of amount of actual use is a basic principle of copyright law. In support of that argument, NCTA cites *Sheldon* v. *M-G-M*, 81 F.2d 49 (2nd Cir. 1936) *aff'd.* 300 U.S. 390 (1940). The Copyright Office finds no support for this proposition in copyright law generally and certainly not in the *Sheldon* case. *Sheldon* applied the patent rule of apportionment of profits attributable to the infringment. The case does not affect actual damages or statutory damages; it certainly does not purport to confirm a principle that the copyright owner may expect compensation based on the amount of the use only and not on factors such as the value of property, the nature of the work and the market for it, and the transaction costs of a per use method of payment. In the ordinary case, the Copyright Act does not regulate the amount of compensation a copyright owner may receive. The copyright owner enjoys an exclusive right and if someone wishes to make use of a copyrighted work in a way restricted by 17 U.S.C. 106 (the exclusive rights provision), the compensation is set by voluntary agreement between the copyright owner and the user. Those voluntary agreements may be based on use, but are not necessarily so. For example, performing rights for nondramatic music are generally licensed on a "blanket" basis—the opposite of a per use basis. Many contracts for other works or other uses are for a term of years and permit unlimited use during the period. It is true that motion pictures are frequently licensed on a per use basis, but this is not a "principle of copyright law." In any event, cable retransmission of broadcast programming is subject to a compulsory license. Compensation is set by the statute (as adjusted by the CRT). The formula is complex and varies depending on the size of the cable system and the definition of DSE value. Actual carriage is important in some cases, but it is clearly not the sole principle on which cable royalties are computed. A cable system grossing less than $55,500 for a given six month period pays $20 in copyright royalties irrespective of the amount of actual carriage.

[13] The MPAA made its proposal before FCC deregulation, when proration of the DSE was also permitted for part time carriage pursuant to the FCC's late night and specialty rules.

television stations carried on a distant basis should be classified instead as "independent stations" with a corresponding DSE value of one. The Copyright Office received three comments in response to this inquiry. Two large MSO's suggested that the Office resolve this issue through use of the FCC definition of "independent station" under 47 CFR 76.5(n):

> (n) *Independent station.* A commercial television broadcast station that generally carries in prime time not more than 10 hours of programming per week offered by the three major national television networks.

The MSO's imply that adoption of this definition would enable certain Canadian stations to be classified as "network" stations.

Testimony offered by representatives of the program supply industry, on the other hand, suggested that classification of foreign television stations as "network" stations is contrary to the definition of "network" and "independent" stations included in section 111(f) of the copyright law and that Canadian and Mexican stations must be classified as "independent stations," for purposes of computing DSE values. The Copyright Office agrees with this view.

Section 111(f) defines a "network station" as:

> * * * a television broadcast station that is owned or operated by, or affiliated with, one or more of the television networks in the United States providing nationwide transmissions, and that transmits a substantial part of the programming supplied by such networks for a substantial part of that station's typical broadcast day.

The subsection then defines an "independent station" as "* * * a commercial television broadcast station other than a network station."

Canadian and Mexican television stations fail to meet several of the qualifying "network" standards set forth above. First, neither Canadian nor Mexican stations are owned or operated by, or affiliated with any of the United States television networks. Second, with respect to Canadian stations, the regulations of the Canadian Radio-Television Telecommunications Commission impose foreign content limits of 40% in every Canadian licensee's program schedule, with 45% allowable in prime time. Although specific limits are not included in the U.S. copyright law definition of "network station," it is unlikely that carriage under the Canadian foreign content limits would constitute a *"substantial* part of the programming *supplied* by such networks for a *substantial* part of that station's typical broadcast day." (Emphasis added). Third, even if the "substantiality" test noted above were met, foreign stations would still fail to meet the "supplied" test since they acquire broadcast rights to such programming directly from the program supply copyright holders rather than through U.S. television networks.

If foreign stations cannot be considered "network stations" within the meaning of section 111(f), and they plainly cannot be considered "noncommercial educational stations" as defined in section 397 of title 47 United States Code, then they must be classified as independent stations for the purpose of assigning the DSE value.

Although the Office did not specifically invite comment with respect to the DSE value for specialty stations in the United States, one cable system operator suggested that the Copyright Office should encourage carriage of "socially useful" signals by permitting cable systems to assign either no DSE value, or a greatly reduced DSE value, for carriage of specialty stations. The general reasoning applicable to Canadian and Mexican stations leads to the same conclusion when applied to specialty stations. The Copyright Office in examining Statements of Account has consistently taken the position that specialty stations must be assigned a DSE value of one, since they do not meet the more specific alternative definitions of "network station" or "noncommercial educational station." The Office emphasizes that this interpretation applies to 17 U.S.C. 111 solely for the purposes of computing DSE values. In order to make these points clear, the Office is adding a new subparagraph (5) to § 201.17(f), which is concerned with computation of DSE's. The new language reads:

> (5) For the purposes of computing DSE values, specialty primary television transmitters in the United States and all Canadian and Mexican primary television transmitters shall be assigned a value of one.

4. *Part-time carriage log.* Under present Copyright Office regulations, cable systems are required to log in Space J of Statement of Account forms CS/SA–2 and CS/SA–3 their carriage on a part-time basis of specialty and late-night programming, and other part-time carriage where they lack the activated channel capacity to retransmit on a full-time basis all signals which they are authorized to carry. These logging requirements first were imposed in 1978 on the assumption that this information "may reasonably be relevant to the question of royalty distribution." (43 FR 960.) Since 1978, the CRT and the copyright claimants to the cable royalty pools have had practical experience in several royalty distribution proceedings. In light of this experience, the Copyright Office decided to review the underlying basis for these logging requirements. The review, however, was limited to form CS/SA–2 since the information on part-time carriage included in form CS/SA–3 remains essential to the royalty calculation process.

The Copyright Office heard testimony and received comments from eight diverse organizations in response to this inquiry. Of these groups, only the National Association of Broadcasters (NAB) advocated retention of the log, at least until the CRT and the claimants gain further experience in the distribution of royalties. The NAB also was critical of any distinction made between "form 2" and "form 3" systems noting that the degree of harm caused copyright owners or the benefits received by multiple "form 2" cable systems is equivalent to the harm and benefits accruing from one "form 3" system serving the same number of subscribers. Therefore, the NAB suggests that these systems be treated equally with respect to their filing requirements.

The Copyright Office takes no position on the validity of the NAB "harm-benefit" analysis. Notwithstanding, the Office proposes to eliminate the part-time carriage log from form CS/SA–2 for several reasons. First, the log is employed on form CS/SA–2 solely to provide information for the CRT royalty distribution proceedings, which have, to date, concentrated on cable systems filing form CS/SA–3. Second, the Office's interim regulation of May 20, 1982 (47 FR 21786) eliminated the part-time logging requirements for carriage of late-night and specialty programming, which should further reduce the utility of the log in the royalty distribution process. Finally, the proposal by the Copyright Office to clarify the occasions when a cable system may appropriately claim part-time carriage because of "lack of activated channel capacity," discussed *infra*, may further reduce the significance of the log.

5. *Lack of activated channel capacity.* The DSE definition permits a cable system that completes form CS/SA–3 to reduce the full DSE value of television broadcast stations carried on a part-time basis where "the cable system lacks the activated channel capacity to retransmit on a full-time basis all signals which it is authorized to carry * * *" (hereafter "LAC capacity"). During its examination of Statements of Account, the Copyright Office has noted several

instances where cable systems have employed this provision and, at the same time, appeared to be using one or more of their activated channels for services other than secondary transmissions (*e.g.*, local origination, subscription services, etc.). Because of the uncertainty surrounding the applicability of the LAC capacity provision in this circumstance, the Copyright Office sought the views of the interested parties.

The Office received testimony and comments from seven groups in response to this inquiry. Organizations representing cable operators commented favorably on the ability of a system to utilize "lack of activated channel capacity" as a basis to reduce the ordinary DSE value in the situation noted above. In particular, they contended that cable operators should not be obligated to pay royalties for full-time carriage when a signal is carried only part-time. They also noted that, under the recent FCC deregulation eliminating its distant signal limitations, it is no longer *possible* for a cable system to retransmit all signals which it may be *authorized* to carry. Thus, the cable spokesmen suggest that all "form 3" cable systems now should be able to apply this provision for any and all part-time carriage. On the other hand, representatives of copyright proprietors advocated a strict interpretation of the DSE definition to eliminate use of the LAC capacity provision in cases where non-secondary transmission services are provided by a cable system.

After a thorough review of the parties' comments and the Copyright Act and its legislative history, the Copyright Office has determined for the following reasons that the intent of the LAC capacity provision limits its application to occasions where *all* of a cable system's activated channel capacity is devoted to secondary transmissions. First, as has been discussed in detail in previous Copyright Office rulemakings relating to this issue, the Office has concluded "that Congress clearly did not intend to establish an open-ended policy of permitting the reduction of DSE values to correspond to actual signal carriage." (45 FR 45271). Acceptance of the cable industry's position on this matter would invariably lead to this unintended result. Second, the statute specifically provides that proration of a DSE under the guise of lack of activated channel capacity may be available only where it is not *possible* for a cable system to retransmit all signals which it is authorized to carry. While the Commission's deletion of its distant signal limitations theoretically negates any possibility of carriage by a cable system of all signals which it is authorized to carry, the devotion of one or more of a system's activated channels to non-secondary transmission services evidences a conscious decision by the cable operator to refrain from carrying as many secondary transmissions as otherwise possible.[14]

In order to effectuate this decision, the Office is adopting a new definition in § 201.17(b) to read as follows:

> (10) For purposes of this section, a cable system "lacks the activated channel capacity to retransmit on a full-time basis all signals which it is authorized to carry" only if: (A) All of its activated television channels are used exclusively for the secondary transmission of television signals; and (B) the number of primary television transmitters secondarily transmitted by the cable system exceeds the number of its activated television channels.

The Office also proposes to make corresponding modifications to the Statement of Account forms, by June 1984.

6. *Gross Receipts for "Basic Service"—the "Tiering Issue."* Section 111(d)(2) of the Act requires cable systems to compute their statutory royalty payments on the basis of their gross receipts paid by subscribers "for the basic service of providing secondary transmissions of primary broadcast transmitters." Cable systems have frequently questioned the appropriate determination of gross receipts in cases where: (1) The minimum service package includes services in addition to the retransmission of radio and television signals, or (2) secondary transmissions are included in various tiers of service packages upon payment of separate charges for each service package or "tier." Since the choice of service packages above minimum service ordinarily rests with the subscriber, different subscriber groups arise for a given tier of service. Cable systems frequently have urged to the Copyright Office that they should be allowed to allocate the gross receipts in some way to reflect the precise amounts received from subscriber groups for the "secondary transmission" services.

In 1978, the Copyright Office specifically addressed the meaning of "gross receipts" (43 FR 27828) with respect to the inclusion in minimum cable service of local origination services (such as time and weather and automated services). At that time, the Office concluded that a cable system could not allocate a portion of the monthly service fee to the local origination services and report only the balance as "gross receipts." The Office's rationale for this decision was that the origination and retransmission services are clearly part of an integral package offered to subscribers and that there is no statutory justification or basis for allocating the monthly fee.

The Copyright Office, in examining Statements of Account since 1978, has generally questioned any allocation of gross receipts where secondary transmission service has been combined with a non-broadcast service for a single subscriber fee for the package of services, either with respect to minimum service or through the tiered approach. If a cable system has reported gross receipts applying its own formula for allocation, however, the Office would not ordinarily be aware of this in examining Statements of Account, unless the cable system voluntarily disclosed to us its allocation of gross receipts.

Since 1978, many cable systems have made various satellite origination networks (such as CNN, ESPN, and USA) and other non-broadcast services available to their subscribers, sometimes in combination with secondary transmission service. When the copyright law was enacted in 1976, cable systems generally transmitted all of their secondary transmissions to their subscribers for a single monthly service charge. Computer micronization has led to the development of "addressable" channel converters enabling cable systems to offer their subscribers a wider range of program selection through different tiers of service consisting of a specified number of channels, purchasable by subscribers at various increments of cost.

In light of these developments, the NCTA suggested in its comments to the Office's July 3, 1980, rulemaking proceeding, that the Office reconsider its earlier decision concerning "gross receipts." The Office decided to consider the "tiering" issue in general, and, as part of the July 1981 hearing, the Copyright Office sought testimony and comments on the implications of tiering.

Many of the comments indicated that the issue is best addressed with respect to the determination of "gross receipts" rather than DSE's. Comments received from cable television operators asserted that cable systems should be required to include as part of their basic service "gross receipts," only that part of their minimum service or tiered revenues attributable to secondary transmission service. The NCTA suggested that, for purposes of simplicity, a cable system

[14] *See In re Arlington Telecommunications Corp.*, Memorandum Opinion and Order of the FCC, 84-87; No. 34233; (February 3, 1984).

should report its entire receipts for all tiers as part of its basic service "gross receipts" in cases where the tier contains any secondary transmissions, but application of these receipts in the royalty calculation process should be limited to that subscriber segment receiving the tiered signals rather than the system's total number of subscribers. On the other hand, representatives of professional sports and the MPAA opposed any allocation or apportionment of gross receipts by subscriber groups, as suggested by the NCTA or by any other method. Instead, these groups requested that the regulations specify that all gross receipts attributable either to minimum service or to any tier of service containing secondary transmissions must be included in the calculation of royalties for the entire cable system, and that the gross receipts and DSE's should be aggregated.

As noted, tiering marketing strategies were not fully contemplated when the current law was enacted. Accordingly, the statute does not specifically accommodate tiering. The Act provides no guidance whatsoever either to the Copyright Office or cable systems regarding the method [15] for attempting any allocation of gross receipts.[16] The Office has been given no specific delegation of regulatory authority to establish a method for allocation. Under the circumstances, the Office has doubted whether it has the authority to establish a method for allocation of gross receipts. Even if that authority could be found under the general rulemaking power of 17 U.S.C. 702, what allocation method would be fair to all interests, and what kinds of controls and verification would be needed to avoid abuse?

The 1982 cable rate adjustment tends to enlarge the Office's doubts about the appropriate method for allocation, if any, since certain signals will cost substantially more than others. Thus, the NCTA's suggestion that the royalty should be calculated based on the segregated revenues for each tier applied to the DSE's for that tier, rather than on aggregated gross receipts and DSE's, would seem open to substantial manipulation of signals and tiers.

The Copyright office has concluded that the Copyright Act does not permit any proration or other allocation of either DSE's or gross receipts by subscriber groups where any secondary transmission service is combined with nonbroadcast services in program packages, clusters, or tiers. We confirm in regulations the interpretation of the Copyright Act applied by the Licensing Division of the Office since 1978.

The Office recognizes that cable marketing practices have changed drastically since 1976, but the Office cannot provide the flexibility requested by cable systems absent guidance from the Congress or the courts. To a large extent, subject to arrangements with local franchising authorities, a cable system can control its own "tiering" destiny. The system can offer secondary transmission services solely as part of minimum service or on discrete tiers, excluding expensive origination services in either case.

Accordingly, the Office is amending the definition of gross receipts for the "basic service of providing secondary transmissions of primary broadcast transmitters" to specify that allocation is not permitted where broadcast and non-broadcast services are combined in separate packages or tiers, chargeable at a single fee for the combined service. Section 201.17(b)(1) as amended reads:

(1) Gross receipts for the "basic service of providing secondary transmissions of primary broadcast transmitters" include the full amount of monthly (or other periodic) service fees for any and all services or tiers of services which include one or more secondary transmissions of television or radio broadcast signals, for additional set fees, and for converter fees. All such gross receipts shall be aggregated and the DSE calculations shall be made against the aggregated amount. Gross receipts for secondary transmission services do not include installation (including connection, relocation, disconnection, or reconnection) fees, separate charges for security, alarm or facsimile services, charges for late payments, or charges for pay cable or other program origination services: Provided That, the origination services are not offered in combination with secondary transmission service for a single fee.

7. *All-band FM.* One of the most difficult issues that the Copyright Office has faced in administering the cable television compulsory license has concerned the appropriate identification of FM radio signals carried by a cable system on an "all-band" basis. In an effort to assure compliance by cable systems with their statutory responsibilities while minimizing burdensome monitoring by them, the Copyright Office adopted a two-pronged regulation in 1978. The first element of the regulation permits cable systems carrying "all-band" FM, to adopt monitoring systems such as the periodic use of a good FM receiver during optimum weather conditions for the area, which can *reasonably be expected* to identify radio signals meeting certain specified time and strength standards. The second part of the regulation requires these affected cable systems to describe in part 3 of Space H of the Statement of Account form the monitoring systems so employed.

As part of the July 1981 hearing, the Office sought testimony and comments on whether or not cable systems carrying "all-band" FM should continue to be required to describe their monitoring activities. All of the comments received on this point favored the elimination of this reporting requirement and the Office is deleting subclause (v) of the § 201.17(e)(10) of its regulations and will eliminate part 3 of Space H of the Statement of Account form accordingly. It should be emphasized, however, that cable systems which continue to retransmit FM radio signals on an "all-band" basis still are required to identify the signals so carried.

Representatives of National Public Radio (NPR), the American Society of Composers, Authors and Publishers (ASCAP), and the National Association of Broadcasters (NAB) expressed the view that, based on their examination of submitted Statements of Account, many cable systems either misunderstand or disregard the instructions relating to Space H. The commentators noted that some cable systems properly answer "No" in part 1, designating no "all-band" carriage, but then neglect to complete part 2 to indicate those radio signals which the cable system processed separately. The Copyright Office agrees that part 1 of Space H may result in some confusion and believes that it can

---

[15] The first allocation question is whether allocation would be permitted with respect to minimum service received by all subscribers, as well as tiered services received by different subscriber groups. Secondly, in addition to the segmentation by subscriber groups proposed by NCTA, other methods might be: (1) Simple apportionment of revenues for each signal on a tier (a cable system might then "load-up" a secondary transmission tier with inexpensive or free program origination services, thereby diluting the amount of royalties due); (2) evaluation of the programming carried on certain tiers, with respect to the market value of the programming and/or the popular appeal of the signal, as measured by some marketing device. Another method, not relating to gross receipt allocation, would be to prorate the DSE to reflect the protion of subscribers receiving a secondary transmission (this method is contrary to the Office's interpretation of the Act that the DSE value cannot be prorated or allocated except as specifically provided in the definition itself).

[16] The Act permits allocation of gross receipts in one instance, unrelated to tiering: where a cable system is located partly within and partly without the local service area of a primary transmitter, gross receipts are allocated to reflect gross receipts derived from subscribers located outside the local service area of such primary transmitter. 17 U.S.C. (d)(2)(B)(iv). The Office has concluded that this provision, which is based on the fundamental distinction between distant and local signals, does not evince any congressional intent to allow allocation in the unrelated case of tiering.

be reduced through simplification of the Statement of Account form. Accordingly, the office intends to delete part 1 of Space H in its entirety and add a new column to part 2 for identifying a radio station that was electronically processed by the system as a separate and discrete signal.

ASCAP and NPR also noted problems which they have encountered during the CRT royalty distribution proceedings due to the lack of an adequate statutory or regulatory definition of "distant" radio carriage. The commentators have asked the Copyright Office to resolve this situation through the adoption in our regulations of a definition of "distant" radio carriage. The Copyright Office has decided not to act on this request. Section 111(f) of the copyright law provides in part that

> The "local service area of a primary transmitter," in the case of a radio broadcast station, comprises the primary service area of such station, pursuant to the rules and regulations of the Federal Communications Commission.

Carriage outside of this local service area constitutes "distant" carriage. The Office cannot provide the desired clarification.

8. *Specification of local television carriage.* Cable systems that complete Statement of Account form CS/SA-3 compute their statutory royalty payment on the basis of their carriage of distant non-network programming. For this purpose, a television station is considered as "local," and hence not considered in the calculation of royalties, if it "is entitled to insist upon its signal being retransmitted * * * pursuant to rules, regulations, and authorizations of the Federal Communications Commission in effect on April 15, 1976" (*i.e.*, within Grade B contour, significantly viewed, etc.). Copyright Office regulations and Statement of Account forms CS/SA–2 and CS/SA–3 currently [17] require cable system operators to indicate whether television stations carried by them are "local" or "distant."

In their comments to the July 3, 1980, Copyright Office rulemaking proceeding, the MPAA suggested that cable systems also be required to specify the particular basis under which they classify particular television station carriage as local. The MPAA believes that this additional requirement would reduce the number of innocent errors in the designation of carriage and would enhance the reviewability of the Statement of Account forms by copyright proprietors and cable system operators. As part of our July 1981 hearing, the Copyright Office sought the views of other interested parties regarding this suggestion.

In response, the Office received comments from four groups of cable operators, all objecting to the suggestion. They noted that the information is presently readily available in FCC files and numerous cable television data publications.

Although the Office does not believe that the further specification of local television carriage would impose great burdens on cable operators, we have decided against adding this regulatory requirement in light of the availability of the information from other sources.

9. *Statement of Account forms and royalty computations.*

a. *CS/SA–2 forms.* Cable systems completing Statement of Account form CS/SA–2 compute their statutory royalty payments through use of either a seven- or eight-step mathematical formula set forth in Space L. In their comments to the July 3, 1980, Copyright Office rulemaking proceedings, the MPAA proposed that the Office adopt a simplified, four-step formula which, they suggest, achieves the same results as the present formulas. Prior to the July 1981 hearing, the Copyright Office published the proposed formula in the **Federal Register** (46 FR 30651) for comment and review.

During the hearing, both the MPAA and the NCTA testified that the proposed formula reached comparable results as the two somewhat longer formulas now used and, therefore, favored its adoption. On the other hand, comments received from two multi-system operators requested that the Copyright Office delay consideration of this matter until completion of judicial review of the CRT "inflationary" rate adjustment, which has now been sustained on appeal.[18]

Although the proposed formula is shorter than the two existing formulas, the Copyright Office believes that the benefits to be gained through simplification are minimal. Furthermore, the two existing formulas track the statutory language of the calculations as set forth in sections 111(d)(2) (C) and (D) of the statute, and, in the opinion of the Copyright Office, lead to a better understanding by cable operators of the royalty computation process under the compulsory license. The Copyright Office believes that this instructional aspect, in addition to its familiarity in use during the last eight accounting periods, far outweighs any benefits that may be derived through use of a simplified formula. Accordingly, the Office has decided to retain the two formulas as presently written.

b. *CS/SA–3 forms.* The MPAA has, for several years, also sought the revision of the royalty calculation process on form CS/SA–3 through the use of a table to convert total DSE's to percentage decimals. The Copyright Office suggests that representatives of the cable industry meet with copyright proprietors to develop joint recommendations concerning simplification of this calculation process.

c. *All forms.* In its July 1981 testimony, the MPAA pointed out that many combined "individual" cable systems often innocently report as several individual systems in violation of the statute and Copyright Office regulations. In an effort to detect and possibly avoid these innocent infractions, the MPAA recommended that: (1) The Statement of Account forms prominently set forth the circumstances when two or more individual systems must report as one system; (2) the system specify the location of its headend; and (3) the system provide its FCC-assigned "physical system" and "community name" code numbers.

The Copyright Office believes that the number of inadvertent "individual" filings has decreased since 1978 due, in part, to the better understanding by cable operators of their obligations under the compulsory license. Therefore, while the Office will continue prominently to include in the Statement of Account instructions the combined "individual" system filing requirements, we have decided against imposing additional filing requirements on cable operators, subject to our ongoing review of procedures to implement the 1982 cable rate adjustment.

d. *Special form for small systems.* Finally, one cable television operator suggested that the Copyright Office define "small" cable television systems as those serving fewer than 1,000 subscribers and allow more liberal reporting requirements for such systems.

The Office has attempted, throughout its administration of the compulsory license mechanism, to reduce the filing burdens imposed on smaller cable systems. the amendments included in this rulemaking attempt to continue this trend. However, the Office has no authority to waive or reduce certain statutory-prescribed filing requirements on the basis of the number of a cable system's subscribers.

* * * * *

[17] As discussed at point 4 *supra*, the Office is eliminating the part-time carriage log for CS/SA–2 systems in the final regulation.

[18] NCTA v. CRT, 689 F. 2d 1077 (D.C. Court of Appeals; 1982).

For the foregoing reasons, the Copyright Office is amending the stated portions of 37 CFR 201.11 and 201.17, effective June 1, 1984. The issues and policies covered by this rulemaking have been the subject of a public hearing and extensive public comment. The regulations are either interpretive of the Copyright Act or concern technical adjustments in the Statement of Account forms. In order to prepare the revised forms for publication in June 1984, the final regulations will be effective on June 1, 1984. The Office invites public comment specifically on the language of the final regulations, but they will be effective on June 1, 1984, in the form they are published today, unless the Office subsequently publishes a notice to the contrary. To the extent that the rules are interpretive of the Copyright Act and confirm past examining practices of the Copyright Office, the Office may cite these regulations in examining Statements of Account from today forward.

With respect to the Regulatory Flexibility Act, the Copyright Office takes the position this Act does not apply to Copyright Office rulemaking. The Copyright Office is a department of the Library of Congress and is part of the legislative branch. Neither the Library of Congress nor the Copyright Office is an "agency" within the meaning of the Administrative Procedure Act of June 11, 1946, as amended (title 5, Chapter 5 of the United State Code, Subchapter II and Chapter 7). The Regulatory Flexibility Act consequently does not apply to the Copyright Office since that Act affects only those entities of the Federal Government that are agencies as defined in the Administrative Procedure Act.[19] To the extent that the regulations are interpretive, moreover, they are not subject to the Regulatory Flexibility Act in any event.

Alternatively, if it is later determined by a court of competent jurisdiction that the Copyright Office is an "agency" subject to the Regulatory Flexibility Act, the Register of Copyrights has determined that the regulations will have no significant impact on small businesses. The regulations primarily affect large MSO cable systems who file CS/SA–3 forms.

[19] The Copyright Office was not subject to the Administrative Procedure Act before 1978, and it is now subject to it only in areas specified by section 701(d) of the Copyright Act (i.e., "all actions taken by the Register of Copyrights under this title (17)," except with respect to the making of copies of copyright deposits). (17 U.S.C. 706(b)). The Copyright Act does not make the Office an "agency" as defined in the Administrative Procedure Act. For example, personnel actions taken by the Office are not subject to APA-FOIA requirements.

List of Subjects in 37 CFR Part 201

Cable television, Copyright, Copyright Office.

Final Regulations

In consideration of the foregoing, Part 201 of 37 CFR Chapter II is amended in the manner set forth below.

A. Section 201.11 is amended as follows:

1. Paragraph (c)(2) of § 201.11 is removed in its entirety.

* * * * *

2. Paragraph (d)(4) of § 201.11 is removed in its enfirety and paragraph (d)(5) is redesignated paragraph (d)(4).

* * * * *

3. Paragraph (e)(2) of § 201.11 and accompanying footnote 5 are removed in their entirety.

4. Paragraph (e)(3) of § 201.11 is redesignated paragraph (e)(2) and is revised to read as follows:

§ 201.11 Notice of identity and signal carriage complement of cable systems.

* * * * *

(e) * * *

(1) * * *

(2) *Special (Required) Amendments for Certain Cable Systems.* Any cable system which records an Initial Notice of Identity and Signal Carriage Complement and is required by the last sentence of paragraph (c)(1)(iv)(B) of this section to record a special amendment shall, no later than one hundred and twenty days after recordation of the Initial Notice, record an amendment to that Notice identifying the primary transmitter or primary transmitters of FM signals generally receivable by the system as of the date of the amendment in accordance with paragraphs (c)(1)(iv) (A) and (B) of this section. Such amendment shall: (i) Be clearly and prominently identified as an "Amendment to Initial Notice of Identity and Signal Carriage Complement"; (ii) specifically identify the Initial Notice intended to be amended so that it may be readily located in the records of the Copyright Office; and (iii) be signed and dated in accordance with paragraph (c)(1)(v) of this section. The signature shall be accompanied by the printed or typewritten name of the owner of the system as given in the Notice sought to be amended.

* * * * *

5. The reference to "paragraph (e)(3)" in the last sentence of paragraph (B) of § 201.11(c)(1)(iv) is changed to read "paragraph (e)(2)."

* * * * *

B. Section 201.17 is amended as follows:

§ 201.17 Statements of Account covering compulsory licenses for secondary transmissions by cable systems.

* * * * *

1. Paragraph (b)(1) of § 201.17 is revised to read as follows:

(b) *Definitions.* (1) Gross receipts for the "basic service of providing secondary transmissions of primary broadcast transmitters" include the full amount of monthly (or other periodic) service fees for any and all services or tiers of services which include one or more secondary transmissions of television or radio broadcast signals, for additional set fees, and for converter fees. All such gross receipts shall be aggregated and the DSE calculations shall be made against the aggregated amount. Gross receipts for secondary transmission services do not include installation (including connection, relocation, disconnection, or reconnection) fees, separate charges for security, alarm or facsimile services, charges for late payments, or charges for pay cable or other program origination services: Provided That, the origination services are not offered in combination with secondary transmission service for a single fee.

* * * * *

2. A new paragraph (b)(10) is added to § 201.17 and reads as follows:

* * * * *

(b) * * *

(10) For purposes of this section, a cable system "lacks the activated channel capacity to retransmit on a full-time basis all signals which it is authorized to carry" only if: (A) All of its activated television channels are used exclusively for the secondary transmission of television signals; and (B) the number of primary television transmitters secondarily transmitted by the cable system exceeds the number of its activated television channels.

* * * * *

3. Paragraph (e)(5) of § 201.17 is revised to read as follows:

* * * * *

(e) * * *

(5) The designation "Channels," followed by: (i) The number of channels on which the cable system made secondary transmissions to its subscribers, and (ii) the cable system's total activated channel capacity, in each case during the period covered by the Statement.

* * * * *

4. Paragraph (e)(8) of § 201.17 is revised to read as follows:

* * * * *

(e) * * *

(8) The designation "Services Other Than Secondary Transmissions: Rates," followed by a description of each package of service which consists solely of services other than secondary transmission services, for which a separate charge was made or established, and which the cable system furnished or made available to subscribers during the period covered by the Statement of Account, together with the amount of such charge. However, no information need be given concerning services furnished at cost. Specific amounts charged for pay cable programming need not be given if the rates are on a variable, per-program basis. (The fact of such variable charge shall be indicated.)

* * * * *

5. Paragraph (e)(9)(vii) of § 201.17 is revised to read as follows:

* * * * *

(e) * * *

(9) * * *

(vii) The information indicated by paragraph (e)(9), subclauses (v) and (vi) of this section, is not required to be given by any cable system that appropriately completed Form CS/SA–1 or Form CS/SA–2 for the period covered by the Statement.

* * * * *

6. Paragraph (e)(10)(i) of § 201.17 is revised to read as follows:

* * * * *

(e) * * *

(10) * * *

(i) A designation as to whether each primary transmitter was electronically processed by the system as a separate and discrete signal.

* * * * *

7. Paragraph (e)(10)(v) of § 201.17 is removed in its entirety.

* * * * *

8. Paragraph (f)(2) of § 201.17 is revised to read as follows:

* * * * *

(f) * * *

(2)(A) where a cable system carries a primary transmitter on a full-time basis during any portion of an accounting period, the system shall compute a DSE for that primary transmitter as if it was carried full-time during the entire accounting period.

(B) where a cable system carries a primary transmitter solely on a substitute or part-time basis, in accordance with subparagraph (3) of this paragraph (f), the system shall compute a DSE for that primary transmitter based on its cumulative carriage on a substitute or part-time basis. If that primary transmitter is carried on a full-time basis as well as on a substitute or part-time basis, the full DSE for that primary transmitter shall be the full DSE type value for that primary transmitter, for the entire accounting period.

* * * * *

9. A new paragraph (f)(5) is added to § 201.17 and reads as follows:

* * * * *

(f) * * *

(5) For the purposes of computing DSE values, specialty primary television transmitters in the United States and all Canadian and Mexican primary television transmitters shall be assigned a value of one.

* * * * *

10. The last sentence of § 201.17(g) is amended by removing the numerals "0.675" and substituting "0.799" in lieu thereof.

BILLING CODE 1410-03-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-VI-FRL-2553-4]

Oklahoma Regulation 1.4—Air Resources Management—Permits Required

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: This notice approves a revision to Oklahoma Air Pollution Control Regulation 1.4—Air Resources Management—Permits Required which adds 2 parts to subsection 1.4.1(c) Necessity to Obtain Permits. The revision was adopted by the Oklahoma State Board of Health on May 12, 1983, and submitted by the Governor on May 19, 1983. The purpose of the revision is to make subsection 1.4.1(c) clear. On September 23, 1983, the State submitted a letter of clarification on subsection 1.4.1(c)(3).

DATE: This action will be effective May 2, 1984 unless notice is received within 30 days that someone wishes to submit adverse or critical comments.

ADDRESSES: Incorporation by reference material is available for inspection during normal business hours at the following locations:

The Office of the Federal Register, 1100 L Street NW., Washington, D.C., Rm. 8401.

Environmental Protection Agency, Public Information Reference Unit, EPA Library Rm. 2404, 401 M Street SW., Washington, D.C. 20460

Environmental Protection Agency, Region 6, Air Branch, 1201 Elm Street, Dallas, Texas 75270

Oklahoma State Department of Health, 1000 Northeast 10th Street, P.O. Box 53551, Oklahoma City, Oklahoma 73152

FOR FURTHER INFORMATION CONTACT: Kathryn Griffth, State Implementation Plan Section, Environmental Protection Agency, Region 6, Air and Waste Management Division, Air Branch, 1201 Elm Street, Dallas, Texas 75270, (214) 767–9853.

SUPPLEMENTARY INFORMATION: On May 19, 1983, the Governor of Oklahoma submitted a revision to Regulation 1.4—Air Resources Management—Permits Required. The revision adds two parts to subsection 1.4.1(c) Necessity to Obtain Permits to make it clear. EPA has reviewed the State's submittal and developed an evaluation report.[1] This evaluation report is available for inspection by interested parties during normal business hours at the EPA Region 6 office and the other addresses listed above.

The State submitted a letter of clarification dated September 23, 1983, on subsection 1.4.1(c)(3) which clarified "minor significance." EPA's concern was whether or not a major source or modification could ever be of minor significance and therefore not require a permit. The letter of clarification states "A major source or modification could not be minor. Therefore, all major emission sources will have permits." Major sources or major modifications, as defined in Regulation 1.4 and approved by EPA, are required to have a permit. This exemption only applies to those other sources which are determined on a case by case basis to be of minor significance. EPA accepts the State's clarification. Therefore, EPA is approving the revision.

Since the revision included in this approval notice is considered

[1] EPA Review of Oklahoma State Implementation Plan Revision to Regulation 1.4—Air Resources Management—Permits Required.

administration in nature and minor in substance, EPA is approving this revision without prior proposal. The public should be advised that this action will be effective 60 days from the date of this Federal Register Notice. However, if notice is received within 30 days that someone wishes to submit adverse or critical comments, this action will be withdrawn and two subsequent notices will be published before the effective date. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2)).

Incorporation by reference of the State Implementation Plan for the State of Oklahoma was approved by the Director of the Federal Register on July 1, 1982.

This notice of final rulemaking is issued under the authority of Section 110 of the Clean Air Act, as amended, 42 U.S.C. 7410.

40 CFR Part 81

[A-III-FRL-2555-8; EPA Docket No. 107-PA-10

Designation of Areas for Air Quality Planning Purposes Approval of Section 107 Designation for the Commonwealth of Pennsylvania

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: EPA is today announcing the approval of a request submitted by the Commonwealth of Pennsylvania to redesignate the Lower Beaver Valley Air Basin (Beaver County) to a "Better than National Standards" status with respect to the National Ambient Air Quality Standards (NAAQS) for sulfur dioxide (SO_2). This change is based on a dispersion modeling study and on eight consecutive calendar quarters of air quality monitoring data showing attainment.

EFFECTIVE DATE: May 2, 1984.

ADDRESSES: Copies of the revision and accompanying documents are available during normal business hours at the following offices:

U.S. Environmental Protection Agency, Region III, Air Management Branch, Curtis Building, 2nd floor, Sixth & Walnut Streets, Philadelphia, PA 19106. Attn: Eileen M. Glen

Commonwealth of Pennsylvania, Department of Environmental Resources, Bureau of Air Quality Control, 200 North 3rd Street, Harrisburg, PA 17120. Attn: Gary Triplett.

FOR FURTHER INFORMATION CONTACT: Eileen M. Glen (3AW11) at the EPA, Region III address above or call 215/597-8187.

SUPPLEMENTARY INFORMATION: The Pennsylvania Department of Environmental Resources has submitted to the U.S. Environmental Protection Agency (EPA), a request to redesignate the Lower Beaver Valley Air Basin (Beaver County, Pennsylvania) from nonattainment to "Better than National Standards" status for SO_2 under Section 107 of the Clean Air Act and 40 CFR Part 81.

The air quality data for January 1980 through the later part of 1982 indicate that this area shows no violations of the SO_2 air quality standards. EPA has examined the air quality data collected from the three monitoring sites used to demonstrate attainment and found that the data were collected in accordance with all EPA requirements. Also, the H.E. Cramer modeling study (EPA-903/9-81-001) has demonstrated SO_2 attainment for the Lower Beaver Valley Air Basin, considering the greater of either SIP allowable or actual emissions for the sources in that area.

EPA, on August 8, 1983, published a proposed rulemaking at 48 FR 35920 approving the redesignation. As a result of the Federal Register notice, EPA received two comments regarding the proposed redesignation for the Lower Beaver Valley Air Basin. One comment, received from a local company, was in favor of the redesignation and one comment, also received from a local company, was opposed to the redesignation.

In its letter dated September 6, 1983, the opposing company questioned both the emission inventory used for their boilers and the modeling results showing the impact of the individual sources. As a result, we requested the Pennsylvania Department of Environmental Resources (DER) review the emission factors and the validity of the modeling results used in the Cramer report.

In response to the emission inventory that was used, DER stated that the emission inventory was developed back in 1976 using the best available information and this was then projected to 1980 using reasonable operating levels and taking into consideration future modifications. Thus, the inventory developed was a 1980 compliance inventory and not an actual 1980 emission inventory as referred to by the Company. This inventory has been updated using 1980 data for not only this company but all the other sources in the Lower Beaver Valley. Using the revised emission estimates, attainment of the SO_2 standard was still predicted.

With respect to the comment regarding the modeling analysis, DER has stated, and EPA agrees, that the proximity of individual sources is one of the least contributing factors when modeling on both an annual and a short-term basis.

Conclusion

In view of these comments and DER's response, we find that sufficient cause to disapprove the proposed redesignation does not exist. Therefore, EPA is today approving Pennsylvania's request to redesignate the Lower Beaver

Valley Air Basin (Beaver County) to "Better than National Standards" status for SO_2. All other Section 107 designations for the Commonwealth of Pennsylvania remain intact.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of the Executive Order 12291.

Under 5 U.S.C. 605(b), the Administrator has certified that redesignations do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

Under 307(b)(1) of the Clean Air Act, judicial review of this action is available only by the filing of a petition for review in the United States Court of Appeals for the appropriate circuit within 60 days of today. Under Section 307(b)(2) of the Act, the requirements which are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

PART 81—[AMENDED]

Part 81 of Title 40, Code of Federal Regulations is amended as follows:

Subpart C—Section 107 Attainment Status Designations

1. In § 81.339, Pennsylvania, the table entitled "Pennsylvania—SO_2", is amended by adding an "X" under the column head "Better than national standards" for Beaver Valley Air Basin (Beaver County) as follows:

40 CFR Part 145

[WH-FRL 2553-7]

Colorado Oil and Gas Conservation Commission; Underground Injection Control; Program Approval

AGENCY: Environmental Protection Agency.

ACTION: Approval of State Program.

SUMMARY: The State of Colorado has submitted an application under section 1425 of the Safe Drinking Water Act for the approval of an Underground Injection Control (UIC) program governing Class II oil and natural gas related injection wells. After careful review of the application and comments received for the public, the Agency has determined that the State's injection well program for Class II wells meets the requirements of Section 1425 of the Act. Therefore, this application covering Class II injections is approved.

EFFECTIVE DATE: April 2, 1984.

FOR FURTHER INFORMATION CONTACT: Richard Long, Ground Water Section, Drinking Water Branch, Environmental Protection Agency, Region VIII, 1860 Lincoln Street, Denver, Colorado 80295. PH: (303) 837-3914. Copies of EPA's summary response to public comment are available at the above address.

SUPPLEMENTARY INFORMATION: Part C of the Safe Drinking Water Act (SDWA) provides for an Underground Injection Control (UIC) program. Section 1421 of the SDWA requires the Administrator to promulgate minimum requirements for effective State programs to prevent underground injection which endangers drinking water sources. The Administrator is also to list in the **Federal Register** each State for which in his judgment a State UIC program may be necessary. Each State listed shall submit to the Administrator an application which contains a showing satisfactory to the Administrator that the State: (i) Has adopted after reasonable notice and public hearings, a UIC program which meets the requirements of regulations in effect under Section 1421 of the SDWA; and (ii) will keep such records and make such reports with respect to its activities under its UIC program as the Administrator may require by regulations. After reasonable opportunity for public comment, the Administrator shall by rule approve, disapprove or approve in part and disapprove in part, the State's UIC program.

The SDWA was amended on December 5, 1980, to include Section 1425, which establishes an alternative method by which a State may obtain primary enforcement responsibility for those portions of its UIC program related to the recovery and production of oil and natural gas (Class II wells). Specifically, instead of meeting the Federal Regulations (40 CFR Parts 124, 144, and 145) and related Technical Criteria and Standards (40 CFR Part 146), a State may demonstrate that its program meets the more general statutory requirements of Section 1421(b)(1) (A) through (D) and represents an effective program to prevent endangerment of underground sources of drinking water.

The State of Colorado was listed as needing a UIC program on September 25, 1978 (43 FR 43420). The State submitted an application under Section 1425 on May 3, 1983, for the approval of a UIC program governing Class II injection wells to be administered by the Colorado Oil and Gas Conservation Commission (COGCC). EPA published notice of its receipt of the application, requested public comments, and scheduled a public hearing on the UIC program submitted by the COGCC on July 10, 1983 (48 FR 26842). A public hearing was held in Denver, Colorado, on June 12, 1983. After careful review of this application and comments received from the public, I have determined that the Colorado UIC program submitted by the COGCC for Class II injection wells meets the requirements of Section 1425 of the SDWA, and hereby approve it. The effect of this approval is to establish this program as the applicable underground injection control program under the SDWA for the State of Colorado. The requirements of this program include State statutes and regulations set forth at: Colo. Rev. Stat., 1973, § 34-60-101 *et seq.* (1983 Cum. Supp.); Colo. Rev. Stat., 1973, § 25-8-101 *et seq.* (1982); 2 Code of Colorado Regulations 404-1, Rules 101-529 (1983).

Since this action simply adopts as the Federal program the State laws and regulations already in effect, EPA is publishing this approval effective immediately. This will enable Colorado to begin immediately issuing UIC permits for Class II injection wells under the Federally approved program.

The terms listed below comprise a complete listing of the thesaurus terms associated with 40 CFR Part 145, which sets forth the requirements for a State requesting the authority to operate its

own permit program of which the Underground Injection Control program is a part. These terms may not all apply to this particular notice.

List of Subjects in 40 CFR Part 145

Indians—lands, Reporting and recordkeeping requirements, Intergovernmental relations, Penalties, Confidential business information, Water supply.

In this application, Colorado chooses not to assert jurisdiction over Indian lands or reservations for purposes of its UIC program. Therefore, the EPA will, at a future date, prescribe a UIC program governing injection wells on any Indian lands or reservations.

OMB Review

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I certify that approval by EPA under section 1425 of the Safe Drinking Water Act of the application by the Colorado Oil and Gas Conservation Commission will not have a significant economic impact on a substantial number of small entities, since this rule only approves State actions. It imposes no new requirements on small entities.

(42 U.S.C. 300)

Dated: March 27, 1984.

William D. Ruckelshaus,

Administrator.

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6593]

Suspension of Community Eligibility Under the National Flood Insurance Program

AGENCY: Federal Emergency Management Agency, FEMA.

ACTION: Final rule.

SUMMARY: This rule lists communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the flood plain management requirements of the program. If FEMA receives documentation that the community has adopted the required flood plain management measures prior to the effective suspension date given in this rule, the suspension will be withdrawn by publication in the **Federal Register**.

EFFECTIVE DATES: The third date ("Susp.") listed in the fifth column.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 287-0222, 500 C Street, Southwest, FEMA—Room 509, Washington, D.C. 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022) prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128) unless an appropriate public body shall have adopted adequate flood plain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR Part 59 et seq.). Accordingly, the communities are suspended on the effective date in the fifth column, so that as of that date flood insurance is no longer available in the community. However, those communities which, prior to the suspension date, adopt and submit documentation of legally enforceable flood plain management measures required by the program, will continue their eligibility for the sale of insurance. Where adequate documentation is received by FEMA, a notice withdrawing the suspension will be published in the **Federal Register**.

In addition, the Director of Federal Emergency Management Agency has identified the special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. No direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood prone areas. (Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Director finds that notice and public procedure under 5 U.S.C. 533(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified. Each community receives a 6-month, 90-day, and 30-day notification addressed to the Chief Executive Officer that the community will be suspended unless the required flood plain management measures are met prior to the effective suspension date. For the same reasons, this final rule may take effect within less than 30 days.

Pursuant to the provision of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. As stated in Section 2 of the Flood Disaster Protection Act of 1973, the establishment of local flood plain management together with the availability of flood insurance decreases the economic impact of future flood losses to both the particular community and the nation as a whole. This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to (adopt) (enforce) adequate flood plain management, thus placing itself in noncompliance of the Federal standards required for community participation.

In each entry, a complete chronology of effective dates appears for each listed community.

List of Subjects in 44 CFR Part 64

Flood insurance, Flood plains.

PART 64—[AMENDED]

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

§ 64.6 List of eligible communities.

State and county	Location	Community No.	Effective dates of authorization/cancellation of sale of flood insurance in community	Special flood hazard area identified	Date certain Federal assistance no longer available in special flood hazard areas

Proposed Rules

Federal Register
Vol. 49, No. 64
Monday, April 2, 1984

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 2

Exceptions to Notice and Comment Rulemaking Procedures

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The proposed rule would amend the Commission's rules of practice by revising Commission rulemaking procedures contained in 10 CFR 2.804 and 2.805 to clarify the Commission's use of the exceptions to notice and comment rulemaking contained in section 4 of the Administrative Procedure Act (5 U.S.C. 553(b)) This clarification is necessary in light of the U.S. Court of Appeals for the District of Columbia decision in *Union of Concerned Scientists* v. *Nuclear Regulatory Commission*, No. 82–2000 (D.C. Cir. June 30, 1983).

DATE: Comment period expires May 2, 1984. Comments received after this date will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received before this date.

ADDRESS: Submit written comments to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch. Copies of comments received may be examined at the NRC Public Document Room at 1717 H Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Francis X. Cameron, Office of the Executive legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Telephone: 301–492–7688.

SUPPLEMENTARY INFORMATION: The U.S. Court of Appeals for the District of Columbia, in its recent decision in *Union of Concerned Scientists* v. *Nuclear Regulatory Commission*, No. 82–2000 (D.C. Cir. June 30 1983) (*"UCS* v. *NRC"*), vacated the Commission's rule of June 30, 1982 which amended operating licenses by removing the deadline for the environmental qualification of electrical equipment. 47 FR 28363, June 30, 1982. The D.C. Circuit held that by making the rule immediately effective instead of providing for notice and comment, the NRC had among other things, violated Commission regulations. This holding was based on language in 10 CFR 2.804 which the Court read, contrary to the Commission's interpretation, as a requirement for notice and opportunity for prior comment in all Commission rulemakings. The Court concluded that the NRC had divested itself of whatever discretion applicable statutes might allow for dispensing with notice and comment.

It is the Commission's intention in the present rulemaking to clarify its regulations so as to leave no doubt that the Commission does assert, to the extent allowable, its discretion under Section 4 of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)) to make exceptions to the general requirements for notice and opportunity for comment in informal rulemaking.

In making this clarification, however, the Commission notes that the D.C. Circuit in *UCS* v. *NRC* had called into question the extent to which the Commission can lawfully claim such discretion. As an alternative reason for vacating the rule under review, the D.C. Circuit held that notice and hearing requirements in Section 189a of the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2239a, prevented the Commission from relying on the APA "good cause" exception in the June 30, 1982 rulemaking. In the Commission's view, however, the Court's explanation of this holding left unclear whether the Court saw Section 189a as a general bar to use of the APA "good cause" exception in any NRC rulemaking affecting the activities of licensees or as a less sweeping restriction.

The Commission moved the D.C. Circuit to vacate this part of its opinion. The Commission noted to the Court that the discussion of the relation between Section 189a and the APA "good cause" exception was unnecessary to the result of the case, raised issues which had not been briefed, was ambiguous in its scope, and could if read broadly interfere severely with the Commission's ability to act promptly in the interest of public health and safety. The Court then called for simultaneous briefing by the parties on the availability of the APA "good cause" exception in Commission rulemaking. The Commission filed a brief which maintained that Section 189a does not restrict use of the "good cause" exception. The Union of Concerned Scientists argued that there was a virtually total bar to use of the exception. After receiving this additional briefing the Court on December 5, 1982 denied without opinion the Commission's motion to amend the decision, offering no further explanation or clarification of its holding, and ordered that its mandate should issue.

In these circumstances, the Commission believes it is reasonable to give the Court's opinion an interpretation no more restrictive than the language and the context appear to require. In addition, the Commission continues to hold the view that any reading of Section 189a which interferes with the Commission's ability to take immediate action affecting the activities of NRC licensees, whether by individual order or by rulemaking, when safety requires it, is contrary to the intent of Congress and is an erroneous interpretation of the Atomic Energy Act. A limitation on use of the APA "good cause" exception clearly has the potential for such interference and therefore should be interpreted narrowly. Accordingly, the Commission reads the language in *UCS v. NRC* relevant to the availability of the "good cause" exception as applying only to the kind of rulemaking under review in that case, *i.e.*, rules that amend reactor licenses, while leaving unaffected the Commission's authority under the APA to make other kinds of rules effective without prior notice and comment when there is good cause.

This reading of *UCS* v. *NRC* leaves intact for the most part the Commission's longstanding and consistent interpretation of its statutory authority and of the rulemaking procedures contained in 10 CFR Part 2, Subpart H, that the Commission could avail itself of the exceptions to notice and comment rulemaking contained in the APA for—

- Interpretative rules, general statements of policy, or rules of agency organization, procedure, or practice. 5 U.S.C. 553(b)(A); or

• When the agency for good cause finds that notice and comment are impracticable, unnecessary, or contrary to the public interest. 5 U.S.C. 553(b)(B)

The Commission sees no reason why this interpretation should not be reaffirmed, except as it is affected by *UCS* v. *NRC*. To assure that the regulation unambiguously reflects the Commission's intentions, the proposed rule would amend 10 CFR 2.804, and 2.805 to provide explicitly for Commission discretion to invoke in appropriate situations the APA exceptions to notice and comment rulemaking cited above, as permitted by law. Under the proposed rule, notice and comment will not be mandatory in Commission rulemaking within the scope of section 553 of the U.S. Code, when they involve interpretative rules, general statements of policy, or rules of agency organization, procedure, or practice, or where the Commission for good cause finds that notice and comment are impracticable, unnecessary or contrary to the public interest. In response to the D.C. Circuit's opinion in *USC* v. *NRC*, however, the Commission proposes to include in Section 2.804(2) language providing that the APA exceptions to notice and comment rulemaking will apply only where notice and comment are not required by statute.

Paperwork Reduction Act Statement

This proposed rule contains no information collection requirements and therefore is not subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Regulatory Flexibility Certification

As required by the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the Commission certifies that this rule, if adopted, will not have a significant economic impact upon a substantial number of small entities. It merely clarifies and affirms existing Commission practice on utilizing the statutory exceptions to notice and comment rulemaking contained in section 553(b) of the Administrative Procedure Act.

List of Subjects in 10 CFR Part 2

Administrative practice and procedure, Antitrust, Byproduct material, Classified information, Environmental protection, Nuclear materials, Nuclear power plants and reactors, Penalty, Sex discrimination, Source material, Special nuclear material, Waste treatment and disposal.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 553, the NRC is proposing to adopt the following amendments to 10 CFR Part 2.

PART 2—RULES OF PRACTICE FOR DOMESTIC LICENSING PROCEEDINGS

Subpart H—Rulemaking

1. The authority citation for Part 2 continues to read as follows:

Authority: Secs. 161, 181, 68 Stat. 948, 953, as amended (42 U.S.C. 2201, 2231); sec. 191, as amended, Pub. L. 87–615, 76 Stat. 409 (42 U.S.C. 2241); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841); 5 U.S.C. 552.

Section 2.101 also issued under secs. 53, 62, 63, 81, 103, 104, 105, 68 Stat. 930, 932, 933, 935, 936, 937, 938, as amended (42 U.S.C. 2073, 2092, 2093, 2111, 2133, 2134, 2135); sec. 102, Pub. L. 91–190, 83 Stat. 853, as amended (42 U.S.C. 4332); sec. 301, 88 Stat. 1248 (42 U.S.C. 5871). Section 2.102, 2.103, 2.104, 2.105, 2.721 also issued under secs. 102, 103, 104, 105, 183, 189, 68 Stat. 936, 937, 938, 954, 955 as amended (42 U.S.C. 2132, 2133, 2134, 2135, 2233, 2239). Section 2.105 also issued under Pub. L. 97–415, 96 Stat. 2073 (42 U.S.C. 2239) Section 2.200–2.206 also issued under secs. 186, 234, 68 Stat. 955, 83 Stat. 444, as amended (42 U.S.C. 2236, 2282); sec. 206, 88 Stat. 1246 (42 U.S.C. 5846). Sections 2.600–2.606 also issued under sec. 102, Pub. L. 91–190, 83 Stat. 853, as amended (42 U.S.C. 4332). Sections 2.700a, 2.719 also issued under 5 U.S.C. 554. Sections 2.754, 2.760, 2.770 also issued under 5 U.S.C. 557. Sections 2.790 also issued under sec. 103, 68 Stat. 936, as amended (42 U.S.C. 2133) and 5 U.S.C. 552. Sections 2.800 and 2.808 also issued under 5 U.S.C. 553. Section 2.809 also issued under 5 U.S.C. 553 and sec. 29, Pub. L. 85–256, 71 Stat. 579, as amended. (42 U.S.C. 2039). Appendix A also issued under sec. 6, Pub. L. 91–560, 84 Stat. 1437 (42 U.S.C. 2135).

2. In § 2.804, paragraph (a) is revised and a new paragraph (d) is added to read as follows:

§ 2.804 Notice of proposed rulemaking.

(a) Except as provided by paragraph (d) of this section, when the Commission proposes to adopt, amend, or repeal a regulation, it will cause to be published in the **Federal Register** a notice of proposed rulemaking, unless all persons subject to the notice are named and either are personally served or otherwise have actual notice in accordance with law.

* * * * *

(d) The notice and comment provisions contained in paragraphs (a), (b), and (c) of this section will not be required to be applied—

(1) To interpretative rules, general statements of policy, or rules of agency organization, procedure, or practice; or

(2) When the Commission for good cause finds that notice and public comment are impracticable, unnecessary, or contrary to the public interest, and are not required by statute. This finding, and the reasons therefor, will be incorporated into any rule issued without notice and comment for good cause.

3. In § 2.805, paragraph (a) is revised to read as follows:

§ 2.805 Participation by interested persons.

(a) In all rulemaking proceedings conducted under the provisions of § 2.804(a), the Commission will afford interested persons an opportunity to participate through the submission of statements, information, opinions, and arguments in the manner stated in the notice. The Commission may grant additional reasonable opportunity for the submission of comments.

* * * * *

Dated at Washington, D.C., this 27th day of March 1984.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

10 CFR Parts 2 and 50

Elimination of Review of Financial Qualifications of Electric Utilities in Operating License Reviews and Hearings for Nuclear Power Plants

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: In response to a remand by the U.S. Court of Appeals for the D.C. Circuit, the Nuclear Regulatory Commission (NRC) proposes a rule which eliminates financial qualifications review and findings for electric utilities that are applying for operating licenses for utilization facilities if the utility is a regulated public utility or authorized to set its own rates.

DATE: Comment period expires June 1, 1984.

Comments received after that date will be considered if it is practical to do so, but assurances of consideration cannot be given except as to comments received on or before this date.

ADDRESSES: Interested persons are invited to submit written comments and suggestions on the proposal to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch. Copies of comments received by the Commission

may be examined in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Carole F. Kagan, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, (Telephone: (202) 634–1493).

SUPPLEMENTARY INFORMATION:

I. Background

On March 31, 1982, the Commission published a notice of rulemaking in the Federal Register (47 FR 13750) to amend the Rules of Practice for Domestic Licensing Proceedings, 10 CFR Part 2 (1982), and its substantive requirements governing Domestic Licensing of Production and Utilization Facilities, 10 CFR Part 50 (1982), to entirely eliminate requirements for financial qualifications review and findings for electric utilities applying for construction permits or operating licenses for production or utilization facilities. The background of this rule was detailed in the notice of rulemaking, as well as in the notice of proposed rulemaking, 46 FR 41786 (Aug. 18, 1981).

The New England Coalition on Nuclear Pollution and others petitioned for review of the rule in federal court under 28 U.S.C. 2342(4) (1976). Review was granted, and the U.S. Court of Appeals for the D.C. Circuit heard argument on February 23, 1983. On February 7, 1984, that court handed down a decision which remanded the rule to the Commission for clarification of its accompanying statement of basis and purpose. *New England Coalition on Nuclear Pollution* v. *NRC*, No. 82–1581 (D.C. Cir. Feb. 7, 1984).

The court found the Commission's explanation of the final rule internally inconsistent because, in the court's view, the reasons the Commission advanced for dispensing with the financial qualifications review for electric utilities would, if supported by the facts, apply generally to all license applicants and would not support a rule that singled out utilities for special treatment. The court found that in promulgating the final rule the Commission had abandoned the first premise on which the proposed rule had rested, *i.e.*, that regulated utilities were presumed financially able to construct and operate nuclear plants safely because of their regulated status.

Commenters on the proposed rule had questioned whether rate commissions could be counted on to support plant construction. Recent cancellations and deferrals of nuclear plants under construction do in fact suggest that a utility's status as a regulated entity does not by itself always ensure that the necessary funds will be forthcoming to complete construction. It does not necessarily follow from this that plants will be or are being constructed in an unsafe manner. However, the financial difficulties experienced at some plants under construction do suggest that elimination of financial qualifications reviews at the construction permit stage is a matter that will require further study by the Commission. There are no construction permit proceedings currently pending, so the matter of construction permit financial qualifications reviews is of small practical consequence. Given this fact, and the fact that any further study of possible elimination of construction permit financial qualifications reviews would delay a response to the court's remand, the Commission has decided that its response on remand will focus on financial qualifications reviews at the operating license stage. The part of the rule subject to the court's remand which eliminated financial qualifications reviews at the construction permit stage should be withdrawn pending further study. In effect, the old rule providing for construction permit reviews will be reinstated pending further study.

At the operating license review stage, however, the regulated status of electric utilities continues to provide a reliable basis for finding financial qualification. Here the focus is not on construction but on safe operation. The Commission believes that case-by-case review of financial qualifications for all electric utilities at the operating license stage is unnecessary for the following reason. Utilities are usually regulated through state and/or federal economic agencies, and generally are allowed to recover all or a portion of the costs of constructing generating facilities and all of the costs of operation, subject to the oversight of such state and/or federal agencies. *See, e.g., FPC* v. *Hope Natural Gas Co.*, 320 U.S.C. 519 (1944); *Bluefield Water Works and Improvement Co.* v. *Public Service Commission of the State of West Virginia*, 269 U.S. 679 (1923). These landmark court decisions established the principle that public utility commissions are to set a utility's rates such that all reasonable costs of serving the public may be recovered, assuming prudent management of the utility. Obviously, the funds needed to operate the plant in conformance with NRC safety regulations shoud be recoverable as reasonable costs of operation. The Commission believes it reasonable to conclude that, as a general rule, the rate regulation process assures for regulated electric utilities (or those able to set their own rates) the ability to meet the costs of safe operation of a nuclear power facility.[1]

Under the financial qualifications reviews at the operating license stage conducted under the original rule, the Commission has found in every case that the state and local public utility commissions could be counted on to provide all reasonable operating costs to licensees, including costs of compliance with NRC requirements associated with safe plant operation. As a result, electric utilities applying for operating licenses have invariably been found financially qualified. This case experience bolsters the Commission's conclusion that as a generic matter electric utilities should be presumed financially qualified to operate the nuclear plants they have constructed and that further case-by-case review on this issue is neither necessary nor productive.

Accordingly, the Commission propcses to eliminate the financial qualifications review at the operating license stage for nuclear power reactor operating license applicants who are regulated public utilities or who are authorized to set their own rates. The Commission proposes to retain its current review under § 50.33(f) at the construction permit stage, and at the operating license stage for applicants for any production or utilization facility licenses who are not electric utilities having either a regulated status or the authority to set their own rates for service. The § 50.33(f) financial qualifications review is also unchanged as to production or utilization facilities not covered by § 50.21b or § 50.22, *i.e.*, medical utilization facilities, research and development facilities, and testing facilities.

II. Invitation to Comment

The Commission seeks comment on this proposed rule. In addition, all interested parties are invited to comment on whether financial qualifications review might be eliminated completely for all license or permit applicants including, but not limited to, electric utilities, on the

[1] A study of state public utility commissions, the Federal Energy Regulatory Commission and publicly owned utilities is currently being conducted by the National Association of Regulatory Utility Commissioners to determine whether, historically, utilities which have requested rate increases or rate provisions for operating safety requirements have regularly received them. The results of the study are expected to be available before promulgation of the final rule. If this study should indicate that Commission is mistaken in its present view that the late process assures electric utilities the financial resources needed for safe operation, the Commission will of course reassess its position on the proposed rule.

ground that no link has been shown between financial qualification reviews and assurance of safety. The Commission's experience leads it to question whether pre-licensing reviews of applicants' future ability to pay for the cost of safety measures provide any significant additional assurance of safety beyond the assurance provided by the prelicensing review of facility structures, systems and components, operating and materials handling procedures, and technical qualifications, and by the Commission's inspection and enforcement program. However, the Commission has not conducted any detailed study to determine whether there exists any significant correlation between its financial qualifications reviews and later safe operation and use of nuclear materials. Therefore, the Commission does not propose such a rule at this time but might consider doing so later if there is adequate support. Commenters are invited to address this issue.

III. Additional Information That Can Be Required

By this proposed rule, the Commission does not intend to waive or relinquish its residual authority under Section 182a of the Atomic Energy Act of 1954, as amended, to require such additional information in individual cases as may be necessary for the Commission to determine whether an application should be granted or denied or whether a license should be modified or revoked. In addition, an exception to or waiver from the proposed rule precluding consideration of financial qualifications in an operating license proceeding could be made if, pursuant to 10 CFR 2.758, special circumstances are shown. For example, such an exception to permit financial qualifications review for an operating license applicant might be appropriate where a threshold showing is made that, in a particular case, the local public utilities commission will not allow the total cost of operating the facility to be recovered through rates.

IV. Practical Impacts

The proposed rule will, in normal circumstances, reduce the time and effort which the applicants, licensees, the NRC staff and NRC adjudicatory boards devote to reviewing the applicant's or licensee's financial qualifications in comparison to the rule which existed before March 31, 1982. The proposed rule aims at eliminating staff review at the operating license stage in cases where the applicant is an electric utility presumed to be able to finance activities to be authorized under the license. The rule will be applied both to ongoing licensing reviews and proceedings and to past proceedings subject to the remanded rule. The rationale for the proposed rule is in effect a generic determination that regulated public utilities are financially qualified to operate nuclear power plants. Accordingly, a decision by the Commission to make the proposed rule final will amount to a generic resolution of financial qualifications issues that may be pending in operating license proceedings involving electric utilities. NRC neither intends nor expects that the rule will affect the scope of any issues or contentions related to a cost/benefit analysis performed pursuant to the National Environmental Policy Act of 1969. Under NEPA, the issue is not whether the applicant can demonstrate reasonable assurance of covering certain projected costs, but what costs to the applicant of constructing and operating the plant are to be put into the cost-benefit balance. As is now the case, the rule of reason will continue to govern the scope of what costs are to be included in the balance, and the resulting determinations may still be the subject of litigation.

Commissioner Bernthal's Additional Views

As a general policy matter, I have always questioned whether the NRC has the necessary resources and expertise to justify its involvement in assessing financial qualifications of applicants. An assessment of financial qualifications, in my view, is clearly not required under the Atomic Energy Act (Section 182), which only requires an applicant to include such information in an application as the Commission, by rule or regulation, "may deem necessary to decide such of the . . . financial qualifications of the applicant . . . as the Commission may deem appropriate for the license." Thus, the option clearly lies with the Commission to determine whether any financial information is required for the Commission to carry out its public health and safety responsibilities.

Nor is it clear that the Commission has the capability to act on a wise and informed basis in making judgments of financial qualification. Such matters, in every case, ultimately remain within the purview of the state and local public utility commissions; no matter what finding the Commission might make in judging financial capability of a utility, the public utility commissions have final authority to render a Commission finding meaningless and inaccurate.

I do not believe that the NRC should second-guess the public utility commission of jurisdiction on the question of what constitutes financial qualification of an applicant. The principal question, therefore, is whether the task of the Commission to insure public health and safety would be rendered unacceptably more difficult by the possible financial inadequacy of a utility.

Should an applicant find itself in financial difficulty, its options are two: to delay or abandon the project, or alternatively, to cut corners on safety. There are no health and safety implications if applicant chooses the first course. If an applicant chooses the second course, that is clearly the Commission's concern.

However, denying a license for lack of financial qualification in this context means that the Commission would be prejudging the ability of applicant to construct and operate the plant consistent with public health and safety; the Commission would be denying a license because of *the possibility* that the applicant might cut corners on safety. That finding, in turn, must stem from a conclusion that the applicant *may* not have the requisite character and integrity to carry out its responsibilities pursuant to the Commission's regulations. Thus, the Commission would, in effect, be making an adverse finding on the character and integrity of the applicant without any basis for doing so other than financial status of the applicant. Denial of a license by the Commission on this basis would be arbitrary and capricious, and could in my view, be successfully challenged as such. As noted earlier, a judgment on an applicant also amounts to a judgment on the public utility commission of oversight jurisdiction. For these reasons, I question whether the Commission should require any financial review *unless* there is an independent concern about the management integrity of an applicant.

I urge special public attention and comment on the Commission's alternative proposal, i.e. that the Commission completely eliminate financial qualifications review for all license or permit applicants, including but not limited to electric utilities, not only on the grounds that no link has been shown between financial qualification review and assurance of safety, but because even having carried out such a review, the Commission is powerless to insure continued financial qualification of an applicant, or to predict what financial resources the public utility commission of jurisdiction might place at applicant's disposal.

I hope that the pending NARUC study, along with the public comments on the

proposed rule, will shed further light on the appropriate role of the Commission in judging financial qualification of license applicants.

Commissioner Asselstine's Additional Views

"Commissioner Asselstine adds that he does not believe that the Commission now has sufficient documented evidence to support a final rule to exclude financial qualification reviews at the operating license stage. However, he supports issuance of the proposed rule for public comment in the expectation that the NARUC study and other comments submitted on the proposed rule may provide the documentation needed to support a final rule."

Paperwork Reduction Act Statement

This proposed rule amends information collection requirements that are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). These requirements were approved by the Office of Management and Budget, OMB Approval No. 3150–0011.

Regulatory Flexibility Certification

In accordance with the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), the NRC hereby certifies that this rule will not have a significant economic impact on a substantial number of small entities. The rule reduces certain minor information collection requirements on the owners and operators of nuclear power plants licensed pursuant to sections 103 and 104b of the Atomic Energy Act of 1954, as amended, 42 U.S.C. 2133, 2134b. These electric utility companies are dominant in their service areas. Accordingly, the companies that own and operate nuclear power plants are not within the definition of a small business found in section 3 of the Small Business Act, 15 U.S.C. 632, or within the Small Business Size Standards set forth in 13 CFR Part 121.

List of Subjects

10 CFR Part 2

Administrative practice and procedure, Classified information, Confidential information, Freedom of information, Hazardous materials, Nuclear materials, Nuclear power plants and reactors, Penalties, Sex discrimination.

10 CFR Part 50

Administrative practice and procedure, Antitrust, Fire prevention, Classified information, Intergovernmental relations, Nuclear power plants and reactors, Radiation protection, Reporting and recordkeeping requirements.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and section 553 of Title 5 of the United States Code, the NRC is proposing to adopt the following amendments to 10 CFR Parts 2 and 50.

PART 2—RULES OF PRACTICE FOR DOMESTIC LICENSING PROCEEDINGS

1. The authority citation for Part 2 continues to read as follows:

Authority: Secs. 161, 181, 68 Stat. 948, 953, as amended (42 U.S.C. 2201, 2231); sec. 191, as amended, Pub. L. 87–615, 76 Stat. 409 (42 U.S.C. 2241); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841); 5 U.S.C. 552.

Section 2.101 also issued under secs. 53, 62, 63, 81, 103, 104, 105, 68 Stat. 930, 932, 933, 935, 936, 937, 938, as amended (42 U.S.C. 2073, 2092, 2093, 2111, 2133, 2134, 2135); sec. 102, Pub. L. 91–190, 83 Stat. 853, as amended (42 U.S.C. 4332); sec. 301, 88 Stat. 1248 (42 U.S.C. 5871). Sections 2.102, 2.103, 2.104, 2.105, 2.721 also issued under secs. 102, 103, 104, 105, 183, 189, 68 Stat. 936, 937, 938, 954, 955, as amended (42 U.S.C. 2132, 2133, 2134,2135,2233, 2239). Section 2.105 also issued under Pub. L. 97–415, 96 Stat. 2073 (42 U.S.C. 2239). Sections 2.200–2.206 also issued under secs. 186, 234, 68 Stat. 955, 83 Stat. 444, as amended (42 U.S.C. 2236, 2282); sec. 206, 88 Stat. 1246 (42 U.S.C. 5846). Sections 2.300–2.309 also issued under Pub. L. 97–415, 96 Stat. 2071 (42 U.S.C. 2133). Sections 2.600–2.606 also issued under sec. 102, Pub. L. 91–190, 83 Stat. 853 as amended (42 U.S.C. 4332). Sections 2.700a, 2.719 also issued under 5 U.S.C. 557.

Section 2.790 also issued under sec. 103, 68 Stat. 936, as amended (42 U.S.C. 2133) and 5 U.S.C. 552. Sections 2.800 and 2.808 also issued under 5 U.S.C. 553. Section 2.809 also issued under 5 U.S.C. 553 and sec. 29, Pub. L. 85–256, 71 Stat. 579, as amended (42 U.S.C. 2039). Appendix A also issued under sec. 6, Pub. L. 91–580, 84 Stat. 1473 (42 U.S.C. 2135).

2. In § 2.4, paragraph (s) is revised to read as follows:

§ 2.4 Definitions.

As used in this part,

* * * * *

(s) "Electric utility" means any entity that generates or distributes electricity and which recovers the costs of this electricity, either directly or indirectly, through rates established by the entity itself or by a separate regulatory authority. Investor-owned utilities including generation or distribution subsidiaries, public utility districts, municipalities, rural electric cooperatives, and state and federal agencies, including associations of any of the foregoing, are included within the meaning of "electric utility."

3. In § 2.104, paragraph (c)(4) is revised to read as follows:

§ 2.104 Notice of hearing.

* * * * *

(c) * * *

(4) Whether the applicant is technically and financially qualified to engage in the activities to be authorized by the operating license in accordance with the regulations in this chapter, except that the issue of financial qualifications shall not be considered by the presiding officer in an operating license hearing if the applicant is an electric utility seeking a license to operate a utilization facility of the type described in § 50.21(b) or § 50.22;

* * * * *

4. In Appendix A to Part 2, paragraph (b)(4) of Section VIII is revised to read as follows:

Appendix A—Statement of General Policy and Procedure: Conduct of Proceedings for the Issuance of Construction Permits and Operating Licenses for Production and Utilization Facilities for Which a Hearing Is Required Under Section 189A of the Atomic Energy Act of 1954, as Amended.

* * * * *

VIII. Procedures Applicable to Operating License Proceedings

* * * * *

(b) * * *

(4) Whether the applicant is technically and financially qualified to engage in the activities to be authorized by the operating license in accordance with the Commission's regulations, except that the issue of financial qualifications shall not be considered by the board if the applicant is an electric utility seeking a license to operate a utilization facility of the type described in § 50.21(b) or § 50.22.

* * * * *

PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

5. The authority citation for Part 50 continues to read as follows:

Authority: Secs. 103, 104, 161, 182, 183, 189, 68 Stat. 936, 937, 948, 953, 954, 955, 956, as amended, sec. 234, 83 Stat. 1244, as amended (42 U.S.C. 2133, 2134, 2201, 2232, 2233, 2236, 2239, 2282); secs. 201, 202, 206, 88 Stat. 1242, 1244, 1246, as amended (42 U.S.C. 5841, 5842, 5846), unless otherwise noted.

Section 50.7 also issued under Pub. L. 95–601, sec. 10, 92 Stat. 2951 (42 U.S.C. 5851). Sections 50.57(d), 50.58, 50.91, and 50.92 also issued under Pub. L. 97–415, 96 Stat. 2071, 2073 (42 U.S.C. 2133, 2239). Section 50–78 also issued under sec. 122, 68 Stat. 939 (42 U.S.C. 2152). Sections 50.80–50.81 also issued under sec. 184, 68 Stat. 954, as amended (42 U.S.C. 2234). Sections 50.100–50.102 also issued under sec. 186, 68 Stat. 955 (42 U.S.C. 2236).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273), §§ 50.10 (a), (b), and (c), 50.44, 50.46, 50.48, 50.54, and 50.80(a) are issued under sec. 161b, 68 Stat. 948, as

amended (42 U.S.C. 2201(b), §§ 50.10 (b) and (c) and 50.54 are issued under sec. 161i, 68 Stat. 949, as amended (42 U.S.C. 2201(i)); and §§ 50.55(e), 50.59(b), 50.70, 50.71, 50.72, 50.73, and 50.78 are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

6. In § 50.2, paragraph (x) is revised to read as follows:

§ 50.2 Definitions.

As used in this part,

* * * * *

(x) "Electric utility" means any entity that generates or distributes electricity and which recovers the cost of this electricity, either directly or indirectly, through rates established by the entity itself or by a separate regulatory authority. Investor-owned utilities, including generation or distribution subsidiaries, public utility districts, municipalities, rural electric cooperatives, and state and federal agencies, including associations of any of the foregoing, are included within the meaning of "electric utility."

7. In § 50.33, paragraph (f) is revised to read as follows:

§ 50.33 Contents of applications; general information.

Each application must state:

* * * * *

(f) Except for an electric utility applicant for a license to operate a utilization facility of the type described in § 50.21(b) or § 50.22, information sufficient to demonstrate to the Commission the financial qualifications of the applicant to carry out, in accordance with regulations in this chapter, the activities for which the permit or license is sought. As applicable, the following should be provided:

(1) If the application is for a construction permit the applicant shall submit information that demonstrates that the applicant possesses or has reasonable assurance of obtaining the funds necessary to cover estimated construction costs and related fuel cycle costs. The applicant shall submit estimates of the total construction costs of the facility and related fuel cycle costs, and shall indicate the source(s) of funds to cover these costs.

(2) If the application is for an operating license, the applicant shall submit information that demonstrates the applicant possesses or has reasonable assurance of obtaining the funds necessary to cover estimated operation costs for the period of the license, plus the estimated costs of permanently shutting the facility down and maintaining it in a safe condition. The applicant shall submit estimates for total annual operating costs for each of the first five years of operation of the facility and estimates of the costs to permanently shut down the facility and maintain it in a safe condition. The applicant shall also indicate the source(s) of funds to cover these costs. An application to renew or extend the term of an operating license must include the same financial information as required in an application for an initial license.

(3) Each application for a construction permit or an operating license submitted by a newly-formed entity organized for the primary purpose of constructing or operating a facility must also include information showing:

(i) The legal and financial relationships it has or proposes to have with its stockholders or owners;

(ii) Their financial ability to meet any contractual obligation to the entity which they have incurred or propose to incur; and

(iii) Any other information considered necessary by the Commission to enable it to determine the applicant's financial qualifications.

(4) The Commission may request an established entity or newly-formed entity to submit additional or more detailed information respecting its financial arrangements and status of funds if the Commission considers this information appropriate. This may include information regarding a licensee's ability to continue the conduct of the activities authorized by the license and to permanently shut down the facility and maintain it in a safe condition.

* * * * *

8. In § 50.40, paragraph (b) is revised to read as follows:

§ 50.40 Common standards.

* * * * *

(b) The applicant is technically and financially qualified to engage in the proposed activities in accordance with the regulations in this chapter. However, no consideration of financial qualifications is necessary for an electric utility applicant for an operating license for a utilization facility of the type described in § 50.21(b) or § 50.22.

* * * * *

9. In § 50.57, footnote one is set out for the convenience of the reader and paragraph (a)(4) is revised to read as follows:

§ 50.57 Issuance of operating license.[1]

(a) * * *

(4) The applicant is technically and financially qualified to engage in the activities authorized by the operating license in accordance with the regulations in this chapter. However, no finding of financial qualifications is necessary for an electric utility applicant for an operating license for a utilization facility of the type described in § 50.21(b) or § 50.22.

* * * * *

10. In Appendix M to Part 50, paragraph 4.(b) is revised to read as follows:

Appendix M—Standardization of Design; Manufacture of Nuclear Power Reactors; Construction and Operation of Nuclear Power Reactors

* * * * *

4. * * *

(b) The financial information submitted pursuant to § 50.33(f) shall be directed at a demonstration of the financial qualifications of the applicant for the manufacturing license to carry out the manufacturing activity for which the license is sought.

* * * * *

Dated at Washington, D.C., this 28th day of March 1984.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 84-8716 Filed 3-30-84; 8:45 am]

BILLING CODE 7590-01-M

[1] The Commission may issue a provisional operating license pursuant to the regulations in this part in effect on March 30, 1970, for any facility for which a notice of hearing on an application for a provisional operating license or a notice of proposed issuance of a provisional operating license has been published on or before that date.

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 701

Surety Bond and Insurance Coverage for Federal Credit Unions

AGENCY: National Credit Union Administration.

ACTION: Proposed rule.

SUMMARY: This is a proposed rule to revise, update and simplify the existing § 701.20—Surety Bond and Insurance Coverage for Federal Credit Unions ("FCUs"). The proposal is issued pursuant to NCUA's ongoing program of regulatory review. Section 701.20 sets forth the requirements for surety bond coverage for losses caused by credit union employees and officials and for general insurance coverage for losses caused by persons outside of the credit union (e.g., losses due to theft, holdup or vandalism). The proposal would change

the requirement that each FCU board of directors conduct a semiannual review of bond and insurance coverage to a requirement for an annual review. It would also change the requirement for faithful performance bond coverage for all officers and employees. Under the proposal, faithful performance coverage would be required only of the financial officer of the credit union. Fraud and dishonesty coverage would continue to be required for all officers and employees. The proposal also contains new schedules for minimum bond and insurance coverage and maximum deductibles. The regulation has been rewritten in plain English and portions of the regulation that are redundant with the Federal Credit Union Act ("Act") and/or regulations have been deleted.

DATE: Comments must be received on or before June 4, 1984.

ADDRESS: Send comments to Rosemary Brady, Secretary, NCUA Board, 1776 G Street, NW., Washington, D.C., 20456.

FOR FURTHER INFORMATION CONTACT: Robert Fenner, Director, Department of Legal Services, or Hattie Ulan, Staff Attorney, NCUA, at the above address or Telephone: (202) 357–1030.

SUPPLEMENTARY INFORMATION:

1. Background

The Act sets forth statutory requirements for the bonding of credit union employees and appointed and elected officials. (*See* Sections 112, 113(2) and 120(h) of the Act, 12 U.S.C. 1761a, 1761b(2) and 1766(h).) The NCUA Board is directed to promulgate regulations setting forth both the amount and character of bond requirements for employees and officials. The Act requires a bond for faithful performance coverage of the financial officer of the credit union. The NUCA Board is also granted the following powers concerning bonding:

To approve bond forms;

To set minimum requirements for bond coverage;

To require such other surety coverage as the Board may determine to be reasonably appropriate;

To approve a blanket bond in lieu of individual bonds; and

To approve bond coverage in excess of minimum surety coverage.

In addition, NCUA's general rulemaking authority provides a statutory basis for both the bonding requirements of § 701.20 and the insurance coverage requirements related to losses caused by persons outside the credit union (*see*, Sections 120(a) and 290(a)(11) of the Act, 12 U.S.C. 1766(a), 1789(a)(11)).

On June 2, 1981, the NCUA Board published a proposed regulation in the **Federal Register** (47 FR 29482) simplifying the current regulation and establishing new minimum coverage and deductible requirements. A final rule was not promulgated. At this time, the NCUA Board is again requesting comments on a new proposed surety bond and insurance coverage regulation. This proposal is similar to the one made in 1981. The major distinction is that this proposal, if adopted, would eliminate required faithful performance coverage for all officials and employees, except for the financial officer.

2. Present Regulation and Proposed Changes Thereto

The following lettered paragraphs first describe the current regulation and then describe and analyze the proposed change.

a. *Scope section.* New 701.20(a)—The present regulation does not contain a scope section. It is being added by this proposal to clearly describe what is covered by the regulation. The regulation only addresses surety bond coverage for losses caused by credit union employees and officials and general insurance coverage for losses caused by persons outside of the credit union (e.g., protection for losses due to theft, holdup or vandalism). This regulation does not address account insurance coverage by the National Credit Union Share Insurance Fund. Account insurance coverage is addressed in Part 745 of NCUA's regulations, 12 CFR Part 745. Nor does the regulation address insurance coverage for losses due to fire or disturbances of nature (e.g., for losses due to hurricane or earthquake). This is not to say that the NCUA Board believes that fire and disaster insurance are not appropriate for FCUs. Rather, NCUA has chosen not to set specific requirements for such insurance through regulation. Such insurance is obtained in the normal course of business. The decision as to the precise nature and amount of coverage is left to the business judgment of each FCU.

b. *Review of coverage.* Present 701.20(a)—Requires the board of directors to conduct a semiannual review of all insurance coverages, including surety coverage.

Proposed Change—New 701.20(b)—The proposal requires that the board of directors conduct an annual rather than a semiannual review. It is incumbent upon each board of directors to carefully review coverages, deductibles and costs when designing a surety and insurance program that both meets the minimum requirements of NCUA's regulation and most efficiently deals with the risks of operating the credit union. Critical to any decision on surety coverage is the need to ensure that the credit union's solvency is not impaired by a non-covered loss. Safety and soundness considerations would dictate that each credit union's board of directors perform at least an annual review of surety and insurance coverage. Rapid growth in a given credit union or other circumstances may dictate a more frequent review.

c. *Faithful performance coverage.* Present 701.20(b)—Requires that all surety bonds provide faithful performance of duty coverage for any officer or employee while performing any of the duties of the treasurer. The bond forms approved under the current regulation extend coverage for faithful performance to *all* credit union employees and officials, excluding directors acting as directors. The approved bond forms also provide coverage for the fraud or dishonesty of all employees and officials.

Proposed Change—New 701.20(c)—Pursuant to Section 112 of the Act, only the board-elected financial officer is *required* to give a bond conditioned upon the faithful performance of his/her trust. (The Act was amended in 1982 to require this bond of the financial officer rather than the treasurer.) Thus, the regulation and approved forms, in requiring the coverage for all employees and officials, exceed the minimum requirement of the Act. Also, this coverage, as compared to fraud and dishonesty coverage, imposes a strict standard of care that court decisions have interpreted to include coverage for the bonded officer's negligence. It has been suggested to NCUA that this coverage is becoming prohibitively expensive, that the requirement for this coverage is keeping potential underwriters out of the marketplace for credit union bonds, and that the coverage is inconsistent with the bond standards that exist in financial institutions generally. Accordingly, as a means of obtaining comment on these issues, the Board has proposed to eliminate the faithful performance coverage requirement for officials and employees other than the financial officer. Of course, the requirement for coverage of the financial officer cannot be eliminated by regulation inasmuch as it is imposed by the Act. In this connection, the proposed regulations defines financial officer as the official of the credit union responsible for performing the duties of the financial officer as prescribed in Article VIII, Section 5 of the Federal Credit Union

Bylaws. If a final change is adopted, the approved bond form will be revised in conjunction with the final regulation. It is noted both that the NCUA Board would retain the authority to require more than the minimum coverage in individual cases (see section 120(h) of the Act) and that each FCU board would retain the ability to obtain faithful performance coverge for other officials and employees.

d. *Fraud and dishonesty.* New 701.20(c)—Section 113(2) of the Act requires that any FCU officer or employee handling funds give a bond in compliance with regulations of the Board. Section 120(h) of the Act requires that every person appointed or elected by an FCU to a position requiring the receipt, payment or custody of the FCU's money or personal property give bond with reference to loss by reason of fraud or dishonesty on a form approved by the Board. The current regulation does not contain a fraud or dishonesty requirement, but such coverage is provided for in the bond forms approved in the regulation. The Proposal contains a requirement for all employees, committee members and directors to give bond covering their fraud or dishonesty. This change will simply make the regulations and approved bond language consistent with each other.

e. *Bond forms.* Present 701.20(c)—Section 120(h) of the Act directs that the NCUA Board approve bond forms prior to their use by FCUs. Section 701.20(c) implements this requirement. This section provides that only NCUA Board-approved bond forms may be used and establishes Standard Form 23 as the minimum acceptable coverage. It also provides approval for other types of blanket bond forms.

Proposed Change—New 701.20(c)—While the language of this section is simplified, the content remains basically unchanged. In addition to Credit Union Blanket Bond Form No. 23, Credit Union Blanket Bond Forms 576, 577, 578, 579, 580 and 581 are approved in the current regulation. Each approved bond provides both the surety and insurance coverages required by the Act and NCUA's regulations. Bond Form 581 is by far the most common bond form in use today. The NCUA Board believes that bond forms 576, 577, 578, 579 and 580 may not be in use at all. For that reason the NCUA Board proposes that the approval of Forms 576, 577, 578, 579, and 580 be revoked in the final regulation. Specific comments are requested on the proposed revocation of these bond forms. If the forms are in use, their approval will not be revoked. Bond Forms 23 and 581 and any other forms approved in the final regulation will be revised prior to the effective date of any final regulation to reflect any change in who must be bonded for faithful performance.

f. *Certificate of authority.* Present 701.20(d)—Requires that Federal credit unions obtain bond coverage from companies which hold a cerificate of authority from the Secretary of the Treasury.

Proposed Change—Deletion—This section is proposed to be deleted because it duplicates the language in Section 120(h) of the Act. It should be borne in mind that the requirement itself remains in force.

g. *Cash fund and cash in transit.* Present 701.20(e)—Requires that coverage be increased to the greater of the FCU's daily cash fund or cash in transit when either exceeds minimum requirements. The increased coverage must be obtained within thirty days after discovery of the need for the increase.

Proposed Change—New 701.20(e)—While the language of this section is simplified, the content remains unchanged. This section remains necessary so that an FCU will be insured for its entire potential loss of cash should one of the insuring clauses of the bond be invoked (less any applicable deductible). If an FCU is robbed the bond will cover the entire potential loss under this section of the regulation.

h. *Minimum coverage.* Present 701.20(f)—Establishes a schedule of minimum surety and insurance coverages for FCUs according to asset size and fixes responsibility with the board of directors of each FCU to ensure adequate coverage.

Proposed Change—New 701.20(d)—The schedule of minimum coverages is simplified. While the schedule would appear to increase the minimum required coverage for credit unions with less than $50,000 in assets, this is not expected to have any practical impact inasmuch as it is NCUA's understanding that the actual bonds on these credit unions are routinely written in amounts equalling or well in excess of their assets. Comment is of course welcome on this point. The minimum coverage for FCUs with between $50,000 and $1,000,000 in assets is decreased. Credit unions with more than $50,000,000 in assets have a slight decrease in required bond coverage. The ceiling of $5,000,000 on minimum coverage requirements has been retained. The following tables show the minimum coverages from the current regulation and the proposal:

CURRENT REGULATION

Assets	Minimum coverage
$0 to 5,000	$1,000
$5,001 to $10,000	2,000
$10,001 to $20,000	4,000
$20,001 to $30,000	5,000
$30,001 to $40,000	9,000
$40,001 to $50,000	10,000
$50,001 to $75,000	15,000
$75,001 to $100,000	20,000
$100,001 to $150,000	30,000
$150,001 to $200,000	40,000
$200,001 to $300,000	50,000
$300,001 to $400,000	60,000
$400,001 to $500,000	70,000
$500,001 to $750,000	85,000
$750,001 to $1,000,000	100,000
$1,000,001 to $50,000,000	[1]100,000
$50,000,001 to $150,000,000	[2]2,500,000
Over $150,000,000	5,000,000

[1] Plus $50,000 for each million or fraction thereof of assets over $1,000,000.
[2] Plus $25,000 for each million or fraction thereof of assets over $50,000,000.

PROPOSAL

Assets	Minimum bond
$0 to $10,000	Coverage equal to the credit union's assets.
$10,001 to $1,000,000	$10,000 for each $100,000 or fraction thereof.
$1,000,001 to $50,000,000	$100,000 plus $50,000 for each million or fraction thereof over $1,000,000.
$50,000,001 to $295,000,000.	$2,550,000 plus $10,000 for each million or fraction thereof over $50,000,000.
Over $295,000,000	$5,000,000

A credit union may choose to have more than the minimum surety and insurance coverage if deemed appropriate by its board of directors. Section 120(h) of the Act requires the NCUA Board to set reasonable standards for bond coverage. The NCUA Board believes that the proposed changes in minimum coverage will give each board of directors more flexibility while at the same time maintaining the requirement in the Act for reasonable standards. Beyond these minimum standards, it is the board of directors' duty to ensure that areas of risk or loss exposure under each surety or insuring clause are covered in an amount necessary to protect the credit union.

i. *NCUA Board approval for reduced coverage.* Present 701.20(g)—Establishes that the schedule provided in Section 701.20(f) is the minimum coverage for all surety bonds for Federal credit unions and requires that reduced coverage have the prior approval of the NCUA Board.

Proposed Change—New 701.20(g)—The language of this section of the present regulation is redundant with the Act and other sections of the regulation. Therefore, most of the verbiage has been deleted in the proposal. The information concerning mandatory advanced approval for credit unions seeking a

reduction in minimum coverage is retained in the proposal.

j. *Deductibles.* Present 701.20(h)—Establishes a schedule of permissible deductibles for required coverages, prohibits deductibles for dishonesty and lack of faithful performance and requires that increased deductibles have the prior approval of the NCUA Board.

Proposed Change—New 701.20(h)—Two alternative new deductible schedules are set out in this section. The first appeared in the 1981 proposal. The second was informally suggested to NCUA by an underwriter of credit union surety bonds. Comments and preferences on these two options are requested. Both options represent substantial changes from the current regulation. First, the maximum amount of deductible has been increased, and second, the deductible has been made permissible for any bond coverage, including loss due to lack of faithful performance and fraud or dishonesty. Both options allow an FCU's board of directors more flexibility in making rational economic decisions on coverage versus risk. At the same time the proposals do not allow the deductible to become so large as to endanger an FCU's safety and solvency. It is hoped that these changes will aid in preventing the steady escalation of premium costs. The following tables show the deductibles allowed under the present regulation and the two options set out in the proposal:

CURRENT REGULATION

Assets	Maximum deductible
$0 to $100,000	No deductible allowed.
$100,001 to $250,000	$500.
$250,001 to $5000,00	$750.
$500,001 to $750,000	$1,000.
$750,001 to $1,000,000	$1,500.
$1,000,001 to $2,000,000	$2,000.
$2,000,001 to $3,000,000	$3,000.
$3,000,001 to $5,000,000	$4,000.
Over $5,000,000	$5,000.

PROPOSAL—OPTION A

Assets	Maximum deductibles
$0 to $100,000	No deductible allowed.
$100,001 to $250,000	$1,000.
$250,001 to $1,000,000	$2,000.
Over $1,000,000	$2,000 plus 1/1000 of total assets up to a maximum deductible of $200,000.

PROPOSAL—OPTION B

Assets	Maximum deductibles
Less than $500,000	$1,000.
$500,000 to $5,000,000	$5,000.
$5,000,001 to $10,000,000	$10,000.
$10,000,001 to $25,000,000	$15,000.

PROPOSAL—OPTION B—Continued

Assets	Maximum deductibles
$25,000,001 to $50,000,000	$20,000.
$50,000,001 to $100,000,000	$25,000.
Over $100,000,000	$100,000.

The proposed regulation retains the provision of the present rule that no deductible may exceed ten percent of an FCU's Regular Reserve unless a Contingency Reserve for the amount of the deductible is set aside. While a credit union with little or no reserves may be well operated and solvent, there may not be enough capital to write off the deductible portion of the loss and the uncovered loss would impair the soundness of a credit union.

3. Federally Insured State Chartered Credit Unions

Part 741 of NCUA's regulations requires, as a condition of account insurance coverage by the National Credit Union Share Insurance Fund (NCUSIF), that a credit union possess the minimum bond coverage stated in Section 701.20. Thus, the proposed changes to Section 701.20 would affect state chartered credit unions whose accounts are insured by NCUSIF. The Board welcomes comments from those credit unions and their state supervisory authorities on the advisability of the proposed changes.

Regulatory Procedures

The NCUA Board has determined and certifies that the proposed regulation, if adopted, will not have a significant economic impact on a substantial number of small credit unions because the proposed regulation reduces restrictions, lowers minimum coverage requirements and increases management flexibility. Therefore, a regulatory flexibility analysis is not required. Since the proposed rule would relieve burdens and delays would cause unnecessary harm, the NCUA Board also finds that full and separate consideration of all of the requirements of the Financial Regulation Simplification Act is impractical. Most of these policies, however, have been considered by the NCUA Board as set forth in the above discussion.

List of Subjects in 12 CFR Part 701

Credit unions, Surety bonds.

Authority: 12 U.S.C. 1761a; 12 U.S.C. 1761b; 12 U.S.C. 1766 (a) & (h); 12 U.S.C. 1789(a)(11).

Dated: March 22, 1984.

Rosemary Brady,

Secretary of the Board.

PART 701—[AMENDED]

It is proposed that § 701.20 of the NCUA Rules and Regulations be revised to read as follows:

§ 701.20 Surety Bond and Insurance Coverage for Federal Credit Unions.

(a) *Scope.* This Part provides the requirements for surety bonds for credit union employees and officials and for general insurance coverage for losses caused by persons outside of the credit union (protection for losses due to theft, holdup, vandalism, etc.).

(b) *Review of coverage.* The board of directors of each Federal credit union shall, at least annually, carefully review the bond and insurance coverage in force in order to ascertain its adequacy in relation to risk exposure and to the minimum requirements fixed from time to time by the Board.

(c) *Minimum Coverage; Approved Forms.* Every Federal credit union will maintain bond and insurance coverage with a company approved by the NCUA Board. Credit Union Blanket Bond Standard Form No. 23 of the Surety Association of America (revised to May, 1950) plus new Faithful Performance Rider (faithful performance coverage for the individual charged with the responsibilities of the financial officer set forth in Article VIII, Section 5 of the Federal Credit Union Bylaws) is considered the minimum coverage required and is approved. Credit Union Blanket Bond Form 581 (with new faithful performance rider) is also approved. Any other form must receive the prior written approval of the NCUA Board. All surety bonds must provide faithful performance of duty coverage for the financial officer elected by the board of directors. Surety bonds must provide coverage for the fraud and dishonesty of all employees, directors, officers, and supervisory and credit committee members.

(d) *Minimum Coverage Amounts.* The minimum amount of bond coverage required will be computed based on the credit union's total assets. The following table lists the minimum requirements:

Assets	Minimum bond
$0 to $10,000	Coverage equal to the credit union's assets.
$10,001 to $1,000,000	$10,000 for each $100,000 or fraction thereof.
$1,000,001 to $50,000,000	$100,000 plus $50,000 for each million or fraction thereof over $1,000,000.
$50,000,001 to $200,000,000	$2,550,000 plus $10,000 for each million or fraction thereof over $50,000,000.

Assets	Minimum bond
Over $295,000,000	$5,000,000

It is the duty of the board of directors of each Federal credit union to provide adequate protection to meet its unique circumstances by obtaining, when necessary, bond and insurance coverage in excess of the above minimums.

(e) *Increased Coverage, Cash On Hand Or In Transit.* When either of the following amounts exceed a Federal credit union's minimum coverage limits as specified in paragraph (d) of this regulation, the minimum coverage limits for that Federal credit union will be increased to be equal to the greater of the following amounts within thirty days of the discovery of the need for such increase:

(1) The aggregate amount of the daily cash fund (change fund plus maximum anticipated daily receipts) and food stamps (if any), on the Federal credit union's premises, or

(2) The aggregate amount of the Federal credit union's money, currency, coin, banknotes, Federal Reserve notes and food stamps (if any) placed in transit in any one individual shipment.

(f) *Increased Cash Coverage; Exception.* Subsection (e) notwithstanding, no increase in coverage will be required where a Federal credit union temporarily increased its cash fund because of an extraordinary event which reasonably cannot be expected to recur.

(g) *Reduced Coverage; NCUA Approval.* Any proposal for reduced coverage must be approved in writing by the NCUA Board at least 20 days in advance of the proposed effective date of the reduction.

(h) *Deductibles.* (1) The maximum amount of deductibles allowed are based on the credit union's total assets. The following table sets out the maximum deductibles:

OPTION A

Assets	Maximum deductible
$0 to $100,000	No deductibles allowed.
$100,001 to $250,000	$1,000.
$250,001 to $1,000,000	$2,000.
Over $1,000,001	$2,000 plus 1/1000 of total assets up to a maximum deductible of $200,000.

OPTION B

Assets	Maximum deductibles
Less than $500,000	$1,000
$500,000 to $5,000,000	5,000
$5,000,001 to $10,000,000	10,000
$10,000,001 to $25,000,000	15,000
$25,000,001 to $50,000,000	20,000

OPTION B—Continued

Assets	Maximum deductibles
$50,000,001 to $100,000,000	25,250
Over $100,000,000	100,000

(2) A deductible may be applied separately to one or more insuring clauses in a blanket bond. Deductibles in excess of those shown in this section must have the written approval of the NCUA Board at least 20 days prior to the effective date of such deductibles.

(3) No deductible will exceed ten percent of a Federal credit union's Regular Reserve unless the credit union creates a segregated Contingency Reserve for the amount of the deductible. Valuation allowance accounts, e.g., allowance for loan losses, may not be considered part of the Regular Reserve when determining the maximum deductible.

(i) *Additional Coverage.* The NCUA Board may require additional coverage for any Federal credit union when, in the opinion of the Board, current coverage is insufficient. The board of directors of the Federal credit union must obtain additional coverage within 30 days after the date of written notice from the NCUA Board.

BILLING CODE 7535-01-M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 121

Small Business Size Standards

AGENCY: Small Business Administration.

ACTION: Proposed rule.

SUMMARY: In conjunction with an SBA notice of policy published concurrently in the **Federal Register** which authorizes deposits in small minority owned and controlled financial institutions (as defined in that notice as specific commercial banks and savings and loan associations) to qualify as subcontracts for purposes of meeting subcontracting goals and credits, this size standard is needed to establish what constitutes a small financial institution. This regulation would establish, upon publication in final form in the **Federal Register**, a size standard applicable to financial institutions. SBA has determined that a financial institution with assets of not more than $100 million will be considered small.

DATE: Comments will be received until June 1, 1984.

ADDRESS: Comments should be addressed to Andrew A. Canellas, Director, Size Standards Staff, U.S. Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: Andrew A. Canellas; (202) 653-6373.

SUPPLEMENTARY INFORMATION: SBA has set forth a notice of policy with respect to the interpretation of sections 8(d) and 15(g) of the Small Business Act, 15 U.S.C. 637(d) and 644(g). This policy broadens the definition of the term "subcontract" for purposes of these sections. It permits contracts for provision of specified services by small minority owned and controlled financial institutions to qualify as subcontracts for purposes of meeting subcontracting goals and credits. Consequently, a size standard is needed for financial institutions to establish which minority financial institutions are to be considered small for purposes of that notice.

Several minority banks have indicated to SBA that permitting contracts for financial services, including deposits, by prime contractors with minority financial institutions to meet subcontracting goals and credits is urgently needed to sustain the minority banking community. Furthermore, in SBA's opinion such a position will result in enhanced availability of capital to small and minority owned businesses since the financial institutions providing such services will be better able to service these businesses. This is the case because of the "pass-through effect" that additional deposits in minority financial institutions would have on minority businesses. The pass-through effect presumes that more money deposited in minority financial institutions would make more loans available at more favorable terms to minority bsuinesses and individuals because such businesses and individuals are likely to be located in the vicinity of minority financial institutions. This would result in aiding the development of minority businesses, which is also urgently needed. Such a position by SBA is consistent with the letter and intent of section 7(j)(9) of the Small Business Act.

Rationale for the Rule

SBA has determined that a size standard for financial institutions should be based upon the assets of the financial institution since this is a commonly accepted measure of bank size. In a study of bank size and financial performance by Kolari and Fraser done for SBA entitled "Size and

Financial Performance in Banking," the authors note the "inherently arbitrary dichotomy between small and large banks." While this may be so, there is a rought consensus among persons who write about banking and size distinctions. SBA reviewed several opinions regarding the size of a small bank. These opinions come from various articles which generally examine banks' performance, industry structure, and competition.

These opinions indicate that the range of $25–$100 million in assets constitutes a small bank. Within this range, data compiled by the Federal Deposit Insurance Corporation permit examination of three size classes: $25, $50, and $100 million. As indicated in Table 1 below, about 85 percent of all banks have assets of less than $100 million, and the average bank size is $149 million in assets.

Data on minority-owned bank sizes have been provided to SBA by the Federal Reserve System. Table 3 below has been constructed from these data. The differences in assets between all banks, Table 2 below, can thus be compared to Table 3 for minority-owned banks. As expected, minority banks generally have less assets, and control of assets is more dispersed among a greater number of these banks. Average size is $43 million in assets compared to $149 million for all banks.

After inspection of this data, various size standards for a small bank were considered by SBA's Size Standards Staff. Clearly a size standard of $25 million in assets would be too small, as it encompasses only 4 percent of all bank assets and 16 percent of minority bank assets. At the other extreme, a size standard of $300 million in assets is so large that most states have only a few banks in this size category. In addition, there are only two minority-owned banks with $300 million in assets.

The two other size standard candidates are $50 and $100 million, both within the range suggested above in the cited articles. On average, a bank with $50 million in assets would do business from a head office and one branch; at $100 million in assets, a second or third branch might be added, although this varies considerably. The $100 million bank is also more likely to be capable of handling electronic funds transfers, a faster paperless way of handling money.

Banks of $50 million or less in assets have 9 percent of all assets; for $100 million, this increases to 17 percent and includes 85 percent of all banks. For minority banks, 38 percent of assets are in banks having $50 million in assets or less; 64 percent are in banks having $100 million in assets or less, representing 95 percent of minority-owned banks. For minority-owned banks, a size standard of $50 million would include 73 of 96 banks; at $100 million, 89 banks would be included.

SBA thus proposes that a size standard of $100 million in assets is within the range suggested by the available data. It falls midway between the $149 million all bank and $43 million minority bank average sizes; should be large enough to handle electronic funds transfer, yet excludes several of the largest minority-owned banks. This size standard would exclude only the largest 15 percent of all financial institutions in the United States, which clearly are not in need of the benefits available by being categorized as small. This standard would result in making the minority banking program, for which this rule is being proposed, available to all but the 7 largest minority-owned banks. For these reasons, SBA proposes that a financial institution with assets of not more than $100 million will be considered small.

For purposes of Executive Order 12291 and the Regulatory Flexibility Act, SBA hereby states that this rule if promulgated in final form may result in significant economic impact upon the minority banking program which this rule is intended to facilitate may be such that this rule be considered a major rule. Therefore, the following regulatory analysis information is provided:

1. *Description of Potential Benefits of the Rule.* The benefit to be derived is the facilitation of the minority banking program described above.

2. *Description of Potential Costs of the Rule.* There are no costs associated with this rule.

3. *Description of Net Benefits of the Rule.* The rule will encourage the placement of deposits by Federal contractors in banks owned and controlled by socially and economically disadvantaged individuals. As such, those banks will be benefited, and the businesses which they serve will have more loanable funds available to them.

4. *Description of Reasons Why This Action is Being Considered.* This action is needed to facilitate the minority banking program described above.

5. *Statement of Legal Basis for the Proposed Rule.* 15 U.S.C. 632(a)).

6. *Description of Entities to Which the Proposed Rule Will Apply.* Commercial Banks and Savings and Loan Associations which are 51 percent owned by one or more socially and economically disadvantaged individuals; or in the case of a publicly owned institution, at least 51 percent of the stock of which is owned by one or more socially and economically disadvantaged individuals; and whose daily business operations are controlled by one or more such individuals.

7. *Description of Reporting and Recordkeeping Requirements.* There are none associated with this rule.

Inventions and patents, Small business.

PART 121—[AMENDED]

Accordingly, pursuant to section 3(a) of the Small Business Act, 15 U.S.C. 632(a), SBA hereby proposes to amend Part 121 of 13 CFR to add a new § 121.13 as follows:

§ 121.13 Definition of small business financial institution for purposes of sections 8(d) and 15(g) of the Small Business Act.

(a) For the purpose of sections 8(d) and 15(g) of the Small Business Act, a small financial institution is a commercial bank or savings and loan association the average annual assets of which for the preceding three fiscal years do not exceed $100 million.

(b) For purposes of this regulation, the term assets shall include all assets reflected on the institution's financial balance sheet for a given fiscal year.

TABLE 1

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 84-NM-13-AD]

Airworthiness Directives; Boeing Model 747 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This Notice proposes a new airworthiness directive (AD) applicable to Boeing Model 747 series airplanes, which would require inspection of the body and canted bulkhead structure for cracks at the nose gear wheel well forward corners. This action is prompted by reports from five operators that twelve crack were found on nine airplanes. This action is necessary because an undetected cracks may result in sudden loss of cabin pressurization and extensive structural damage.

DATE: Comments must be received on or before May 21, 1984.

ADDRESSES: Send comments on the proposal in duplicate to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 84-NM-13-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

The applicable service information may be obtained from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124, or may be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. O. E. Schrader, Airframe Branch, ANM-120S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 431-2923. Mailing address: Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the rules docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the rules docket.

Availability of NPRMS

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 84-NM-13-AD, 17900 Pacific Highway South,C-68966, Seattle, Washington 98168.

Discussion

The Boeing Company has conducted a structural reassessment of the Boeing Model 747 airplane as part of their program to develop a Supplemental Structural Inspection Document (SSID) for the airplane. In conducting this assessment, Boeing used advanced analysis techniques which were not available during the original design and certification of the Model 747 and used as guidelines the requirements of Federal Aviation Regulations (FAR) 25.571, Amendment 25-45. The reassessment included structural details that have a history of cracking. The analysis has revealed that certain of these details should receive increased emphasis in the maintenance program of operators to maintain the structural integrity of the airplane. The nose wheel well lower forward corners are one such detail.

Numerous cracks up to six inches long have been found by five operators in the body and canted buklhead structure at the nose gear wheel well forward corner on nine airplanes. These cracks are caused by a combination of cabin pressurization loads, flight loads, and landing loads.

Undetected, cracks in the exterior skin could progress forward to the next frame and cracks in the canted bulkhead could grow and result in sudden loss of cabin pressure and extensive structural damage.

Boeing has issued Service Bulletin 747-53-2112, Revision 3, which defines the specific procedures to be used to inspect for cracks in the body and canted bulkhead structure at the nose gear wheel well forward corners on certain Model 747 airplanes. A modification is described in the service bulletin which consists of installing skin doublers on certain airplanes and modifying the forward hinge fitting-to-body attachment on other airplanes. The repetitive inspection requirements would continue after modification.

Since this condition is likely to exist or develop in other airplanes of the same type design, the proposed AD would require inspections of the nose gear wheel well forward corners on certain Model 747 series airplanes.

It is estimated that 94 airplanes of U.S. operators would be affected by this AD, that it would take approximately 200 manhours per airplane to accomplish the required actions, and that the average labor cost would be $35 per manhour. Repair parts are estimated at $2000 per airplane. Based on these figures, the total cost impact of the proposed AD is estimated to be $850,000. This is a worst case analysis, since not all aircraft would need modification.

For these reasons the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. No small entities within the meaning of the Regulatory Flexibility Act would be affected.

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

Boeing: Applies to Model 747 series airplanes certificated in all categories listed in Boeing Service Bulletin 747–53–2112, Revision 3, dated November 4, 1983, or later FAA approved revisions. To prevent failure of the body skin and the canted pressure bulkhead structure, accomplish the following, unless already accomplished:

A. For airplanes that have not been modified in accordance with Service Bulletin 747–53–2112, Revision 3, or later FAA approved revisions;

(1) Within the next 250 landings for Group I airplanes and 500 landings for Group II airplanes after the effective date of this AD, or prior to the accumulation of 4,000 landings, whichever occurs later; and thereafter at intervals not to exceed 1000 landings for Group I airplanes and 2000 landings for Group II airplanes, visually inspect the nose gear wheel well lower forward corners exterior and interior area for cracks in accordance with the service bulletin. Additionally, high frequency eddy current (HFEC) inspect the chord and doubler for cracks at the two forward hinge fairing attach bolt locations identified for inspection in Service Bulletin 747–53–2112, Revision 3, or later FAA approved revisions.

(2) For Group I airplanes, if a crack is visible only from outside the airplane and has not progressed into the vertical leg of the nose wheel well forward bulkhead lower chord and does not extend forward of the first row of skin fasteners, repair may be deferred for 500 landings with inspection at 100 landing intervals. If the crack exceeds the above limits, repair in accordance with Service Bulletin 747–53–2112, Revision 3, or later FAA approved revisions, prior to next pressurized flight.

(3) If cracks are found on Group II airplanes, repair in accordance with a method approved by the Manager, FAA, Seattle Aircraft Certification Office prior to further flight.

B. For airplanes that have been modified in accordance with Service Bulletin 747–53–2112, Revision 3, or later FAA approved revisions; within the next 200 landings for Group I airplanes and 500 landings for Group II airplanes after the effective date of the AD or prior to the accumulation of the threshold landings specified in Table I, below, whichever occurs later, inspect the nose gear wheel well lower forward corners in accordance with Table I. Reinspect at intervals not to exceed those specified in Table I. If cracks are found, repair in accordance with an FAA approved procedure prior to further flight.

C. Alternate means of compliance with this AD which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

D. For purposes of complying with this AD, subject to acceptance by the assigned FAA Maintenance Inspector, the number of landings may be determined by dividing each airplane's time in service by the operator's fleet average from takeoff to landing for the airplane type.

E. Aircraft may be ferried to a base for maintenance if accordance with Sections 21.197 and 21.199 of the Federal Aviation Regulations.

F. Upon request of the operator, an FAA Maintenance Inspector, subject to prior approval of the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, may adjust the repetitive inspection intervals specified in this AD to permit compliance at an established inspection period of an operator, if the request contains substantiating data to justify the adjustment period.

TABLE I.—NOSE GEAR WHEEL WELL LOWER FORWARD CORNER INSPECTION FOR CRACKS

[Applicable only for airplanes modified per Boeing Service Bulletin 747–53–2112, revision 3, or latest revision.]

Airplane and inspection	Inspection threshold landings	Repeat inspection interval landings
Group I		
Option I.—External inspection: Airplanes modified per S/B 747–53–2112, Rev. 3: Perform an external visual inspection of the structure adjacent to the left and right forward corners of the nose gear wheel well forward bulkhead in accordance with Service Bulletin 747–53–2112, Rev. 3.	Within 200 landings from effective date of AD, or 1,000 landings after modification, whichever is later.	1,000
Option II.—Internal inspection: Perform an internal visual inspection of the nose gear wheel well lower forward corner structure in accordance with Service Bulletin 747–53–2112, Rev. 3.	Within 200 landings from effective date of AD, or 1,000 landings after modification, whichever is later.	1,500
Group II: Airplanes modified per S/B 747–53–2112, Rev. 3. Perform a low frequency eddy current inspection in the under skin doubler at the nose gear wheel well lower forward corners in accordance with Service Bulletin 747–53–2112, Rev. 3.	Within 500 landings from effective date of AD, or 6,000 landings after modification, whichever is later.	3,000

(Secs. 313(a), 314(a), 601 through 610, and 1102 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 through 1430, and 1502); 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.85)

Note.—For the reasons discussed earlier in the preamble: the FAA has determined that this document: (1) Involves a proposed regulation which is not major under Executive Order 12291; and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, would not have a significant economic impact on a substantial number of small entities, since no small entities operate Boeing Model 747 airplanes. A regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Seattle, Washington on March 22, 1984.

Availability of NPRMS

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 84–NM–12–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

The Boeing Company has conducted a structural reassessment of the Boeing Model 747 airplane as part of their program to develop a Supplemental Structural Inspection Document (SSID) for the airplane. In conducting this reassessment, Boeing used advanced analysis techniques which were not available during the original design and certification of the Model 747 and used as guidelines the requirements of Federal Aviation Regulation (FAR) 25.571, Amendment 25–45. The reassessment included structural details that have a history of cracking. The analysis has revealed that certain of these details should receive increased emphasis in the maintenance program of operators to maintain the structural integrity of the airplane. The front spar pressure bulkhead chords are one such detail.

Numberous cracks ranging from 0.10 to 2.0 inches have been found on five airplanes by two operators in the wing front spar pressure bulkhead lower chord. The cracks are caused by a combination of cabin pressurization loads, flight loads, and landing loads.

Cracks remaining undetected could grow and result in sudden loss of cabin pressurization and extensive structural damage.

Boeing has issued Service Bulletin 747–53–2064, Revision 4, which defines the specific inspection procedures to be used to inspect for cracks in the front spar pressure bulkhead chord on certain Model 747 airplanes. A modification is described in the service bulletin which consists of installing reinforcements to the front spar pressure bulkhead chord and reworking the drag splice fitting. The repetitive inspection requirements would continue after modification but at an increased interval.

Since this condition is likely to exist or develop in other airplanes of the same type design, the proposed AD would require inspection and, if necessary, repair or modification of certain Model 747 series airplanes.

It is estimated that 102 airplanes of U.S. operators would be affected by this AD, that it would take approximately 422 manhours per airplane to accomplish the required actions, and that the average labor cost would be $35 per manhour. Repair parts are estimated at $3550 per airplane. Based on these figures, the total cost impact of the AD is estimated to be $1,868,000. For these reasons the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. No small entities within the meaning of the Regulatory Flexibility Act would be affected.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

Boeing: Applies to Model 747 series airplanes certificated in all categories listed in Boeing Service Bulletin 747–53–2064, Revision 4, dated September 23, 1983, or later FAA approved revisions. To prevent front spar pressure bulkhead chord failures, accomplish the following unless already accomplished:

A. For airplanes that have not been modified in accordance with Service Bulletin 747–53–2064, Revision 4, or latter FAA approved revisons; within the next 1000 landings after the effective date of this AD or prior to the accumulations of 10,000 landings, whichever occur later, and thereafter at intervals not to exceed 7000 landings, high frequency eddy current (HFEC) inspect the chord for cracks between stringers S–37 and S–39 at the chord radius, heel, and flanges adjacent to the fastener holes identified for inspection in Service Bulletin 747–53–2064, Revision 4, or later FAA approved revisions. If cracks are found in the pressure bulkhead chord, accomplish the repair and modification in accordance with the service bulletin before further flight. Repair of cracks along the chord radius under five inches in length or acorss a chord flange that have not severed the chord flange may be deferred 1000 landings by stop drilling and reinspecting for crack progression every 200 landings using high frequency eddy current. If crack progression is found, repair prior to further flight.

B. For airplanes that have been modified in accordance with Service Bulletin 747–53–2064, Revision 4, or later FAA approved revisions; within the next 1000 landings after the effective date of this AD or prior to the accumulation of 10,000 landings after the modification, whichever is later, and thereafter at intervals not to exceed 10,000 landings, high frequency eddy current (HFEC) inspect for cracks in the front spar pressure bulkhead lower chord heel from stringers S–37 to S–39 and ultrasonicly inspect for cracks in the fuselage skin orignating at the indicated fastener holes beneath the forward drag splice fitting flanges in accordance with the service bulletin. If any cracks are found, repair in accordance with the service bulletin before further flight.

C. Alternate means of compliance with this AD which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

D. For purposes of complying with this AD, subject to acceptance by the assigned FAA Maintenance Inspector, the number of landings may be determined by dividing each airplane's time in service by the operator's fleet average from takeoff to landing for the airplane type.

E. Aircarft may be ferried to a base for maintenance in accordance with §§ 21.197 and 21.199 of the Federal Aviation Regulations.

F. Upon request of the operator, an FAA Maintenance Inspector, subject to prior approval of the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, may adjust the repetitive inspection intervals specified in this AD to permit compliance at an established inspection period of an operator, if the request contains substantiating data to justify the adjustment period.

(Secs. 313(a), 314(a), 601 through 610, and 1102 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 through 1430, and 1502); 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.85)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this document: (1) involves a proposed regulation which is not major under Executive Order 12291; and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, would not have a

significant economic impact on a substantial number of small entities, since no small entities operate Model 747 airplanes. A regulatory evaluation had been prepared and has been placed in the public docket.

Issued in Seattle, Washington on March 22, 1984.

The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the rules docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the rules docket.

Availability of NPRMS

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 84-NM-11-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion

The Boeing Company has conducted a structural reassessment of the Boeing Model 747 airplane as part of their program to develop a Supplemental Structural Inspection Document (SSID) for the airplane. In conducting this reassessment, Boeing used advanced analysis techniques which were not available during the original design and certification of the Model 747 and used as guidelines the requirements of Federal Aviation Regulation (FAR) 25.571, Amendment 25-45. The measurement included structural details that have a history of cracking. The analysis has revealed that certain of these details should receive increased emphasis in the maintenance program of operators to maintain the structural integrity of the airplane. The body station 1241 bulkhead splice strap is one such detail.

Thirty-three incidents of cracking have been reported. The cracks were caused by cyclic loading and corrosion.

Undetected cracks in the station 1241 bulkhead frame forging could result in sudden in-flight depressurization of the airplane and the inability to withstand fail-safe loads.

Boeing has issued Service Bulletin 747-53-2219, Revision 1, which describes the specific procedures to be used to inspect for cracks in the body station 1241 bulkhead splice strap on certain Model 747 airplanes. A modification is described in the service bulletin which consists of replacing the lower portion of the bulkhead splice strap with a wider strap of different material. Repetitive inspections are required after modification.

Since this condition is likely to exist or develop in other airplanes of the same type design, the proposed AD would require inspection and, if necessary, repair or modification of the body station 1241 bulkhead splice strap on certain Model 747 series airplanes.

It is estimated that 142 airplanes of U.S. operators would be affected by this AD, that it would take approximately 800 manhours per airplane to accomplish the required actions, and that the average labor cost would be $35 per manhour. Repair parts are estimated at $8000 per airplane. Based on these figures, the total cost impact of the AD is estimated to be $5,112,000. For these reasons the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. No small entities within the meaning of the Regulatory Flexibility Act would be affected.

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

Boeing: Applies to Model 747 series airplanes certificated in all categories listed in Boeing Service Bulletin 747-53-2219, Revision 1, dated October 13, 1983, or later FAA approved revisions. To prevent failure of the body station (B.S.) 1241 bulkhead splice strap, accomplish the following:

A. For airplanes that have not been modified in accordance with Service Bulletin 747-53-2219, Revision 1, or later FAA approved revisions:

(1) Perform an eddy current inspection for cracks in the B.S. 1241 bulkhead frame splice strap and other structure common to the aft hole in accordance with the Service Bulletin instructions within the next 1000 landings (1500 landings for 747-100SR) after the effective date of this AD or prior to the accumulation of 10,000 landings (13,000 landings for 747-100SR) whichever occurs later.

(2) If no cracks are found at the aft large bolt hole common to the longeron fitting identified in the Service Bulletin, eddy current inspect thereafter at intervals not to exceed 7000 landings (10,500 landings for 747-100SR).

(3) If a crack is found in the bulkhead splice strap at the aft hole, perform an eddy current inspection for cracks in the bulkhead frame splice strap and frame forging and other structure common to the adjacent

forward hole in accordance with the Service Bulletin instructions.

(4) If no cracks are found in the forward hole, or if cracks are found only in the bulkhead splice strap at the aft hole, reinspect with an eddy current procedure the bulkhead splice strap and frame forging for cracks at the forward hole at intervals not to exceed 3000 landings (4500 landings for 747–100SR).

(5) If cracks are found at the forward hole in the bulkhead frame forging, repair in accordance with Service Bulletin 747–53–2219, Revision 1, or later FAA approved revisions, prior to next flight.

B. For airplanes that have been modified in accordance with Service Bulletin 747–53–2219, Revision 1, or later FAA approved revisions; within the next 1000 landings (1500 landings for 747–100SR) after the effective date of this AD or prior to the accumulation of 10,000 landings (13,000 landings for 747–100SR) after the modification, whichever occurs later, and thereafter at intervals not to exceed 10,000 landings (15,000 landings for 747–100SR), perform the following inspections in accordance with Service Bulletin 747–53–2219, Revision 1, or later FAA approved revisions:

(1) Perform an ultrasonic inspection for bulkhead frame forging corner cracks at forward fastener hole.

(2) Perform an ultrasonic inspection for bulkhead splice strap edge crack extending throught the aft hole.

(3) Perform a close visual inspection for fastener hole cracks in the external splice plate and the forward and aft internal splice straps.

If cracks are found, repair in accordance with FAA approved procedure prior to further flight.

C. Alternate means of compliance with the AD which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

D. For purposes of complying with this AD, subject to acceptance by the assigned FAA Maintenance Inspector, the number of landings may be determined by dividing each airplane's time in service by the operator's fleet average from takeoff to landing for the airplane type.

E. Aircraft may be ferried to a base for maintenance in accordance with Section 21.197 and 21.199 of the Federal Aviation Regulations.

F. Upon request of the operator, an FAA Maintenance Inspector, subject to prior approval of the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, may adjust the repetitive inspection intervals specified in this AD to permit compliance at an established inspection period of an operator, if the request contains substantiating data to justify the adjustment period.

(Secs. 313(a), 314(a), 601 through 610, and 1102 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 through 1430, and 1502); 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.85)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this document involves a proposed regulation which: (1) Is not major under Executive Order 12291; and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); an it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, would not have a significant economic impact on a substantial number of small entities, since no small entities operate Boeing Model 747 airplanes. A regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Seattle, Washington on March 22, 1984.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes a new airworthiness directive (AD) that would require modification of the "C" hydraulic system in Lockheed Model L–1011–385 series airplanes to minimize the probability of loss of three hydraulic systems during takeoff. This action is prompted by a recent incident wherein three of the four hydraulic systems in one airplane were lost when multiple main landing gear tire failures were experienced during the takeoff run. The loss of three hydraulic systems would significantly reduce the capability of the flight control system.

DATE: Comments must be received no later than May 21, 1984.

ADDRESSES: The applicable service information may be obtained from: Lockheed-California Company, P.O. Box 551, Burbank, California 91520, Attention: Commercial Support Contracts, Dept. 63–11, U–33, B–1. This information also may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 4344 Donald Douglas Drive, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Franklin Tiangsing, Aerospace Engineer, Systems & Equipment Branch, ANM–130L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California 90808, telephone (213) 548–2831.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or argumants as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified under the caption "Availability of NPRMS." All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMS

Any person may obtain a copy of this notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 84–NM–20–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

One incident has been reported where an L–1011 had two main landing gear tires fail due to foreign object damage as the airplane approached V_1 speed during the takeoff run. Fragments of the failed tires ruptured the "A" and "B" system hydraulic lines and the truck leveler and downlock lines of the "C" system. The takeoff was successfully aborted, although the "B" and "C" system hydraulic brake accumulators were depleted during the stop. Additionally, the "C" system steering was lost shortly after the aircraft had taxied off the runway.

Therefore, in consideration of the hazardous consequence of multiple hydraulic system failures, the proposed AD is considered to be necessary.

Cost Estimate

The estimated costs associated with this proposed AD are as follows: 70 domestic airplanes would be affected requiring approximately 37.6 manhours per airplane to accomplish the required actions at an average labor cost of $35 per manhour. The kit costs are approximately $3,542 per airplane. Based on these figures, the total cost impact of this AD on the U.S. fleet is

estimated to be $340,060. For these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few, if any, small entities within the meaning of the Regulatory Flexibility Act would be affected.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 30.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

Lockheed-California Company: Applies to Lockheed Model L–1011–385 series airplanes, certificated in all categories. Compliance required as indicated, unless previously accomplished.

To prevent the loss of flight control capability due to loss of hydraulic fluid through the landing gear truck leveler, the downlock supply, or "C" system return line failures, accomplish the following:

A. Within 180 calendar days after the effective date of this AD, modify the "C" hydraulic system by installing a hydraulic fuse and associated hydraulic tubing and replace aluminum return lines with steel lines in accordance with Lockheed L–1011 Service Bulletins No. 093–29–065, Revision 4, dated August 9, 1983, and 093–29–085, dated December 8, 1983, or later revisions approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

B. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this proposal who have not already received these documents from the manufacturer may obtain copies upon request to the Lockheed-California Company, P.O. Box 551, Burbank, California 91520, Attention: Commercial Support Contracts, Dept. 63–11, U–33, B–1. These documents also may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or 4344 Donald Douglas Drive, Long Beach, California.

(Secs. 313(a), 314(a), 601 through 610, and 1102 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 through 1430, and 1502); 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.85)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this document: (1) Involves a proposed regulation which is not major under Executive Order 12291; and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because few, if any, Model L–1011 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket. A copy may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in Seattle, Washington on March 22, 1984.

Charles R. Foster,

Director Northwest Mountain Region.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 50

[AD–FRL–2556–3]

Proposed Revisions to the National Ambient Air Quality Standards for Particulate Matter

AGENCY: Environmental Protection Agency.

ACTION: Public hearing announcement.

SUMMARY: On March 20, 1984, EPA proposed revisions to the national ambient air quality standards for particulate matter (49 FR 10408). In accordance with Section 307(d)(5) of the Clean Air Act, today's notice is to announce a public hearing to be held in Washington, D.C. for the purpose of receiving public comment on the proposed revisions to the standards and on related notices that set out proposed revisions to EPA's regulations concerning ambient air monitoring reference and equivalent methods (49 FR 10454) and ambient air quality surveillance (49 FR 10435).

DATE: The hearing will be on April 30, 1984 beginning at 9:30 a.m.

ADDRESS: The hearing will be held at the Environmental Protection Agency, 401 M Street, S.W., Room 3906, Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Mr. John H. Haines, Strategies and Air Standards Division, Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Mail Drop 12, Research Triangle Park, N.C. 27711. Telephone (919) 541–5531 (FTS: 629–5531).

SUPPLEMENTARY INFORMATION: Individuals planning to make oral presentations at the hearing should notify John H. Haines, at the above address, at least seven days prior to the date of the hearing. Oral presentations will be limited to 15 minutes each. Any member of the public may file a written statement before, during or within 30 days after the hearing. Written statements (duplicate copies preferred) should be addressed to: Central Docket Section (LE–131), Environmental Protection Agency, Attn: Docket No. A–82–37, 401 M Street, S.W., Washington, D.C. 20460.

A verbatim transcript of the hearing and written statements will be available for copying during normal working hours at the Central Docket Section, Environmental Protection Agency, West Tower Lobby, Gallery I, 401 M Street, S.W., Washington, D.C.

List of Subjects in 40 CFR Part 50

Air pollution control, Carbon monoxide, Ozone, Sulfur oxides, Particulate matter, Nitrogen dioxide, Lead.

Dated: March 26, 1984.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

Development of Extra Long Staple Cotton Multi-Peril Crop Insurance

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Federal Crop Insurance Corporation (FCIC), USDA has accepted a proposal developed by private multi-peril crop insurers through the Crop Hail insurance Actuarial Association, to provide insurance for producers in five (5) Arizona Counties approved by FCIC for extra long staple (Pima) cotton crop insurance, using only FCIC approved rates and forms for this purpose, beginning with the 1984 crop year. Insurers wishing to write this business may be reinsured under FCIC's Reinsurance Agreements. Extra long staple (Pima) cotton producers wishing to contact participating insurance companies or to have cotton yields certified, should contact their county ASCS Office. Would be insurers wishing further information may contact the individual listed below.

FOR FURTHER INFORMATION CONTACT: Alan S. Walter, Chief, Reinsurance Branch, Federal Crop Insurance Corporation, P.O. Box 293, Kansas City, MO 64141, telephone (816) 926–7939.

The Arizona Counties where this insurance will be available are:

Graham
Maricopa
Pima
Pinal
La Paz

Done in Washington, D.C. on March 22, 1984.

Peter F. Cole,
Secretary, Federal Crop Insurance Corporation.

Dated: March 23, 1984.

BILLING CODE 3410–08–M

Federal Grain Inspection Service

Designation Renewal of Chattanooga Grain Inspection Company, Inc. (TN), and Enid Grain Inspection Company, Inc. (OK)

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This notice announces the designation renewal of Chattanooga Grain Inspection Company, Inc., and Enid Grain Inspection Company, Inc., as official agencies responsible for providing official services under the U.S. Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (Act).

EFFECTIVE DATE: May 1, 1984.

ADDRESS: James R. Conrad, Chief, Regulatory Branch, Compliance Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue SW., Room 1647 South Building, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447–8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Department Regulation 1512–1; therefore, the Executive Order and Department Regulation do not apply to this action.

The October 28, 1983, issue of the Federal Register (48 FR 49896) contained a notice from the Federal Grain Inspection Service (FGIS) announcing that Chattanooga's and Enid's designations terminate on April 30, 1984, and requesting applications for designation as the agency to provide official services within each specified geographic area. Applications were to be postmarked by November 28, 1983.

Chattanooga and Enid were the only applicants for each respective designation.

FGIS announced the names of these applicants and requested comments on same in the January 3, 1984, issue of the Federal Register (49 FR 128). Comments were to be postmarked by February 17, 1984.

No comments were received regarding the designation renewal of Chattanooga and Enid.

FGIS has evaluated all available information regarding the designation criteria in Section 7(f)(1)(A) of the Act, and in accordance with Section 7(f)(1)(B), has determined that Chattanooga and Enid are able to provide official services in the respective geographic areas for which their designations are being renewed. Each assigned area is the entire geographic area, as previously described in the October 28 Federal Register issue.

Effective May 1, 1984, and terminating April 30, 1987, the responsibility for providing official inspection services in their respective specified geographic areas are assigned to Chattanooga and Enid.

A specified service point, for the purpose of this notice, is a city, town, or other location specified by an agency to conduct official inspection services and where the agency and one or more of its licensed inspectors are located. In addition to the specified service points within the assigned geographic area, an agency will provide official services not requiring a licensed inspector to all locations within its geographic area.

Interested persons may contact the Regulatory Branch, specified in the address section of this notice, to obtain a list of the specified service points. Interested persons also may obtain a list of the specified service points by contacting the agencies at the following address:

Chattanooga Grain Inspection Company, Inc., Judd Road, P.O. Box 5113, Chattanooga, TN 37406

Enid Grain Inspection Company, Inc., 2305 N. 10th Street, P.O. Box 229, Enid, OK 73701

(Sec. 8, Pub. L. 94–582, 90 Stat. 2873 (7 U.S.C. 79))

Dated: March 23, 1984.

J. T. Abshier,

Director, Compliance Division.

BILLING CODE 3410-EN-M

Request for Comments on Designation Applicants in the Areas Currently Assigned to Georgia Department of Agriculture (GA) and Schneider Inspection Service, Inc. (IN)

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This notice requests comments from interested parties on the applicants for official agency designation in the areas currently assigned to Georgia Department of Agriculture and Schneider Inspection Service, Inc.

DATE: Comments to be postmarked on or before May 17, 1984.

ADDRESS: Comments must be submitted in writing, in duplicate, to Lewis Lebakken, Jr., Information Resources Management Branch, Resources Management Division, Federal Grain Inspection Service, U.S. Department of Agriculture, Room 0667 South Building, 1400 Independence Avenue, SW., Washington, DC 20250. All comments received will be made available for public inspection at the above address during regular business hours (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT: Lewis Lebakken, Jr., telephone (202) 382-1738.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Department Regulation 1512-1; therefore, the Executive Order and Department Regulation do not apply to this action.

The February 1, 1984, issue of the **Federal Register** (49 FR 4019) contained a notice from the Federal Grain Inspection Service requesting applications for designation to perform official services under the U.S. Grain Standards Act, as amended (7 U.S.C. 71 *et seq.*) (Act), in the areas currently assigned to the official agencies. Applications were to be postmarked by March 2, 1984.

Georgia Department of Agriculture and Schneider Inspection Service, Inc., the only applicants for each respective designation, requested designation for the entire geographic area currently assigned to each of those agencies.

In accordance with § 800.206(b)(2) of the regulations under the Act, this notice provides interested persons the opportunity to present their comments concerning the applicants for designation. All comments must be submitted to the Information Resources Management Branch, Resources Management Division, specified in the address section of this notice, and postmarked not later than May 17, 1984.

Comments and other available information will be considered in making a final decision. Notice of the final decision will be published in the **Federal Register**, and the applicants will be informed of the decision in writing.

(Sec. 8, Pub. L. 94-582, 90 Stat. 2873 (7 U.S.C. 79))

Dated: March 23, 1984.

J. T. Abshier,

Director, Compliance Division.

BILLING CODE 3410-EN-M

Request for Designation Applicants To Perform Official Services in the Geographic Areas Currently Assigned to Oregon Department of Agriculture (OR) and Southern Illinois Grain Inspection Service, Inc. (IL)

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Notice.

SUMMARY: Pursuant to the provisions of the U.S. Grain Standards Act, as amended (Act), official agency designations shall terminate not later than triennially and may be renewed in accordance with the criteria and procedures prescribed in the Act. This notice announces that the designation of two agencies will terminate, in accordance with the Act, and requests applications from parties, including the agencies currently designated, interested in being designated as the official agency to conduct official services in the geographic area currently assigned to each specified agency. The official agencies are Oregon Department of Agriculture and Southern Illinois Grain Inspection Service, Inc.

DATE: Applications to be postmarked on or before May 2, 1984.

ADDRESS: Applications must be submitted to James R. Conrad, Chief, Regulatory Branch, Compliance Division, Federal Grain Inspection Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., Room 1647 South Building, Washington, DC 20250. All applications received will be made available for public inspection at the above address during regular business hours.

FOR FURTHER INFORMATION CONTACT: James R. Conrad, telephone (202) 447-8525.

SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12291 and Department Regulation 1512-1; therefore, the Executive Order and Department Regulation do not apply to this action.

Section 7(f)(1) of the Act (7 U.S.C. 71 *et seq.*, at 79(f)(1)) specifies that the Administrator of the Federal Grain Inspection Service (FGIS) is authorized, upon application by any qualified agency or person, to designate such agency or person to perform official services after a determination is made that the applicant is better able than any other applicant to provide official services in an assigned geographic area. Oregon Department of Agriculture (Oregon), Agriculture Building, Salem, OR 97310, was designated under the Act as an official agency for the performance of inspection functions on November 5, 1978. Southern Illinois Grain Inspection Service, Inc. (Southern Illinois), 5900 North Illinois Street, P.O. Box 3099, Fairview Heights, IL 62208, was designated under the Act as an official agency for the performance of inspection functions on August 10, 1981.

The agencies' designations will terminate on September 30, 1984. This date reflects administrative extensions of official agency designations, as discussed in the July 16, 1979, issue of the **Federal Register** (44 FR 41275). Section 7(g)(1) of the Act states generally that official agencies' designations shall terminate no later than triennially and may be renewed according to the criteria and procedures prescribed in the Act.

The geographic area presently assigned to Oregon, pursuant to Section 7(f)(2) of the Act, and which is the area that may be assigned to the applicant selected for designation, is the entire State of Oregon, except those export port locations within the State.

The geographic area presently assigned to Southern Illinois, in the State of Illinois, pursuant to Section 7(f)(2) of the Act, and which is the area that may be assigned to the applicant selected for designation, is the following:

Bounded on the North along a straight line from the junction of State Route 111 and the northern Macoupin County line southeast to the junction of Interstate 55 and State Route 16; State Route 16 east-

northeast to a point approximately 1 mile northeast of Irving; a straight line from this point to the northern Fayette County line; the northern Fayette, Effingham, and Cumberland County lines; the northern and eastern Jasper County lines south to State Route 33; State Route 33 east-southeast to U.S. Route 50; U.S. Route 50 east to the eastern Lawrence County line;

Bounded on the East by the eastern Lawrence, Wabash, Edwards, White, and Gallatin County lines;

Bounded on the South by the southern Gallatin, Saline, and Williamson County lines; the southern Jackson County line west to U.S. Route 51; U.S. Route 51 north to State Route 13; State Route 13 northwest to State Route 149; State Route 149 west to State Route 3; State Route 3 northwest to State Route 51; State Route 51 south to the Mississippi River; and

Bounded on the West by the Mississippi River north to Interstate 270; Interstate 270 east to Interstate 70; Interstate 70 east to State Route 4; State Route 4 north to Macoupin County; the southern and eastern Macoupin County lines.

The following location, outside of the foregoing contiguous geographic area, is presently assigned to Southern Illinois and is part of this geographic area assignment: Sigel Elevator Company, Inc., Sigel, Shelby County.

An exception to the described geographic area is the following location situated inside Southern Illinois' area which has been and will continue to be serviced by Springfield Grain Inspection Department: OK Grain Company, Litchfield, Montgomery County.

Interested parties, including Oregon and Southern Illinois, are hereby given opportunity to apply for designation as the official agency to perform the official services in the geographic areas, as specified above, under the provisions of Section 7(f) of the Act and section 800.196(b) of the regulations issued thereunder. Designations in the specified geographic areas are for the period beginning October 1, 1984, and ending September 30, 1987. Parties wishing to apply for designation should contact the Regulatory Branch, Compliance Division, at the address listed above for appropriate forms and information.

Applications submitted and other available information will be considered in determining which applicant will be designated to provide official services in a geographic area.

(Sec. 8, Pub. L. 94–582, 90 Stat. 2873 (7 U.S.C. 79))

Dated: March 23, 1984.

J. T. Abshier,

Director, Compliance Division.

[FR Doc. 84-8404 Filed 3-30-84; 8:45 am]

BILLING CODE 3410-EN-M

Rural Electrification Administration

Intent To Conduct Public Meetings and Prepare an Environment Assessment; Georgia

AGENCY: Rural Electrification Administration (REA), USDA.

ACTION: Notice of intent to conduct public meetings and prepare an environmental assessment (EA).

SUMMARY: REA intends to conduct public meetings and prepare an Environmental Assessment in connection with possible REA financing assistance to Oglethorpe Power Corporation (Oglethorpe), 2100 East Exchange Place, Tucker, Georgia 30085. The public meetings and EA will consider the environmental aspects of a proposed transmission line project between Woodstock and Alpharetta, with the preferred and alternate corridors located in Fulton, Cobb and Cherokee Counties. REA will conduct public meetings as follows:

Dates: May 1, 1984 and May 2, 1984.
Location: Milton High School, School Street, Alpharetta, Ga.
6:30 p.m. Registration to present verbal comments.
7:00 p.m. Public meeting.

ADDRESS: All interested parties are invited to submit written comments to REA prior to, at, or within 30 days after the public meetings, in order for the comments to be considered in the preparation of the EA. Comments should be sent to Mr. James A. Ruspi, Chief, Distribution and Transmission Engineering Branch, Southeast Area—Electric, Room 0262, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Mr. James Ruspi, at the above address, (202) 382–8436, or Mr. F. F. Stacy, Jr., Oglethorpe Power Corporation, 2100 East Exchange Place, Tucker, Georgia (404) 496–7600.

SUPPLEMENTARY INFORMATION: REA intends to hold public meetings and prepare an EA in connection with possible financing assistance to Oglethorpe for a transmission line from Woodstock to Alpharetta, Georgia. The proposes 230 kV transmission line would be approximately 14 miles long. Such a project is of the type for which REA normally prepares an EA. REA does not normally hold public meetings for proposed projects of this category, however, REA has become aware of public interest in the siting of the line and has decided that meetings should be held on the proposed Woodstock to Alpharetta line.

Oglethorpe has prepared a Borrower's Environmental Report which provides information on the environmental aspects of the proposed route, the route alternatives, and possible environmental effects. Copies of the BER are available for public review and comment at:

Woodstock Public Library, 15 North Main Street, Woodstock, Georgia 30188
Cobb County Public Library, 30 Atlanta Street, Marietta, Georgia 30060
Alpharetta Public Library, 15 Academy Street, Alpharetta, Georgia 30201

Also, a limited supply of BER's are available from Oglethorpe and REA at the addresses given above.

Based upon information in the BER and comments at the public meetings, as well as other comments and information, REA will prepare an EA on the proposed project. Alternatives to be considered by REA include, among other options:

(1) No action; (2) load management and energy conservation; and (3) alternative transmission line routes. After the EA has been prepared, a decision will be made on whether REA should prepare a Finding of No Significant Impact or an Environmental Impact Statement. Notice of this decision will be published in the **Federal Register.**

The public meetings, to be conducted by a representative of REA, will be held to solict public input and comments concerning, but not limited to, the nature of the proposed project, possible routes and alternatives, and any significant environmental issues and concerns that should be addressed in the EA. If numerous people wish to comment at these meetings, commenters may be asked to keep their comments brief so that everyone can be give an opportunity to speak. Potential commenters should consider this when preparing their statements. Written comments can be submitted at the meetings, or mailed to REA at the address given above.

REA's financing assistance to Oglethorpe will be subject to and is contingent upon reaching satisfactory conclusions with respet to the environmental effects of the proposed project. Final action will be taken only after the National Environmental Policy Act requirements have been met.

This program is listed in the Catalog of Federal Domestic Assistance as 10.850—Rural Electrification Loans and Loan Guarantees.

Dated: March 28, 1984.

Harold V. Hunter,

Administrator.

[FR Doc. 84-8709 Filed 3-30-84; 8:45 am]

BILLING CODE 3410-15-M

DEPARTMENT OF COMMERCE

National Bureau of Standards

National Voluntary Laboratory Accreditation Program

AGENCY: National Bureau of Standards, Commerce.

ACTION: Withdrawal of preliminary finding of need to accredit laboratories that test portable fire extinguishers.

SUMMARY: In a notice published in the **Federal Register** on October 5, 1983 (48 FR 45453–45455) the National Bureau of Standards (NBS) requested public comments on its preliminary finding that there is a need to accredit laboratories that test portable fire extinguishers. The comments received included two requests for an informal public hearing on the preliminary finding of need. In a notice published in the **Federal Register** on November 8, 1983 (48 FR 51353–51354) NBS announced a public hearing to be held on November 29, 1983. The majority of the testimony presented and the written comments received objected to the establishment of a laboratory accreditation program (LAP) which has led NBS to the conclusion that the preliminary finding of need should be withdrawn. Accordingly, NBS hereby announces the withdrawal of the Preliminary Finding of Need to Accredit Laboratories that Test Portable Fire Extinguishers.

FOR FURTHER INFORMATION CONTACT: John W. Locke, Manager, Laboratory Accreditation, National Bureau of Standards, TECH B141, Washington, D.C. 20234, (303) 921–3431.

SUPPLEMENTARY INFORMATION:

Background: On October 5, 1983, the National Bureau of Standards published in the **Federal Register** (48 FR 45453–45455) for public comment a request from Dennis R. Dewar, Director, Division of the State Fire Marshal, Tallahassee, Florida, under the provisions of 15 CFR Part 7a, to establish a Laboratory Accreditation Program (LAP) for laboratories that test portable fire extinguishers and invited public comments over a 60-day period. That notice also established a 15-day period, to request an informal public hearing. Two requests for a hearing were received, one a letter dated October 14, 1983, from John H. Addington of the Fire Equipment Manufacturers' Association, Inc., the other a letter dated October 17, 1983, from Mr. G. T. Castino of Underwriters Laboratories, Inc. (UL). A total of five written statements were filed in response to the preliminary finding of need. The written statements and a copy of the oral testimony presented at the hearing are available for inspection and copying at the Department of Commerce (DOC) Central Reference and Records Inspection Facility (CRRIF), Room 6628, Herbert C. Hoover Building (HCHB), 14th Street between E Street and Constitution Avenue, N.W., Washington, D.C. 20234.

These written comments and the testimony given at the hearing have been analyzed and considered. The result of this analysis is a document entitled, "Summary and Analysis of Comments on the Preliminary Finding of Need to Accredit Laboratories that test Portable Fire Extinguishers". That document, which lists the members of the public who provided written comments, is also available for inspection and copying at CRRIF mentioned above.

Summary of Comments. Four respondents objected to the establishment of the LAP.

Only one respondent favored the establishment of a LAP for portable fire extinguishers indicating that in his view fire marshals, purchasing authorities, manufacturers and testing laboratories, as well as the general public, would benefit from having more listing and labeling services available for portable fire extinguishers.

One respondent objected to the use of the UL standards claiming that they are not "nationally accepted standards," but the property of UL which are not arrived at through input of all interested parties. He indicated that he would be pleased to reconsider his position on the proposed LAP when national standards are referenced.

Another respondent stated that there is a lack of a demonstrated need for a LAP, that a LAP cannot be practically and effectively implemented for these products, and that a LAP could be counterproductive from a safety standpoint.

Another respondent objected to the establishment of a LAP to accredit laboratories that merely test but do not certify the safety of portable fire extinguishers.

Another respondent acknowledged the need for a set of standards that are nationally acceptable, but felt that the interest and needs of the requestor of the LAP would be best met by relying on ANSI to adopt UL standards which would negate the need for a LAP.

Further details and analysis of the responses are summarized in the above referenced summary and analysis document.

The respondent who favored the LAP did not provide supporting testimony as to the benefit from or need for the LAP.

Conclusion. Based upon the comments and analysis set out above, NBS hereby announces the withdrawal of the preliminary finding of need to accredit laboratories that test portable fire extinguishers.

Dated: March 27, 1984.

Ernest Ambler,

Director, National Bureau of Standards.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcing Import Limits for Certain Cotton and Man-Made Fiber Textile Products From the Federative Republic of Brazil, Effective April 1, 1984

March 28, 1984.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on April 2, 1984. For further information contact Diana Bass, International Trade Specialist (202) 377–4212.

Background

The Bilateral Cotton and Man-Made Fiber Textile Agreement of March 31, 1982, as amended, between the Governments of the United States and the Federative Republic of Brazil establishes an aggregate and group limits and within those limits specific limits for Categories 300/301, 313, 317, 319, 338/339, 347/348, 350, 361, 363, 369pt. and 604, among others, during the agreement year which begins on April 1, 1984. It also provides consultation levels for certain other categories, such as Categories 314, 320, and 614, which are not subject to specific limits and which may be adjusted during the agreement year. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs, in accordance with the terms of the bilateral agreement, to prohibit entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 300/301, 313, 314, 317, 319, 320, 338/339, 347/348, 350, 361, 363, 369pt, 604, and 614, produced or manufactured in Brazil and exported during the twelve-month period which begins on April 1, 1984 and extends through March 31, 1985, in excess of the designated levels of restraint.

The limit for Category 300/301 has been adjusted to deduct carryforward used during the previous agreement year which began on April 1, 1983.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924) and December 14, 1983 (48 FR 55607), and December 30, 1983 (48 FR 57584).

This letter and the action taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton and Man-Made Fiber Textile Agreement of March 31, 1982, as amended, between the Governments of the United States and the Federative Republic of Brazil; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on April 2, 1984, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 300/301, 313, 314, 317, 319, 320, 338/339, 347/348, 350, 361, 363, 369 pt.[1] 604, and 614, produced or manufactured in Brazil and exported during the twelve-month period beginning on April 1, 1984 and extending through March 31, 1985, in excess of the following levels:

Category	12-mo. level
300/301	7,465,218 lbs.
313	28,050,060 sq. yds.
314	1,500,000 sq. yds.
317	10,418,590 sq. yds.
319	8,014,300 sq. yds.
320	4,000,000 sq. yds.
338/339	416,111 doz.
347/348	300,562 doz.
350	48,255 doz.
361	290,323 nos.
363	11,556,000 nos.
369 pt.[1]	1,356,955 lbs.
604	354,931 lbs.
614	3,000,000 sq. yds.

[1] In category 369, all T.S.U.S.A. numbers except 360.2000, 360.2500, 360.3000, 360.7800, 360.8100, 361.0515, 361.1820 361.5000, 361.5420, and 361.5630.

In carrying out this directive, entries of textile products in the foregoing categories, produced or manufactured in Brazil, which have been exported to the United States on and after April 1, 1983, shall to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during the twelve-month period which began on April 1, 1983 and extends through March 31, 1984. In the event the levels of restraint established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The levels set forth above are subject to adjustment pursuant to the provisions of the bilateral agreement of March 31, 1982 between the Governments of the United States and the Federative Republic of Brazil which provide, in part, that: (1) within the aggregate and group limits, specific limits may be exceeded by designated percentages; (2) specific ceilings may be increased by carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate future adjustments under the foregoing provisions of the bilateral agreement will be made to you by letter.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924) and December 14, 1983 (48 FR 55607), and December 30, 1983 (48 FR 57584).

The actions taken with respect to the Government of the Federative Republic of Brazil and with respect to imports of cotton and man-made fiber textile products from Brazil have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 84–8707 Filed 3–30–84; 8:45 am]

BILLING CODE 3510–DR–M

Announcing New Tariff Schedule Numbers To Provide for the Proper Category Placement of Parts of Certain Garments

March 28, 1984.

On March 20, 1984 (49 FR 10325) the Chairman of the Committee for the Implementation of Textile Agreements (CITA) announced the creation of new Tariff Schedule of the United States, Annotated, (T.S.U.S.A.) numbers to provide for the proper category placement of parts of certain garments. These T.S.U.S.A. numbers will appear in the April 1, 1984 supplement to the T.S.U.S.A. In the letter published below the Chairman for the Committee for the Implementation of Textile Agreements directs the Commissioner to Customs to begin implementation of the new Tariff Schedule numbers for parts of certain garments for goods imported for consumption, withdrawn from warehouse for consumption, or entered into warehouse on or after July 1, 1984.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on

December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), and December 30, 1983 (48 FR 57584). A description of the new T.S.U.S.A. numbers and the categories to which thay are assigned also follows this notice.

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

March 28, 1984

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: To facilitate implementation of the United States' 28 bilateral textile and apparel agreements, I request that you begin implementation of the Tariff Schedule of the United States, Annotated (T.S.U.S.A.) numbers listed below for parts of certain garments for imports entered for consumption, withdrawn from warehouse for consumption, or entered into warehouse on or after July 1, 1984. These T.S.U.S.A. numbers will appear in the April 1, 1984 supplement to the Tariff Schedules.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

T.S.U.S.A.	Description	Textile category
	Cotton, Men's and Boy's, Ornamented	
379.0420	Parts of sweaters, knit	345
379.0425	Parts of shirts, knit	338
379.0430	Other parts of garments, knit	359
379.0642	Parts of shirts, not knit	340
379.0646	Parts of trousers, slacks and shorts, not knit	347
379.0650	Parts of other garments, knit	359
	Wool, Men's and Boys', Ornamented	
379.1535	Parts of sweaters, knit	445
379.1540	Parts of other garments, knit	459

BILLING CODE 3510-DR-M

Establishing Import Limits for Certain Cotton and Man-Made Fiber Textiles and Textile Products Exported From Indonesia

March 28, 1984.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on April 3, 1984. For further information contact Diana Bass, International Trade Specialist (202) 377–4212.

Background

On March 7, 1984 a notice was published in the **Federal Register** (49 FR 8472) which established import restraint limits for cotton gloves and mittens in Category 331, women's, girls' and infants' woven blouses in Category 341, and other yarn, wholly on non-continuous filament in Catetory 604, produced or manufactured in Indonesia and exported during the ninety-day periods which began on December 29, 1983 and extends through March 27, 1984 in the case of Categories 331 and 604 and December 30, 1983 through March 28, 1984 in the case of category 341, pursuant to a newly agreed consultation provision under the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of October 13 and November 9, 1982, as amended. The notice also stated the Government of the Republic of Indonesia is obligated under the bilateral agreement, if no mutually satisfactory solution is reached on a level for these categories during consultations, to limit its exports during the periods which began on December 29 and 30, 1983 and extend through June 30, 1984 to following limits:

Category	Prorated limit	Restraint period
331	146,837 doz.	Dec. 29, 1983–June 30, 1984.
341	141,261 doz.	Dec. 30, 1983–June 30, 1984.
604	286,492 lbs.	Dec. 29, 1983–June 30, 1984

The notice also stated that merchandise in the indicated categories which is in excess of the ninety-day limits, if it is allowed to enter, may be charged to the prorated limits.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 14, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924) and December 14, 1983 (48 FR 55607), and December 30, 1983 (48 FR 57584).

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

March 28, 1984.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (U.S.C. 1854); pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of October 13 and November 9, 1982, as amended, between the Governments of the United States and the Republic of Indonesia and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on April 3, 1984, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products

in Categories 331, 341 and 604, produced or manufactured in Indonesia and exported during the indicated periods, in excess of the following restraint limits:

Category	[illegible] limit [1]		Restraint period
[illegible]	148,837 [illegible]	Dec. 29,	1983–June 30, 1984
341	141,261 [illegible]	Dec. 30,	1983–June 30, 1984.
[illegible]	[illegible] lbs	Dec. 29,	1983–June 30, 1984.

[1] The limits have not been adjusted to reflect any exports exported after December 29, 1983 (Cat. 341), and after December 28, 1983 (Cats. 331 and 604).

Textile products in Categories 331, 341 and 604 which have been exported to the United States during the ninety-day periods which began on December 29 and 30, 1983 and extended through March 27 and 28, 1984 shall be subject to this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924) and December 14, 1983 (48 FR 55607), and December 30, 1983 (48 FR 57584).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Indonesia and with respect to imports of cotton and man-made fiber textiles and textile products from Indonesia have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on Defense Data Network (Defensive Systems Subgroup); Advisory Committee Meeting

The Defensive Systems Subgroup of the Defense Science Board Task Force on Defense Data network will meet in closed session on 24–25 April 1984 in Washington, D.C.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meeting on 24–25 April 1984 the Task Force will discuss the application of technology to systems designed to improve future U.S. air defense capabilities.

In accordance with Section 10(d) of the Federal Advisory Committee Act, Pub. L. 92–463, as amended (5 U.S.C. App. I, (1976)), it has been determined that this DSB Task Force meeting, concerns matters listed in 5 U.S.C. 552(b)(1) (1976), and that accordingly this meeting will be closed to the public.

March 28, 1984.

DEPARTMENT OF ENERGY

Office of Energy Research

Energy Research Advisory Board; Light Water Reactor R&D Panel; Open Meeting

Notice is hereby given of the following meeting:

Name: Light Water Reactor R&D Panel of the Energy Research Advisory Board (ERAB)

Date and time: May 1–2, 1984 from 9 a.m. to 5 p.m.

Place: U.S. Department of Energy, 1000 Independence Avenue, SW., Room 8E–089, Washington, DC 20585

Contact: Charles E. Cathey, U.S. Department of Energy, Office of Energy Research (ER–6), 1000 Independence Avenue, SW., Washington, DC 20585, Telephone: 202/252–5444

Purpose of the parent board: To advise the Department of Energy on the overall research and development conducted in DOE and to provide long-range guidance in these areas to the Department.

Tentative agenda:

Discuss the first draft of a report on Light Water Reactor R&D

Public Comment (10 minute rule)

Public participation: The meeting is open to the public. Written statements may be filed with the Panel either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Charles E. Cathey at the address or telephone number listed above. Requests must be received 5 days prior to the meeting and reasonable provision will be made to include the presentation on the agenda. The Chairperson of the Panel is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Transcripts: Available for public review and copying at the Freedom of Information Public Reading Room, 1E–190, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. between 8 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, D.C. on March 27, 1984.

J. Ronald Young,

Director of Management.

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket No. TA84–1–20–004]

Algonquin Gas Transmission Co.; Rate Reduction Filing Under Rate Schedule S–IS

March 28, 1984.

Take notice that Algonquin Gas Transmission Company ("Algonquin Gas") on March 23, 1984 tendered for filing three tariff sheets to its FERC Gas Tariff, Second Revised Volume No. 1, as follows:

Substitute Third Revised Sheet No. 213
Substitute Fourth Revised Sheet No. 213
Fifth Revised Sheet No. 213.

Algonquin Gas states that Substitute Third Revised Sheet No. 213 and Substitute Fourth Revised Sheet No. 213, proposed to be effective January 1, 1984 and February 1, 1984 respectively, are being filed to include in Algonquin Gas' Rate Schedule S–IS Payment for Inventory Sale Gas a decrease in Consolidated Gas Supply Corporation's ("Consolidated") underlying Rate Schedule E. Fifth Revised Sheet No. 213, proposed to be effective March 1, 1984 is being filed to reflect in Algonquin Gas' Rate Schedule S–IS Payment for Inventory Sale Gas, a subsequent decrease by Consolidated in its Rate Schedule E.

Algonquin Gas requests the Commission accept the above-mentioned tariff sheets to be effective as proposed.

Algonquin Gas also requests that the Commission grant such special permission as may be necessary to allow Algonquin Gas to provide a credit if necessary on the next month's billing subsequent to acceptance by the Commission of the tariff sheets filed hereunder in order to effectuate the result of the proposed effective dates.

Algonquin Gas notes that a copy of this filing is being served upon each affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 11, 1984. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717–01–M

[Docket No. TA84–1–20–005]

Algonquin Gas Transmission Co. Rate Change Pursuant to Purchased Gas Cost Adjustment Provision

March 28, 1984.

Take notice that Algonquin Gas Transmission Company ("Algonquin Gas") on March 23, 1984 tendered for filing Substitute Fourth Revised Sheet No. 201 to its FERC Gas Tariff, Second Revised Volume No. 1.

Algonquin Gas states that Substitute Fourth Revised Sheet No. 201 is being filed pursuant to Algonquin Gas' Purchased Gas Cost Adjustment as set forth in Section 17 of the General Terms and Conditions of its FERC Gas Tariff, Second Revised Volume No. 1. Such tariff sheet is being filed to track revised rates filed by its pipeline supplier, Texas Eastern Transmission Corporation, pursuant to Commission's order issued January 31, 1984 in Docket No. TA84–1–17–001.

Algonquin Gas proposes the effective date of Substitute Fourth Revised Sheet No. 201 to be March 1, 1984.

Algonquin Gas request permission to credit the subsequent month's bill following Commission acceptance to

effectuate such rate change as of March 1, 1984, in the event Algonquin Gas does not receive approval in time for the April 7, 1984 billing of March, 1984 sales.

Algonquin Gas notes that a copy of this filing is being served upon each affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Steet, N.E., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 11, 1984. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. CP84-282-000]

ANR Pipeline Co.; Request Under Blanket Authorization

March 28, 1984.

Take notice that on March 5, 1984, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, filed in Docket No. CP84-282-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that ANR proposes to undertake a transportation service for 3M Corporation (3M), an eligible end-user, under authorization issued in Docket No. CP82-480-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

ANR states that the transportation service would be provided pursuant to a transportation agreement (Agreement) between ANR and Northern Natural Gas Company, a Division of InterNorth, Inc. (Northern), dated November 7, 1983, as amended January 18, 1984, wherein Northern acts as agent for various end-users, including 3M. ANR is advised that Northern, as agent for 3M, has entered into a gas purchase contract dated August 18, 1983, with Colony Natural Gas Corporation and Reliancy Pipeline Company for the purchase of natural gas. It is explained that to effectuate delivery of the purchased volumes, ANR on January 10, 1984, commenced transportation services on behalf of 3M for an initial automatic period of 120 days and subject to Commission authority, has agreed to provide transportation services through June 30, 1985. It is stated that pursuant to the Agreement ANR would take receipt of up to 7,000 dt equivalent of gas per day which 3M, through its agent, Northern, would cause Oklahoma Natural Gas Company (ONG) to render to ANR at the point of interconnection of the pipeline systems of ANR and ONG in Custer County, Oklahoma, and ANR would transport and deliver equivalent volumes to Northern for 3M's account at an existing point of interconnection of the pipeline systems of Northern and ANR near Greensburg, Kansas. ANR is advised that Northern and Northern States Power Company (NSP) would provide additional transportation for, or on behalf of, 3M.

ANR estimates peak day and average day transportation volumes of 7 and 4.5 billion respectively, and annual volumes of 1,219,500 million Btu. ANR advises that NSP has indicated NSP has sufficient capacity to perform the transportation service without detriment to its other customers. ANR also indicates that no facilities need be constructed to provide the transportation service. ANR also has submitted an affadavit from 3M indicating that the gas would be used at its St. Paul, Minnesota, plant for boiler fuel.

ANR proposes to charge 3M 16.5¢ per dt for all gas transported and delivered to Northern for 3M's account after February 11, 1984, the date ANR's Rate Schedule EUT-1 went into effect.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules and (18 CFR 385.214) a motion to intervene or notice of intervention pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. QF84-207-000]

Albert D. Klain; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

March 28, 1984.

On March 9, 1984, Albert E. Klain; (Applicant), of Turtle Lake; North Dakota 58575, submitted for filing an application for certification of a facility as a qualifying facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The 10 kilowatt wind facility will be located in McLean County, North Dakota.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary

[FR Doc. 84-8736 Filed 3-30-84; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 4945-001]

City of Ukiah, California; Surrender of Preliminary Permit

March 27, 1984.

Take notice that City of Ukiah, California, Permittee for the proposed Eden Creek Hydroelectric Project, has requested that its preliminary permit be terminated. The preliminary permit was issued on March 21, 1983, and would have expired September 30, 1984. The project would have been located on

Eden Creek in Mendocino County, California.

The Permittee filed its request on February 13, 1984, and the surrender of the preliminary permit for Project No. 4945 is deemed accepted as of February 13, 1984, and effective 30 days after the date of this notice.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 84-8740 Filed 3-30-84; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. TA84-2-44-000]

Commercial Pipeline Co., Inc.; PGA Filing

March 28, 1984.

Take notice that on March 22, 1984, Commercial Pipeline Co., Inc. ("Commercial") tendered for filing its 44th Revised Sheet No. 3A, superseding Second Amended 43rd Revised Sheet No. 3A reflecting Purchased Gas Adjustments and effective dates as set forth below.

Sheet No.	Current adjustment	Cummulative adjustment	Surcharge adjustment	Total rate
44th Revised Sheet No. 3A.	(base) $.5139. (excess) .5295.	$.5432	$.4091	$5.5092
		.6589	.4091	5.6334

The effective date of Commercial's filing is April 23, 1984.

Commercial states that this filing reflects adjustments in its purchased gas cost to provide for the tracking of a corresponding PGA adjustment by Commercial's role supplier, Northwest Central Pipeline Corporation. The filing also reflects surcharge adjustments in accordance with Commercial's PGA.

Copies of the filings were served on Commercial's FERC jurisdictional customers, the Kansas Corporation Commission and the Missouri Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Steet, N.E., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before April 6, 1984. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. QF84-200-000]

Delta Energy Project—Phase IV; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

March 28, 1984.

On March 5, 1984, Delta Energy Project—Phase IV (Applicant), of 177 Bovet Road, Suite 520, San Mateo, California 94402, submitted for filing an application for certification of a facility as a qualifying facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The windpark facility is designed to provide up to 7.875 megawatts of power and will be located in the Altamont Pass area near Tracy, California.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capital Street NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protest will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER84-325-000]

Enerex; Filing

March 28, 1984.

The filing Company submits the following:

Take notice that on March 19, 1984, Enerex, a partnership, tendered for filing (as the authorized representative of the five public utilities named below) an Interchange Agreement (Agreement) between Iowa Electric Light and Power Company, Iowa-Illinois Gas and Electric Company, Iowa Power and Light Company, Iowa Public Service Company, and Iowa Southern Utilities Company, dated as of January 1, 1984, with schedules using existing and new rates for wholesale energy transactions between the above-named parties and existing rates for wholesale energy transactions between the above-named parties and other utility companies.

Enerex states that the Agreement (and its service schedules) uses existing rates and in certain transactions between the parties uses of new rates. The principal purpose of the Agreement is to facilitate energy transactions between the parties so that they may operate their generating facilities as one control area so as to utilize the lowest cost energy for the group.

Enerex proposes an effective date of March 19, 1984, and therefore requests waiver of the Commission's notice requirements.

According to Enerex copies of this filing have been served upon the five utility companies named above, the Iowa State Commerce Commission, the Illinois Commerce Commission, and the South Dakota Public Utilities Commission.
